PUBLISHED WEEKLY BY

THE BRADSTREET COMPANY,

NOS. 346 AND 348 BROADWAY, NEW YORK.

Berlin, 23 Charlotten-Strasse.
London, 137 Cheapside, E. C.
Melbourne, 231 Flinders Lane.
Paris, 20 Boulevard Montmartre.

TERMS: $5.00 PER YEAR IN ADVANCE.

Remit by Express Money Order, Draft, P. O. Order or Registered Letter.

Communications regarding editorial matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, JANUARY 5, 1907.

While the old year did not come to an end without whisperings of pending financial troubles growing out of the continued high rates for money and the enormous shrinkage of values for certain inflated stocks, Wall street met with no disturbing incidents of that kind. In fact, the January 1 disbursements and the shifting of balances which they involve passed off without mishap, and, as might be expected, the money market has developed a better and easier tone, this being particularly true as regards time loans, which are again being offered with considerable freedom. Money is also coming back from the interior to a certain extent, and there is a general impression that the loan market has seen the worst and may tend to ease still further in the ensuing weeks. At the same time conservative financial authorities do not seem inclined to accept the theory that the New York loan market is likely to exhibit a prevalence of extremely low rates in the early part of 1907. The foreign financial situation cannot be left out of account in this connection, and it is considered rather significant that the rates for demand sterling have advanced sharply, leading, in fact, to some discussion as to whether this country might not be called on ere long to supply some gold to Europe. With the maintenance of relatively high money rates here, the danger of any such developments would seem, however, to be remote, and any apparent disposition on the part of the foreign markets to secure gold from the United States would undoubtedly be checked by a renewal of dear money on this side of the ocean.

On January 1 the pure food and drugs law went into effect. One of the main purposes of this law is to insure the labeling of food products put up in packages in such a way that the consumer will not be deceived as to the nature or the composition of the products. It is required, for example, that distinctive names shall give no false indications of origin, character or place of manufacture, and imitations through the use of colors or flavors are forbidden. The requirements of the act as to labels will not be completely enforced until October 1 next, but labels now on hand may be used where they are made to conform to the provisions of the act by supplemental labels or pasters. The Department of Agriculture has not yet at its command the necessary force to carry out the provisions of the law, but it is expected that with the assistance of the Civil Service Commission a sufficient corps of chemists and inspectors will be provided in the course of the next month or two.

Advices from Cuba for some time past have been of a rather mixed character. Much of the information coming from the island a month or more ago was of a discouraging nature, seeming to point to unsettled conditions and to the unlikelihood of order being eventually secured without the continued intervention of the United States. Secretary Taft made public on Saturday last a statement containing passages from public and private correspondence going to show that the earlier information was misleading. In a passage quoted from a letter from Governor Magoun, the latter said that the situation was full of hopefulness and that the continued tranquillity of the island was as satisfactory as anything could be in Cuba. In a reply to an address by the Diplomatic Corps at Havana on New Year's Day, he declared that everywhere in the island there were evidences that passion and prejudice were passing away, that reason and judgment were taking their places, and that peace and prosperity had returned. To all appearance the administration is hopeful of the outcome in Cuba, whatever may have been the discouragements it has had to face thus far.

Within the week two federal judges have held the employers' liability act passed by Congress in June last unconstitutional. In one of the decisions rendered, the first in which the law was construed, Judge Evans, of the United States Circuit Court for the Western District of Kentucky, held that the act would regulate commerce within the state, and was therefore unconstitutional. He said that the act only created and imposed a liability upon certain common carriers to their employees and in no way prescribed rules for carrying on traffic or commerce among the states. In another case decided the day after that to which reference has just been made, Judge McCall, of the Federal Court at Memphis, held the act unconstitutional, declaring himself unable to bring his mind to the conclusion that the liability of a common carrier to its employee for injuries was interstate commerce or commerce of any character within the meaning of the commerce clause of the Constitution.

It is to be noticed, of course, that the decisions noted above are those of subordinate federal tribunals. In view of the importance of the point involved in both and of the interest taken in the legislation by the President, it is not to be supposed that the matter will be left to rest with the pronouncements of the courts just referred to. On the contrary, it is announced that appeals will be taken from those decisions and that the Attorney-General will endeavor to have the cases brought before the Supreme Court at as early a date as possible. It is known that while the government was not directly interested as a party in either of the cases, an Assistant Attorney-General made an argument in each of them, under permission of the court, directing his attention solely to the constitutional question involved.

There was an increase of over $14,800,000 in the amount of money in circulation during December, the most notable individual increases being one of over $6,600,000 in gold coin and one of over $7,400,000 in gold certificates. As compared with January 1 last year there was on the first day of this month an increase of over $212,300,000. The most notable individual change was an increase of over $99,400,000 in gold certificates. Likewise noteworthy were increases of over $57,800,000 in national bank notes and over $38,400,000 in gold coin. The total volume of money in circulation on January 1 was $2,883,900,328. On the basis of a population estimated by the Treasury experts at 85,367,000, this represents a per capita circulation of $33.78, an increase of 13 cents as compared with the preceding month, and of $1.96 as compared with the corresponding date a year ago.

Thus far, seemingly, no date has been fixed for the meeting of the next Hague Peace Conference. For some time Great Britain has been endeavoring to induce the Czar to fix a date, but, as it appears, without success. Early in the fall the suggestion was communicated to the St. Petersburg government that May would be a convenient month for the conference, but no reply to this suggestion has yet been received. Great Britain will be strongly represented at the conference, for its delegates will include a cabinet minister—possibly, as has been suggested, the Premier—and the new ambassador to Washington, Mr. James Bryce. The delay on the part of Russia in fixing a date may be due in part, at least, to the disturbed condition of domestic affairs, a fresh outbreak of terrorism seeming to have occurred in the last few weeks.

Monday witnessed the formal signing of the Algeciras Convention at Madrid in the presence of the representatives of all the nations taking part in the conference. The document was signed by the United States delegates with reservations at Algeciras, and the ratification at Madrid was also made by them under reserve, the American representatives declaring that their government did not accept the obligation of responsibility with regard to the measures necessary to carry out the provisions of the protocol. The situation in Morocco seems to have improved considerably in the last couple of weeks. Raisuli, the insurgent chief, who for so long carried matters with a high hand, has had his power shaken, and it is now believed that he is being deserted by most of those who helped to make him formidable. It is expected that the policing of the Moroccan ports by France and Spain will be begun at once.

It is somewhat singular that almost upon the heels of the plea for aid for the Chinese suffering from famine, an appeal addressed in a particular way to the United States, comes the news of a revival of the so-called boycott against American goods in China. At a meeting recently held at Canton it was resolved to revive a boycott against American goods, to prevent newspapers from advertising American manufactures, to dissuade laborers from going to Panama, and to petition the government to negotiate with the United States for a modification of the exclusion law. The authorities at Washington appear to think that this new agitation is purely local, but the advices which come from Peking seem to indicate that the movement is spreading over China.

A large share of the attention of the world last year was directed to Russia, where the experiment was being tried of introducing a constitutional régime in a country in which an autocratic system had been traditional. For the time at least, as we know, the experiment failed, though the project has not been wholly abandoned. Conditions at present cannot be said to be particularly favorable for the retrial of the constitutional plan. A number of recent assassinations bear testimony to the activity of the extreme elements among the revolutionary party. The assassinations of Count Ignatieff, of General Litvinoff, and finally of General Von der Launitz, the Prefect of Police of St. Petersburg, are taken as indicating that an organized system of terrorism has been inaugurated, to meet which all the resources of the government will be required.

106464

FEWEST FAILURES IN TWENTY-THREE YEARS.

There were 9,384 failures reported to BRADSTREET'S for the full calendar year 1906, a decrease of 5.9 per cent. from last year, of 2.5 per cent. from 1899, and to this extent the smallest total of failures reported in any year by BRADSTREET'S since 1882. Liabilities, swelled largely by a few bank suspensions, due not to structural weakness in that line, but mainly to isolated dishonest practices, aggregated $123,827,957, an increase of 1.6 per cent. over 1905. Only three of the past ten years showed smaller liabilities than did 1906, and the percentage of assets to liabilities is only 49.9, the smallest proportion in five years. In addition, it is to be noted that, despite a very large increase in the number of those in business, and presumably, therefore, a heavily increased possibility of friction, the annual commercial death rate for 1906 was the lowest recorded since 1880. All of these features combine to show that 1906 was a very prosperous year, the like of which, as regards failures, has certainly not been seen for nearly a generation past.

Following will be found BRADSTREET'S record of failures yearly since 1881, with particulars as to assets and liabilities:

	No failures	*Per ct. inc. or dec.*	*Actual assets*	*Total liabils*	*P c. assets to liabils*
1906	9,384	—5.9	61.6	123.8	49.9
1905	9,970	—4 3	65.2	121.7	53.5
1904	10,422	+6.7	75.9	143.3	53.1
1903	9,768	—2.0	84.0	154.2	54.5
1902	9,971	—6.4	50.8	105.7	48.0
1901	10,657	+7.5	61.1	129.9	46.9
1900	9,913	+2.8	60.1	127.1	47.2
1899	9,634	—17.3	60.2	119.7	51.8
1898	11,638	—11.2	72.9	141.1	52.1
1897	13,099	—13.3	85.6	156.1	54.4
1896	15,112	+16.1	148.2	247.0	59.9
1895	13,013	+2.2	88.1	158.8	55.4
1894	12,721	—18.3	79.7	149.5	53.0
1893	15,560	+51.5	262.4	402.4	65.0
1892	10,270	—17.1	54.7	108.5	50.
1891	12,394	+16.2	102.8	193.1	53.0
1890	10,673	—9.0	92.7	175.0	53.0
1889	11,719	+10.7	70.5	140.7	50.0
1888	10,587	+9.7	61.9	120.2	52.0
1887	9,740	—7.8	64.6	130.6	50.0
1886	10,568	—4.9	55.8	113 6	49.0
1885	11,116	—4⅓	55.2	119.1	46.0
1884	11,620	+13.0	134.6	248.7	54.0
1883	10,299	+34.0	90 8	175.9	52.0
1882	7,635	+28.0	47.4	93.2	51.0
1881	5,929	....	35.9	76 0	47.0

Some irregularity is observable in the quarterly returns of failures and liabilities during the year. Thus, while the number of failures fell off from the corresponding periods of 1905, the liabilities in the first and third quarters showed increases. This was due to the few large bank failures mentioned above, which swelled the liabilities above the 1905 totals. In the first quarter of 1906 the failures decreased 5 per cent. in number, while the liabilities increased 20 per cent., largely owing to a private banking failure in Ohio. In the second quarter failures decreased 10 per cent. in number, and liabilities fell off 28 per cent. In the third quarter the failures again decreased by 8 per cent., but the liabilities increased by 21 per cent., owing to the occurrence of a trust-company failure in Pennsylvania and a state-bank failure in Illinois. In the fourth quarter failures fell off about 1 per cent., while liabilities were about even with a year ago, owing to two more bank suspensions, one of a private firm in New York and the other of a national bank in Pennsylvania.

In connection with this matter of banks, it might be well to note that five of these bank or trust-company suspensions account for nearly $20,000,000 of the entire liabilities, or about one-sixth. Other banking and financial suspensions of large size go to swell this total further, so that about $24,000,000 of the $123,827,957 of liabilities, or about one-fifth, was due to failures of this kind. Including these, there were in 1906 155 failures in which the liabilities exceeded $100,000 each, contributing a total of $55,000,000, or 44 per cent. of all liabilities. In 1905 there were 147 such failures, furnishing $50,000,000, or 40 per cent. of all liabilities, and in 1904 there were 225 such failures, contributing $70,000,000, or 49 per cent. of all liabilities. August had the heaviest liabilities of the year, while those of September were the smallest, the former month's liabilities being swelled by the occurrence of two of the large failures heretofore mentioned.

The returns by groups of states show very slight increases in number, only about 1 per cent. in each case in the middle and western states and in the territories. The failures in the far-western and New England group fell off 15 per cent., while those in the northwest decreased 11 per cent., and those in the south decreased 10 per cent. In liabilities the middle group showed an increase of 31 per cent. and the western group an increase of 8 per cent., due to the bank failures mentioned, while the liabilities of the other groups fell off from 15 to 30 per cent., accordingly as the various sections are considered. The states showing the largest liabilities and heaviest increases over the year before are New York, Pennsylvania and Illinois, while Massachusetts, Ohio, Wisconsin, South Carolina, Tennessee and Kansas show notable decreases.

What has in the course of years grown to be known as BRADSTREET'S business mortality table is shown in the following:

	Number in business	*Number failing*	*Per ct. failing*
1906	1,401,985	9,384	.66
1905	1,352,947	9,970	.73
1904	1,308,000	10,422	.80
1903	1,273,000	9,768	.76
1902	1,238,973	9,971	.80
1901	1,207,898	10,657	.88
1900	1,161,000	9,913	.85
1899	1,125,000	9,634	.85
1898	1,093,000	11,638	1.05
1897	1,086,000	13,099	1.20
1896	1,080,000	15,112	1.40
1895	1,054,000	13,012	1.23
1894	1,047,000	12,721	1.21
1893	1,050,000	15,560	1.50
1892	1,035,000	10,270	1.00
1891	1,010,000	12,394	1.22
1890	989,000	10,673	1.07
1889	978,000	11,719	1.20
1888	955,000	10,587	1.10
1887	933,000	9,740	1.04
1886	920,000	10,568	1.15
1885	890,000	11,116	1.25
1884	875,000	11,600	1.32
1883	855,000	10,299	1.20
1882	820,000	7,635	.93
1881	780,000	5,929	.76
1880	733,000	4,350	.60
1879	703,000	6,652	.94

The above table shows that of the 1,401,985 persons in business in the United States in 1906 (a gain of 3.6 per cent. over 1905), only 9,384 failed, a proportion of but 66 hundredths of 1 per cent., as against 73 hundredths in 1905, 80 hundredths in 1904, 1.40 per cent. in 1896 and 1.50 per cent. in 1893. This is really in some respects the most striking exhibit of the entire report, because, compared with the returns of other prosperous years, it seems to point to a permanently lower commercial mortality, in this respect coinciding with the ascertained facts regarding the vital

NUMBER OF BUSINESS EMBARRASSMENTS, UNITED STATES, CANADA AND NEWFOUNDLAND, FOR TWO YEARS, WITH ASSETS AND LIABILITIES.

statistics of the country, which show that with improved sanitary conditions and the advance of medical knowledge, the death rate among human beings has also decreased.

It might be well to state, as frequently in the past, that these statistics are what they purport to be and nothing else. The guiding idea in the drafting of the definition of a commercial failure is that there must be some loss to creditors of individuals, firms or corporations engaged in legitimate mercantile occupations. Under this classification, failures of professional men (such as physicians, lawyers and actors), farmers, stockbrokers, real-estate dealers, bucket shops, and old bankruptcies passing through the courts, have no place. Any or all of the above may be, and in fact are, dissociated from the recognized and legitimate commercial life of the country and should not be, and have not been, included in BRADSTREET'S failure statistics. Comparison of the commercial failure reports made up by BRADSTREET'S with those issued by other concerns cannot, therefore, be properly made.

The Canadian failure record for twenty-seven years past follows:

	Number	*Assets*	*Liabilities*
1906	1,232	$4,258,310	$9,540,915
1905	1,424	6,556,331	13,837,176
1904	1,177	4,136,618	10,018,299
1903	956	3,852,197	8,328,362
1902	1,092	3,597,220	8,328,658
1901	1,370	5,196,951	11,656,937
1900	1,333	4,244,932	10,786,276
1899	1,285	4,507,608	11,077,891
1898	1,427	4,085,722	9,644,100
1897	1,907	5,191,647	13,147,929
1896	2,179	6,724,535	16,208,460
1895	1,923	6,299,177	15,793,559
1894	1,873	11,047,253	23,985,283
1893	1,781	7,388,692	15,690,404
1892	1,682	4,848,095	11,603,210
1891	1,846	6,014,000	14,884,000
1890	1,626	6,746,000	12,482,000
1889	1,616	6,119,585	13,147,910
1888	1,730	7,178,744	15,498,242
1887	1,315	8,407,000	17,054,000
1886	1,186	5,566,474	11,240,025
1885	1,286	4,201,831	9,210,334
1884	1,363	9,074,000	17,126,000
1883	1,464	12,367,000	22,155,000
1882	755	3,948,000	8,139,000
1881	607	3,278,475	6,122,208
1880	839	4,760,372	9,340,929

The above statistics go far to confirm the advices of large trade and good profits in Canada in the past year. There were 1,232 failures in the Dominion in 1906, a decrease of 13.4 per cent. from 1905, while the liabilities were $9,540,915, a decrease of 31 per cent. from the preceding year.

THE STOCK MARKET IN 1906.

Dominated as it was during a great part of the past year by the strained financial situation, it is natural that the securities market should have exhibited much irregularity in its movements. National prosperity, large crops, enormous railroad earnings and the improved position of the industrials as a class have furnished justification for numerous increases in dividend rates or for the resumption of such payments by various corporations. There has been persistent manipulation of certain issues, particularly in high-priced standard railway shares, and record-breaking advances were scored in numerous instances. Still, Wall street at large is perhaps inclined to consider the results of the year as rather unsatisfactory. High money markets, even though partially disregarded, tended to keep the public out of speculation, and, more important still, restricted investment buying, especially of bonds, the dealings in the latter kind of securities falling off considerably, while it is noteworthy that bond prices show general declines for the year. The stockbrokerage business cannot be said to have been poor, but it was rendered less profitable by such causes, and while the volume of transactions at the New York Stock Exchange exceeded all previous yearly records, it was not evenly distributed, one of the characteristic features of the market being the extent to which a comparatively small element, comprising large capitalists, pools in different stocks and the manipulative operators, both supplied the activity and measurably regulated the course of quotations.

The following table gives the transactions in stocks and bonds at the New York Stock Exchange by months during 1906, and supplementing it are comparisons of such dealings for a series of years:

	Shares sold	*Bond sales, par value*
January	38,547,868	$105,326,600
February	21,687,579	59,854,500
March	19,329,949	54,192,000
April	24,206,611	63,391,700
May	23,945,096	60,850,100
June	20,282,307	53,940,000
July	16,255,681	36,712,000

BOND TRANSACTIONS (PAR VALUE) FOR FOURTEEN YEARS.

1906	$677,651,600	1899	$834,182,130
1905	1,022,455,670	1898	922,514,410
1904	1,036,810,560	1897	539,477,030
1903	684,200,850	1896	394,329,000
1902	891,305,150	1895	519,142,100
1901	999,404,920	1894	352,741,950
1900	578,253,280	1893	301,303,777

In detail, the market early in last January seemed likely to respond further to the bullish influences which had asserted themselves in 1905 even in the face of the high money market in the later portion of that year. Transactions were enormous; bond quotations in particular were, as a rule, at their highest in the opening month of the year. Before it ran out there had, however, been a sharp reaction, which continued in an irregular fashion during February, followed by an uncertain and narrow market throughout the month of March. By this time, however, it had

become apparent that there were adverse factors in the situation, one of them the tendency toward regulation of corporations by governmental agencies, but the other and more important being the inadequate supply of money available in the loan market to meet the requirements of an expanded business. The succeeding month of April emphasized this latter fact by the first deficit the New York banks had exhibited in the spring since 1884 and by the running up of call-money rates to 30 per cent., while the Treasury Department, in view of the necessity of relief, extended it by agreeing to make advances to banks against gold engaged abroad for shipment hither. April also brought with it the San Francisco disaster, which occasioned a further decline in stocks, the downward movement not culminating until the beginning of the succeeding month. In fact, on May 2 the low point of the year for many stocks was reached. From this, however, there was a rally, money market conditions having improved somewhat owing to the gold secured abroad under the Treasury's offer. The advance continued in June despite some intervals of reaction, and it was at this period that the market began to be regaled with noteworthy dividend increases and it became apparent that very powerful interests were actively ranged on the bull side in certain important stocks. Conditions during July were somewhat similar, prices, on the whole, tending to advance in spite of disturbances in the foreign markets due to the Russian situation. Among the sensational incidents of August, the chief was the placing of Union Pacific on a 10 per cent. dividend basis and an initial distribution on Southern Pacific common at the rate of 5 per cent. Crop reports of the most favorable character also had a bullish effect. The opening of the autumn and the crop-moving season again brought the question of money to the fore. Early in the month the banks were once more under their reserves, while call money touched 40 per cent. Heavy gold engagements abroad were again effected, but the reply to this was the prompt raising of the foreign bank rates, giving notice that London and the other foreign centers were determined to protect their reserves. In October, in fact, the Bank of England rate was marked up to 6 per cent., the highest figure since 1899—the Boer war year—the Bank of Germany's figure going to 7 per cent. In the face of this, of another bank surplus deficit in early November and of continued high money rates, the market, though irregular, held rather firmly, being helped by the increase of Pennsylvania's yearly dividend rate to 7 per cent. and by the persistent bull manipulation in Union Pacific, St. Paul and the Hill stocks, and by successive measures of relief on the part of the Secretary of the Treasury, embracing increases in government deposits in the banks, the prepayment of interest on the debt, and, finally, an offer to purchase $10,000,000 of the 4s due July, 1907. In December the banks again fell below the legal reserve requirements, money continued very firm, and though sterling exchange broke to below the normal gold-import point, foreign financial conditions absolutely precluded assistance from that source. The announcement of long anticipated "rights" in Great Northern, Northern Pacific and St. Paul in connection with enormous new stock issues seemed to have disappointing results, and the placing of New York Central on a 6 per cent. basis was without effect. Liquidation in the high-priced shares which had led the market was, in fact, the dominant factor in the year's concluding month.

BANK CLEARINGS FOR 1906.

Despite a small falling off in December clearings from those of the same month a year ago—the first falling off from the preceding year shown for over two years past—the total clearings at all cities for the calendar year 1906 broke all records and set up new standards of financial measurement which dwarfed all hitherto existing.

The aggregate clearings at ninety-six cities for the calendar year 1906, as reported to BRADSTREET'S, totaled $158,823,847,914, a gain over 1905 of 10.9 per cent., and to this extent were the greatest clearings ever reported. Of this vast total New York City contributed $104,675,828,656, a gain of 11.5 per cent. over 1905; while at ninety-five cities outside of New York the total was $54,148,019,258, a gain of 10 per cent. over the preceding year.

Following are the aggregates of clearings monthly at all cities, compared with the same periods in five preceding years:

[Six figures omitted.]

	1906	1905	1904	1903	1902	1901

Dec	14,182	14,361	12,738	9,225	9,810	9,723

The monthly clearings at New York and at all other cities reporting compare with preceding months of 1905, 1902 and 1901 as follows:

[Six figures omitted.]

	New York City				*Outside New York*			
	1906	1905	1902	1901	1906	1905	1902	1901
Jan	$11,236	$7,735	$6,929	$7,401	$4,998	$4,050	$3,634	$3,276
Feb	8,324	7,118	5,348	5,623	4,055	3,480	2,977	2,699
Mar	8,377	8,731	5,506	6,886	4,533	4,124	3,377	3,074
April	8,543	8,681	7,352	8,636	4,152	3,991	3,526	3,332
May	8,793	7,884	6,805	9,325	4,340	4,104	3,541	3,460
June	7,816	6,735	4,967	6,860	4,340	4,020	3,207	3,208
July	7,256	6,839	6,593	6,081	4,312	3,967	3,546	3,250
Aug	8,833	6,980	5,816	4,929	4,178	3,865	3,087	3,026
Sept	8,314	6,859	6,804	5,047	4,097	3,944	3,300	2,878
Oct	9,344	8,026	7,496	5,950	5,066	4,512	3,799	3,509
Nov	8,607	8,542	6,539	6,368	4,917	4,514	3,495	3,424
Dec	9,228	9,689	6,166	6,316	4,954	4,671	3,668	3,408

It might be noted in connection with these monthly figures that those of December, while 5 per cent. larger than those of November, fell off 1.2 per cent. from December a year ago, this being due to a decrease of 4.7 per cent. at New York, because the clearings outside of the metropolis gained 6 per cent. over 1905.

As bearing upon the above figures also, it might be added that, except in January, August and May, when stock speculation was active—during the latter at declining prices—the year was one of repression in security dealings. Stock sales, it is true, were larger by 7 per cent., but bond dealings were smaller by 33 per cent. than in 1905. Grain speculation also was at no time very active, being very dull in the latter part of the year, though cotton was dealt in heavily. Land speculation early and mining-share speculation later helped to enlarge clearings, but it is probably safe to say that New York clearings in 1906 more closely represented actual business and industrial activity than in

* Contains other items than clearings, hence excluded from totals. § Not included in totals because of incomplete comparisons.

many preceding years. Hence it is encouraging to note that New York's clearings made up 65.9 per cent. of the entire country's clearings in that year, as against 65.5 per cent. in 1905.

The clearings by sections of country in each of the past five years follow:

[Six figures omitted.]

	1906	1905	1904	1903	1902
New England..	$9,444	$8,690	$7,555	$7,665	$7,869

New York City.	104,675	93,822	68,649	65,970	76,328

From this table we learn that clearings in every group of cities in 1906 showed gains over those of any preceding year, and, curiously enough in a way, the largest gain was that noted by the far-western group, which includes San Francisco, despite the absolute suspension of all bank operations at that city from April 18 to May 22, inclusive. The gain in the far-western group over 1905 was 18.7 per cent.; the gains in the middle states and at the south were 11 per cent. in each case; those in New England and in the western group were 8.5 per cent., and that in the northwest was 9.3 per cent.

The percentages of gain shown by the larger cities are, most of them, moderate, and few of them show gains larger than that shown in the country as a whole. Thus, while the gain in the entire country is 11 per cent., the increase at New York is 11.5, that at Baltimore and Detroit 12 per cent. each and that at Kansas City 11 per cent. Chicago gains 8.9 per cent., Boston and San Francisco 8.8 per cent. each, Cincinnati 8.7 per cent., Minneapolis 8.4 per cent., Cleveland 8.1 per cent. and Louisville 7.8 per cent. St. Louis shows the moderate gain of 2.5 per cent., Pittsburgh 5.3 per cent. and New Orleans 6 per cent. The gain of 8.8 per cent. at San Francisco, notwithstanding the month's shutdown of the banks, is an encouraging feature. It might be noted that all the other Pacific coast ports show large gains, varying from 60 per cent. at Seattle to 23 per cent. at Portland, Ore., and Tacoma, and 20 per cent. at Los Angeles.

Special value, of course, attaches to figures of clearings of identical cities over a period of years because of the constancy of comparisons possible, and in the following table the clearings yearly at New York, at fifty-four cities outside of New York, and at the fifty-five cities taken as a whole, are given, with comparisons back to 1892:

	Total New York	*Total 54 other cities*	*Grand total 55 cities*	*P. ct. N. Y. to all*
1906...	$104,675,828,656	$50,924,759,881	$155,600,588,537	67.2
1905...	93,822,060,202	46,503,451,808	140,325,512,009	66.8
1904...	68,649,418,673	40,837,280,650	109,486,699,323	62.7
1903...	65,970,337,955	40,396,266,383	106,366,604,343	62.2
1902...	76,328,189,165	39,074,249,152	115,402,438,317	66.0
1901...	79,427,685,837	36,804,821,132	116,232,506,969	68.1
1900...	52,634,201,865	31,632,249,898	84,266,451,763	61.9
1899...	60,761,791,000	31,632,050,000	92,393,842,000	65.2
1898...	41,971,782,000	25,598,564,000	67,570,346,000	62.0
1897...	33,427,027,000	22,718,363,000	56,145,390,000	59.9
1896...	28,870,775,000	21,291,185,000	50,161,960,000	56.0
1895...	24,841,796,000	22,450,753,000	47,292,549,000	52.5
1894...	24,387,857,000	20,278,578,000	44,666,385,000	54.5
1893...	31,261,037,000	22,112,201,000	53,373,238,000	58.3
1892...	36,662,469,000	24,607,477,000	61,269,946,000	59.8

These figures constitute a veritable barometer of the country's trade over a period of fifteen years, from the height of prosperity before the 1893 panic to the depths of depression in 1894, and thence upward to the high point touched in 1906. From them we learn that the clearings of the entire country in 1906 are over three times what they were in the year 1896, only a decade ago, and are two and a half times what they were in 1892. The New York City clearings in 1906 were double what they were in 1900 and over four times what they were in 1894, while nearly three times what they were in 1892. The growth in the rest of the country was not so great as at New York, but it is to be noted that these clearings have doubled since 1898 and are two and one-half times those of 1894, while over double those of 1892.

Following will be found the clearings yearly at all Canadian cities for seven years past:

1906 (11 cities)	$3,950,701,262
1905 (11 cities)	3,335,530,600
1904 (11 cities)	2,735,664,091
1903 (11 cities)	2,689,482,209
1902 (10 cities)	2,515,576,232
1901 (8 cities)	1,871,061,725
1900 (8 cities)	1,589,560,411

There is here found a total at eleven cities of $3,950,701,262, a gain of 18 per cent. over 1905, and to this extent the largest clearings ever reported. Furthermore, it is to be seen that Canadian clearings are to-day practically twice what they were in 1901; in other words, that Canadian banking operations, and presumably the trade of the Dominion, doubled in five years.

NEW YORK'S GOVERNOR ON PUBLIC PROBLEMS.

The importance of the post held by him, coupled with the nature of the circumstances under which he was chosen to occupy it, lends a special interest to the first annual message of Governor Hughes, of New York. This interest is not lessened by the character of some of the recommendations made by him. The experience of the governor, for example, leads him to suggest at least a tentative and permissive departure from certain methods of party administration which have long prevailed in the state. He recommends the passage of an amendment to the primary law providing that any general committee of a party may adopt a rule arranging for direct nominations, and that thereupon voting at the primaries shall be upon an official ballot printed at the public expense. So he urges the enactment of legislation to prevent abuses in the control of political conventions. He would do away with the party column in the official ballot and proposes the substitution of a ballot in which the names of candidates for any office shall appear but once, grouped under the names of the offices, but with appropriate designations of party opposite the candidates' names. Governor Hughes also recommends that the law be amended by imposing a limitation upon the amount that may be expended by a candidate to procure his election. He suggests that immediate provision be made by the legislature for a recount of the votes cast for mayor at the municipal election in New York City in 1905, and that the power to authorize the bringing of an action to try title to office should be taken from the attorney-general and intrusted to the Supreme Court.

Considerable space is devoted by the governor to the subject of improving means of communication in the state. It seems that with an increase in the tonnage carried on the canals there was a reduction in the appropriations for the fiscal year for both repairs and improvements, and that a further reduction will be possible for the next year. The total obligations incurred and expenditures made in connection with the barge canal up to December 1 last amounted to a little over $15,000,000. Under the contracts thus far let for about $20,000,000 worth of work, the estimated cost will be about $2,000,000 less than the estimates made at the time the Barge Canal act was passed, notwithstanding increases in the cost of labor and materials and the widening of a number of the locks. In addition to that now under contract, plans for $18,000,000 worth of work have been completed. Altogether, plans have been prepared for about 200 miles of canal, and plans for about $12,000,000 worth more are expected to be completed within the next three months. The construction and maintenance of roads have been undertaken by the state for the first time in a systematic manner under the constitutional amendment of 1905, which authorized an indebtedness of not exceeding $50,000,000 for the improvement of highways. Under it surveys and plans for the improvement of about 2,500 miles of main road have been approved by the local authorities. Of these about 800 miles have been constructed, and between 500 and 600 miles will be completed during the coming year.

Governor Hughes regards the present scheme of railroad regulation in the state as inadequate and the method of paying the expenses of the commission as indefensible. He recommends that the present Board of Railroad Commissioners and the Commission of Gas and Electricity be abolished and that a new commission be constituted, with enlarged powers of regulation and supervision over the corporations now subject to the existing commissions. In like manner he suggests the abolition of the existing Board of Rapid Transit Commissioners in Greater New York and the creation of a new board, having powers with reference to operations within the territory of Greater New York, or, if necessary, a wider contiguous district similar to those suggested for the new State Railroad Commission. The governor also suggests that the laws relating to the existing Department of Labor and to the employment of children should be revised, and that the laws relating to adulteration and impurities in food now contained in different statutes should be codified and presented in a single comprehensive law. The governor touches in his message upon a number of other topics of lesser importance though still of public concern. He gives the impression throughout of a man who means to look carefully through every department of state activity, and where possible to secure the revision and recasting of state legislation, to which in particular instances there have been many and varying accretions, into something like a simplified and comprehensive form, adapted by needed amendments to the conditions of to-day.

EDITORIAL NOTES

Railway accidents have been occurring of late with a frequency and with such disastrous results as regards the numbers of lives lost or of passengers injured, as to [illegible] remark. Among the successive collisions which have been recorded within the last few weeks, some of the worst were on roads which are equipped with modern safety signals, while double-track roads are apparently just as liable to have them as those which are operated with a single track. On the face of the matter it can be easily comprehended that the vast increase in the amount of all traffic, both passenger and freight, increases the liability to accidents. The railway companies of the country, great and small, are called upon to do an ever-growing volume of business, outstripping their present facilities and placing an enormous strain upon their organization. One of the most disturbing features of the matter takes the form of the suggestion that the rules for conducting traffic are being constantly violated by the employees of some of the companies regarded heretofore as among the best conducted in the country, the obvious reason for the same being to accelerate the movement of trains. While the allegation cannot be confirmed, one of the most prominent railroad officials in the United States was quoted a few days ago as saying that operating departments were disregarding block signals to a lamentable extent, and that it was not unusual for them to allow two or three trains on a block instead of the one train on the given length of track which such systems are designed to secure. Recent occurrences would, in fact, tend to give color to such a view of the matter, and would seem to call for such an inquiry as that just begun by the Interstate Commerce Commission.

Expectations were outrun by the government receipts for December, which amounted to $55,812,979, as compared with expenditures aggregating $46,537,586, an excess of over $9,275,000 for the month, contrasting with one of only $5,400,000 in December, 1905. The receipts for the first six months of the fiscal year ending with December amounted to $328,461,118, an excess over the expenditures of over $25,000,000. Last year at the same time the expenditures exceeded the receipts by over $7,200,000. For the calendar year 1906 the receipts, according to an estimate of Secretary Shaw, amounted to $625,000,000 and the expenditures to $566,000,000. This represents an excess of receipts amounting to $59,000,000, which, as may be recalled, is but a million more than the amount which Secretary Shaw regards as the probable surplus at the end of the current fiscal year.

Just before the close of the year 1906 the Shah of Persia and the Crown Prince signed the newly adopted constitution. The constitution was read on Sunday before the National Assembly, and, it is only proper to say, was objected to by the members of the National Assembly because of the proposed constitution of the Senate. This latter body is, under the constitution, partly elective, but the lower house seems to have the financial control of the government in its hands. Owing to the opposition to the constitution of the Senate, that feature of the constitution is still regarded as an unsettled one, and it seems that negotiations on the subject have been resumed between the Cabinet and representatives of the people. It may be noted that, in addition to signing the constitution itself, the Crown Prince signed a separate document in which he promised not to dissolve the present Parliament for two years.

RECENT LEGAL DECISIONS.

[*Prepared for* BRADSTREET'S.]

Note—Holder for Value.

The Kentucky Court of Appeals held, in the case of Wilkins et al. vs. Usher, that where a note was given due one day after date, and was assigned by the payee on the day it was executed as collateral security to a surety of the payee for an antecedent debt, such assignee thereby became a holder of the note for value to the extent of his lien, he having no notice that there was any infirmity in the note.

Village—Liability—Accident—Sidewalk.

The New York Court of Appeals held, in the case of Butler vs. Village of Oxford, that a village was not liable for injury to a person from stumbling in the nighttime against the edge of a stone sidewalk which projected about two and one-half inches above the adjoining dirt walk, no similar accident having occurred at the place, it being practically a new walk, and lighted by electric lights at the time of the accident.

Taxation—City Stock—Banks.

In the case of The State of Maryland vs. The City of Baltimore, recently decided by the Court of Appeals of Maryland, it appeared that the state sued the city to recover a state tax of 17 cents on each $100 of the par value of $9,907,100 city stock held by national banks and other corporations, and on $2,140,500 of such stock held by savings banks. The Superior Court of Baltimore gave judgment for the state for the amount of the claim, but declined to allow interest thereon. The city appealed on the ground that it could not be required to pay the tax on its stock held by these corporations, and that, moreover, the holders of its stock were not liable for the state tax thereon. The State Court of Appeals affirmed the action of the lower court in giving judgment for the amount of the state's claim, but held that it should have allowed interest also.

Transfer Tax—Insurance—Non-Resident.

The New York Court of Appeals held, in the case of The Comptroller of the State of New York vs. Gordon, that the transfer tax law of 1906, imposing a tax "when the transfer is by will or intestate law of property within the state, and the decedent was a non-resident at the time of his death," did not apply to a claim under a life-insurance policy issued by a New York corporation to and upon the life of a resident of New Jersey, although payable at the office of the company in New York; it appearing that at the time of his death the insured was a resident of New Jersey, where his will was probated and where the policy had always remained and the premiums been paid; that proofs of death could be presented in that state, and by its laws it required the company as a condition of doing business there to submit to its laws and the jurisdiction of its courts, and that at the testator's death there was sufficient property of the company in the state of New Jersey to satisfy the claim. Under such circumstances, the court said, the situs of the contract of insurance and of the claim arising thereunder was in the foreign state, and the property sought to be taxed should be regarded as in that state.

Insurance—Stipulation—Waiver.

The Kentucky Court of Appeals held, in the case of The Germania Life Insurance Company of New York vs. Lauer, that where the agent of an insurance company accepted the first premium of a policy from a brother of the insured, knowing that he was sick, but not knowing the nature of his illness, or that he was dangerously ill and had been suffering from delirium tremens for three weeks, with four physicians attending him, he could not be considered as waiving a stipulation in the policy that it should "not take effect until it shall have been delivered and accepted and the first premium paid during the continued good health of the insured," and that the waiver of such a stipulation, to be effectual, must not only be made intentionally but with full knowledge of all the existing conditions, and will not be binding on the insurer unless the agent, whose acts and conduct are relied on to establish the waiver, was at the time in full possession of the material facts concerning the condition of the insured. The court held further that generally the question as to whether or not there was a waiver of stipulation in a contract is for the jury under proper instructions, but that where the evidence is wholly insufficient to show a waiver the court should direct the jury to find a verdict.

BUSINESS NOTES.

Onion Crop.

According to reports obtained by the Jerome B. Rice Seed Company, of Cambridge, N. Y., the 1905 and 1906 onion crops by producing states may be compared as follows:

	Acreage		*Yield per acre*		*Total crop, bushels*	
	1906	1905	1906	1905	1906	1905
Ohio	4,801	4,942	253	208	1,212,431	1,025,782
Indiana	4,344	3,287	302	238	1,311,140	781,563
New York	3,630	3,570	231	267	838,400	955,780
Massachusetts	1,300	1,300	275	330	357,500	392,0 0
Connecticut	1,000	1,100	215	225	215,000	247,500
Michigan	787	840	293	172	230,496	144,517
Illinois	700	600	300	350	210,000	210,000
Minnesota	670	627	368	334	246,650	209,485
New Jersey	425	360	350	502	148,750	180,000
Iowa	210	150	400	400	84,000	60,000
Rhode Island	175	250	500	225	52,500	56,250
Wisconsin	132	170	330	251	43,500	42,625
Vermont	20	25	250	300	5,000	7,500
Total	18,194	17,230	272	250	4,955,277	4,311,000

The onion crop of 1906, as shown by preceding figures, is considerably in excess of that of 1905, and no doubt the largest acreage ever grown in this country. The quality of the crop as a whole is not, however, up to the average of other years, though possibly as good as that of 1905.

Fire Losses.

The fire losses for the United States and Canada during the calendar year 1906, compiled by the *Journal of Commerce*, reached the unprecedented sum of $459,710,000, of which $280,000,000 was due to the San Francisco conflagration of last April. Deducting that sum the other losses aggregated $179,710,000, or more than any year in the history of the country, excepting those of the Chicago, Boston and Baltimore conflagrations. The destruction of property in this country by fire during the past thirty years reaches the enormous total of $4,054,654,825, or a yearly average of $135,155,000. The following table of losses (three figures being omitted) by years shows a steady increase in the amount of property destroyed, which would indicate that the forces that go to make an increased fire hazard, such as the use of electricity, gasoline, congestion of values, etc., have more than offset the improvements made toward fire prevention, such as better building laws, automatic sprinkler equipments and fireproof construction:

1906	$459,710	1891	$143,764
1905	175 193	1890	108,993
1904	252,554	1889	123,016
1903	156,195	1888	110,885
1902	149,260	1887	120,283
1901	164,347	1886	104,924
1900	163,362	1885	102,818
1899	136,773	1884	110,008
1898	119,650	1883	110,149
1897	110,319	1882	84,505
1896	115,655	1881	81,280
1895	129,835	1880	74,643
1894	128,240	1879	77,703
1893	156,445	1878	64,315
1892	151,516	1877	68,265
Total for thirty years			4,054,654

World's Gold Production.

George E. Roberts, Director of the Mint, says: "Four years ago the world's output of gold was $325,000,000, three years ago $346,000,000, in 1905 $376,000,000, and in 1906 it was between $400,000,000 and $410,000,000. The largest addition in recent years has been made by South Africa, which, including all districts, is now producing about $12,000,000 per month. In the United States, Nevada and Alaska have made increases which will carry the output of this country close to and perhaps above $100,000,000. It will be the first time the United States has ever reached that great figure. Outside of this country and South Africa gains and losses will probably about offset each other. In 1896 the world's production of gold was about $200,000,000. The enlarged output since then has made a notable change in the bank reserves of all countries. This shows the holdings of the principal banks of issue, and of such governments as carry gold reserves outside of banks, on January 1, 1896, and January 1, 1906 (three figures omitted):

	Jan. 1, 1896	*Jan.* 1, 1906
Bank of Austria Hungary	$98,932	$246,400
Bank of Denmark	18,895	20,900
Bank of Spain	38,619	74,100
Bank of France	378,859	555,500
Banks of United Kingdom	255,836	188,100
Banks of issue of Italy	84,039	189,500
Bank of The Netherlands	17,988	31,800
Bank of Roumania	11,773	15,000
Bank of Russia	370,500	434,700
Banks of issue in Sweden	8,588	18,400
Banks of issue of Switzerland	16,096	20,500
National banks and Treasury of U. S.	259,939	955,800
Banks and Treasury of Canada	18,123	53,100
Banks of Germany	167,384	170,500
Banks of South Africa	15,967	36,500
Banks of Australasia	122,643	128,700
Banks of Portugal	5,100	5,300
Banks of Norway	9,000	7,600
Bank of Japan	15,692	59,400
Government reserve of India	None	19,700
Argentine Conversion Office	None	90,200
Total	1,915,053	3,321,700

CURRENT BUSINESS NEWS.

Commercial.

The denaturized alcohol law went into effect January 1. Internal revenue experts estimate that 50,000,000 gallons will be manufactured in the United States this year. Last year Germany made 38,000,000 gallons, France 9,000,000 gallons and England 7,000,000 gallons.

Foreign crop conditions as published Wednesday in Broomhall's Liverpool *Corn Trade News*: United Kingdom—There are occasional complaints heard as to a weak plant, but otherwise the outlook is favorable. France—The crop outlook is favorable, with the weather milder, and supplies are larger. Germany—Severe frost is reported, but no apprehension is felt, as there is a good snow cover. River navigation is partly closed. According to an official report for the empire the yield for 1906, with comparisons, follows (three figures being omitted):

	1906	1905
Wheat, bushels	144,800	135,000
Rye, bushels	353,600	352,800
Oats, bushels	611,000	475,000
Potatoes, metric tons	42,936	48,523

The hay crop is larger than last year. Hungary—There have been very sharp weather changes. Roumania—The weather is very changeable, but the crops are under a snow cover. Large stocks are collecting at Sulina. Russia—Occasional complaints are heard regarding a weak plant and the appearance of vermin, but otherwise conditions are favorable. Arrivals are small. Italy and Spain—The crop outlook is favorable. India—Reports from the United Provinces confirm an increase of 500,000 acres under wheat, and also that rain is wanted.

Lloyd C. Griscom, American ambassador to Brazil, reports that the Brazilian Congress, which expired December 30, authorized continuation of our 20 per cent. preferential tariff reduction. The preferential tariff continues unchanged except that linotypes and cash registers are added under the classification of typewriters.

A Shanghai dispatch says that as a result of the revival of the boycott of American goods, due to the failure of the United States authorities to modify the Chinese Exclusion act, the boycott, which was recently revived at Canton, is spreading over China. Efforts are being made in Shanghai to induce the Chinese newspapers to reject advertisements of American manufactures.

In 1906 300,000 bags of Spanish peanuts were handled in Petersburg, Va., representing a money value of more than $1,500,000. In the same time about 175,000 bags of Virginia peanuts were sold at $3 a bag.

In a statement issued by the Bureau of Statistics of the Department of Commerce and Labor, it is stated that American exports to Panama in 1906 will aggregate more than $14,000,000. Three years ago exports reached only about $2,500,000.

Financial.

The December production in the Rand mines is estimated by London Kaffir houses at 550,000 ounces, fine gold, another new high record. The November output was 533,373 fine ounces; October, 549,609. Reckoning one ounce roughly at $21 25, the value is $11,687,500, as against $11,328,125 in November, and $9,166,475 in December, 1905, when the output was 431,594 ounces, 100,000 ounces less than the December, 1906, total. Prior to the Boer war, the high record of Transvaal production was $8,604,000, in August, 1899. Comparison of the value of last month's output with previous months, and with December in other years, follows:

December, 1906	$11,687,500	December, 1905	$9,166,475
November, 1906	11,328,125	December, 1904	7,694,000
October, 1906	11,481,850	December, 1903	6,075,500
September, 1906	10,727,875	December, 1902	4,163,260
August, 1906	10,812,915	December, 1901	1,123,460
July, 1906	10,145,000	December, 1900	None
June, 1906	10,109,065	December, 1899	1,841,750

Directors of the Delaware & Hudson Company on Wednesday declared a dividend of 9 per cent. for the year 1907, payable in four quarterly installments. This dividend compares with 7 per cent. declared annually since 1901, prior to which the annual rate was 5 per cent.

New York City's real-estate operations during the past year have involved a total of $2,265,195,990. The total market price of conveyances in the metropolis and suburbs has been $1,025,000,000. Mortgage lenders have advanced $445,970,315 in Manhattan and the Bronx, $162,574,600 in Brooklyn, and $30,000,000 in Queens. Builders have spent on new structures and alterations $250,000,000. The huge total of the past year was a little under that of 1905, which was $2,386,004,655.

The first foreign loan to be placed in the American market since Japan's $75,000,000 issue of November, 1905, was announced Thursday, when the National City Bank reported that it had purchased, in connection with H. Schröder & Co., of London, £3,000,000, state of San Paulo, Brazil, 5 per cent. gold bonds. One-quarter of the bonds will be redeemable each year from December 1, 1908, to December 1, 1911. Of the total issue, £1,000,000 is payable in United States gold dollars at the fixed rate of exchange of $4.84 per pound sterling. The loan, besides being a direct obligation of San Paulo, is further secured, both as to principal and interest, by a first charge upon a surtax of 3 francs, gold, per bag of coffee exported from San Paulo. The tax is deposited weekly in Santos with the agents of the bankers purchasing the loan. The taxes thus far collected have averaged 708,075 francs per week, or at the rate of £1,458,214 per annum.

Following are the comparative figures as compiled by the *Journal of Commerce* of companies incorporated in the eastern states during December and the twelve months ending therewith with an authorized capital of $1,000,000 or more:

	1906	1905	1904
January	$411,915,000	$116,250,000	$59,508,200
February	202,650,000	98,600,000	53,750,000
March	105,374,000	192,645,000	83,050,000
April	232,080,000	180,111,111	74,700,000
May	135,300,000	249,250,000	132,000,000
June	242,240,000	232,150,000	102,950,000
July	69,200,000	61,315,000	61,374,000
August	109,150,000	85,125,000	32,960,000
September	167,750,000	167,400,000	66,250,000
October	138,350,000	120,950,000	215,500,000
November	227,950,000	50,000,000	121,200,000
December	255,981,000	139,391,100	107,300,000
Total	2,307,970,000	1,691,187,211	1,093,542,200

The New York News Bureau says: "An important interest here, with pronounced views as to the extent of the credit balance of this country against Europe, recently requested the opinion of a prominent London financier, who cabled: 'Europe owes America £40,000,000 on balance of trade.'"

Industrial.

The Mexican Central Railway Company has granted the increase of about 15 per cent. in wages demanded by the conductors, making their pay equal to that of conductors in the United States.

The Toledo Railways & Light Company and the Maumee Valley Railways & Light Company have granted an increase in wages of 10 per cent. to their 900 conductors and motormen.

The American Shipbuilding Company has granted a general increase in pay of from 5 to 10 per cent. to all of its employees at all points on the lakes. This will affect all yards, and will mean an increase of at least $750,000 in the annual pay rolls of the company.

C. F. Smith, general superintendent of the New York Central & Hudson River Railroad Company, has announced that the wages of 30,000 men employed on the New York Central lines, including the yard men, have been advanced from 7 to 10 per cent. Some of the advances went into effect December 1, and the others January 1.

On January 1 the wages of all firemen on the Cleveland, Cincinnati, Chicago & St. Louis Railroad were increased 7.77 per cent.

The Public Service Corporation of New Jersey has increased the pay of its 3,000 motormen and conductors.

The Indianapolis Street Railway Company has increased the wages of its employees 1 cent an hour.

"The year 1907 will be the most prosperous in the history of the steel business, and, in fact, in all lines of business," says Willis L. King, vice-president of the Jones & Laughlin Company.

According to the *American Federationist*, 1,226 labor unions, with an aggregate membership of 101,691, reported 1.8 per cent. without employment in November. In October 577 unions, with a membership of 69,177, reported eight-tenths of 1 per cent. unemployed. In November, 1905, the ratio was 1.25 per cent.

Railroads.

At a special meeting of the board of directors of the Pennsylvania Railroad Company, held Wednesday, James McCrea, vice-president of the Pennsylvania Railroad Company, in charge of the lines west of Pittsburgh, was elected president, to succeed the late A. J. Cassatt.

Miscellaneous.

The record for beneficence in the United States for 1906, as compiled by the Chicago *Tribune*, shows a total of $106,388,000, including no items of less than $1,000. In 1905 the total was $104,586,000.

STOCK EXCHANGE CLOSED.

STATE OF TRADE.

[A Summary of Special Telegrams to BRADSTREET'S.]

Quiet prevails in distributive trade, but industrial lines were never so active at this period. Post-holiday and weather conditions affect both wholesale and retail trade, the latter line noting slackness in demand for heavy wearing apparel. Clearance sales by jobbers have cleaned up stocks, which were at no time burdensome, and many cities report retailers already beginning to stimulate sales in winter goods by cut-price sales. Prices of staples show remarkable strength, and iron and steel, leather, raw wool, cotton and cotton goods display notable firmness. While the car-shortage trouble is still very acute the country over, there are reports from a few sections, especially the northwest and parts of the Pacific coast, that grain and lumber are moving more freely. Car congestion is complained of, however, in the eastern and western coal trade, and affects cotton movement in parts of the south. Inventories have been completed by wholesalers, excellent results being generally shown, and salesmen are now starting out for spring business, the prospects for which appear bright, the more so because most lines are sold ahead from three to six months. It is noted now, as last year at this time, that mild weather, while a drawback to some lines of trade, allows of building being carried on in a usually closed season. The money market has been a subject of close study and has shown great activity, with opinion still divided as to the prospects for rates in the next few months. Collections are classed as good at the west; slow, with extensions asked for, in the south Atlantic states, and only fair in the northwest, where they are said not to have expanded in proportion to the increase in general business. A feature of the week has been the divergent statements as to the outlook for the current year issued by various observers. Some pessimistic views have been published as to the future of industry and finance, but, on the other hand, some optimistic reflections have been widely disseminated. With past good results and large bookings for 1907 secured, the wholesale and manufacturing world, however, takes a favorable view generally, pending the later developments of the year in crops and money matters.

Notwithstanding the holiday week, demand for pig iron for future delivery was active, the eastern and Chicago districts being the chief factors. In the east the sales have been made up of basic, foundry and forge irons, while in the west heavy orders for malleable Bessemer have been placed, deliveries to be made in the last half of the year. Sales of spot iron are unimportant, simply because none is available. A significant feature of the general situation is the fact that foreign iron has appeared in the Cleveland district after a lapse of five years. In fact, the product of most furnaces is sold ahead for the next six months. New orders for steel rails are of goodly proportions, and it is reported that two western roads have placed contracts for upward of 90,000 tons for delivery in 1908. It is to be noted, however, that conclusive details regarding the latter item are not available. Two independent Pennsylvania rail producers announce that they will not book orders calling for delivery after August for less than $30 a ton, an increase of $2, and the highest price quoted for standard rails since 1900, but the leading producer shows no disposition to advance its price. San Francisco has figured to the extent of 4,500 tons in the demand for structural material, and further business is looked for from that city. Building operations have fallen off, but the railroads continue to place goodly contracts for structural shapes. Specifications are coming in quite freely, and the mills are sold up for the next three or four months. Merchant bars are active, and wire products are in good demand. Some grades of scrap are unsettled, the decline recently noted at Chicago having extended to other markets. Coke is strong, and, while there is a heavy shortage of supplies in the Chicago district, the supply of local by-product material is sufficient to prevent a serious situation. Coal is firm and in good demand. Lead and spelter are not so firm. Tin declined sharply in the latter part of the week on pressure to sell and a more favorable statistical situation. Domestic copper is firm and considerable premiums prevail for spot supplies, but late advices indicate weakness for warrants and refined copper in oversea markets.

Strong demand for spot cotton and the prompt stoppage of January notices have made for strength in raw cotton despite the heavy current movement. Spot cotton is 10 points up on the week, and futures are correspondingly higher. Grain prices have shown little movement, wheat easing on larger movement, but meeting a rather better export inquiry than of late. Corn and oats are little changed, provisions are strong, with lard advanced, but cotton-seed oil is slightly lower.

The aggressive strength of all kinds of leather and of hides is in rather sharp contrast with the reports of conservative buying of shoes from manufacturers. Shoe shipments from eastern cities for 1906 aggregated 5,082,380 cases, a gain of one-half of 1 per cent. over 1905.

The situation in textile markets is apparently a very strong one. Clearing sales by jobbers have been complete, and cotton goods are heavily sold ahead. Most manufacturers are booked for six months and prices are very firm. Mild weather is a drawback to trade in heavy winter goods, and clearance sales by retailers are reported begun in the west. Raw wool is strong and active here and abroad, and no sign of easing prices is noted.

There were fewer failures in 1906 than for twenty-two years preceding, but owing to a few large bank failures, due to isolated cases of dishonesty, the liabilities were larger than in 1905. There were 9,384 failures, involving $123,827,927 in liabilities, a decrease of 6 per cent. in number from 1905, but an increase of 1.6 per cent. in liabilities. The proportion of assets to liabilities was 49.9 per cent., the smallest ratio since 1902. The number of those in business in 1906 was 49,000 larger than in 1905, but owing to the smaller number of failures reported, the percentage failing in 1906—the commercial death rate, in fact—was only 66 hundredths of 1 per cent., as against 71 hundredths in 1905, 1.40 per cent. in 1896, 1.50 per cent. in 1893, and the smallest death rate reported since 1880. Five bank failures—all due to dishonesty—accounted for one-sixth of all liabilities.

Notwithstanding a small decrease—1.2 per cent.—from December a year ago, caused by reduced speculation at New York—the first decrease from the preceding year shown in any month for two and a half years past—the grand total of clearings at ninety-six cities for the calendar year 1906 broke all records, aggregating $158,823,847,914, a gain over 1905 of 10.9 per cent. Of this sum New York contributed 65.9 per cent., or $104,675,828,656, a gain of 11.5 per cent. over 1905. At ninety-five other cities the clearings aggregated $54,148,019,258, a gain of 10 per cent. over 1905. In spite of the loss of one month's business by earthquake and fire, San Francisco gained 8.8 per cent. in 1906 over 1905. Other cities on the Pacific coast made larger gains, Seattle increasing 60 per cent., Portland, Ore., and Tacoma 23 per cent., and Los Angeles 20 per cent.

Easier money rates have followed the completion of the January 1 disbursements, and though there were at first further declines in the high-priced railroad stocks, a firmer tone is seen in various specialties and dividend-payers which had not been unduly advanced by manipulative means. Bonds, however, continue dull and neglected. Foreign exchange has had a sensational rise in the easing of money and on a marked increase in the demand for remittances. Demand sterling is nearly 2½ cents higher than a week ago, at 4.85@4.85.15.

Bank clearings for the week ending with January 3 (a holiday period) aggregate $3,169,983,794, 12 per cent. over last week, but 9 per cent. below the same week last year. Excluding New York City, the total is $1,121,316,355, 13 per cent. in excess of last week and nine-tenths of 1 per cent. over last year.

Business failures for the week ending Januars 3 number 185, against 161 last week, 220 in the like week of 1906, 278 in 1905, 262 in 1904 and 336 in 1903.

Wheat, including flour, exports from the United States and Canada for the week ending January 3 aggregated 4,255,270 bushels, against 2,494,832 bushels last week, 3,839,741 bushels this week last year, 1,411,947 bushels in 1905 and 4,818,471 bushels in 1902. For the past twenty-seven weeks of the fiscal year the exports are 97,923,504 bushels, against 69,020,020 bushels in 1905-06 a year ago, 36,175,274 bushels in 1904-05 and 151,009,774 bushels in 1901-02. Corn exports for the week are 1,974,599 bushels, against 1,660,008 bushels last week, 6,265,333 bushels a year ago and 3,186,532 bushels in 1905. For the fiscal year to date the exports are 25,804,088 bushels, against 43,218,281 bushels in 1905-06 and 18,686,866 bushels in 1904-05.

IN CANADA.

The situation is one of quiet confidence in Canadian trade. Stock-taking returns have been favorable, large orders ahead are on the books of wholesalers, and the opening of the regular spring season is awaited with sanguine hope. Montreal reports some manufacturers' order books filled for the entire season's output. Collections are good and country trade is quiet. Toronto reports unseasonable weather affecting country trade, which, however, is usually quiet at this season. Retail trade is slow. Preparations are making for an unusually heavy spring trade. Industry is very active and collections are beginning to improve. Trade is quiet in Manitoba, but the spring trade outlook is excellent. Less complaint of land speculation is heard. The lumber industry is very active in British Columbia, and higher prices are looked for. Collections are good. Failures in the Dominion of Canada in 1906 number 1,232, with liabilities of $9,540,915, decreases of respectively 13 and 30 per cent. from 1905. Clearings at eleven cities for the year 1906 aggregated $3,950,701,262, a gain of 18 per cent. over 1905, the hitherto record year. For the past week clearings aggregate $83,325,336, a gain of 14.7 per cent. on last week and of 14.7 per cent. on last year. Failures for the week number 16, as against 18 last week and 32 in 1906.

TRADE REPORTS.

Dry-goods business at New York is of a post-holiday character. Retailers find trade quiet after the holiday activity. A number of them are getting ready for January sales. Raw silk is quiet. In the millinery, hat and fur trades there has been some cutting of prices. Wholesale men's furnishings continue very active. Manufacturers of shirts and shirt waists have obtained good early orders, and a large spring trade is anticipated. Business in notions at wholesale is very satisfactory, and button manufacturers are busy filling orders. Receipts of beef on the hoof are large and supplies of dressed meats liberal. Prices are firm and demand increasing. Receipts of butter are light but equal demand. Fresh eggs are more plentiful and prices have dropped 2 cents. Poultry is dull. Trade in wholesale groceries is about an average, while the usual reaction after the holidays is experienced by retailers. Business in wines and spirits is not up to expectations. California wines are in fair request and prices are steady. Wholesale confectioners find collections fair. In the jewelry trade business in 1906 was profitable and of record proportions. Tobacco is quiet, but prices continue high and goods scarce. Cigar manufacturers did a large 1906 business and report collections fair. Tin and enameled ware manufacturers are unable to keep abreast of their orders, a condition which also obtains in the hardware trade. Metals are firm and higher prices are looked for. Steel and pig iron are in good demand, machine tools are at a premium for prompt delivery, and jobbers of electrical goods are doing an active business. Wire and wire goods have advanced 10 cents. Trade in automobiles and their accessories is unusually brisk, due largely to the forthcoming show, which has caused a large influx of dealers and manufacturers. Manufacturers of jute cordage are unable to keep pace with the demand. Paints, oils and kindred lines are quiet, but prices are maintained and collections are fair. Turpentine, in small lots, is slightly higher. In the leather trade, belting butts continue dear, sole leather is firm in price, and there is a very active demand for patent leather. Stocks of goatskins are lower than for some years. Furniture and carpets at wholesale command fair attention, and collections are generally good. In anthracite coal there is considerable activity, and steam coals are in demand. Real estate is quiet. Building loans are being gradually obtained, and a better feeling prevails among speculative builders, many of whom are, however, behind in their payments. In lumber and building materials the volume of business is affected by conditions in the building trade and shows a decided falling off. Collections in these lines are slow, and renewals of paper are being asked. In the wholesale paper trade demand continues active, stocks have been reduced, and prices still have an upward tendency.

The following telegrams show trade conditions at the cities mentioned for the week ending January 4:

BOSTON.—Jobbing trade in dry goods is in very good condition. The clearing out of odds and ends and of winter goods has been complete. Spring goods have been sold ahead to an unusual extent, and in view of possible scarcity as spring approaches, buyers show urgent interest. Prices are firm at high levels. Manufacturers of cotton goods and yarns are sold up for the next six months. Shoe manufacturers report the average jobber not placing as large orders at this time as last year, but expressing the intention to buy frequently on his own trade demands. Leather has been active, shoe manufacturers apparently hastening to cover orders on hand before there should be any further increase in prices. The feeling among paper dealers is one of confidence, and while there has been a lull owing to stock-taking, prospects for an active business are generally regarded as favorable. The tone of the market continues to be firm, and there is talk of higher prices for news paper, manila and box board. The various grades of paper stock have been in fair movement during the closing weeks of the year, although the demand has been somewhat uneven. The situation is accounted generally satisfactory, and it is expected that manufacturers will place orders more freely after the turn of the year. There is the customary lull in furniture, carpets and upholstery lines, but the outlook is promising for a good volume of spring business. Collections are fairly prompt. Business continues good in all lines, the general volume of trade being very large. In paints and oils no material change in prices is noted, orders being light. In iron and steel business continues very active, with many advance orders, and with mills behind in filling them. Copper continues to advance, but in spite of the high prices, buying is very active. In lime, cement, drain pipe, brick and other lines of building material, prices are steady on a quiet market. In western lumber, prices have somewhat advanced, market being firm. In southern lumber there is no material change in condition, while northern and eastern lumber is quiet but steady in price. Tidewater coal is in good supply, but rail shipments are hampered by the embargo placed on shipments on account of scarcity of cars. There is danger of a famine in territory away from the seaboard, but relief is promised by the railroads. Receipts of fresh fish in Boston and Gloucester during the past year are estimated at 60,000,000 pounds less than in 1905. High prices prevailing have offset this to a considerable degree.

PROVIDENCE.—In the jewelry trade collections are good. Salesmen in the field are already reporting good orders in this line, and manufacturers anticipate an excellent spring business. Cotton goods are firm, with prices advancing. The machinery and tool trade is in an excellent condition. Business in lumber is fair.

PORTLAND, ME.—The usual dullness following the holidays prevails in wholesale and retail lines, though wholesalers report orders for spring more numerous than in former years. Inventories are showing good gains in many instances.

PHILADELPHIA.—Wool prices are firm, and cotton yarns continue scarce and high in price, some spinners, it is said, being sold ahead till July, 1907. Dry-goods jobbers report a fair trade, but collections continue slow. Flour is dull and weak and prices favor the buyer, but trading is slow. Chemicals and dyestuffs and paints and glass have been inactive. Lumbermen say that the market continues remarkably active, demand being strong and prices stiffer. Hides and skins continue firm, with a fair demand, good supply and high prices. Goatskins continue scarce, with a firm market and an upward tendency. Glazed kid is firm at high prices; buying confined to immediate needs. Leather is strong though less active, and stock carried is small. Retail shoes are fairly active, rubber goods selling freely. Manufacturers are busy on spring orders. Tobacco sales for the past week have been few and small; many factories have been closed for stock-taking. Wholesalers have been similarly engaged and have not attempted to do much. Fine goods are scarce; prices are high and inclined to be higher. Liquor distillers secure little business just now; wholesalers having supplied their trade for the holidays, are not called on for much of anything. The provisions of the pure food law going into effect January 1 adversely affect trade. The new year opens with every evidence of continued prosperity in iron, sales assuring full operation for the first six months, with spirited buying extending into the last half of the year. Prices are strong and indications point to their being higher. Coal demand continues good, especially for anthracite, colder weather influencing trade.

PITTSBURGH.—There were but few transactions in the pig-iron market, due to stock-taking, and also to the fact that practically only second-half iron is now available. Leading producers are holding this at $21.50 to $22, valley furnaces, for both Bessemer and basic. Buyers have been holding off expecting better prices, but there appears to be a strong underlying demand for iron, which, it is thought, will materialize about the close of the month. There has been no abatement in the demand for finished products, and specifications on contracts are being received in large numbers. Coke of standard quality is very scarce for spot delivery, and prices are firm. Nominal quotations for pig iron for spot delivery at the valley furnaces are as follows: Standard Bessemer, $23 to $24; chilled basic, $23 to $24; No. 2 foundry, $25 to $26, and gray forge, $22. Standard Connellsville furnace coke is quoted at $3.50, and foundry coke, $4 to $4.50, at the ovens.

BUFFALO.—Business is quiet. The labor question is becoming serious, some manufacturers being unable to keep their factories more than about half employed. The future looks favorable.

BALTIMORE.—Clearance sales by retailers are under way. Jobbers of men's furnishings report good sales. Collections are fair. Dry goods and notions are quiet, but prices are firm. Salesmen in these lines are preparing to go out after spring business and expect satisfactory results, except in portions of the south Atlantic states, whence come requests for extensions, which, with few exceptions, are granted. Lumber is quiet and stocks are rather full, due to free shipments from the south during the latter part of 1906. Collections are fair. Clothing salesmen are out finishing up the spring business, and while some few cancellations are received, prospects, on the whole, are encouraging. In the retail line weather conditions have deterred business, and stocks are heavier than at this time in 1906. Dividends paid by local institutions have been larger than for several years past. Money continues firm, the supply being fully taken, with increased demands from out-of-town sources.

CINCINNATI.—Unfavorable weather, the new-year holiday and stock-taking render trade dull. Money is more plentiful and rates are easier.

CHICAGO.—The year opened with a good trade, all things considered, and with more orders on the books of jobbers and manufacturers than a year ago. The car shortage continues to be felt in all lines, though the grain trade has been favored with an increased number of cars of late. Shipments from the steel mills are seriously hampered, and the plants have to run their shifts to conform to the shipping facilities. The Illinois Steel Company has had its rail output of 650,000 tons sold for this year for several months, and reports from the east indicate that better than the schedule prices are being secured there. Good inquiries are reported for pig iron, and a number of large sales have been closed at higher prices. No. 2 northern foundry pig iron is selling at $23.50 for the first half of the year and $22.50 to $23.50 for the last half. It is difficult for the billet or steel bar mills to take new orders, as they are sold ahead for most of the year. In December output and sales of wire products reached new high levels, and new business is 20 to 30 per cent. ahead of production. Deliveries are slow. Receipts of eastern coke are small, but the local output relieves the situation to a fair extent. Business with jobbers of dry goods, clothing and shoes is fair, with a strong undertone. Mild weather has permitted the erection of many structures, but cooler weather is promised and activities may be temporarily suspended. Coal is selling freely, but deliveries are slow. In other lines of wholesale trade quiet prevails. Eggs are lower and potatoes higher. Cattle and hogs have advanced, but lambs declined sharply. Receipts of all live stock show a good increase. Money is strong. Prospects favor a good demand for months to come, at high rates Collections are good.

ST. LOUIS.—Manufacturers and jobbers started the new year under favorable conditions, with no let-up in demand. Collections as well as sales during the past season have been unprecedented in almost every line, and for that reason, together with the prosperous condition of the country, every merchant and manufacturer in this region feels more encouraged to push business than ever before. With this feeling of confidence and enthusiasm there seems to be no doubt of the continuation of good times during 1907. The meeting of the various legislatures in the states tributary to this section may to an extent make capital somewhat timid, but it is the general belief among conservative men that nothing will be done to harass or hinder trade. A similar impression prevails regarding the prospective acts of Congress.

KANSAS CITY.—In 1906 sales in leading lines broke previous records. Dry goods, boots, shoes, hats, caps and millinery scored healthy gains. Spring orders in hand give evidence of a bright outlook. Collections are good. Retailers are conducting clearance sales. Lumber and building material continue in demand, due to uninterrupted construction work.

MILWAUKEE.—Business is quiet. Collections are fair and money steady.

SIOUX CITY.—The weather is seasonable. Retailers are holding clearance sales. Jobbing lines are quiet. Collections are fair.

DAVENPORT.—Post-holiday trade, though quiet, equals last year's. Stock-taking is general. In a few cases pre-inventory sales are being pushed, thus imparting some activity. Collections are fairly prompt.

ST. PAUL.—Current wholesale trade is seasonably quiet. Dry-goods houses are stocked up heavily for spring business, but no shipments have been made as yet. Collections have picked up a little. Payments in December, 1906, equaled in volume those of the like month in 1905, but allowing for the volume of business outstanding, collections should have been better by 11 per cent. in order to have been relatively as good as those of December, 1905.

MINNEAPOLIS.—Trade is comparatively quiet. Salesmen are off the road, and many firms are busy with inventories, which will undoubtedly show that 1906 was a successful year. Prospects for the coming year are regarded as quite favorable. Spring orders in hand considerably exceed those of a year ago. Collections are still unsatisfactory, though fewer extensions are being asked. Flour is steady.

OMAHA.—Business is seasonably quiet. Holiday trade exceeded all expectations. Collections are fair to good.

LINCOLN.—Retail trade is being stimulated by discount sales. Open weather reduced the demand for winter goods.

CHARLESTON.—On account of the unsettled condition in this state, caused by a shortage of crops, jobbers do not anticipate a large spring trade. Collections are slow and extensions are still being granted.

AUGUSTA.—Retail trade is quiet. Jobbers report business fair. Collections are fair.

ATLANTA.—In 1906 business in practically all lines showed an increase over 1905. Collections, however, are not so good. The usual failures following the holidays and stock-takings are fewer in number than last year, but amount to more in dollars. There seems to be a feeling with many that conditions do not justify so large a future volume of business as that of 1906. Salesmen are just getting out, and orders so far are not up to expectations.

JACKSONVILLE.—The usual dullness follows the holidays, but the new year starts off full of promise. Wholesalers report good orders. Demand for money is unusually active. Collections are only fair.

BIRMINGHAM.—Southern foundry No. 2 pig iron is quoted at $23.50 for first-quarter delivery. Demand is good. Trade in general is not quite so brisk since the holidays. Collections are a little slow.

MOBILE.—Business is exceedingly dull. Collections, however, equal expectations.

MONTGOMERY.—Business is very quiet. Collections are only fair.

CHATTANOOGA.—Trade, wholesale and retail, is satisfactory. Building is active. Collections are good.

MEMPHIS.—Business is quiet. Merchants are busy inventorying and drummers are preparing to start on the road. Collections are slow. Money is tight. Warehouses and railroad platforms are congested, and the car shortage delays the movement of cotton and lumber.

NASHVILLE.—Trade, following a heavy holiday business, is quiet. Jobbers report unsatisfactory country collections. Stock-taking is general.

LITTLE ROCK.—Wholesale trade shows a small decrease from the same week in 1906. Retail trade is very light owing to forty-eight hours of continuous rain, during which time eight inches of water fell. Washouts have caused an entire shutout of all railway service. Little cotton has been offered for shipment during the past week, and such as remains in fields has been badly damaged, being under water in many instances. Wholesale collections are good, and retail fair.

NEW ORLEANS.—Post-holiday quietness prevails. Jobbers are sending travelers out for spring trade, and preparations are under way for an active business. Collections show a tendency to improve, but money is still tight.

FORT WORTH.—Stock-taking is in progress and very satisfactory results are expected. The outlook continues bright. Collections are good.

DALLAS.—Business is quiet, jobbers and retailers being busy stock-taking. Indications for spring business are excellent. Collections are fair.

SAN FRANCISCO.—Trade continues excellent and without the usual post-holiday dullness. Reconstruction continues despite wet weather.

SEATTLE.—Stock-taking is under way and business is slack. Wheat is moving slowly on account of the car shortage, and a coal famine which has existed here for some time has not been relieved to any great extent. Collections are good.

SPOKANE.—Real estate and building continue active. In wholesale lines business is good and collections are fair.

TACOMA.—Trade is reasonably active. Merchants express extreme satisfaction over the year's business. Real estate is in good demand at increased prices.

PORTLAND, ORE.—The usual lull coincident with stock-taking exists. The car situation is somewhat improved, and manufacturers, particularly of lumber, are able to move considerable product. Collections are good.

TORONTO.—Added to the quiet usual at this time of year, some effect is felt from the unseasonable weather prevailing. Retail trade in winter lines is generally slow, and wholesalers find the sorting trade rather less active. In other parts of the country there is, however, excellent sleighing, and this greatly helps the retail movement in all lines. It was these weather conditions that made December's trade the biggest on record. There is great activity here in the way of preparation for spring business, and general conditions incline wholesalers to hope that business will this year be even heavier than that of twelve months ago. In all lines of dry goods orders already placed have been exceedingly heavy. Silks are unusually active and hold very firm. Cottons and linens also hold up well; deliveries of the latter are still inclined to be slow. Hardware moves well, and groceries are about steady. Teas are advancing. Collections from all points are beginning to improve, and it is to be expected that during this month they will be unusually prompt. Industries here and at all points in Ontario are actively engaged. Manufacturers in many lines are still unable to quite keep up with the business in hand. Values of country products hold steady to firm.

MONTREAL.—General trade continues quiet. From all appearances the coming spring and summer is going to be one of the best on record. Retail traders are showing confidence by placing large orders for spring lines. Manufacturers in certain lines, particularly dry goods, have taken all the orders they will be able to fill this season, and there is little chance for lower prices. For the most part the weather has held very well, and a good sorting trade for winter lines is expected to open out shortly. Collections are generally good. There is a big business being done in hardware and metals, and steel and iron hold firm on brisk demand. The great railroad extension which has been going on in all parts of the country is partly responsible for this, and the enormous sums being spent in this connection are a factor in the general prosperity. Country trade is now a little quiet. Receipts of produce are light and prices hold firm. Hogs are firm in tone.

VANCOUVER-VICTORIA.—Business continues active all along the coast. The lumber business is brisk. Good orders for next spring are coming in, although this season's orders are not yet filled. There is a great demand for heavy railroad timbers, and lumber prices generally are expected to go higher. General wholesale trade is moving well. Values in all lines are well maintained. Vancouver's building permits and bank clearings show heavy gains over those of the same month last year. Collections are good.

WINNIPEG.—Wholesalers are busy stock-taking and are much pleased at the results of the year's business. Trade has a quiet tone and it will continue so for two or three weeks, but the outlook for the coming season is exceedingly favorable. Spring orders are large and deliveries will commence shortly. Collections are fair to good. Owing to the delay experienced in moving crops, money is getting into farmers' hands gradually, instead of in a lump sum, as in former years. It is stated this is having the effect of keeping down land speculation, which has always been an adverse factor in the matter of collections.

Money Market.

During the present week the New York loan market acted as it was expected to do, being very firm on the last day of the old year, but developed an easier tone with a lowering of rates in the last three days when the January 1 disbursements had been completed. It was noted, however, that on last Monday the highest quotation for call loans was 40 per cent., with renewals at 25 per cent., whereas in the concluding loan market of 1905, renewals were 40 per cent., and as high as 75 per cent. was recorded for call money. On Wednesday 20 per cent. was the extreme figure, and renewals dropped to 15 per cent. with a further recession to 8 per cent. on Thursday, on which day quotations as low as 2 per cent. were made,

representing, however, merely the final loans of the day. On Friday the decline in rates was more pronounced, 6 per cent. being the highest, and renewals were mostly at 5½ per cent. In time money the relief from the recent strain was also apparent, the offerings being again fairly liberal, while it was noted that borrowers showed a decided disposition to stand off in the expectation of a further relaxation in rates for such accommodation. Commercial paper continues inactive, and in this department it is also noted that the offerings are limited, mercantile interests considering that they can secure lower rates by waiting. The January disbursements were, of course, calculated to make the week's movement of funds confusing, but the estimates point to a gain by the banks of $5,000,000 cash for the week. More or less attention was paid to the sharp recovery in foreign exchange rates following the drop in money, but suggestions that this movement may continue to a point where gold exports would become imminent are not taken seriously.

New York Banks.

Last Saturday's Clearing House statement showed a gain of $4,501,400 in the cash items, which was larger than the estimate of the week's net results as regards the actual movements of money. At the same time the averages gave an increase of $5,789,700 in loans, which was unexpected on account of the stock market liquidation which had been in progress. The figures of the statement, however, were doubtless affected by the preparations for January 1 interest and dividend payments, this also holding true of a gain in the deposits of $9,652,300, whereby the reserve requirements increased $2,413,075, and the gain in surplus reserve was consequently $2,088,325. The statement compares as follows with that of the preceding week:

	Dec. 29	Dec. 22	Changes
Loans	$1,032,973,000	$1,027,183,300	I. $5,789,700
Specie	179,323,000	176,627,600	I. 2,695,400
Legal tenders	71,371,500	69,565,500	I. 1,806,000
Deposits	*981,301,100	971,648,800	I. 9,652,300
Circulation	53,670,800	53,525,600	I. 145,200
Total reserve	250,694,500	246,193,100	I. 4,501,400
Reserve required	245,325,275	242,912,200	I. 2,413,075
Surplus reserve	5,369,225	3,280,900	I. 2,088,325

The following compares the statements for the respective weeks in 1906, 1905 and 1904:

	Dec. 29, 1906	Dec. 30, 1905	Dec. 31, 1904
Loans	$1,032,973,000	$1,001,025,000	$1,066,701,200
Specie	179,323,000	173,005,600	208,554,800

Foreign Exchange.

With the relaxation in the loan market following the completion of the January 1 payments, foreign exchange had a decided advance this week. Such tendencies, in fact, asserted themselves on last Monday, there being on that day a renewed and rather urgent inquiry for remittances, which carried actual demand sterling from 4.82.75 on Saturday up to 4.83.65. On Wednesday the movement became more pronounced, the demand rate rising to 4.84.75, or 2 cents advance in four days, posted rates being marked up to 4.80½@4.85. On Thursday the market reacted more or less, but finally recovered, and on Friday was steady at a further rise to around 4.85 for demand. The advance gave occasion for more or less discussion as to whether Europe might not be able to draw gold from the United States, but the general opinion was that such operations would be unlikely in view of the continued narrow supplies of funds in the New York loan market, and the certainty that withdrawals of gold would create a renewed hardening of money rates here.

Closing quotations on Friday for actual business in other classes of bills were: Cables, 4.86; commercial bills, 4.79¼@4.80½; francs, 5.23¾ less 1-16@5 20⅝ plus 1-64; reichsmarks, 93½ @94 7-16.

The Bank of England's discount rate remains at 6 per cent. During the week it gained £1,218,000 in gold, and its proportion of reserve was reported as 33.50 per cent. of the liability, against 37.13 per cent. last week. In the London open market call money is lower at 3½@4 per cent., and discounts are 4 15-16@5 1-16 per cent. The Bank of France reported a decrease of 40,925,000 francs in gold for the week. Its rate is unchanged at 3 per cent, the Paris market quotation for discounts being also 3 per cent. At Berlin the bank rate remains 7 per cent., but the market for discounts is lower at 5⅛ per cent.

New York Securities Market.

Up to Friday of this week the stock market was rather flat, stale and unprofitable. On that day a considerably stronger tone and a fair degree of activity, in contrast with the early dullness, was shown. Money was easier early, but this in itself did not suffice to bring the market out of the rut it was in. The daily sales of about 600,000 shares contrasted rather poorly with the million to million and a half share markets which ruled in the early part of January a year ago. The main feature early seemed to be the uncertain position of the leading high-priced stocks of the Hill and Harriman groups, which had a rather weak tone and tended to recede on limited selling pressure. There was, however, no general disposition to work on the bear side, and it was largely a waiting market. The symptoms of easier money were offset by warnings that a period of permanently lower rates was not yet at hand. Predictions of gold exports due to the rise in foreign exchange did not, however, find much support. On the other hand, the raising of the Delaware & Hudson dividend from 7 to 8 per cent. fell flat.

Decided changes in quotations were accordingly lacking early. As already indicated, the Hill stocks were conspicuously heavy, but in this respect shared the honors with St. Paul and Union Pacific. Reading also was the object of some irregular selling pressure, and Delaware & Hudson, instead of rising on the increased dividend, declined a little apparently on realizing sales. On the other hand, Amalgamated Copper was exceptionally strong, although it is impossible to say whether this was not the result of pure manipulation or otherwise. There were, however, reports that the next quarterly dividend will be increased, perhaps to an extent placing the stock on a 10 per cent. basis. It is also to be remarked that a number of the lower-priced dividend payers and specialties acted well and tended to advance.

On Friday, as already stated, there was a transformation. The dealings rose to over 900,000 shares, and the whole market broadened in response to the further decline of call-loan rates to 5@6 per cent. While practically the entire active list participated in the improvement, the lead was taken by the newer favorites, Amalgamated in particular selling up to 120. Reading, however, was again strong, and the Hill and Harriman stocks recovered materially.

Boston Stock Market.

Cereal Crop Movement.

The movement of flour and of leading grains at primary points for the week and for the twenty-six weeks of the present season compares with similar periods in 1905 and 1904 as follows:

Week ending	*Flour, barrels*	*Wheat, bushels*	*Corn, bushels*	*Oats, bushels*
Dec. 29, 1906	314,504	4,863,607	6,017,414	2,846,445
Dec. 30, 1905	222,385	5,265,505	5,940,143	4,148,130
Dec. 31, 1904	261,601	2,899,095	6,510,139	1,785,100
Season				
July 1 to December 29, 1906	11,821,773	154,490,050	90,837,308	112,394,037
July 1 to December 30, 1905	11,378,866	162,974,393	97,814,841	126,993,496
July 1 to December 31, 1904	10,129,292	147,309,918	92,004,451	95,778,046

Grain on Passage.

Total	4,651,000	3,680,500	5,754,000

Statistical Situation of Cotton.

The aggregate world's visible supply of American and other cotton last week, as made up by the New Orleans Cotton Exchange, is shown, with comparisons:

Week ending	*Dec.* 28, 1906	*Dec.* 21, 1906	*Dec.* 29, 1905
American	4,124,646	3,937,956	4,153,977
Other kinds	1,049,000	943,000	1,154,000
Total	5,173,646	4,880,956	5,307,977

Of the world's visible supply, as above, there were afloat for or held in various countries on the dates given the following quantities:

	Dec. 28, 1906	*Dec.* 21, 1906	*Dec.* 29, 1905
Great Britain and continent	2,402,000	2,199,000	2,575,000
Egypt	238,000	217,000	191,000
India	452,000	405,000	613,000
United States	2,082,000	2,060,000	1,929,000
Total	5,174,000	4,881,000	5,308,000

Following will be found the movement of cotton into sight for the week and season, as compiled by the New York Cotton Exchange:

	This week	*Last week*	*Last year*
Week	449,318	458,941	220,525
Season	8,293,039	7,843,721	7,176,039

Boston Shoe and Leather Market.

The leather market for December was, on the whole, better than the average for that month. Union sole was active, some good sales being reported. Oak sole improved in activity and calfskins were bought in good quantities in the aggregate, shoe manufacturers covering orders as fast as received. Prices are very firm. Hides are apparently held in strong hands and concessions in prices as a rule mean lack of quality in the material. Foreign markets are a trifle easier for green salted hides. Shoe manufacturers report shoe jobbers buying with extreme conservatism. They are not placing as large orders as a year ago and express intention of buying later only when their stocks are becoming reduced by actual sales. The *Shoe and Leather Reporter's* shipments figures for the year 1906 are given below: Last week, 71,048 cases; preceding week, 89,161; last year, 85,671; total for 1906, 5,082,380; total for 1905, 5,058,795; increase, 23,585.

Boston Wool Market.

There was a large increase in the amount of sales of wool during the past week, and now that the holidays are over, the movement is steadily increasing. Prices did not vary much from those quoted for the past two weeks, but the general feeling was stronger. All foreign markets are showing great strength, and the attention of Boston dealers is largely taken up with events abroad, knowing that stocks of domestic wool will all be wanted. Both fleece and territory staple wools are well cleaned up, and there is a steady movement of fair volume in clothing wools. The scarcity of staple wools has caused a good demand for Australian fine crossbreds from 50s to 60s, especially 56s to 58s, and fine merinos are so scarce that American manufacturers have purchased freely abroad at high prices. From twelve to fifteen buyers from Boston will attend the London sales, which open January 15, but there is much wool, mostly for manufacturers' account, on the way from Melbourne to this country, which will probably commence to arrive by January 20, and this may reduce the urgency in the demand for these classes of wool in this country for a time, so that American buyers cannot pay too high prices abroad. It is said that there has been some contracting done in the west by eastern parties. Among the sales of the week are reported fine and fine medium clothing territory at 22@23 cents, eastern Oregon at 23@24 cents, fall Texas at 22@23 cents, California middle counties at 21@23 cents, fleece XX fleeces at 34 cents, delaine at 37 cents, merino and crossbred Australian wools at previous quotations and 600 bags East India wool at 32@41 cents.

THE NATION'S PROPERTY VALUE.

The census report just issued gives the estimated true value of Uncle Sam's property in 1904 as $107,104,211,917, compared with $88,517,306,775 in 1900, an increase in four years of $18,586,905,142, which is equal to an average yearly increase of $4,646,726,285. On the basis of 85,000,000 population the yearly increase is about $55 per capita.

By main classes of property the values for each of the years were:

	1904	1900
Real property and improvements	$62,341,492,134	$52,537,628,164
Live stock	4,073,791,136	3,306,473,728
Farm implements and machinery	844,980,863	749,775,970
Manufacturing machinery, tools and implements	3,297,754,182	2,541,046,639
Gold and silver coin and bullion	1,998,603,393	1,677,379,825
Railroads and equipment	11,244,752,000	9,035,732,000
Street railways, shipping, waterworks, etc	4,810,546,939	3,495,228,350
All other property	18,462,281,792	15,174,042,540

In round millions of dollars the increases in values in 1904 were:

Real property and improvements	$9,804,000,000
Live stock	767,000,000
Farm implements and machinery	95,000,000
Manufacturing machinery, tools and implements	756,000,000
Gold and silver coin and bullion	322,000,000
Railroads and equipment	2,209,000,000
Street railways, shipping, waterworks, etc	1,345,000,000
All other property	3,288,000,000

By geographical divisions of states the comparison of total property values is:

	1904	1900
North Atlantic	$38,301,608,078	$32,306,482,253
South Atlantic	7,036,882,951	6,679,190,048
North central	40,820,672,079	33,446,949,385
South central	10,052,457,528	8,207,174,377
Western	9,992,581,271	7,877,510,712

The ten states having the largest value in property were:

New York	$14,679,042,207
Pennsylvania	11,473,620,306
Illinois	8,816,556,191
Ohio	5,946,969,466
Massachusetts	4,956,578,913
California	4,115,491,166
Iowa	4,048,516,078
Missouri	3,759,597,451
Minnesota	3,343,722,076
Michigan	3,282,419,117

These states have a property value of about $64,000,000,000, or about two-thirds of the whole value of all the property in all the states and territories of the country.

The increased values in these ten states in the four years are:

New York	$2,264,000,000
Pennsylvania	2,158,000,000
Illinois	1,840,000,000
Ohio	927,000,000
Massachusetts	598,000,000
California	897,000,000
Iowa	681,000,000
Missouri	515,000,000
Minnesota	830,000,000
Michigan	628,000,000

CUTTING METAL BY HEAT.

"The cutting of metals by heat has been accomplished by the use of the gas blow-pipe, and recently on a larger scale by the use of the electric arc," says the *Railway Age*. "An interesting application of the process was carried out in the construction of the new Hoffman House at Broadway and Twenty-fifth street, New York City. The heavy interlocking steel piling used in the foundation work projected unevenly on account of the underlying rock and it was desirable to trim this off to an even level. The current used was single-phase, having an initial potential of 2,500 volts, with a secondary voltage of fifty. One wire of the circuit was bolted directly to the sheet piling and the other connected directly with the carbon electrode, which was 1¼ by ¾ inch and clamped between two copper plates five inches square by ½ inch thick. These copper plates could be used for about fifteen hours, when they became so buckled as to require renewal. The circuit is completed without extra resistance, the operator simply pushing the electrode against the steel piles, thus forming the arc, and care is exercised so that the arc is not disrupted. The depth of the cut varied from ½ inch at the center of the pile to 3½ inches at the junctions. A current of 650 amperes at a potential of fifty volts was required, which is equivalent to a consumption of thirty-two kilowatts.

"By the aid of this device ten lineal feet of piling were cut in eight hours with an energy consumption of 256 kilowatt-hours. The cost of labor was $4 per day, and with the current at 10 cents per kilowatt-hour, the total cost of operation was $30 per day, or $3 per foot of piling cut. While this is one of the first commercial attempts to cut metals by electricity, it is sure to have numerous applications in situations similar to that described; that is, in out of the way places where it is difficult to use powerful machine tools. It is quite probable that the further use of the electric arc in cutting metal will develop still greater efficiency and will find such convenient application that it may in some instances come into competition with the work of machine tools. The intense heat and light from the arc may be rather uncomfortable for the operator, but when further developed, means will doubtless be provided for proper protection in this respect.

SMOKE AND ITS PREVENTION.

Dr. R. S. Moss, writing in the *Black Diamond*, says that "the prevention of smoke in stationary plants is being agitated more every day; within the city limits this agitation also applies to railroad engines, tugboats and river steamers. The prevention of smoke when using western or, for that matter, any coal rich in volatile combustible depends upon well defined laws of combustion, and wherever those are carried out smoke is prevented. It would be well for consumers of coal to acquaint themselves with the laws of combustion; they would then be able to judge and accept only such device that would meet the laws of combustion; it would by this means eliminate a number of so-called smoke-consuming devices now so persistently flaunted before the minds of coal consumers, most of whom are not capable of forming an intelligent opinion between the good and the bad.

"Let us examine the laws of combustion and state our facts as far as possible in such a simple everyday matter-of-fact language that anyone may understand. First, what is combustion? Simply the union of the combustible matter in the coal with the oxygen present in the atmosphere. Anyone knows that water will not burn; therefore the water, or moisture, as it is termed, in the coal is not a part of the combustible matter. While this does not apply in perhaps the same manner to the ash, yet, for simplicity, ash is not combustible; therefore the valuable ingredients in the coal are termed combustible. This combustible is composed of volatile matter, which, as its name implies, may be distilled from the coal when subjected to heat in a closed retort, forming solid, liquid and gaseous products, but when in contact with the air those bodies composed for the most part of carbon and hydrogen may burn to invisible gases, or may pass off mixed with air in the form of smoke. The evidence remaining after the volatile matter passes off is the coke, a mixture of carbon which is combustible, plus the useless substance ash, which not only is not combustible, that is, will not burn, but in proportion to its amount acts as a deterrent to combustion, and makes it more difficult to burn the whole of the carbon in the coke in proportion to the greater the amount of ash the coke contains. One can readily understand that it will under ordinary conditions be far more difficult to burn with equal efficiency a coal having 16 per cent. ash as against 8 per cent. ash, other things as to size of coal and furnace conditions the same. Sixteen per cent. ash in the coal with 34 per cent. volatile matter means considerably more in the coke.

"Now it is understood that air is just as important to proper and complete combustion as is the coal. One must supply a proper amount of air and in as finely divided condition as possible; that is, sift the air, as it were, over all the space where volatile matter or combustion is taking place, for it is absolutely essential that each particle of volatile combustible must have its corresponding amount of air if we desire to get smokeless combustion; also the air and gas or volatile combustible after having become thoroughly mixed must be at the right temperature or they will not unite with one another; this temperature must not be less than 600 degrees Fahrenheit. Having obtained such conditions, it will be found that clean smokeless combustion will take place; if any particle of volatile combustible is not supplied with air, then it will pass up the stack in the form of smoke; hence no matter how hot the volatile combustible gases may be, smoke will be produced unless thoroughly mixed with air. It is this combination of causes that produces the dense black smoke so often seen emanating from our chimney stacks. It needs intelligence and proper installation of those reliable stokers to entirely prevent smoke. It is absolutely impossible to do so by means of hand firing, because it is too intermittent and the air and coal can never be proportioned to the required amount. Then, again, whenever the furnace door is opened large volumes of cold air pass through the furnace, cooling the gases below the point of ignition or burning point, besides the cooling effect of the raw coal thrown on top of a mass of incandescent fuel, which does nothing more than distill the volatile matter at a temperature so low that it will not burn, no matter how thoroughly it may be mixed with air. This is probably the cause producing dense black smoke in nine cases out of ten.

"What can we do to prevent this? Let us see. Suppose that instead of throwing the coal on the top of the fire it was put in below and gradually forced up to the mass of hot coke. Would not the heat radiating downward raise the temperature of the raw coal to the point at which it would give off its volatile matter or smoke? Then, suppose this smoke was obliged to pass up through the mass of hot coke. Would it not become heated sufficiently so that it would unite or burn when properly mixed with air? And suppose air was heated and in a finely divided stream was passed into this volatile combustible matter at every point where the volatile matter was being given off—would not this make a mixture that would burn very rapidly? Then, suppose the air supply was automatically regulated after once being set to give just the proper amount of air for complete combustion—does it not follow as a matter of ordinary common sense that such principles when properly carried out would entirely prevent smoke? Not only that, but would give more heat per pound of coal than when smoke is produced; thus an economy as well as the total elimination of smoke.

"Then, further, suppose that, while the air is properly regulated in proportion to the amount of coal consumed, it was still automatically arranged to feed the coal and supply the air only in accordance with the demand for steam, it would seem that such a system is well-nigh perfect, and offers a solution in a practical manner to the elimination of smoke and economy in fuel while burning smoky coal."

THE 1906 CORN PACK.

The overproduction of canned corn in 1905 led to conservative action on the part of the packers in the campaign of 1906, resulting, as the record shows, in a total output in the United States of 9,136,900 cases, a reduction of nearly 30 per cent. from 1905. In Canada there was a gain of 25,000 cases, so that the combined pack of the two countries was about 29 per cent. below the record of the previous year.

This is a notable result, for conditions throughout the United States were so favorable for the corn crop that the total yield of field corn was about 3,000,000,000 bushels, the largest ever harvested. The decreased acreage of sweet corn was offset in Iowa, Illinois and other states by an exceptionally fine yield, and as some packers could not resist the temptation to put it into cans, the pack in those states proved heavier than anticipated. The demand for cans continued into October, or until hard frost put a stop to canning, which was in progress when the writer visited Illinois in October.

The table presented below shows better than words the result as compared with 1905, when the pack was undoubtedly heavier than reported. And while convinced of the fact we did not go behind the packers' returns, nor overestimate the output of those not signing a report.

In detail the pack was as follows (in cases of two dozen tins each):

	1905	1906
Maine (including Vermont)	1,348,751	939,698
New York	1,583,969	1,422,012
Maryland and Virginia	1,676,240	1,058,492
Iowa	2,557,104	1,815,900
Illinois	1,963,617	1,243,106
Ohio	1,140,631	648,796
Indiana	1,025,606	621,433
Pennsylvania	220,022	199,920
Nebraska	441,000	251,300
Missouri	47,100	29,100
Delaware	95,300	110,040
Wisconsin	443,055	441,711
Minnesota	272,030	192,033
Michigan	145,152	119,300
Kansas	53,887	32,819
All other states	5,231	12,400
Total, United States	13,018,665	9,136,960
Canada	400,000	425,000
Total, United States and Canada	13,418,665	9,561,960

The pack of corn in 1906 compares with the output of nine previous years as follows (in cases of two dozen tins each):

1906	9,561,960	1901	5,027,735
1905	13,418,665	1900	6,485,624
1904	11,462,969	1899	5,463,420
1903	4,861,146	1898	4,448,563
1902	4,191,087	1897	2,908,740
Total, ten years			67,829,909
Average per year			6,782 990
Average per year 1904-06			11,481,198
Average per year 1902-06			8,699,165

Certainly the United States are enjoying a prosperity never before attained, and with a mania for eating in full possession of 84,000,000 people, an average yearly pack of 11,000,000 cases of corn for three years ought to disappear long before the pack of 1907 is in sight. We believe it will, for the demand for the article by reason of low cost and high prices for other canned vegetables has been unprecedented.

The average quality of the pack of 1905 was higher than that of 1904, while the output of 1906 is way ahead of the quality of the previous year's pack. The product of the chief corn-packing states the past season was very high.

STATISTICS ON SUGAR.

Willett & Gray, in their annual sugar review, figure the average price of centrifugals for 1906 at 3.686 cents a pound, against 4.278 cents in 1905, 3.974 cents in 1904, 3.72 cents in 1903, 3.542 cents in 1902, 4.017 cents in 1901, 4.565 cents in 1900, 4.419 cents in 1899 and 4.235 cents in 1898. The average for ten years is 4 cents, duty paid, but during this period duties varied considerably.

The average price of granulated in 1906 was 4 515 cents a pound, against 5.256 cents in 1905, 4.772 cents in 1904, 4.638 cents in 1903, 4.455 cents in 1902, 5.050 cents in 5.32 cents in 1900 and 4.919 cents in 1899.

The average difference between raw and refined in 1906 was .829 cent a pound, against .978 cent in 1905 and .798 cent in 1904. The average price of granulated for ten years is 4.84 cents per pound. The average difference between raw and refined for ten years is .84 cent per pound.

The refining capacity is slightly increased over that of 1905 and is more than sufficient to supply the consumption.

The highest price for granulated sugar since July, 1897, is 6 cents per pound, on March 1, 1905, and the lowest, 4.21 cents per pound, in November, 1902.

Willett & Gray have prepared the following statistics to show the progress made by the beet-sugar industry in the United States during the past fifteen years. The production stated for the present season (1906-07) is necessarily estimated, as some factories have not yet completed their run.

	Tons produced	*Factories operated*
1906-07	395,000	63
1905-06	283,717	53
1904-05	229,722	51
1903-04	208,135	53
1902-03	195,463	44
1901-02	163,126	39
1900-01	76,859	34
1899-1900	72,944	31
1898-99	32,471	15
1897-98	40,399	9
1896-97	37,536	7
1895-96	29,220	6
1894-95	20,092	5
1893-94	19,550	6
1892-93	12,018	6

A FAIRLY COMPLETE STORY OF THE RAILWAYS IN 1906.

The *Railway Age* has performed a commendable service in compiling statistics regarding American railways in 1906. At the outset this authority points out that "6,000 miles of new railway were built in 1906, orders were placed during the year for 3,400 passenger cars, 5,650 locomotives and 310,000 freight cars, representing an expenditure of nearly three-quarters of a billion dollars. The record of foreclosures and receiverships continues to show the encouragingly small number of mortalities among railway corporations which has characterized the last four or five years.

"The statistics of block signaling are interesting and encouraging, though the totals are not as large as many would like to see. They indicate that the larger systems appreciate the importance of equiping their lines with automatic block signals. There has been an encouraging growth and development in this direction, and the future is large with promise that the railways will install the needed signal protection as fast as their revenues will enable them to incur the heavy expenditures which block-signaling equipment on a large scale entails.

"The total of 6,000 miles of railway built (the largest record in eighteen years) is not an adequate expression of the real activity in new railway construction. The extensive plans which are maturing for increased mileage in the northwestern part of the United States and in Canada, where a great deal of work has been done, but on which little new road has been completed, are not reflected in these returns. Our construction statistics take account only of completed track and not of grading

and other very important and expensive construction work. As is to be expected, the new mileage is greatest in the southwest, west and northwest, and indicates the degree to which industrial development is manifesting itself in the great and growing west.

"Perhaps the most interesting figures presented are those bearing upon freight-car equipment. The widespread interest and anxiety aroused by the freight congestion and car shortage have doubtless given to many people the impression that the railways have not put forth their best efforts to provide themselves with necessary equipment. As a matter of fact, the returns show that they have done as much as, if not more than, was reasonably to have been expected.

"During the year 1905 American railways, including those of Canada and Mexico, placed orders for 341,315 freight cars. Out of this total 22,839 cars were ordered from railway shops in the United States; 8,048 were ordered by Canadian railways of their own shops; 7,226 were ordered by Canadian railways from Canadian builders; 326 were ordered by Mexican railways from builders in Mexico. These several items make a total of 38,439, which deducted from the grand total of 341,315 leaves a balance of 302,876 cars, orders for which were placed during 1905 with the contract shops of the United States.

"The total number of freight cars ordered during 1906 was 310,805. Of these 28,810 were ordered from American railway shops; 12,718 were ordered by Canadian railways from Canadian builders; 10,140 were ordered by Canadian railways from their own shops; while 271 were ordered by Mexican railways from Mexican railway shops. These items make a total of 51,939, which deducted from the grand total for 1906, of 310,805, leaves a balance of 258,866 cars ordered during 1906 from the contract builders of the United States. In this number were 3,888 cars ordered by Mexican roads.

"It is somewhat difficult to get at the exact capacity of the car-building establishments of the country. Estimates indicate that the present capacity is about 200,000 freight cars a year. During 1905 the contract shops had a capacity of about 175,000 cars per year. Extended improvements recently completed or now under way indicate that the total capacity available during 1907 will approximate 250,000 cars per year.

"Orders now in hand will engage the capacity of the car-building establishments until September 1, 1907. In other words, two-thirds of the capacity for the ensuing year, or about 170,000 cars, is already taken up. Assuming that at the beginning of 1905 the car builders had the orders for 1904 practically cleared up—that is to say, that they began even in 1905—we deduce the following:

CAPACITY OF PLANTS.	*Cars*
1905	175,000
1906	200,000
1907 (eight months)	170,000
Total	545,000
ORDERS PLACED WITH CONTRACT SHOPS.	*Cars*
1905	302,876
1906	258,866
Total	561,742

"The comparison confirms with reasonable exactitude the statement that the orders now in hand will keep the builders working to their maximum capacity until September 1, 1907, and it goes to show that the railways have for two years or more discounted by six to twelve months the freight-car producing capacity of the country.

"Another remarkable feature shown in the freight-car statistics is the tremendous expansion in the demand for steel cars and cars with steel underframes. Returns show that 142,172, or 46 per per cent., of the freight cars ordered during the year were specified to be of steel or to have steel underframes. This is a growth of about 400 per cent. as compared with the year 1901. The use of fireproof steel cars for passenger service is growing rapidly. Cars of this class are now generally regarded as essential in tunnels and subways, where no other form of construction is thought of. The Pullman Company has about completed the first steel sleeping car which is to be entirely fireproof. The Union Pacific and the Southern Pacific are both engaged in building steel passenger cars at their own shops, and several of the large car builders are prepared to take contracts for this class of equipment.

"The orders for locomotives placed during 1906, while less by 623 engines than the total for 1905, indicated a remarkable demand for power, when the figures are compared with those for 1903 and 1904. The year has been notable in the development of types of locomotives which combine great power and great weight.

"The returns of motive power and rolling stock constructed during the last six years follow:

	1901	1902	1903	1904	1905	1906
Locomotives	4,340	4,665	3,283	2,538	6,265	5,642
Pass. cars	2,879	3,459	2,310	2,213	3,289	3,402
Freight cars	193,439	195,248	108,936	136,561	341,315	310,805

"The new mileage built in 1906 is shown as follows:

	No. lines	*Miles*		*No. lines*	*Miles*
Alabama	16	80.14	Missouri	4	25.66
Alaska	3	39.50	Montana	1	16
Arizona	4	43.49	Nebraska	4	136.74
Arkansas	20	240.03	Nevada	6	360.37

Mississippi	19	176.92	Wyoming	4	214 85
Total in forty-four states and territories				388	6,067.40

The increase in mileage for the past twenty years is shown in the following table:

1887	12,983	1897	1,880
1888	7,106	1898	3,083
1889	5,230	1899	4,588
1890	5,670	1900	4,437
1891	4,281	1901	5,222
1892	4,192	1902	5,684
1893	2,635	1903	5,786
1894	1,949	1904	4,252
1895	1,823	1905	5,000
1896	1,848	1906	6,067

WORLD'S GROWTH IN TEN YEARS.

According to the English "Blue Book," the entire population of the principal countries of the world is placed at 570,000,000, as compared with 506,000,000 in 1895, or an increase in the population of the principal countries of the world of 63,000,000 persons. The figures are as follows, in seven of the largest populated countries, for the years 1905 and 1895:

	1895	1905
Russia	125,000,000	141,200,000
United States	68,934,000	83,143,000
Germany	52,279,000	60,605,000
Japan	42,271,000	47,975,000
United Kingdom	39,221,000	43,221,000
France	38,459,000	39,3 0,000
Italy	31,296,000	33,604,000

The most crowded civilized nation in the world is Belgium, while the nation which has the most room for expansion is the United States. The United States has an area of 3,567,371 square miles and an average of 21.4 persons to the square mile, while Belgium has an area of 11,370 square miles and an average of 588.7 persons to the square mile.

London is still the only city in the world that can boast of a population of over 4,000,000, the exact figure being 4,872,710. The following table shows the population of six of the largest cities in the world:

London	4,872,710	Berlin	2,640,000
New York	3,437,000	Tokio	1,819,000
Paris	2,714,000	Chicago	1,699,000

The total debt of nine of the important civilized nations amounts to £4,000,000,000. The following figures show the expenditure and debt of the largest countries in detail:

	Expenditure	*Debt*
Russia	£223,675,000	£747,518,000
United States	150,022,000	296,222,000
United Kingdom	146,961,000	796,736,000
France	143,889,000	1,038,379,000
Germany	110,444,000	161,344,000
Italy	74,219,000	517,247,000

BRADSTREET'S

PUBLISHED WEEKLY BY

THE BRADSTREET COMPANY,

NOS. 346 AND 348 BROADWAY, NEW YORK.

Berlin, 23 Charlotten-Strasse.
London, 137 Cheapside, E. C.
Melbourne, 231 Flinders Lane.
Paris, 20 Boulevard Montmartre.

TERMS: $5.00 PER YEAR IN ADVANCE.
Remit by Express Money Order, Draft, P. O. Order or Registered Letter.

Communications regarding editorial matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, JANUARY 12, 1907.

Some noteworthy statistics which give an indication of the importance of New York as a municipality are presented in the annual message of Mayor McClellan sent to the Board of Aldermen this week. It appears from the figures given that the city owes a little over $500,000,000; that in two years the debt has increased over $89,600,000, and that the borrowing capacity of the municipality is now something over $72,000,000. The debt of the city is more than half that of the United States, and is greater than that of, say, Argentina or the Netherlands. A municipality of this importance, with a population in excess of 4,000,000 persons distributed unequally in a number of boroughs separated by bodies of water, presents many problems of difficulty, of which, perhaps, the most pressing is that of supplying adequate means of transportation, a subject to which the mayor devotes much attention in his message. It is a matter of contemporaneous interest that on the day in which the mayor sent his annual message to the Board of Aldermen the recently elected attorney-general of the state instituted proceedings to oust him from office on the ground that in the election of November, 1905, his competitor, the late unsuccessful candidate for governor, was duly chosen to the mayoralty, but was excluded from office through an improper count of the votes.

The question of the taxation of incomes seems to be coming into the foreground again. It will be remembered that the President in his annual message took the ground that if an income tax could be devised which would be constitutional it would certainly be desirable. He seemed, however, to take the view that the tax should be imposed by national authority. A majority of the Special Tax Commission in New York seem to agree with Mr. Roosevelt as to the desirability of an income tax, but they seem prepared to recommend it as a piece of state legislation. According to report, the commission has under consideration a bill taxing incomes above $500 a year. Beginning at 1 per cent. on incomes between that sum and the first $10,000 above the amount of exemption, the rate is raised progressively until a tax of 20 per cent. is reached, which is imposed upon all incomes over $200,000 annually. This will be the most noteworthy change suggested by the commission, which, however, will recommend a number of other changes in the laws respecting taxation.

A privileged status has been given by a resolution of the House to the bill to be reported by the special joint committee on the revision of the laws creating a penal code for the United States. This bill, which will contain 345 sections, is the result of nine years' labor on the part of the commission appointed to revise the laws. It is understood that but few of the changes suggested by the commission have been accepted by the special committee. Such alterations as have been made comprise in the main changes in classifications or in penalties. The action of the House in giving this measure a preferred place on its calendar will doubtless affect seriously the fate of some other measures. The session is a short one, and there are large possibilities of delay in discussions upon legislation affecting the liberty of individuals. If the House should be in a mood to take up the amendments in anything like a critical spirit, the chances for any other than appropriation bills securing a hearing would be rather slim.

It is now deemed likely that, instead of amending the pending treaty between Santo Domingo and the United States, the administration will negotiate a new treaty, which will be submitted to the Senate as a substitute for the one which has been under consideration. This much was, in effect, suggested by Secretary Root at a hearing before the Senate Committee on Foreign Relations, on Wednesday. The Secretary informed the committee that an agreement had been reached between the Dominican government and its creditors which made possible the elimination of several features of the pending treaty which were regarded as objectionable by members of the ratifying body. As the result of this agreement the total indebtedness of the republic will be reduced to about $17,000,000, the foreign claims being scaled down from $21,000,000 to about $12,000,000, and the domestic debt from over $9,000,000 to about $5,000,000. This scaling down has only been rendered possible by the understanding that the United States government will continue to exercise some sort of control over the collection and distribution of the republic's revenues. Thus far about $2,250,000 has been sequestrated by the American customs administration of the country for the purpose of liquidating obligations. The Senate committee seems to regard favorably the proposed substitute, which, it is agreed, will contain nothing indicating the existence of a protectorate by the United States over Santo Domingo.

It seems that information has been brought to the attention of the Senate Committee on Interoceanic Canals regarding the nature of the soil formation at the site of the proposed Gatun dam which calls for careful consideration. This information is to the effect that the chief engineer of the canal has reported that borings on that site have disclosed a stratum of clay with a substratum of soft mud. Such a soil is not generally believed to be sufficient to support the foundations of the dam, which is thought to be the most important feature of the proposed lock canal as at present planned. This somewhat disconcerting information induced the committee to adopt at once a resolution calling on the Isthmian Canal Commission for additional information as to borings, etc., at the site named. If the fact should turn out to be as intimated it must exercise a most serious effect upon the construction of the canal, and may even, as some think, cause the abandonment of the lock plan.

A new turn has been given to the traction situation in the Borough of Brooklyn, New York, by a decision which was handed down last Tuesday by the New York Court of Appeals. That tribunal decides that the Brooklyn Rapid Transit Company, under the existing laws, is entitled to charge a fare of 10 cents for carrying passengers from Brooklyn to Coney Island, and ends the contentions of city officials and of a large section of the public that a larger fare than 5 cents per passenger was illegal. It will be recalled that the controversy in question was carried on with such heat that rioting was provoked last summer, which was only quieted by the Brooklyn Rapid Transit adopting a system of rebate checks to enable passengers to reclaim the extra fare in case the decision of the Court of Appeals should be against the company. In announcing its opinion the court upholds the acquisition of various operating traction companies by the Rapid Transit organization, and maintains the doctrine that the substitution of electricity as a motive power does not affect the company's rights so far as the question of fares is concerned. This, consequently, settles a vexed question, and illustrates the liability of the newspapers, the public and even judges of the lower courts to take a completely incorrect view of a purely legal proposition. At the same time it is not likely that the matter will be dropped altogether. The traction situation in Brooklyn, according to Governor Hughes's programme, is to have earnest attention at Albany this winter, and the advocates of a 5-cent fare to all points in the borough may obtain from the legislature such an enactment as would render the Rapid Transit Company's legal victory of no avail.

A decision of much importance to stock market interests was rendered this week by the New York Court of Appeals. The question involved the validity of the amended law imposing a state stamp tax of 2 cents per share on all sales of stocks, irrespective of the par value of the shares. The court, in passing on a test case which was brought by certain New York curb brokers, unanimously declares this portion of the law to be unconstitutional, on the ground that it denies to the transferers of stocks of a par value of less than $100 per share the equal protection of the law within the meaning of the Fourteenth Amendment to the Constitution of the United States. The amendment, which was adopted by the legislature last year, being thus invalidated, it follows that the original law of 1905, imposing a tax of 2 cents on each $100 of face value or fraction thereof, was never modified or in any way affected by the new legislation. This decision, in fact, seems to place the state tax on stock sales upon a normal and sensible basis, there never having been good reason for a measure which subjected all sales of stock, whether of the par value of $100 or only $1 per share, to a uniform impost.

Within ten days after the signing of the new constitution of Persia, the Shah, Muzaffar-ed-din, died at Teheran, the capital, in the fifty-fourth year of his age, after a reign of ten years and eight months. The dead ruler maintained many of the traditions of his country with conservatism, but he was an enlightened and cultivated man, and his grant of the recently signed constitution, coupled with his adoption of many of the conveniences and improvements in use in more advanced countries, notably the telegraph, bore witness to his desire to be abreast of the times. He will be succeeded by his son, Mohammed Ali Mirza, who is now in his thirty-fifth year, and is regarded as a man of intelligence and strength of character. It will not have escaped notice that he as well as the late Shah signed the constitution just before the close of the year, but there seems to be some doubt as to whether the new ruler will accept that document in spirit. There are those who look for a dismissal of the Parliament as soon as he feels himself firmly seated.

PRICES STEADY AT THE HIGHEST LEVEL.

Prices of staples made another slight advance during the month just closed, the result being the lifting of the general levels of all prices, as indicated by BRADSTREET'S approximate index number, above the high record levels touched on December 1 last year, and making the January 1 index number the highest recorded in the past fourteen years. Eight out of thirteen groups of staples advanced more or less during the month, textiles, hides and leather, metals and provisions showing most strength, while four declined, fruits and miscellaneous products here leading, and one, chemicals, remained unchanged.

BRADSTREET'S approximate index number on January 1, 1907, was $8.9072, a gain of one-tenth of 1 per cent. on December 1, of 7 per cent. over January 1, 1906, and of 56 per cent. over July 1, 1896. Fluctuations in the index number in the past fourteen years are shown in the following table, which gives the respective swings from high to low and the reverse thereof, as noted by BRADSTREET'S approximate index number:

Jan. 1, 1892	$8.1382	Sept. 1, 1905	$3.2795
July 1, 1896	5.7019	Oct. 1, 1905	8.2293
Jan 1, 1897	6.1164	Nov. 1, 1905	8.2547
July 1, 1897	5.8537	Dec. 1, 1905	8.3014
Feb. 1, 1900	8.2307	Jan. 1, 1900	8.3289
June 1, 1901	7.4181	Feb. 1, 1906	8.2415
Dec. 1, 1902	8.1413	Mar. 1, 1906	8.2321
Aug. 1, 1903	7.7473	April 1, 1906	8.2987
Feb. 1, 1904	8.0473	May 1, 1906	8.3054
July 1, 1904	7.6318	June 1, 1906	8.3203
Jan. 1, 1905	8.0827	July 1, 1906	8.2835
Feb. 1, 1905	8.0805	Aug. 1, 1906	8.3176
Mar. 1, 1905	8.0976	Sept. 1, 1906	8.4428
April 1, 1905	7.9996	Oct. 1, 1906	8.5480
May 1, 1905	7.9700	Nov 1, 1906	8.7409
June 1, 1905	7.9073	Dec. 1, 1906	8.8923
July 1, 1905	7.9100	Jan. 1, 1907	8.9072
Aug. 1, 1905	8.1111		

This table gives the index numbers (prices per pound) at different dates by groups of commodities:

	July 1, 1896	*Jan.* 1, 1906	*Nov.* 1, 1906	*Dec.* 1, 1906	*Jan.* 1, 1907
Breadstuffs	$0.0524	$0.0808	$0.0761	$0.0758	$0.0752
Live stock	.1855	.3035	.3155	.3185	.3215
Provisions	1.3619	1.8652	2.0077	2.0738	2.0799
Fruits	.1210	.1392	.2215	.2157	.2010
Hides and leather	.8250	1.2150	1.1875	1.2000	1.2100
Textiles	1.5799	2.5408	2.5976	2.6499	2.6649
Metals	.3757	.7010	.8143	.8298	.8371
Coal and coke	.0048	.0072	.0076	.0078	.0080
Oils	.2082	.2988	.3062	.3095	.3087
Naval stores	.0402	.1039	.1091	.1088	.1095
Building materials	.0716	.0823	.0930	.0929	.0936
Chem. and drugs	.6607	.6987	.7083	.7083	.7083
Miscellaneous	.2150	.2945	.2965	.3015	.2895
Total	5.7019	8.3289	8.7409	8.8923	8.9072

During the month of December the following changes occurred in the prices of various articles:

JANUARY 1, 1907, COMPARED WITH DECEMBER 1, 1906.

INCREASES.

Barley	Sugar	Silver
Sheep	Molasses	Copper
Hogs	Union leather	Lead
Horses	Wool, O. and Pa.	Bituminous coal
Mutton	Wool, Australian	Connellsville coke
Beef, family	Silk	Olive oil
Bacon	Flax	Turpentine
Lard	Print cloths	Nails
Butter	Iron ore	Opium
Cheese	Eastern pig iron	Quinine
Mackerel	Southern pig iron	Hay
Codfish		

DECREASES.

Wheat	Rice	Cotton
Corn	Beans	Jute
Flour	Peas	Cotton sheetings
Beeves	Potatoes	Tin
Beef, carcasses	Apples	Cotton-seed oil
Hogs, carcasses	Peanuts	Spruce timber
Eggs	Lemons	Hops
Pork	Raisins	Paper
Coffee	Currants	Ground bone

UNCHANGED.

Oats	Steel billets	Glass
Rye	Steel rails	Yellow pine
Milk	Tinplates	Hemlock timber
Bread	Steel beams	Alum
Hams	Quicksilver	Bicarbonate soda
Tea	Anthracite coal	Borax
Salt	Southern coke	Carbolic acid
Cranberries	Petroleum, crude	Caustic soda
Hides	Petroleum, refined	Nitric acid
Hemlock leather	Linseed oil	Sulphuric acid
Oak leather	Castor oil	Phosphate rock
Hemp	Rosin	Alcohol
Standard sheetings	Tar	Rubber
Ginghams	Brick	Tobacco
Bessemer pig iron	Lime	Cotton seed

In all, thirty-four products moved higher, while twenty-seven went down and forty-five remained unchanged. Compared with a year ago the following changes are noted:

JANUARY 1, 1907, COMPARED WITH JANUARY 1, 1906.

INCREASES.

Oats	Hides	Connellsville coke
Barley	Hemlock leather	Southern coke
Beeves	Wool, Australian	Cotton-seed oil
Hogs, prime	Hemp	Castor oil
Beef, carcasses	Jute	Olive oil
Hogs, carcasses	Silk	Rosin
Mutton	Flax	Turpentine
Milk	Print cloths	Tar
Eggs	Ginghams	Lime
Beef, family	Iron ore	Nails
Pork	Eastern pig iron	Glass
Bacon	Southern pig iron	Yellow pine
Hams	Bessemer pig iron	Hemlock timber
Lard	Steel billets	Borax
Butter	Tinplates	Carbolic acid
Cheese	Steel beams	Opium
Mackerel	Silver	Tobacco
Molasses	Copper	Paper
Peanuts	Lead	Ground bone
Lemons	Tin	Hay
Raisins	Quicksilver	Cotton seed
Currants	Bituminous coal	

DECREASES.

Wheat	Rice	Petroleum, refined
Corn	Beans	Linseed oil
Rye	Peas	Brick
Flour	Potatoes	Spruce timber
Sheep	Apples	Alcohol
Codfish	Cranberries	Quinine
Coffee	Union leather	Hops
Tea	Oak leather	Rubber
Salt	Cotton	

UNCHANGED.

Horses	Cotton sheetings	Bicarbonate soda
Bread	Steel rails	Caustic soda
Sugar	Anthracite coal	Nitric acid
Wool, O. and Pa.	Petroleum, crude	Sulphuric acid
Standard sheetings	Alum	Phosphate rock

Here it will be seen that sixty-four products are higher, while twenty-six are lower and fifteen remain unchanged from a year ago.

UNION PACIFIC AS A HOLDING COMPANY.

Although the investigation of the Union Pacific Railroad Company's finances by the Interstate Commerce Commission is only in its initial stage, the facts already revealed at the hearings have fairly astounded Wall street and the general public. It was, of course, known that the Union Pacific had large interests in the stocks of various other companies. In fact, the company's report for the year ending June 30, 1906, set forth its ownership of $10,343,100, par value, of Chicago & Alton Railway preferred, $90,000,000 of Southern Pacific common, $18,000,000 of Southern Pacific preferred, $13,352,800 Northern Pacific and $15,436,400 Great Northern preferred, together with $724,900 of Northern Securities "stubs," the three latter items representing the stock holdings acquired as a result of the dissolution of the Northern Securities Company and the distribution of its interests in Northern Pacific and Great Northern shares. It was known in a general way that the Union Pacific, its subsidiary concerns, or individuals connected with it had recently acquired considerable amounts of other stock, notably the block of Baltimore & Ohio which was sold by the Pennsylvania Railroad Company. What the financial world did not suspect, however, was that, in addition to this, the Union Pacific or its sub-organizations since the end of the last fiscal year had also become a large stockholder in the Illinois Central, the Atchison, Topeka & Santa Fe, the Chicago, Milwaukee & St. Paul, the Chicago & Northwestern and the New York Central & Hudson River Railroad companies. From the testimony it would appear that the Union Pacific or its controlled company, the Oregon Short Line, now holds the following amounts of stocks of other railroads which are not parts of its own system. In making the list the holdings of Southern Pacific and Great Northern which it now possesses are merely approximated, as it would appear that since June 30, 1906, further amounts of these stocks have been sold and the proceeds reinvested in the newly acquired issues. With this necessary qualification the items would appear to be about as follows:

	Total outstanding	*Union Pacific holdings*	*P. ct. of total*
Atchison, Topeka & Santa Fe pfd	$114,173,730	$10,000,000	8.76
Baltimore & Ohio common	152,604,100	32,334,200	21.33
Baltimore & Ohio pfd	60,000,000	7,260,000	12.20
Great Northern pfd	150,000,000	5,000,000	3.33
Illinois Central	95,040,000	28,123,500	29.59
St. Joseph & Grand Island common	4,600,000	2,900,000	63.00
St. Joseph & Grand Island first pfd	5,498,500	932,200	17.00
St. Joseph & Grand Island second pfd	3,500,000	1,250,000	35.70
Northern Pacific	155,000,000	4,000,000	2.58
Southern Pacific common	197,849,000	90,000,000	45.60
Southern Pacific pfd	39,569,700	18,000,000	45.50
Chicago, Milwaukee & St. Paul common	83,183,900	3,690,600	4.40
Chicago & Northwestern common	75,217,300	2,572,000	3.40
New York Central & Hudson River Railroad	179,037,360	14,285,700	7.90
Great Northern Ore ctfs	150,000,000	5,500,000	3.30

In addition to this, it was brought out that one-half of the San Pedro, Los Angeles & Salt Lake Railroad's $25,000,000 of stock is held, presumably in trust, for the benefit of the Union Pacific, though this transaction has not yet been made entirely clear. It also appears that individual capitalists connected with the Union Pacific management acquired and own $40,000,000 of Atchison stock and demanded and received representation in that company's board on this ground. Altogether, it would seem that the Union Pacific is one of the greatest holding companies in the country. In fact, the magnitude of its acquisitions fairly astounded the financial community, though Wall street's surprise was not unmingled with a certain amount of admiration. The revelations have not, indeed, been regarded unfavorably in that quarter, it being argued that the possession of securities of such value and intrinsic merit is a point in favor of the company's position and that of its stock in the market.

Such favorable comments on the investigation and its results seem, however, to be based upon a partial and imperfect view of the situation. The object of the Interstate Commerce Commission investigation has been pretty clearly defined. It is, in substance, to determine whether the Union Pacific management, in acquiring control of the Southern Pacific and other systems, is not violating the laws which prohibit the amalgamation of parallel and competing lines, provisions which have already been found to be effective in the Northern Securities case. It would also seem to be the intention of the commissioners and their counsel to raise the point whether the Union Pacific Railroad Company and its subsidiary organizations have not exceeded their powers by incurring an excessive bonded indebtedness, a leading purpose of which was to purchase either the control of other roads or such an interest therein as would establish a "community of interests." As far as the hearing has progressed, it would appear that there has been, in one instance at least, a direct stifling of competition—to wit, in the case of the San Pedro, Los Angeles & Salt Lake Railroad—the transfer of a half interest in the stock of that company to individuals connected with the Union Pacific management being accompanied by an agreement in regard to the maintenance of rates which would on its face seem to be in direct contravention of the laws governing such matters. It can therefore be readily deduced that the inquiries of the commissioners, if the further progress of the investigation tends to reënforce the facts already elucidated, may readily result in complications and legal proceedings by the law department of the government which would oblige the managers of the Union Pacific to make a decided change in the company's investments and its general financial arrangements.

The developments thus far also raise some very important considerations as to the practice of corporate managements. In the case of the Union Pacific, it would seem that Mr. Edward H. Harriman, as president of the company and chairman of its executive committee, had practically a free hand to buy or sell stocks. Mr. Harriman himself has not yet been examined. In the absence of his testimony and that of other prominent directors, or of the bankers who were principally identified with the execution of the various deals, it is, of course, impossible to pronounce a decided opinion about the motives which underlaid these extraordinary performances. At the same time a great deal of adverse comment has been aroused by the seeming willingness of the Union Pacific board to delegate all its powers to one individual, even though he was a financier of the courage, skill and good judgment which Mr. Harriman unquestionably possesses. In fact, an unflattering parallel to the methods of the large life-insurance organizations has naturally suggested itself. Moreover, the way in which the Union Pacific's large interest in Illinois Central was acquired, followed as it was by the ousting of Mr. Fish from the presidency of that corporation, is regarded as one of the most noteworthy examples of high finance in full operation which has come to light in recent days.

What the outcome will be it is impossible, under such circumstances, to foretell. It is, however, a fair supposition that the aims of Mr. Harriman and his associates in the Union Pacific management were in the direction of the creation of a transcontinental system under one control, if not under an identical management. This could be made up of the Union Pacific proper, extending from Ogden to Omaha, with a Pacific outlet to San Francisco over the Central Pacific; another to Portland, Ore., over its Oregon Short Line and Oregon Railroad & Navigation properties, and a third to Los Angeles over the San Pedro line. From Omaha to Chicago the Illinois Central would supply a needed link, and the Baltimore & Ohio would in turn provide the avenue whereby the united systems would reach the Atlantic seaboard.

THE PANAMA CANAL PAYMENTS VALID.

It must, we imagine, strike the average citizen as rather peculiar that the action of the Secretary of the Treasury in paying $50,000,000 on account of the purchase of the Panama canal property should at so late a date as this be made the subject of question in a court. It will doubtless, in time to come, be accounted one of the curiosities of legal history in the United

States that such a question has actually been brought up to the federal court of last resort. The case originated in the Supreme Court of the District of Columbia, where the appellant, in the case of Wilson vs. Shaw, applied for an injunction to restrain the payment of the money to the new Panama Canal Company of France as directed in the act of Congress of 1902. Both the Supreme Court and the Court of Appeals of the District of Columbia decided against the contention of the appellant, who, from the standpoint of a taxpayer, argued that the act of Congress under which the payment was made was unconstitutional. The Supreme Court of the United States has affirmed the decisions of the lower courts in an opinion in which Mr. Justice Brewer characterized as "startling" the demand of the appellant for an injunction, and declared that the United States government had dominion and control over the canal zone and therefore had authority to appropriate money to construct the canal.

Referring briefly to the history of the Panama canal, Justice Brewer said that a few years ago Panama seceded from the republic of Colombia and established a new republic which has been recognized by the different nations of the earth. This new nation has by treaty granted to the United States rights, territorial and otherwise. Acts of Congress have been passed providing for the construction of a canal, and in many ways the executive and legislative departments of the government have committed the United States to this work, and it is now progressing. For the courts at this stage to interfere, and, at the instance of a citizen who did not disclose the amount of his interest, stay the work of construction by stopping the payment of money from the Treasury of the United States therefor, would be an exercise of judicial power which, to say the least, would be novel and extraordinary. In brief, the conclusion was reached not only that the appellant was not entitled to an injunction, but that he presented no ground for any relief at all.

The contention of the appellant was that whatever title the government had was not acquired, as provided by the act of June 28, 1902, by treaty with the republic of Colombia. A short but sufficient answer to that contention was that subsequent ratification was equivalent to original authority. The title to what might be called the isthmian or canal zone, which at the date of the act was in the republic of Colombia, passed by an act of secession to the newly formed republic of Panama. The latter was recognized as a nation by the President, and a treaty with it ceding the canal zone was duly ratified. There was a full ratification by Congress of what had been done by the Executive, and their concurrent action was conclusive upon the courts. Justice Brewer once again laid down the doctrine that the Supreme Court has no supervising control over the political branch of the government in its action within the limits of the Constitution, and that it is too late in the history of the United States to question the right of acquiring territory by treaty. Any other conclusion than that reached would, indeed, be almost unthinkable at this stage of the country's development.

CLEARINGS AND CHANGES IN RANK AT INDIVIDUAL CITIES.

While most of the cities of the United States showed increases in bank clearings in 1906 over all preceding years, seven only showing decreases from 1905, the percentages of gain, as a rule, were smaller than in the preceding year, when an enormous gain was marked over 1904. Naturally the gains made by the larger cities are quite moderate, but it is interesting to note that the group of cities showing the heaviest individual gains is that of the far west, which includes the cities on and near the Pacific coast. The reasons for this are not far to seek. Aside from the great natural growth which the expansion of Pacific-coast commerce is causing, the cities of this group reflect some effect of the deflection of trade from the largest city in that section caused by the earthquake and fire of last April.

BANK CLEARINGS AT 109 CITIES FOR TWO YEARS.

CITIES.	*Rank,* 1906	1906	*Rank,* 1905	1905	*Inc. p. ct.*	*Dec. p. ct.*
New York	1	$104,675,828,656	1	$93,822,060,201	11 5	....

† Excluded from totals because containing other items than clearings.

The total clearings at ninety-six cities for 1906, as stated last week, aggregated $158,823,847,914, a gain of 10.9 per cent. Of this immense total New York City contributed 65.9 per cent., or $104,675,828,656, a gain of 11.5 per cent. on 1905, while the ninety-five other cities contributed $54,148,019,258, a gain of 9.8 per cent. on 1905.

Among the other large cities of the country, one is struck by the frequency of the occurrence of the figure 8 in the list of increases. Chicago and San Francisco each gain 8.9 per cent., Boston and Cincinnati 8.8 per cent., Minneapolis 8.4 per cent. and Cleveland 8.1 per cent. Philadelphia, Kansas City, Baltimore and Detroit make gains of from 10.9 to 12.1 per cent.

Some very large gains are shown by the far-western group of cities. Seattle leads with a gain of 61.1 per cent., Salt Lake City gains 36 per cent., Spokane has 39.3 per cent. increase, Tacoma gains 23.5 per cent., Portland, Ore., 23.1 per cent., Los Angeles gains 20.5 per cent., and, despite a loss of over a month last spring, San Francisco, as above noted, gains 8.9 per cent. The largest gain reported over 1905 by any city is that made by Mobile—103 per cent.

Among the seven cities showing decreases, Memphis, with a decline of 9.4 per cent., is most prominent. Augusta shows a decrease of 8.3 per cent. and Macon a loss of 21.2 per cent. Fargo, N. D., shows a decline of 19.7 per cent., Canton, Ohio, 1.3 per cent., Greensburg, Pa., 30.1 per cent., and Jacksonville, Ill., three-tenths of 1 per cent.

Some important changes are shown in the rank of the cities as a result of the 1906 operations. The rank of the first eight cities is unchanged, but the ninth, Kansas City, has supplanted Cincinnati, which falls to tenth place. Detroit also moves above Louisville. One of the notable gains is that made by Seattle, which moved up from No. 24 to No. 19, passing St. Paul, Providence, Buffalo, Indianapolis and Denver. St. Paul, however, gained two numbers, while Providence, Buffalo and Indianapolis lost two places each. Denver gained one step, as did Fort Worth and Richmond. Albany also made a notable gain, rising from thirty-third place to twenty-seventh, passing Washington, Portland, Ore., Columbus, Ohio, and St. Joseph, while Memphis fell from twenty-fifth to thirty-third place. Augusta fell from forty-seventh to fifty-fourth, while Mobile rose from sixty-seventh to fifty-fifth place by more than doubling its clearings.

Every one of the eleven Canadian cities shows a gain in 1906 over 1905, Vancouver, B. C., leading with 49.8 per cent. increase, Winnipeg coming next with 36.4 per cent., and Victoria, B. C., third with 23.6 per cent. Montreal gains 15.7 per cent. and Toronto 16.4 per cent. The smallest increase is that made by Halifax—2.8 per cent.

THE STOCK-TRANSFER TAX LAW VALID.

The Supreme Court of the United States in an opinion handed down on Monday affirmed the validity of the New York stock-transfer law, whose constitutionality was questioned in a test case brought by a member of the New York Stock Exchange.

The case was that of Hatch vs. Reardon. The latter was a peace officer of New York, and the former was a citizen of Connecticut, who was arrested on the charge that in June, 1905, he sold to another resident of Connecticut certain shares of the stock of the Chicago, Milwaukee & St. Paul and Southern Railway companies without affixing stamps as required by the law. Upon arrest Hatch immediately made application for a writ of habeas corpus, raising the point that inasmuch as the statute imposed penalties of fine and imprisonment for its violation, its enforcement would deprive him of liberty and property without due process of law, in contravention of the federal Constitution. The technical ground was also assigned that the constitution of the state of New York had been violated for the reason that the amendment to the tax laws under which the proceeding fell had lain for only one day instead of three on the tables of members of the New York legislature.

One point made against the law was that a tax on sales is a tax on property. As to this point the court, speaking through Mr. Justice Holmes, said that whether taxes on sales and taxes on goods are to be distinguished or identified depends on the scope of the constitutional amendment concerned. A tax on foreign bills of lading may be held equivalent to a tax on exports as against article 1, section 9, and a license tax on importers of foreign goods may be held an unauthorized interference with commerce, yet it would be consistent to sustain a tax on sales within the state as against the Fourteenth Amendment so far as that alone is concerned. Whatever the rights of parties engaged in commerce among the states may be, Justice Holmes said, a sale depends in part on the law of the state where it takes place for its validity, and in the courts of that state at least for the mode of proof. No one, for example, would contest the power to enact a statute of frauds for such transactions. The state may make parties pay for the help of its laws so far as this objection is concerned, and a statute requiring a memorandum in writing is as clearly a regulation of the business as a tax.

One of the arguments made against the law was that the tax imposed by it constituted an interference with interstate commerce. This contention was disposed of rather summarily by Mr. Justice Holmes, who said that there was not a shadow of a ground for calling the transaction described an instance of such commerce. The communications between the parties were not, he said, between different states, and the bargain did not contemplate or induce the transport of property from one state to another, as in the drummer cases. The bargain was not affected in any way, legally or practically, by the fact that the parties happened to have come from another state before they made it. It did not appear that the petitioner came into New York to sell his stock, as it was put on his behalf. It appeared only that he sold after coming into the state. At the same time Mr. Justice Holmes said he was far from implying that it would have made any difference if he had come to New York with the supposed intent before any bargain was made. The decision can hardly be said to have caused any surprise. Upon the constitutional aspects of the legislation the minds of most people interested were probably long ago made up. It is understood, however, that an effort will be made to bring about the repeal or the modification of the law at the present session of the New York legislature. Meanwhile, as is noted in another column, the New York Court of Appeals has held invalid the amendment to the law imposing a tax on all sales of stocks, irrespective of the par value of the shares.

BANK AND TRUST-COMPANY SUSPENSIONS IN 1906.

There were only forty-five suspensions of national, state, savings and private banks and loan and trust companies reported to BRADSTREET'S for the calendar year 1906, as against sixty-three suspensions in 1905 and ninety-six in 1904. So far as the number of such suspensions is concerned, therefore, the showing in 1906 was better than in either of the preceding two years, and only three of the preceding thirteen years made a better showing than did 1906. In the matter of liabilities the showing is not quite so good, in that a total damage is here shown of $22,879,445 in 1906, as against $24,019,740 in 1905 and $22,339,366 in 1904. Thus, as compared with 1905, though the failures were 28 per cent. fewer in number, the liabilities fell off only 4.7 per cent. As pointed out last week, however, the larger part of the liabilities in 1906 were contributed by a few large bank or trust-company suspensions. Actually four suspensions produced nearly $18,000,000 of the $22,879,445 of total liabilities, or over 75 per cent., leaving the remaining banks and trust companies to account for the small balance. Also, it might be pointed out that the few large and costly failures or suspensions—for one at least of those suspending has resumed—cannot be taken to show special strain in the banking business as a whole, because in each case they were caused by dishonesty in management, and the small number and volume of liabilities of the other institutions or firms suspending may, in fact, be taken as evidence of the essential soundness and profitable character of the business done by financial institutions, as a whole, in 1906.

The influence of these four large failures is found to run through the statistics. Thus, one large national-bank failure swells the liabilities in that class, and the suspensions of a state bank in the second group, of a large private banking house in the fourth group, and of a large loan and trust company in the fifth group, have to a certain extent warped the comparisons. With the national-bank failure mentioned excluded, the showing as regards solvency of this class of institutions in 1906 would have been the best recorded in the fourteen years' statistics included above. Very much the same exhibit could be similarly made by the state-bank liabilities, and the past year would have been one of the best of the past fourteen, as regards liabilities of private bankers and loan and trust companies, were it not for the inclusion of these two suspensions, brought about not by special stress in the lines referred to, but simply by the defiance of moral and legal restraints by those responsible for the collapse.

Another example of the warping effect of these four failures is found in the percentage of assets to liabilities in 1906, being only 57, as against 76 per cent. in the preceding year.

EDITORIAL NOTES

By far the most important item of financial news of the present week is the announcement that the Pennsylvania Railroad Company is to make provision for a further and exceedingly large increase in its capitalization. The matter takes the form of notice that the stockholders of the company, at their annual meeting on March 12, will be asked to ratify an increase of $100,000,000 in the authorized share capital, and also to make provision for the creation of bonds to the amount of $100,000,000. It is explained that the management does not intend to issue any part of the new stock or bonds forthwith, and that it is, in effect, only taking measures whereby the necessities for new capital in the future can be adequately met. These assurances, however, seem to be received in stock market circles with something akin to incredulity. It is pointed out that the system will have to pay off some $50,000,000 of 4½ per cent. notes of the Pennsylvania Company which mature next November, that it has placed orders for new cars amounting in the aggregate to $18,000,000 or so, and that the various improvements under way, including the New York tunnel and station, all call for much heavier outlays than were originally planned, so that there would be no surprise if a part at least of the new capital should be emitted before the year draws to an end. Controverting, as it does, the statement made last summer by the late President Cassatt, that the various arrangements then made, including the placing of a $50,000,000 loan in France, had adequately financed the Pennsylvania's requirements for some time to come, the present step has naturally been unfavorably received by the stock market public.

American stocks of wheat increased 4,548,000 bushels during the month of December, as against a gain of 8,877,000 bushels in December, 1905, 2,230,000 bushels in 1904 and 5,502,000 bushels in 1903. European stocks, on the other hand, decreased during December by 2,500,000 bushels, as against a decrease a year ago of 1,000,000 bushels. The net result has been a gain in the world's supply of about 2,000,000 bushels, as against a gain in December of the preceding year of 7,700,000 bushels. Following will be found the statistics of stocks held in the United States and Canada east and west of the Rocky mountains on January 1, 1907, as compared with the same period of the three preceding years:

	East of Rockies	*Pacific coast*	*Total American visible*
January 1, 1907	80,590,000	2,647,000	83,237,000
January 1, 1906	71,634,000	5,511,000	77,145,000
January 1, 1905	56,892,000	3,458,000	60,350,000
January 1, 1904	55,961,000	3,282,000	59,243,000

American stocks of wheat, it will be seen, are 6,100,000 bushels larger than a year ago, and 23,000,000 bushels larger than on January 1, 1905. European stocks are 4,400,000 bushels larger than a year ago on January 1, but 3,000,000 bushels smaller than on January 1, 1905. The total American and European stocks on January 1, 1907, were 170,400,000 bushels, a gain of 10,500,000 bushels over January 1, 1906, and of 19,900,000 bushels over January 1, 1905. The following figures show the American and European stocks of wheat on the first of each month since January 1, 1905, as reported by BRADSTREET'S for the United States and Canada, by Broomhall for Europe and afloat therefor, and the grand total thereof on the same dates:

[Five figures omitted.]

RECENT LEGAL DECISIONS.

[*Prepared for* BRADSTREET'S.]

Slander—Insolvency—Oral Charge.

The Supreme Court of Michigan held, in the case of Dallavo vs. Snider, that an oral charge of insolvency against a merchant was not actionable per se unless the words were actually spoken in relation to his business.

Corporation—Hotel—Powers.

The Supreme Court of Illinois held, in the case of Stacy vs. Glen Ellyn Hotel & Springs Company, that where a corporation was organized to build and operate a summer hotel and to develop certain mineral springs, it had no power to subdivide certain of its property into lots, sell them, and dedicate certain other portions to the public.

Railroad—Right of Way—Assessments.

The Supreme Court of Minnesota held, in the recent case of Patterson et al. vs. Chicago, Rock Island & Pacific Railway Company, that the right of way of a railway company paying a gross earnings tax in lieu of all taxes and all assessments, as provided for by chapter 111 of the Special Laws of 1873, was exempt from assessments for special benefits accruing thereto by the construction of a public ditch.

Trespass—Special Privilege.

The Court of Appeals of Maryland held, in the case of Haines' Executors vs. Haines, that when a person has a special privilege or authority to enter upon the premises of another to seize goods or perform other acts, and he exceeds his authority by doing what he was not authorized or justified in doing, he comes a trespasser ab initio; all his subsequent acts are trespasses, and he is in the same position as if he were a stranger acting without excuse or justification.

Duty on Tobacco—Entering Warehouse.

The question was involved, in the case of The United States vs. Falk et al., whether the duty on tobacco should be paid when it was received at the bonded warehouses or when it was withdrawn from them, the weight being less at the latter than at the former time, with a corresponding reduction in the amount of revenue collected. The Supreme Court of the United States, sustaining the action of the New York Collector of Customs, held that the duty should be collected upon entrance.

Mechanic's Lien—Notice—Price.

The New York Court of Appeals held, in the recent case of Finn vs. Smith et al., that a notice of lien filed under the Mechanics' Lien law must state either explicitly or by plain inference the value or the assessed price of the labor performed or materials furnished at the time of the filing, and that a notice that a lien was claimed on the property described "for $5,889.60, being the value and agreed price of certain materials furnished and to be furnished, to wit, timber, lumber," etc., was an insufficient statement under the statute.

Shipper's Duty—Bales—Tying.

The United States Circuit Court for the District of Rhode Island held, in the case of Cronin vs. American Linen Company, that a shipper of goods packed in bales and tied with ropes was under no duty to the carrier or its servants to see that the ropes were strong enough to withstand a pull sufficient to move the bale, and that a bale not tied with ropes having such strength was not such an inherently dangerous thing as to render the shipper liable for an injury to a teamster who threw his weight upon the rope in moving the bale while on his wagon with such force that when the rope broke he fell to the ground.

Foreign Corporation—State Taxation.

In the case of The American Smelting & Refining Company vs. The People of the State of Colorado, the Supreme Court of the United States had before it for consideration that portion of the revenue laws of Colorado imposing a tax of 4 cents annually on each thousand dollars of stock of foreign corporations doing business in the state. The smelting company, which is a New Jersey corporation, opposed the assessment as a direct property tax, and, as such, unconstitutional, but the state Supreme Court upheld the law on the ground that it provided for a tax only on the business of the corporations, using the capital-stock basis as the most convenient means of ascertaining the volume of business. The Supreme Court of the United States reversed the decision of the state Supreme Court, saying, through Mr. Justice Peckham: "A discussion as to the name or nature of the tax imposed by the act of 1902 or the former acts is wholly unimportant with reference to the view we take of the case. After the payment of the money and the receipt of the permit to enter and do business in the state, the corporation could not be thereafter further taxed than were domestic corporations. The tax on the latter under that act is the same in substance and effect as that upon the foreign corporation, but is only for one-half thereof in amount. The domestic party must pay 'an annual state corporation tax,' while the foreign corporation must pay 'a state license tax' annually. The means of enforcing payment are not different, and such means are stated in the act of 1902. Whatever be the name or nature of the tax, it must be measured in amount by the same rate as is provided for the domestic institution, and if the latter is not taxed in that way, neither can the state thus tax the foreign corporation."

Bankruptcy—Claims After Settlement.

In the case of J. B. Orcutt Company et al. vs. Green et al., just decided by the Supreme Court of the United States, it appeared that claims for more than $8,000 were filed more than twelve months after the affairs of a bankrupt had been settled. Objection was made by other creditors to the filing of the claims, but the District Court for the Northern District of New York allowed them to be filed. The order of the District Court was reversed by the Circuit Court of Appeals for the Second Circuit, but the decision of the latter court was reversed by the Supreme Court, which held that the claims might be filed, with the modification, however, that a referee cannot extend his own claim.

Naturalized Citizen's Child Barred.

The Supreme Court of the United States had before it, in the case of Zartarian vs. Billings, the question as to the right of a minor child of foreign birth, whose father was a naturalized citizen of the United States, to come to this country, notwithstanding she might be so diseased as in ordinary circumstances to be barred from landing. The court decided against the right of the child to land, on the ground that the case did not fall within the statutes naturalizing the foreign-born children of American citizens. Referring in his opinion to the fact that the child was barred from returning to her own country, Justice Day remarked upon the hardship involved, but said that relief in such cases rests with Congress and not with the courts.

Partnership—Dissolution—Accounting.

The Supreme Court of Minnesota held, in the case of Reis vs. Reis et al., that, in connection with proceedings to dissolve a partnership, each partner is entitled to an account of all firm transactions, and that an adjustment of the accounts is a necessary condition precedent to a determination of the rights of the parties under the partnership agreement. The court said that there are exceptional cases in which no order for an accounting is proper, as where the parties have agreed upon a settlement, or where the court finding the facts and granting relief has had before it all or sufficient evidence pertaining to the accounts so that its findings operate as an accounting, and that the fact that under particular circumstances it may be difficult to make a true accounting, or that the only statement possible will be an approximation to correctness, is no reason for refusing the redress of accounting.

Carrier—Delayed Delivery—Damages.

The Kentucky Court of Appeals held, in the case of Patterson vs. Illinois Central Railroad Company et al., that in an action for special damages against a carrier for failure to deliver cotton seed within a reasonable time, for loss in weight of cattle, and extra work in taking care of and providing proper feed for them during the delay, the rule was that where a contract had been broken the damages for the breach were such as might be reasonably supposed to have been in contemplation of both parties at the time the contract was made as the probable result of the breach of it, and that where there was delay in the shipment of cotton seed with which to feed cattle owned by the plaintiff, the fact that the latter gave notice to the carrier of the seed of his special need thereof—who then agreed to trace it and deliver it as soon as possible—did not constitute a new contract between the parties, there being no consideration therefor, and that there could be no recovery on such a promise.

BUSINESS NOTES.

Copper Production.

The increase in copper production in 1906 was 5 per cent., as figured by the *Engineering and Mining Journal*. A comparison of statistics shows (in pounds):

District	1906	1905	1904
Alaska	6,250,000	4,703,600	2,043,586
Arizona	265,300,000	222,866,024	191,602,958
California	23,500,000	13,089,993	29,975,154
Colorado	9,100,000	9,854,176	9,491,913
Idaho	10,100,000	6,5 0,000	5,422,007
Michigan	223,800,000	218,999,753	208,329,248
Montana	293,000,000	319,179,835	298,314,804
New Mexico	5,800,000	5,638,842	5,358,666
South and east	19,500,000	14,997,982	15,211,086
Utah	56,8 0,000	51,950,789	47,062,889
Wyoming	252,000	2,393,201	3,565,629
Other states	1,600,000	1,550,000	1,418,065
Total	915,000,000	871,634,245	817,715,005

Last year's consumption of copper is estimated at 660,540,000 pounds. The North American production is figured as follows (in pounds):

	1906	1905	1904
United States	915,000,000	871,634,245	817,715,005
Mexico	135,899,000	144,350,962	114,117,000
Canada	46,500,000	47,597,502	42,970,594
Total	1,097,399,000	1,063,582,709	974,802,599

Building in Greater New York.

The Philadelphia *Ledger* points out that "Greater New York has during the last five years built 16,158 flat houses, furnishing homes for 585,021 tenants. The cost for construction has been $390,512,595. When the cost of land is included the total investment has reached $1,000,000,000. The investment to house each person has been $1,710. If each tenant has paid, on the average, 10 per cent. a year for housing accommodations, the annual rent which such an investment demands from each tenant is $171. From the figures of the past five years, and from current information as to the immediate future, it is believed New York reached the top of its flat-building wave in 1906. The construction of flats gained steadily in volume during the decade preceding 1905. It receded sharply in 1906. Brooklyn's rise as a flat-house center has been steady and rapid. It has met with no reaction. The growth has been due to the increasing accessibility of Brooklyn land to persons who have business in Manhattan. Brooklyn built 180 flat houses for 2,784 tenants in 1902. In 1903 the construction was 657 flat houses for 7,629 tenants. The next year produced 1,433 houses for 34,002 tenants. During 1905 2,864 flat houses were built for 54,888 tenants. Last year the output was 3,230 flat houses for 67,383 tenants. Bronx and Queens boroughs have shown similar steady development."

Great Britain's Foreign Trade.

The December statement of the British Board of Trade shows increases of £1,553,500 in Great Britain's imports and £2,757,000 in its exports. The principal increase for the month was in the imports of raw materials, of which cotton from America totaled £1,000,000. On the other hand, the imports of grain decreased £900,000. The increase in exports was principally in manufactured articles. In 1906 imports increased £42,967,976 and exports £45,856,299. The year's figures are the largest on record. The year's principal increases in imports were raw materials, and in exports manufactured goods. From the returns, imported goods reëxported being omitted, the following comparative table of the United Kingdom's November trade in merchandise may be compiled:

	1906	1905	1904
Imports	£54,673,985	£53,120,486	£52,845,366
Exports	38,502,303	35,745,303	34,512,410
Excess imports	16,171,683	17,375,183	18,332,956

For the full calendar year the United Kingdom's foreign trade makes the following comparison:

	1906	1905	1904
Imports	£608,247,378	£565,279,402	£551,038,628
Exports	453,678,287	427,821,988	371,015,321
Excess imports	154,569,091	137,457,414	180,023,307

Organization of National Banks.

With the chartering of forty-one national banks, with aggregate capital of $3,280,000, during the month of December, the total number of banks chartered during the past calendar year reached 462, with aggregate capital of $23,493,500, of which 307, with capital of $7,933,500, were with individual capital of approximately $26,000, and 155, with aggregate capital of $15,560,000, with individual capital of $50,000 or more. At the close of business at the end of the year there were in existence 6,283 national banks, with authorized capital of $862,016,775; circulation outstanding secured by bonds, $549,280,084; circulation secured by deposits of lawful money, $46,882,385, and total circulation outstanding, $596,162,469. As a result of the liquidation of seventy-three associations and the failure of four, the net increase in number of banks during the year was 385; the increase in authorized capital being $43,534,700; in circulation secured by bonds, $44,437,771, and in total circulation secured by bonds and lawful money, $55,248,122. Since March 14, 1900, and under authority of the act of that date, 2,104 associations have been organized, their authorized capital being $54,840,500. During the same period, and under the act of June 3, 1864, associations to the number of 1,121, with authorized capital of $130,922,800, were chartered, making the total number and capital of banks chartered from March 14, 1900, to December 31, 1906, 3,225 and $185,763,300 respectively. A further classification shows that 357 state banks, with authorized capital of $23,956,800, were converted into national banks; 1,056, with capital of $66,784,000, state and private banks reorganized as national banking associations, leaving 1,812, with capital of $95,022,500, primary organizations.

Stock Exchange Listings for the Year.

The listings on the Stock Exchange during 1906 aggregated $1,569,088,400, of which $594,016,500 were railroad and miscellaneous bonds, $275,000,000 Japanese government bonds and $700,071,900 stocks of various kinds. The excess of the stock listings over bonds, excluding the Japanese issues, was the feature of the year, the tight money market that prevailed during the greater part of 1906 making it difficult to float new bond issues, while the many dividend increases that occurred were materially helpful in the sale of stocks. The following table gives a comparison of the last year's listings with those of previous years:

	Bonds	*Stocks*	*Total*
1906	*$869,016,500	$700,071,900	$1,569,088,400
1905	1,054,837,100	708,416,200	1,849,132,800
1904	486,952,500	551,584,460	1,038,536,960
1903	582,070,500	457,351,550	1,039,422,050
1902	524,497,700	813,053,740	1,337,551,440
1901	929,798,200	1,646,657,240	2,556,455,440
1900	443,713,000	620,935,000	1,064,648,000
1899	525,381,240	704,172,605	1,229,556,845
1898	700,664,680	528,153,996	1,228,218,676
1897	357,415,962	502,074,891	860,390,793
1896	582,285,700	590,732,215	1,173,018,915
1895	257,275,450	143,573,970	400,649,370
1894	309,804,600	251,193,003	560,997,603
1893	288,803,400	198,245,261	487,048,661
1892	317,861,500	237,036,105	554,897,605
1891	287,645,700	188,914,904	476,560,604
1890	684,867,879	437,992,330	1,122,860,209

* Including $275,000,000 Japanese government bonds.

Pensions for Railway Employees.

The *Railway Age* says: "The Atchison, Topeka & Santa Fe has been added to the list of railway companies which have adopted a liberal plan for the retirement and pensioning of employees on reaching the age of sixty-five years. The Santa Fe method differs somewhat from that of most of the other companies in that, instead of providing an allowance based upon 1 per cent. of the average regular monthly pay received for the ten years next preceding retirement, it fixes the pension on the following plan: 'For each year of service an allowance of 1¼ per cent. of the first $50 of the highest average monthly pay of the officer or employee during any consecutive ten years of service and in addition three-fourths of 1 per cent. of any excess of such highest average monthly pay over $50.' The allowance in no case is to be less than $20 or more than $75 a month, but in exceptional cases of long and unbroken service, of first-class record, the pension may be increased by not exceeding 25 per cent. The companies which now have adopted pension systems and the year in which they became effective are as follows: Baltimore & Ohio in 1884; Pennsylvania Railroad in 1900; Chicago & Northwestern and Illinois Central in 1901; Southern Pacific lines, Union Pacific, Oregon Railroad & Navigation, Oregon Short Line, Philadelphia & Reading, Delaware, Lackawanna & Western, Buffalo, Rochester & Pittsburgh and Canadian Pacific in 1903; Atlantic Coast Line in 1904; Atchison, Topeka & Santa Fe January 1, 1907. The New York Central Company has for some time been preparing to establish a pension plan on all the lines of the system, including the New York Central & Hudson River, Boston & Albany, West Shore, Big Four, Lake Shore & Michigan Southern, Michigan Central and other roads, and the announcement of this important extension of provision for superannuated employees is expected early in the present year.

CURRENT BUSINESS NEWS.

Commercial.

According to the Baltimore *Manufacturers' Record*, the south in 1906 built 3,055 miles of railroad, produced $2,000,000,000 on its farms, dug 84,000,000 tons of coal from its mines, cut more than 13,000,000,000 feet of lumber from its forests, exported merchandise worth $700,000,000, manufactured iron, steel, wood, leather, cotton and wool products worth $2,000,000,000, and added $2,650,000,000 to the value of its real wealth.

Any publisher has the right to use the name Webster in connection with the publication of a dictionary, according to a decision by Judge Colt, of the United States Circuit Court, announced in Boston, Wednesday, the copyright giving the exclusive right to the use of the name having expired in 1889. The decision was in the case of the G. & C. Merriam Company, of Springfield, which sought to retain the exclusive right to use the name of Webster in the title of dictionaries in the English language.

It is reported that the fast steamers of the White Star and Cunard lines will in the near future abandon Liverpool for the channel ports.

Shipments of anthracite coal for the years 1906 and 1905 compare as follows:

	1906	1905	*Dec.*
Reading	11,258,295	12,574,502	1,316,207
Lehigh Valley	8,536,254	10,072,120	1,535,866
Central R. R. of N. J.	6,983,217	7,983,274	1,000,057

Total	55,698,595	61,410,201	5,711,606

The following table shows the movement of grain at Chicago the past year, the figures being compiled by the Board of Trade:

Receipts—	1906	1905	1904
Flour, barrels	9,959,329	7,944,955	8,839,220
Wheat, bushels	28,249,475	26,899,012	24,457,347
Corn, bushels	98,895,563	110,893,444	100,543,207
Oats, bushels	89,912,881	92,486,761	73,023,119
Rye, bushels	2,104,875	2,292,444	2,379,357
Barley, bushels	20,811,432	28,073,142	25,316,917
Shipments—			
Flour, barrels	8,199,628	7,361,867	7,267,896
Wheat, bushels	16,788,573	13,922,714	17,957,416
Corn, bushels	78,974,686	91,153,342	75,184,758
Oats, bushels	73,718,199	66,131,725	47,303,901
Rye, bushels	1,532,157	1,152,019	1,567,273
Barley, bushels	6,924,357	7,374,037	5,802,856

The maritime customs at Shanghai for 1906 were $30,000,000, the largest amount ever received in one year.

E. H. Gary, chairman of the United States Steel Corporation, says the outlook for 1907 is remarkably good. The unfilled orders on hand are larger than ever before, and the daily bookings exceed capacity. Although the output has been increased about 25 per cent. in the last five years, the sales for 1906 largely exceeded production. As a result the unfilled orders are sufficient to keep furnaces and mills fully occupied for the greater portion of the year 1907. One danger to be feared, he says, is that the demand will influence manufacturers to unreasonably increase prices.

It is reported that German flour millers will need to import about 8,000,000 bushels of wheat monthly

Foreign crop conditions as published Tuesday in Broomhall's Liverpool *Corn Trade News:* United Kingdom, Italy and Spain—The crop outlook continues satisfactory. France—The weather is too mild, but crop conditions are favorable; supplies are smaller, but they are sufficient for home requirements. Germany—A thaw has set in, but no complaints are heard regarding the condition of the crops. There is a brisk demand for foreign grain. Hungary—There is a good snow covering, but thawing has developed as a result of milder weather. Roumania—The weather is seasonably cold and there are no complaints heard. Russia—There is generally a fair snow covering. Arrivals are generally light. Australia—There is a continued disposition to reduce crop estimates. Portugal—It is officially reported that permission has been granted to import grain. Argentina—Some rain has fallen which has been beneficial to the corn crop, and has caused no damage to wheat. Some cables, however, are reporting that estimates for wheat are being reduced as regards the quality, quantity and natural weight.

The latest estimate of the production of wheat in Argentina favors a crop of 142,000,000 bushels, against 135,000,000 bushels last year.

Boston's total shipments of shoes for 1906 were 5,179,543 cases, as compared with 5,100,038 for 1905, 4,730,332 cases for 1904 and 5,094,436 cases for 1903. "If these cases contained twenty-two pairs of shoes each, which is a conservative estimate," says the Boston *Transcript*, "the number of pairs of shoes shipped from Boston alone to all parts of the country and abroad would amount to 113,949,946, or more than enough to give every inhabitant of the United States a pair, and some a second pair."

The foreign trade of Japan for the year 1906 broke all previous records, amounting all told to $420,500,000. It is estimated that the budget receipts and expenditures for the next fiscal year will balance at $305,500,000. The financial prospects of the country are regarded as very bright.

The Michigan January crop report states that 489 correspondents report that wheat was not injured during December, while 189 correspondents say that it was. There has been very little protecting snow. Last season's damage came later. Nearly half of last year's crop has been marketed.

Financial.

The *Frankfurter Zeitung* publishes the following figures of foreign securities listed on the Berlin Stock Exchange in recent years, adding that 1906 will show large reduction from the previous year:

	Total	*Issued in Germany*
1905	M 4,146,000,000	M 594,000,000
1904	926,000,000	124,000,000
1903	1,039,000,000	185,000,000
1902	2,465,000,000	647,000,000
1901	507,000,000	119,000,000

The chartered banks of Canada, between the end of 1900 and 1906, increased paid-up capital from $65,000,000 to $94,000,000, a gain of 44 per cent. The total deposits in 1900 were $305,140,000; now they are $577,300,000, an increase of 89 per cent. Total discounts and current loans in 1900 were $279,279,000, compared with $576,000,000 at the present time, an increase of 107 per cent. In 1906 the business of the banks increased at a more rapid rate than in any previous year. A year ago the total deposits were $511,942,492, contrasted with the latest figures of $583,698,906, an increase of 14 per cent.

On Tuesday Mr. F. Augustus Heinze was elected a director in the Consolidated National Bank as well as in the Mercantile. Arthur P. Heinze and Stanley Gifford, vice-president of the United Copper Company, also became directors of the Mercantile National.

The Census Bureau states that there were 11,750,944 bales of cotton ginned to January 1, 1907, as against 9,725,426 bales ginned up to the same time last year. Following are the figures of ginning by states up to January 1, counting round as half bales:

	1906-07	1905-06
Alabama	1,199,740	1,176,608
Arkansas	732,201	510,599
Florida	59,030	72,859
Georgia	1,572,701	1,670,466
Indian Territory	350,383	296,723
Kentucky	1,362	1,218
Louisiana	836,646	456,339
Mississippi	1,288,697	1,033,794
Missouri	38,441	35,427
North Carolina	572,143	629,344
Oklahoma	349,677	279,353
South Carolina	868,328	1,075,936
Tennessee	242,419	240,565
Texas	3,626,269	2,231,689
Virginia	12,907	14,476
United States	11,750,944	9,725,426

On Tuesday the stockholders of the Chemical National Bank ratified the action of the directors by voting to increase the capital from $300,000 to $3,000,000 by a transfer of $2,700,000 from the surplus. J. B. Martindale was added to the board of directors.

On Tuesday F. A. Vanderlip was elected a director of the National City Bank in place of John A. McCall, deceased.

E. C. Converse has been succeeded by F. B. Schenck in the presidency of the Liberty National Bank.

The comptroller of the Emigrant Industrial Savings Bank of New York says: "The public is carrying about a lot more currency in its clothes than usual. That is one important reason why the money market has been tight and the banks have found currency of small denominations scarce. The mechanic and laboring man, who, in hard times, would have, perhaps, 50 cents or $1 in his pocket, now has $5 or more." There have been estimates of all the way from $300,000,000 to $400,000,000 as the amount of money which the people of the country are now carrying about in their pockets.

Boston's gross debt December 31, 1906, was $100,517,456, against $99,017,856 on December 31, 1905. The net debt was $68,300,702, against $66,770,207 in 1905. Boston's debt of $155 per capita, or $100,517,456 gross, is the largest of any city in the United States.

According to the London *Statist*, "the outlook for 1907 is that the United States will import a considerable amount of capital on balance from Europe. In other words, the country will use at home the whole of its growing capital, and will probably supplement its own supplies by imports from Europe. The *Statist* anticipates that the amount of capital that will be required for house construction will be even greater than the vast sum needed in the past year; that the enormous amount of traffic to be transported by the railways will induce—indeed will compel—the companies to raise a very large amount of capital for additional lines and equipment, and that manufacturing and other industries will desire to make expensive additions to their works. Europe must thus reckon with the unbounded prosperity of America and with the fact that that prosperity will enable it to obtain a very large amount of capital from this side." The authority mentioned intimates that considerable foreign capital will be available for investment in the United States.

The receipts from the stock-transfer tax law during the calendar year 1906 amounted to $6,500,654, a much larger sum than was anticipated when the law was passed. The monthly average for 1906 is larger than the average for the seven months of 1905 when the law was in force. This table shows the returns by months:

	1906	1905
January	$911,321	----
February	490,498	----
March	427,498	----
April	560,300	----
May	503,571	----
June	424,071	$446,301
July	106,046	308,790
August	795,000	477,784
September	668,629	372,501
October	617,466	495,784
November	539,720	607,152
December	516,534	728,409
Total	6,500,654	3,346,721
Monthly average	571,721	478,146

The Nashville, Chattanooga & St. Louis Railway Company has declared a semi-annual dividend of 3 per cent., an increase of ½ per cent. over the previous disbursement, and places the stock on a 6 per cent. basis. This dividend is payable February 1. In 1906 and 1905 the company paid 5 per cent.; in 1904, 4 per cent. In the five years between 1899 and 1904 no dividends were paid.

Reports of the Curb Quotation Company show that the total sales on the New York curb in 1906 were more than double those of 1905. Figures follow:

	1905	1906
Total curb sales, indust. and miscel.	4,208,081	2,757,577
Total curb sales, mining	10,432,414	26,751,694
Total curb sales, railroads	4,944,548	1,673,192
Total number of shares of stock sold	19,585,043	31,182,463
Total sales bonds, par value	$83,806,680	$42,302,899

Sales of securities on the Chicago Stock Exchange last year compare as follows:

	1906	1905	1904	1903
Stocks	1,234,537	1,544,319	1,251,177	1,024,052
Bonds	$5,858,050	$9,567,500	$5,432,700	$3,364,100

Removal of transfer offices of railroads and industrials to New York explains the great decline in local trading.

The concentration of active trading in a few stocks is evidenced from the fact that of the total of 283,707,955 shares traded in on the New York Stock Exchange during 1906, considerably more than half this amount represented transactions in only six stocks—Amalgamated, Pennsylvania, Reading, Southern Pacific, Union Pacific and United States Steel, individual sales of each being more than 10,000,000 shares. Comparisons follow (in shares):

	1906	1905
Amalgamated	30,286,826	17,536,964
Pennsylvania	13,172,797	12,053,058
Reading	43,860,040	22,318,220
Southern Pacific	10,769,803	7,962,564
Union Pacific	35,986,630	32,270,627
United States Steel common	23,479,492	17,540,159
Total, six stocks	157,555,588	109,681,592
Total sales	283,707,955	263,040,993

An important consolidation of west side banking interests is announced in the resolutions adopted on January 8 by the boards of directors of the New York National Exchange and Irving National banks to merge the two institutions under the name of the Irving National Exchange Bank. Through this consolidation the aggregate capital of the succeeding institution will be $2,000,000, the surplus $1,000,000 and the total resources $22,000,000. The Irving National Exchange Bank will be located in the offices now occupied by the New York National Exchange Bank at West Broadway and Chambers street, and, in the estimation of the officers, it will give to the lower west side the advantages of a bank fully equipped for the requirements of all neighboring interests, however large or small they may be. Full details of the merger have not been made public, but it is announced that the officers of the newer and larger institution will be Lewis E. Pierson, president; Rollin P. Grant and Charles L. Farrell, vice-presidents, and Benjamin F. Werner, cashier.

Industrial.

The precious metal production of Colorado for 1906 was as follows: Gold, $24,644,859; silver, $8,939,141; lead, $6,003,972; copper, $1,790,177; zinc, $5,059,528; tungsten, $205,525; total, $46,643,202.

The London *Iron and Coal Trades Review*, writing regarding the outlook for the iron, steel and coal trades in 1907, says "it is entirely satisfactory. Good trade in iron and coal appears to be assured for at least six months to come, and it may extend over a much longer period. Everything points to a continuance of present conditions, although we know only too well that clouds arise in the coal and iron trades both suddenly and from the most unexpected quarters."

Shipbuilding in the United States during the calendar years set forth is thus reported by the Bureau of Navigation:

	No.	*Gross tons*
December 31, 1906	1,045	393,291
December 31, 1905	1,054	306,563
December 31, 1904	1,065	265,104
December 31, 1903	1,159	381,970
December 31, 1902	1,262	429,327

The output of pig iron in December was 2,236,153 tons, a new high monthly record. The output in 1906 as per the estimate of the *Iron Age* was 25,350,000 tons, which compares with 22,992,380 tons in 1905, heretofore the record year. In 1904 the output was 16,497,033 tons, and in 1903 it was 18,009,252 tons.

This table, taken from the *Engineering Journal*, estimates the mineral and metal production of the United States in 1906 and 1905:

Non-metallic—	1905	1906
Coal, bituminous, short tons	310,285,015	335,738,059
Coal, anthracite, short tons	78,731,523	71,018,433
Garnet, short tons	3,654	5,442
Graphite, crystalline, pounds	4,260,656	4,079,333
Iron ore, long tons	44,578,456	49,670,000
Limestone flux, long tons	14,098,000	14,228,500
Petroleum, barrels	130,728,839	131,061,505
Phosphate rock, long tons	1,933,286	2,102,067
Pyrites, long tons	200,280	204,896
Manufactured—		
Alundum, pounds	3,612,000	4,331,233
Arsenic, white, short tons	773	831.5
Bromine, pounds	899,434	1,250,000
Coke, short tons	28,404,112	32,568,926
Copper sulphate, pounds	52,278,996	48,534,129
Copperas, short tons	21,103	18,546
Crushed steel, pounds	812,000	837,000
Graphite, artificial, pounds	4,595,500	4,868,000
Lead, sublimed white, short tons	6,977	8,000
Zinc, oxide, short tons	65,403	68,549
Zinc-lead, white, short tons	7,200	5,749
Metallic—		
Aluminium, pounds	11,350,000	14,350,000
Copper, pounds	871,634,245	915,000,000
Gold, fine ounces	4,265,742	4,702,235
Iron, pig, long tons	22,702,397	25,521,911
Lead, short tons	319,744	364,336
Quicksilver, flasks	30,650	27,276
Silver, fine ounces	56,101,600	57,358,267
Zinc, short tons	201,748	225,395

Railroads.

At the special meeting of the stockholders of the Northern Pacific Railway Company held Monday, the proposition to increase the capital stock of the company by $95,000,000 was ratified.

On Wednesday Joseph Wood, second vice-president of the Pennsylvania lines west, was elected first vice-president, the post held by James McCrea. The elevation moves up all the other vice-presidents, and Daniel T. McCabe, freight traffic manager, takes fourth vice-presidency. To succeed him as freight traffic manager, William Hodgen, formerly traffic manager of the Vandalia lines, was named.

Miscellaneous.

An energetic effort is being made by the republic of Peru to attract immigration from the United States and Europe to develop the resources of that country. Eduardo Higginson, consul-general of Peru in this city, has made public a "supreme decree" of President Pardo, issued some months ago, in which the governmental invitation is extended and in which are laid down the requisites which all intending settlers must possess. It is pointed out that Peru is a wonderfully rich territory awaiting development.

The French census shows that France has a population of 39,252,267, an increase of only 290,322 over that of 1901.

STATE OF TRADE.

[A Summary of Special Telegrams to BRADSTREET'S.]

There are some cross currents in trade which prevent generalization, but, as a whole, the situation loses little by comparison with preceding years at this early stage of the season. Weather conditions have been hardly seasonable—in some sections severe rainstorms have checked operations—but the resemblance to last year in the effect of mild weather on retail trade in winter goods and upon building activity is marked. The need of seasonable weather is noted throughout the country. In wholesale and jobbing trade spring season activity is not marked as yet, but it is to be noted that a number of lines of cotton goods have been advanced, that eastern shoe manufacturing centers are filled with buyers looking around, and that shipments of goods on orders are being called for. The western centers also report rather more buying from country merchants and some liberal purchases of agricultural implements. In industrial lines previous activity continues without changes. Some few lines of iron and steel, notably structural shapes and cast-iron pipe, are in less active request, but other finished lines are active, and the market as a whole is strong, with leading authorities making optimistic predictions as to the coming year's trade. Some shading of prices on far-off deliveries is shown. The open winter allows of great activity in building, but there is not the unanimity as to the predictions of record-breaking construction noted a year ago. The car-shortage question is still acute, though mild weather helps the railroads. Special complaint of trouble from this source comes from the northwest, where the fuel and grain movement is checked; from the Pacific coast, where the supply of fuel is scanty; from Oklahoma, where building in the new cities and towns is affected by inability to get material; from the iron and steel centers, where mill operations are hampered by slow arrival of supplies, and from the cotton and lumber producing sections, which complain of the car shortage affecting shipments. The money situation is easier in a few centers, notably the southwest, where the banks are reported well supplied with money, but collections in the northwest are affected by backward grain movement, another example of the cross currents affecting past trade settlements. As a whole, the market is firm and higher than a year ago at this time.

Summed up, the situation is that retail trade is backward, that some few lines of wholesale trade seem to be taking a breathing spell, but that the heavily-sold-ahead condition in most lines guarantees a future large turnover. Relatively the best reports come from the southwestern states; the northwestern reports are rather irregular, but the only really poor reports as to trade and collections come from the south Atlantic states, where crop returns were below early anticipations.

Reports from the winter-wheat crop are not uniform. A cool wave following heavy rains and rank growth in portions of the west has led to some fears of damage and slight hardening of prices, but Texas and Oklahoma send excellent advices, and California reports that heavy rains, while discomforting to traders, have helped crops.

The winter pilgrimage of shoe buyers to Boston fills the manufacturers' offices, but business so far placed does not equal last year. Shipments for the first week are 5 per cent. below 1906. Leather moves freely on past orders. Patent and enameled leather manufacturers report the weather retarding manufacture and shipment. Supplies of these and of finished split leathers are very scarce.

The situation in raw and manufactured textiles is a very strong one. Relatively best reports as to current trade come from the dry-goods lines. Heavy clothing feels the dulling effect of mild weather. Some leading prints and ginghams have been further advanced this week, and cotton yarns are active and in insufficient supply. Dress goods are in good shape, and fancy woolens are selling better than for some years. Wool markets are very firm, in sympathy with foreign markets, though transactions are not heavy. Less contracting by eastern dealers in the west is noted, owing to the high prices ruling near points of production.

Sugar is without much change, except that one refinery has cut prices of refined one-eighth cent. Probabilities seem to favor lower prices by other refiners, but the strike of drivers has been a steadying feature. Coffee has eased slightly, futures being 25 to 35 points lower on large movement. The world's visible supply on January 1 was 14,377,932 bags, against 13,808,836 bags on December 1, and 12,647,595 bags on January 1, 1906. The stock of all kinds in the United States on January 1 was 3,828,879 bags, against 3,422,385 bags December 1, and 4,397,556 bags on January 1, 1906.

American wheat stocks gained 4,548,000 bushels, while European stocks decreased 2,500,000 bushels in December, the net result being a gain of 2,000,000 bushels for the month in the entire world's supply, as against a gain of 7,700,000 bushels a year ago. The total supply on January 1, 1907, was 170,400,000 bushels, a gain of 10,500,000 bushels over a year ago, and of 20,000,000 bushels over January 1, 1905. Lighter offerings, fears of cold-weather damage to winter wheat, and good export demand were strengthening features in the premier cereal this week, but price changes were slight here, though advances of 2 cents were noted at Minneapolis, and Chicago showed a fraction of 1 cent advance. Corn also showed more strength but less than 1 cent advance on better cash demand and light movement. Provisions showed a downward tendency, pork losing 25 cents a barrel.

The market for Kentucky whiskey is very strong, aged goods being in active inquiry. A feature of the trade is the scarcity of barrels, which is so marked that some distillers are hard put to deliver goods. As high as $4 each is paid in that state for the wooden receptacles.

Cotton has been irregularly strong throughout most of the week, good demand for actual cotton early offsetting heavy crop movement and advancing prices 15 to 20 points on futures and 15 points on spots. The ginning report showing 11,750,000 bales ginned to January 1, as against 9,725,000 bales a year ago, was also regarded as in a measure bullish, being construed as pointing to 12,500,000 to 13,000,000 bales. Later in the week, however, the large movement caused irregularity, the market closing 10 points up on spots and futures on Friday.

Easier conditions have developed in some branches of the iron and steel industry. Thus, western structural-material plants, the capacities of which have been greatly increased, are not so rushed with ordes, and one leading interest now operates its mills every other week on billets. Bar iron is lower, the movement being similar to that displayed at about this time last year. Open-hearth billets have declined at Philadelphia. Scrap material is weaker at many centers, and some cities appear indisposed to cover their requirements for cast-iron pipe, owing to high prices. Moreover, concessions are said to have been made in the east on foundry and basic pig iron for last-half delivery. On the other hand, spot pig iron is very scarce, western furnaces have sold upward of 65 per cent. of their product, and a heavy buying movement has developed at Pittsburgh, the grades ordered being Bessemer, basic and foundry irons for last-half delivery. Pig-iron production in December amounted to about 2,230,000 tons, thus establishing a new record, and indicating a production of 25,350,000 tons for 1906, also a new high record. Eastern plate makers have advanced prices $2 a ton. New business in structural material for railway bridge work is of fair volume. Steel bars are firm on a fair demand, while sheets are strong. Steel rails are in light demand, though trolley roads continue good purchasers of light sections. Coke is firm and the supply scarce, owing to car shortages. Copper is higher, as high as 25 cents per pound having been paid for a carload lot of lake copper for prompt shipment. For future delivery prices range from 24¼ to 25 cents. Tin is lower, and spelter and lead are higher.

The New York stock market is dull after a sharp decline, due to the unexpected news of a new large stock and bond issue by the Pennsylvania Railroad Company. The remarkable revelations regarding Union Pacific's stock interests in other systems, and the possibility of adverse action by the government based thereon, also tended to restrict speculative activity, though the market apparently had support at the concessions and displayed a rather good undertone. Bonds are still dull and neglected. Foreign exchange is weak, demand sterling being 4.84.50.

Bank clearings for the week ending with January 10 aggregate $3,474,625,215, 9.5 per cent. over last week, but 9 per cent. below the same week last year. Excluding New York City, the total is $1,229,715,388, 9.6 per cent. in excess of last week and 5 per cent. over last year. At this time last year transactions on the New York Stock Exchange were very heavy, hence weekly bank clearings were of record proportions.

Business failures for the week ending January 10 number 283, against 185 last week, 286 in the like week of 1906, 295 in 1905, 315 in 1904 and 234 in 1903.

Wheat, including flour, exports from the United States and Canada for the week ending January 10 aggregated 4,073,110 bushels, against 4,255,270 bushels last week, 4,768,772 bushels this week last year, 700,950 bushels in 1905 and 3,567,710 bushels in 1902. For the past twenty-eight weeks of the fiscal year the exports are 101,996,614 bushels, against 73,788,792 bushels in 1905-06, 36,876,224 bushels in 1904-05 and 154,577,484 bushels in 1901-02. Corn exports for the week are 1,296,187 bushels, against 1,974,599 bushels last week, 5,342,569 bushels a year ago and 2,932,014 bushels in 1905. For the fiscal year to date the exports are 27,100,275 bushels, against 48,560,850 bushels in 1905-06 and 21,618,880 bushels in 1904-05.

IN CANADA.

Following the holidays, trade in Canada is quiet, this being somewhat accentuated in retail lines by the recent mild weather. Spring shipments from eastern points have already begun. Collections as a whole are good, following the holidays. Country trade is quiet. Montreal reports high prices for butter may cause reshipments from England of Canadian butter. Toronto reports spring orders for dry goods being received and a heavy business in prospect. Unseasonable weather affects retail trade but allows of activity in building. Winnipeg reports retail stocks of winter goods as moving well, but there is complaint as to collections dragging. In British Columbia the lumber business shows great activity. Failures for the week number 24, as against 16 last week and 46 in this week a year ago. Clearings for the week aggregate $87,102,540, a gain of 4.2 per cent. over last week and of 7.6 per cent. over this week a year ago.

TRADE REPORTS.

At New York business in dry goods and clothing is very satisfactory, considering the season. Spring business with some houses is over, and they are already preparing for fall trade. There have been some large sales of cotton and dress goods from stock, and orders for future delivery of gray cotton goods have been placed at strong and steady prices. Silk is in a healthier condition, and worsteds are in fairly good demand. Retail trade is comparatively quiet. In millinery artificial feathers and flowers still sell well; women's hats are in good demand and an active spring trade is promised. A considerable stock of furs has been carried over by manufacturers, who are offering at reduced prices to clear. Manufacturers of shirts and overalls are active, and commission houses are sold up on knit goods and cannot take further orders for either spring or summer deliveries. Business in wholesale notions is normal. Wholesale grocers report trade satisfactory and collections good, but retail is less active. In the tobacco trade collections are good, but cigar manufacturers find them somewhat slow. Poultry is weak. Eggs are off 1 cent. The car shortage has diminished and receipts of live stock and dressed meats have been heavy, despite which prices are well maintained. The bicycle business is active and the number of automobiles registered in this state during 1906 shows an increase of 3,128 over the previous year. Conditions in the metal-goods trade were never better, and manufacturers of hardware, tin and enameled ware find it difficult to keep up with orders. The increase of 10 per cent. in the price of glass has not curtailed business. Copper, the consumption of which is heavy, is quoted at 25 cents. Pig iron and scrap material are in good request and machinery dealers have never been so busy. The boot and shoe trade is quiet because of weather conditions. Prices in the hide and leather market are firm. In jewelry business is satisfactory, though there is less demand for diamonds. In the furniture trade medium-priced goods are free sellers and conditions generally are satisfactory. Wholesale paper shows a slight reaction. Real estate is active. The number of plans for new buildings filed shows a return of confidence among speculators, but more conservative operators are not taking on any new work. There is continued activity in general construction lines and iron and steel in structural form are in strong demand. The volume of business in lumber and building materials shows some falling off, but the trade as a whole regard the situation as satisfactory, complaint, however, still being made of car shortage.

The following telegrams show trade conditions at the cities mentioned for the week ending January 11:

BOSTON.—Jobbers of dry goods are doing a good business for the season. Retailers generally are conducting regular January clearance sales, and some are announcing early openings of spring goods. Preparations are being made for an early spring trade. Cotton goods are still advancing in price. Announcement is made this week of an increase of ½ cent on staple prints. Ginghams and denims are also stronger. Wash fabrics are scarce and mills are sold up far ahead. In dress fabrics, panamas, voils and fancy worsteds are most popular and are in very good demand. Cutters-up for retail trade have spring samples out and are soliciting first orders. Men's-wear woolens of fine finish are in better demand than for the past two years, although worsteds still retain their general popularity. Jobbers of men's furnishing goods report business as active and of good volume. The annual winter pilgrimage of jobbers fills the shoe manufacturers' offices, but business placed is not yet up to the same period of last year. Business in chemicals is reported as good for January. Prices generally continue on a high level. Denatured alcohol is quoted at 42 cents per gallon, while grain alcohol is unchanged. Drugs are quiet, with gum camphor firm, latest quotation being $1.17½ per pound. Quinine is moving fairly well in jobbing quantities. The demand for dyestuffs and tanning materials is confined to near requirements. Aniline colors are lower, owing to strong competition. Trade in northern and eastern lumber continues quiet, with prospect of firm prices for some time to come. Weather conditions are favorable for lumbering operations, but scarcity of labor retards the work. In southern and western lumber there appears to be slowness, prices remaining about the same. Pig iron is not so active, and in the steel market deliveries are backward. Copper

and metals continue very active, prices being high. In paints and oils prices continue firm on a quiet market. Grocery jobbers express satisfaction with last year's results.

PROVIDENCE. — General business is good. Jobbers in dry and fancy goods report an excellent volume of trade. Prices are high and there are excellent prospects for a good spring trade. Cotton goods continue in good demand. Collections in the jewelry line are coming in fairly well.

PORTLAND, ME.—Dullness in retail trade continues, particularly in dry goods, clothing and shoes. Travelers, however, are starting out for spring orders, which are coming in with more than usual freedom. Factories continue busy.

PHILADELPHIA.—Wool continues fairly active, with prices well sustained. Textile manufacturers as a rule appear to have about all the business they can take care of, and the demand for cotton yarns continues unabated, notwithstanding the high prices. Flour is weak and unsatisfactory, the demand being very moderate. Chemicals and dyestuffs rule firm and business is a little more active, especially for heavy goods. Drugs are in good demand and the market rules strong and active. Paints and glass are moving in moderate volume and the market rules strong, glass having been advanced. Lumbermen still complain of a scarcity of cars, which is retarding business somewhat, otherwise the market is in a very satisfactory condition, both as regards demand and prices. Hides and skins continue firm and fairly active at good prices. Leather continues firm at further advances in prices. Wholesale and retail shoe dealers report good business, with prices high. The rubber trade is not so brisk, owing to weather conditions. Factories are now busy on spring orders. Tobacco sales are fair, although efforts have not yet been put forth. Salesmen now on the road have secured some business. Prices are high and desirable stocks scarce. Liquor sales have been larger than usual, apparently for medicinal purposes. The market is steady. The manner in which business of the new year has opened presages a continuance of activity in iron for some months to come, early deliveries being as urgent as ever. Prices are strong, in some cases higher, and orders are being placed well into the last half of the year. The open weather has been favorable for coal transportation, but a shortage of cars causes more or less interruption to an otherwise good business.

PITTSBURGH.—There was more activity in the pig-iron market during the week than for some weeks past, and sales of Bessemer and basic aggregating 20,000 tons for second, third and fourth quarters were reported. The second-quarter iron, of which there appears to be a small quantity available, was sold at $22.50 for Bessemer and $22 for basic at the valley furnaces, and the same prices prevailed for third and fourth quarter delivery. There is now a very general inquiry for iron, and the prices named seem to be pretty well established between buyer and seller. Inquiry for finished material has slackened to some extent, but specifications on contracts already booked are being received in such quantity as to equal the productive capacity of the mills. There is a continued heavy movement of coke, and but little complaint is heard as to transportation facilities. Practically the whole production of standard Connellsville coke for the year has been absorbed, but the lower grades are still available. Prices are well sustained, with no signs of a break. Nominal quotations for pig iron at the furnaces, for spot delivery, are as follows: Standard Bessemer, $23 to $24; chilled basic, $23 to $24; No. 2 foundry, $25 to $26, and gray forge, $22. Standard Connellsville furnace coke is quoted at $3.50 and foundry coke at $4 to $4.50, at the ovens.

BUFFALO.—Unseasonable weather has had a depressing effect on retail trade. Sales fell below the average for the corresponding period of former years. Merchants, however, have their stocks pretty well reduced, and general conditions point to continued prosperity.

BALTIMORE.—City retail business has been only fair, owing to continued unseasonable weather, and retail clothiers are much disappointed. The labor problem is becoming more acute, and new manufacturers in various lines are meeting with difficulty in getting out their goods. Wholesale grocers report a good week's business, with fair collections. In wholesale liquors the usual after-holiday quiet is experienced, with collections fair. Clothing manufacturers are busily engaged manufacturing for spring delivery. Conditions in this line have improved, and cancellations are restricted to certain lines. In dry goods and notions a few mail orders are being received, salesmen not having got started. The drug trade reports active sales and fair collections. The lumber market is largely overstocked because the mills rushed their output to market during the open weather, anticipating a freeze-up or unseasonable weather later on. Sales to the yards are small. Crockery and glassware are quiet, usual between season conditions existing, and collections are slow. Boots and shoes are fairly active, values firm and collections fair. Statistics show a record-breaking export business in coal to foreign countries from Baltimore during 1906. The grain business, which has been quiet for some months, is beginning to look up. Local banks report a continued strong demand for money, both at home and from out of town.

CINCINNATI.—Business in merchandise has improved, owing to more seasonable weather. Retail trade is fairly active. Groceries are in good demand. Provisions are stronger, with a fair general movement. In most manufacturing lines business is good. Collections are good.

CLEVELAND.—The jobbing trade is comparatively quiet, but the outlook for spring continues favorable. Manufacturing establishments are busy.

CHICAGO.—While trade conditions are, in the main, most excellent, there are a few features in the iron and steel trade that attract attention and create comment. Reduced demand for structural material is causing the Illinois Steel Company to operate its mills one week on structural shapes and the next on billets. This stands out more conspicuously from the fact that capacity has been largely increased within a year. For all other finished products of iron and steel there is a good demand, except for cast-iron pipe, which is slow, as municipalities are holding off from buying owing to high prices, but Minneapolis bought 2,000 tons this week. Bar iron is weakening in price as it did a year ago, but steel bars are held firmly. Specifications in most lines are coming in faster than the mills are able to turn out the stock, but a shortage of cars is hampering operations by the mills, as their shipping facilities are overcrowded. Light rails are selling freely, with mills sold ahead. Pig iron is active. Local merchant furnaces have sold two-thirds of their output for the year, about all the first half being booked at full prices. Pipe mills are crowded with orders. Ideal traffic weather has enabled eastern railroads to move good supplies of coke to the west, but a heavy consumption prevents accumulations. Coal is scarce in parts of the west, and severe weather has caused much suffering. With jobbers of dry goods, clothing and shoes there is an active trade, not only in filling small orders to reassort stock, but in the way of new business. Shipments of goods to the south and southwest are heavy. Groceries are being consumed in large quantities. Eggs and potatoes are higher, but butter is easy, while poultry is lower. Hogs are quoted at $6.60, the highest price in six months. Good cattle bring more money, but sheep and lambs are easier. Receipts of all live stock have increased. Money is easier, demand has declined, and currency is returning from the interior more freely. Collections generally are good, although in sections where business has been poor, slowness is reported.

DETROIT.—Retail business is rather quiet, as usual at this time, and warm weather has retarded sales of woolens and winter fabrics. Dealers all appear to be well stocked. Wholesalers report good orders for spring goods and prospects bright. Hardware and lumber are quite active. Building operations continue very active, and demand for labor is good. Collections, on the whole, are classed from fair to good.

LOUISVILLE.—Business in all jobbing lines is quiet. In retail trade clearance sales are the feature. Warm weather has hurt some of these cut-price sales, but the volume is still reported to be large. Fine Kentucky whiskey is in large demand, and the older ages of bonded goods are increasing in price. Distillers who have not contracted for cooperage are in a desperate plight, as whiskey barrels are very scarce and the price very high. Four dollars each has been refused by the leading cooperage manufacturers. Money is reported scarce, though all the banks' statements of December 31 show large cash balances. Collections are fair.

ST. LOUIS.—The good feeling with which the year started still prevails, and manufacturers and jobbers in all lines feel that basic conditions are sound. There is, however, some uneasiness as to the money market, owing in part to inimical measures introduced and talked of by various state legislatures. The indications are that the output of shoes will be largely increased over 1906, as nearly all the large firms have increased their capacities. Manufacturers of furniture will also show an increase, while jobbers in hardware feel that 1907 will be the best year on record. Statements that are being received from retail merchants and bankers in the country districts indicate a more solid basis than at any time heretofore. The banks apparently have plenty of money, while stocks of merchandise appear less than last year, which augurs well for the jobber. Building in the city continues active, yet there are not so many contracts to be let for future construction as existed a year ago, and prominent real estate people seem to think that there will be a lull in building during the latter part of this year on account of high prices for material and labor.

TERRE HAUTE.—All branches of trade began the new year with much promise. Sales and collections compare favorably with, and in some instances exceed, those of the corresponding date last year. A steady increase in the city's growth is maintained, indicating settled labor conditions. General bank deposits are materially increasing.

KANSAS CITY.—Reports from jobbers in all lines show a very good volume of sales for the beginning of the new year. Country merchants are said to be doing an excellent business and ordering freely for spring trade. Shipments of farm implements are unusually heavy. Trade in hardware, glass and paints is active. Collections are good. Retail business continues heavy.

MILWAUKEE.—Unseasonable weather has affected jobbing and retail trade, but improvement is looked for. Manufacturing industries report satisfactory conditions. Collections are fair.

SIOUX CITY.—Open weather continues. Trade, wholesale and retail, is quiet. Collections are only fair.

DAVENPORT.—Trade as a whole is satisfactory for this time of the year. Some merchants complain, but they are few. The weather so far this winter has been mild. Banks report an active demand for money. Collections are fairly good.

ST. PAUL.—Dry-goods lines are very active, working night and day getting out spring orders. Shoes and rubbers are having a fair trade and are anticipating more. Hardware is dull. Collections are improving gradually, but are not what they ought to be. Traffic is demoralized in North Dakota. Opinion is divided as to the future movement of grain. Some anticipate a rush in the spring and a consequent fall in price. Others think it will continue slow, and that payments, being likewise small, will be spent on current wants, leaving debts unpaid.

MINNEAPOLIS. — A large number of farm-machinery dealers have been in the city this week attending a convention, and wholesale houses in that line have consequently been very busy. In other lines there has been the usual amount of business. Collections are still only fair and money is in good demand at better rates. The flour business is fair and prospects are improving.

OMAHA.—Wholesale and retail trade is quiet. Jobbers report spring orders on hand as exceeding those of a year ago. The outlook appears unusually favorable. Collections are a little backward.

LINCOLN.—Many merchants are having discount sales. Continued warm weather has weakened the demand for heavy apparel. Wholesale trade and collections are fair.

OKLAHOMA.—Stormy weather throughout the week has depressed retail trade to some extent. In the larger towns building operations are somewhat seriously impeded from inability to secure delivery of material, owing to the car shortage. Collections are not so easy as last month. Wheat is in good condition over the greater portion of the state.

CHARLESTON.—Trade in all lines shows a small improvement. Collections are still slow.

ATLANTA.—While traders in all lines report a considerable volume of business, a marked hesitancy is noted in filling the same. Collections are not good, and the usual after-the-holiday failures are occurring. So far these failures have occurred principally to small dealers. Unseasonably warm weather has affected the retail clothing and dry-goods trades, and a rather pessimistic view is being taken of early spring business.

JACKSONVILLE.—Retail trade is slow and continued warm weather hinders the movement of winter goods. Wholesalers, however, report the receipt of good orders, with collections fair.

BIRMINGHAM.—Southern No. 2 foundry pig iron for first-quarter delivery is quoted at $23.50, with a strong demand. Trade in general shows an increase since January 1. Collections are a little slow.

AUGUSTA.—Trade is quiet.

MOBILE.—Owing to merchants being slow in giving orders for future delivery, wholesalers are not sending out all their travelers. Collections are only fair.

MONTGOMERY.—Retail trade is only fair, but it is as good as that of last year at this time. Wholesalers report business as satisfactory. Collections are fair.

CHATTANOOGA.—Trade is comparatively quiet. Many firms are busy with inventories, which will show that 1906 was a very successful year. Prospects for the coming year are regarded as quite favorable. Collections range from fair to good.

KNOXVILLE.—Business in mostly all lines continues brisk. Retailers are conducting clearance sales. Manufacturing industries have on hand sufficient orders to tax their capacities. The general outlook is good. Continued warm weather, however, affects certain retail lines. Collections, though fairly satisfactory, are somewhat slow.

NASHVILLE.—Wholesale trade in all line shows an improvement over the previous week. Retail business is affected by unseasonable weather. Collections continue slow.

MEMPHIS.—The lull usually following holidays prevails. Retail trade is quiet. Drummers are in their territory, but orders are placed conservatively. Collections are slow. Money is tight. Car shortage, wet weather and bad country roads delay movement of cotton. Warehouses and railroad platforms are congested.

LITTLE ROCK.—Trade, wholesale and retail, is fair. Collections are fair.

NEW ORLEANS.—The reaction from large trade during the holidays continues, but reports from the country section show activity and prospects of good spring trade. Collections are fairly good. Exports are light. Money is firm.

DALLAS.—Warm weather, with occasional showers, the past ten days has been most beneficial to small grains in northern and northwestern Texas. The acreage will exceed that of former years, and the outlook for an average yield is very favorable. Business in all lines is suffering from the holiday reaction, but both jobbers and retailers, after inventorying, report satisfactory gains for 1906. Collections are highly satisfactory.

WACO.—All trades are quiet, after a very prosperous year. Collections are fair and slow. Crop conditions are very favorable, as recent rains put the soil in excellent condition for tilling.

SAN FRANCISCO.—Storms have hampered retail trade, transportation and building, but assure abundant crops. The fuel shortage has caused some discomfort. Collections are good.

SEATTLE.—Business, wholesale and retail, has not slackened to any marked extent since the passing of the holidays. There is still a coal shortage, and the failure to supply sufficient cars is the cause of wheat moving very slowly. Prices are firm and collections are good.

SPOKANE.—The fuel shortage continues acute throughout this section. Trade in general is good, with clearings in excess of last year. Collections are fair.

TACOMA.—Stock-taking is still in progress, but business on the whole is satisfactory. Collections are fair, and the fuel situation is somewhat better.

PORTLAND, ORE. — The usual post-holiday conditions exist in business circles. Building activity continues. Collections are good.

TORONTO. — Trade continues quiet. Spring orders for dry goods are still coming in freely, and the outlook is for a very heavy business. Shipments are beginning to go forward. The grocery trade continues quiet. The leading feature of the market is the firmness in canned goods, with stocks of fruits and vegetables light. Dried fruits continue firm. The hardware trade is holding fairly well, and metals are active, with prices firm. Building permits here during December showed a heavy increase over those of the same month of the previous year. Unseasonable weather has affected retail trade, but business is fair for an after-holiday season. Colder weather has now set in, and a better city and country trade is expected. The wholesale sorting trade, too, may be expected to show a better tone by the end of the month. Money is coming forward fairly well. Hides are quiet, with a firm tone. Provisions are generally steady to firm, with stocks of cold-storage eggs light. Wool is still quiet. Hogs are very firm in tone, and the market supplies are light.

MONTREAL.—Wholesale trade is quiet. Dry-goods merchants are commencing spring shipments and the outlook for that trade continues bright. Hardware trade is good and values in all departments are more or less firm. There is no

change in the iron and steel situation; stocks of most lines are light and prices are firm. Local retail trade has continued quiet in character since the holidays. Country trade has also fallen off. Collections, however, are showing the results of the good holiday trade and are generally good. Country retail trade is also quiet. Country produce is not coming forward freely and most lines hold firm. Prices have been very high for some time and the farmers have profited accordingly. Small lots of butter are being made, and it is expected large quantities of Canadian butter will be reshipped to this market from England. Eggs are active and very firm, stocks of cold storage being light. Flour is steady to firm, while grain is quiet and about steady. Stocks of hay are light and prices firm. The hide market is easier, following the decline at Chicago. Wools are steady to firm. There is still a good demand for hogs and too few coming forward. Receipts of choice cattle are light.

VANCOUVER-VICTORIA.—Wholesale and retail business is moving fairly well, and collections from all points are reported as satisfactory. All lines of commodities hold firm in value. The lumber trade reports continued great activity. It is generally stated in the trade that prices may again be expected to advance.

WINNIPEG.—There is already some sign of reviving trade after the quiet of the holiday season, although the movement is by no means heavy. The weather has been favorable, however, and retail stocks of winter lines have been moving well. Wholesale trade is quiet, although a fair sorting trade is looked for soon. Further preparations for the spring trade show that there is every prospect of business being heavy. Collections have not been as good as they were earlier in the season. There is some slight complaint on this score from all parts of the country.

Money Market.

While some variation occurred in call-loan rates at New York in the earlier days of the week, the tendency was, nevertheless, in the direction of increased ease. The banks have gained rather largely from the operations of the Treasury, and receipts of funds from the interior were in fair volume, making the total estimated net increase $10,000,000. Satisfaction was also expressed about Secretary Shaw's decision to postpone the repayment by the banks of the $12,000,000 of special deposits which were made in the banks in December for the purpose of relieving the strain which existed at that time. It was also noted that the foreign exchange market is again decidedly weak and that all fear of gold exports has disappeared for the time being, notwithstanding the continued strength of the London money market. One of the chief features was the free offerings of time money at 5 per cent. by bankers, which was construed as indicating a belief in such quarters that such accommodation is liable to rule at fairly easy rates from now on. Commercial paper is more active, the offerings of high-grade names being more liberal, and while there is little or no local buying, out-of-town institutions are again taking paper with some liberality and at concessions from the recent rates.

New York Banks.

Last Saturday's Clearing House averages were somewhat confused by the shifting of balances incident to the January 1 interest and dividend payments. In the case of the cash items, which displayed a net decrease of $402,100, this result was attributed in a large degree to the fact that the trust companies were obliged under the law to have the full 5 per cent. reserve on January 1. Those requirements, it was held, affect the receipts of money from the interior. The increase of $16,694,500 in loans was attributable to increased stock market activity as well as to syndicate borrowings, while the increase of $19,277,200 in deposits was nearly $3,000,000 greater than was called for by the changes in cash and loans, thus making the statement a discordant one in its principal items. As the reserve requirements increased $4,819,300, the surplus reserve decreased $5,221,400, and stood at only $147,825. The figures of the statement compare as follows with those of the preceding week:

	Jan. 5, 1907	*Dec. 29, 1906*	*Changes*
Loans	$1,049,667,500	$1,032,973,000	I. $16,694,500
Specie	172,951,400	179,323,000	D. 6,371,600
Legal tenders	77,341,000	71,371,500	I. 5,969,500
Deposits	*1,000,578,300	981,301,100	I. 19,277,200
Circulation	53,664,200	53,670,800	D. 6,600
Total reserve	250,292,400	250,694,500	D. 402,100
Reserve required	250,144,575	245,325,275	I. 4,819,300
Surplus reserve	147,825	5,369,225	D. 5,221,400

The following compares the statements for the respective weeks in 1907, 1906 and 1905:

	Jan. 5, 1907	*Jan. 6, 1906*	*Jan. 7, 1905*
Loans	$1,049,667,500	$1,004,658,300	$1,069,742,700
Specie	172,951,400	167,316,600	203,684,000

Foreign Exchange.

The inquiry for remittances became very slack this week and there was a fair supply of commercial bills in the New York market. Easier money conditions abroad also appear to have encouraged bankers to put out finance bills with some freedom. Under these circumstances the exchange market developed weakness and the posted rates were reduced from 4.81½@4.86½ to 4.81@4.85½, while actual transactions in demand sterling went from 4.85.50 at the end of last week to as low as 4.84.60 on last Wednesday. The market, however, rallied somewhat from the extreme decline, and this improvement continued on Friday, though its tone continued to be unsteady.

POSTED RATES OF LEADING DRAWERS FOR LONG AND DEMAND STERLING.

Jan. 5	*Jan. 7*	*Jan. 8*	*Jan. 9*	*Jan. 10*	*Jan. 11*
4.81½ @ 4.86½	4.81½ @ 4.86½	4.81½ @ 4.85	4.81 @ 4.85½	4.81 @ 4.85½	4.81 @ 4.85½

ACTUAL BUSINESS BANKERS' DEMAND STERLING.

4.85.30 @ 4.85.40	4.85.00 @ 4.85.20	4.84.90 @ 4.85.10	4.84.60 @ 4.84.80	4.84.65 @ 4.84.75	4.84.75 @ 4.84.85

ACTUAL BUSINESS BANKERS' SIXTY-DAY STERLING.

4.80.75 @ 4.80.80	4.80.50 @ 4.80.75	4.80.50 @ 4.80.75	4.80.40 @ 4.80.50	4.80.30 @ 4.80.50	4.80.40 @ 4.80.50

Closing quotations on Friday for actual business in other classes of bills were: Cables, 4.85.60; commercial bills, 4.79⅞@4.80¼; francs, 5.23⅛@5 20 plus 1-16; reichsmarks, 93 11-16@94⅝.

The Bank of England's discount rate remains unchanged at 6 per cent. In the week ending Thursday it gained £1,371,154 in specie, and the proportion of its reserve to liability was increased from 33.50 per cent. to 39.97 per cent. There was an apparent decrease of over £6,700,000 in the borrowings by the market from the bank. In the London open market money eased off at the beginning of the week, but as it closed the tone was somewhat firmer, with call loans quoted at 3½ per cent. and discount 4 15-16@5 per cent. The Bank of France this week reported a loss of 7,425,000 francs in specie. Its rate remains 3 per cent., the Paris market quotation being also 3 per cent. At Berlin the bank rate is 7 per cent., and the market for discount 5 5-16 per cent.

New York Securities Market.

Although the strong tone which had developed in the stock market at the end of last week continued to display itself in the first days of the present one, it did not hold out throughout, the trading becoming dull and the price list showing an irregular, sagging tendency. The exhaustion of the short interest, which had covered extensively when money began to grow easier, was accompanied by no indications of a general buying demand for stocks. It is true that the market appeared to have support from the larger interests, who are not disposed to allow it to become demoralized. This was shown by the way the Harriman stocks were aided in the face of the revelations brought out by the probing into its finances by the Interstate Commerce Commission, although it is already apparent that the facts bearing on the relations of the company to the Southern Pacific and other properties will doubtless be used as a basis for efforts by the government to loosen the control which binds together the Union Pacific-Southern Pacific systems and auxiliary properties. It might also be remembered that the street was to some extent inclined to consider the revelations into the Union Pacific's enormous holdings of other securities as favorable and as holding forth possibilities of future benefits to its shareholders.

The chief incident of the week, however, was adverse, or at least was construed in that way. This was the entirely unexpected announcement that the Pennsylvania Railroad management seeks authority to increase its stock by $100,000,000 and also to issue an equal amount of new bonds. It is claimed that this is merely a provision for the company's future capital requirements, and that no new stock or bonds are to be issued for some time. The street, however, seemed to receive such assurances with a measure of incredulity, and, coming as the news does at a time when the market is fairly surfeited with new stock issues and "rights," the prospect of a further enormous addition to the Pennsylvania's overgrown capitalization was the object of unfavorable comment. Pennsylvania shares broke from 140¾ on Thursday to 135¼ soon after the opening on Friday, and the entire active list sold off rather sharply. It was, however, again noted that there was support at the concessions and that the selling which developed was not of a very severe character, so that the market steadied itself with greater rapidity than might have been expected

in view of the suddenness of the bad news. Another incident was the announcement that the attorney-general of Missouri has taken action in the courts against the Missouri Pacific, the Iron Mountain and the Wabash roads, the object being to declare illegal the combination which exists among the principal corporations of the so-called Gould railroad system. The effect of this was seen in a drop on the part of Missouri Pacific. Some attention was also paid to reports that a minority interest in the Wabash debenture B bonds proposes to offer legal opposition to the plan for the rearrangement of that company's finances, and it was also noted that minority holders of United States Leather preferred have begun a suit designed to block the proposed merger of that organization with the Central Leather Company. On Friday afternoon the market was steady at a further recovery, which was aided by the expectation of a favorable bank statement to-day.

Boston Stock Market.

Prices of principal stocks, with volume of transactions, on the Boston Stock Exchange, have been as follows:

Wheat and Flour Exports.

[Special to BRADSTREET'S.]

The quantity of wheat (including flour as wheat exported from United States and Canadian ports for the week ending with Thursday compares as follows, in bushels:

Week ending	1907	1906	1905
January 3	4,255,270	3,839,741	1,411,947
January 10	4,073,110	4,768,772	700,950
Largest exports in 1906, week ending Aug. 30			5,188,817
Smallest exports in 1906, week ending July 19			1,535,967
Largest recorded exports, week ending Aug. 11, 1901			9,039,761
Smallest recorded exports, week end'g Feb. 16, 1905			536,540

Corn Exports, in Bushels.

[Special to BRADSTREET'S.]

Week ending	1907	1906	1905
January 3	1,974,590	6,265,333	3,186,532
January 10	1,296,187	5,342,569	2,932,014
Largest exports in 1906, week ending February 1			8,289,359
Smallest exports in 1906, week ending June 14			320,486
Largest ever recorded, week ending Feb. 1, 1906			8,289,359
Smallest ever recorded, week ending Sept. 1, 1902			21,196

Statistical Situation of Cotton.

The aggregate world's visible supply of American and other cotton last week, as made up by the New Orleans Cotton Exchange, is shown, with comparisons:

Week ending	Jan. 4, 1907	Dec. 28, 1906	Jan. 5, 1906
American	4,148,891	4,121,646	4,131,399
Other kinds	1,067,000	1,049,000	1,235,000
Total	5,215,891	5,173,646	5,366,399

Of the world's visible supply, as above, there were afloat for or held in various countries on the dates given the following quantities:

	Jan. 4, 1907	Dec. 28, 1906	Jan. 5, 1906
Great Britain and continent	2,531,000	2,402,000	2,667,000
Egypt	249,000	238,000	205,000
India	454,000	452,000	664,000
United States	1,982,000	2,082,000	1,830,000
Total	5,216,000	5,174,000	5,366,000

Following will be found the movement of cotton into sight for the week and season, as compiled by the New York Cotton Exchange:

	This week	Last week	Last year
Week	434,748	449,318	246,927
Season	8,727,787	8,293,039	7,422,966

Boston Wool Market.

While the market has been rather more quiet during the past week, owing to small stocks more than anything else, the great strength of foreign markets and the excellent inquiry have served to maintain prices at the top and assure dealers that their stocks will be needed. The Australian market opened very strong and ½@1d. higher after the holidays, and as Boston is now the lowest market in the world for most kinds of wool, dealers are disposed to hold for higher prices the wool that is left. Boston dealers have done nothing in the way of contracting for the 1907 clip in the west as yet, though something has been done by western houses, but the strength abroad has raised the ideas of the growers as well as dealers, and there is now less talk of contracting by local houses than for three years at this time. Worsted wools are in small supply and therefore quiet, but there is a very good movement in clothing wools. Manufacturers' stocks are low; there is keen competition in foreign markets and no disposition to make price concessions either in the foreign or domestic markets. The sales of the week included fine and fine medium Idaho at 20@22 cents, fine medium Utah at 22 cents, 150,000 pounds of New Mexico wool, all grades, at 23 cents, quarter blood Wyoming and Montana at 26@28 cents, fine washed delaine at 37@38 cents, unwashed delaine at 30 cents, fine unwashed at 26@26½ cents, XX Ohio at 34@34½ cents, staple Oregon at 23@24 cents, middle counties California at 20@21 cents for ordinary and 23@24 cents for choice; old fall wool at 53@55 cents for free and 37@38 cents for defective; new fall, California carbonized, at 56@58 cents, Texas twelve months' at 75 cents clean, and a good volume of fall Texas at 22@23 cents. The London sales will open January 15 with offerings of only 152,000 bales, instead of the 180,000 bales limit, and prices are expected to be higher on low crossbreds and very firm on merinos and fine crossbreds. About eighteen buyers from this country will attend, including about sixteen from Boston and two from Philadelphia.

Boston Shoe and Leather Market.

The leather market opens the new year with fair activity and a general point of unyielding prices. Sole leather is going forward on all purchases, and receipts are well taken care of. Finished splits are still very scarce, and most houses are unable to fill old orders promptly, to say nothing of accepting new business. Dealers in patent and enameled leather are unable to obtain finished goods as fast as shipments are called for, owing to lack of favorable weather. Buff hides are considered worth about 15 cents, although some shippers still quote ⅛ to ¼ cents higher. The condition of the hide market is described as dull. Some brokers report large orders for foreign skins from leading tanners. Sheepskins and goatskins are firm and high. Wholesalers are in Boston, either personally or represented by their buyers, in large numbers. Shoe manufacturers anticipate the placing of large supplementary orders for spring goods, it being the belief of some that many houses have not bought more than 50 per cent. of their reasonable requirements for spring and summer trade. The price question is not a disturbing feature at present time. According to the *Shoe and Leather Reporter*, 1907 starts off with a decrease in shipments as compared with last year. This is in accordance with information, which is that orders in hand are not up to last year. The figures for the first week of 1907 are as follows: Last week, 91,945 cases; preceding week, 71,048; last year, 96,736; total for 1907, 91,945; total for 1906, 96,736; decrease, 4,791.

SHIPBUILDING IN THE UNITED STATES.

According to the *Marine Review*, "the shipyards of the Great Lakes have seventy-one vessels under construction for 1907 delivery, of which forty-five are bulk freighters, four are passenger steamers, four are package freighters, five are tugs, two dredges, two car ferries, five scows, three hopper barges and one quarantine steamer. The forty-five bulk freighters have a carrying capacity of 302,000 gross tons on a single trip, or 6,040,000 tons in an average season of twenty trips. In addition, there is to be added to this 1907 programme three vessels which were taken for 1907 delivery, but which were actually delivered in the fall of 1906. These three steamers increase the available tonnage for a season by 460,000 tons, making the total increase available for next year's ore trade 6,500,000 tons. This enormous shipbuilding programme exceeds in number, though it does not exceed in actual carrying capacity, the fine list of orders that the shipbuilders of the lakes had on hand when the year 1906 opened. In January last the shipbuilders had under order thirty-nine vessels, of which thirty-four were bulk freighters, two package freighters, two car ferries and one passenger steamer. With the exception of two 6,500-ton freighters, these vessels had carrying capacities ranging from 8,000 to 12,000 tons, the thirty-four having a carrying capacity on a single trip of 338,000 tons, moving approximately 6,760,000 tons in a single season. The average carrying capacity of the 1907 shipbuilding programme is reduced by the fact that there are fifteen steamers building having carrying capacities of between 6,500 and 7,000 tons. This indicates a tendency to return to a medium-sized carrier. There are at present twenty-two ships building for the United States navy, as against thirty-two a year ago. The twenty-two ships under construction represent a displacement of 216,058 tons, horse power of 299,000, and a monetary value, exclusive of armor and armament, of $55,796,600. In this programme of twenty-two ships only two are additions to the list last year, the battleships South Carolina and Michigan. They are to displace 16,000 tons and to have a speed of 18½ knots. Tentative designs have been submitted for a battleship to exceed in displacement, offensive and defensive qualities, the Dreadnaught, recently added to the British navy, and shipbuilders will undoubtedly be asked during the year to bid upon its construction. Other additions will also be made. The coast shipyards are busier on merchant work than they have been for several years past. With two exceptions, however, all of the work in the coast shipyards is for coastwise trade."

OUTPUT OF GOLD AND SILVER.

The gold production of the United States reached a total of $88,180,700 in 1905, the largest figure ever recorded up to that date. In 1906, according to the preliminary figures received through the courtesy of George E. Roberts, Director of the Mint, the total output was $97,155,201.

GOLD PRODUCTION OF THE UNITED STATES.

	1905	1906	Changes

Michigan	127,800	250,000	I. 122,200
Montana	13,500,000	11,532,000	D. 1,968,000
Nevada	6,000,000	6,600,000	I. 600,000
New Mexico	250,000	362,375	I. 112,375
Oregon	81,560	100,100	I. 18,540
South Dakota	138,409	157,539	I. 19,130
Texas	469,600	280,000	D. 189,600
Utah	12,000,000	11,385,400	D. 616,600
Washington	115,412	31,119	D. 84,293
Other states	34,666	15,896	D. 18,770
Total	58,918,849	57,358,267	D. 1,560,572

The increase was largely due to developments in Alaska and the new mines of southern Nevada. The latter are remarkable from the fact that they are in a region which was prospected and passed over many years ago, and then neglected until two or three years ago, when the finds at Tonopah sent a multitude of prospectors into the country to search out its heretofore undiscovered riches.

Of course, their full value is still uncertain, and there may be a decrease in following years, or, we should say, less production than is now anticipated; but so much is established that we may confidently expect to see some of the world's great gold mines on the Nevada desert.

According to the *Engineering and Mining Journal*, the year 1906 records a further increase in the great production of gold which has marked the past decade. The accompanying table gives the world's approximate figures for the year, compared with the completed statement for 1905:

	1905	1906	Changes
Australasia	$85,470,779	$82,851,561	D. $3,119,218
British India	11,924,308	10,645,674	D. 1,278,634
Canada	14,485,833	12,000,000	D. 2,486,833
Mexico	14,526,855	15,430,000	I. 903,145
Russia	22,107,155	21,500,000	D. 607,155
Rhodesia	7,203,865	10,201,327	I. 2,997,462
Transvaal	101,225,558	119,605,922	I. 18,380,364
United States	88,180,700	97,155,201	I. 8,974,501
All others	34,151,823	35,250,000	I. 1,098,177
Total	379,857,373	404,649,685	I. 34,782,372

The total exceeds $400,000,000, the largest amount on record. The Transvaal again leads, and, moreover, shows the largest gain. The United States holds the second place, with Australia third. These three producers together furnished about three-fourths of the total. For Russia, the fourth producer in rank, it has been impossible to obtain the usual estimates, owing to the troubles of the past year. From the best available information, however, it appears that the decrease is small; it is small because most of the Siberian gold mines are isolated from the centers of commercial and administrative disturbance. Canada dropped last year to the sixth place, falling below Mexico; the decrease resulted chiefly from a lower output in the Yukon territory, which is still in the transition state, but may be expected to recover within the coming year, to a large extent. British India showed a loss in the Kolar goldfield, the largest mine in that field—the Champion Reef—having entered a zone of lean ore, through which work is being pushed in the hope of recovering the main ore body at a lower depth.

RAILWAY RECEIVERSHIPS AND FORECLOSURES.

"The year 1906 will be noted in railway history as a year of unprecedentedly large traffic and earnings, of vastly increased expenditures for material and labor, and yet of a larger total of net earnings than in any previous twelve months; hence as a year notably lacking in railway failures and receiverships," says the *Railway Age*. "With exceptions so few as almost to prove the rule, American railways, large and small, have earned at least their expenses and interest on their bonds, and thus have kept out of the hands of the courts. Of the nearly 2,000 steam railway companies, independent and subsidiary, in the United States, now representing some 223,000 miles of road, only six companies, with an aggregate of but 204 miles, had to be placed in the charge of receivers on account of insolvency in the year, the list being as follows:

	Miles	Bonds	Stock
Toledo Railway & Terminal	31	$3,500,000	$3,100,000
Union & Glenn Springs	22	....	20,000
Velasco, Brazos & Northern	20	200,000	36,000
New Jersey & Pennsylvania	27	125,000	145,000
Chicago Terminal Transfer	84	16,239,000	30,000,000
Peoria & Pekin Terminal	20	977,000	700,000
Total	204	21,041,000	34,001,000
Total bonds and stock			55,042,000

"The smallness of the failures for last year is made more evident by examination of the following summary of the railway receiverships established in the United States in the last fourteen years:

	No. roads	Miles	Bonds and stocks
1893	74	29,340	$1,781,046,000
1894	38	7,025	395,791,000
1895	31	4,089	369,075,000
1896	34	5,441	275,597,000
1897	18	1,537	92,909,000
1898	18	2,069	138,701,000
1899	10	1,019	52,285,000
1900	16	1,165	78,234,000
1901	4	73	1,627,000
1902	5	278	5,835,000
1903	9	229	18,823,000
1904	8	744	36,069,000
1905	10	3,503	176,321,000
1906	6	204	55,042,000
Total	281	56,806	3,477,355,000

"Eight small roads, aggregating 262 miles, were sold in foreclosure and reorganized under conditions more satisfactory to their creditors during the year, as follows:

	Miles	Bonds	Stock
Dillsburg & Mechanicsburg	8	$100,000	$89,800
Michigan Midland & Canada	14	323,600	300,000
Nashua, Acton & Boston	22	1,200,000	500,000
Brooklyn & Rockaway Beach	3	338,030	150,000
St. Louis & North Arkansas	126	3,065,500	3,065,500
Velasco, Brazos & Northern	20	200,000	36,000
Berkeley Railroad	10	....	115,000
Wiscasset, Waterville & Farmington	59	673,000	244,000
Total	262	5,900,100	4,500,300

	No. roads	Miles	Bonds and stocks
1893	25	1,613	$79,924,000
1894	42	5,643	318,999,000
1895	52	12,831	761,791,000
1896	58	13,730	1,150,377,000
1897	42	6,675	517,680,000
1898	47	6,054	252,910,000
1899	32	4,294	267,534,000
1900	24	3,477	190,374,000
1901	17	1,139	85,828,000
1902	20	693	39,788,000
1903	13	555	15,885,000
1904	13	524	28,266,000
1905	6	679	20,307,000
1906	8	262	10,400,000
Total	401	58,169	3,740,943,000

SATURDAY, JANUARY 19, 1907.

Still another is to be added to the list of natural disasters which have shocked the world, not only by their destructiveness, but by their comparative frequency, during the last twelve months. The information which has come from the city of Kingston, in the island of Jamaica, is thus far meager and in some particulars conflicting, but it seems to be established that an earthquake more serious than any other that has visited the island in the course of more than two centuries has destroyed the greater part of the city's buildings, killing hundreds of the city's inhabitants and wounding hundreds more. There is naturally much distress among the people of the stricken city, to aid whom efforts are being made in every direction. The United States Congress has been especially prompt in passing a bill authorizing the President to distribute naval stores and medical supplies among those in need of them. It will not escape notice that earthquakes and volcanic disturbances of a less destructive character are reported from a number of widely separated points on the globe.

Agreeing with expectations on that point, the Bank of England this week reduced its discount rate from 6 to 5 per cent., the former figure having been maintained since October 18 last. At the same time the institution on Thursday of this week presented a very favorable statement showing a decrease of £2,929,000 in the loan account, with a gain of £508,000 in specie, and, most important of all, a rise in the proportion of reserve to liability from 39.97 per cent. to 45.30 per cent. On the face of the British institution's figures, it would seem that an equilibrium has been reëstablished in the London money market. In fact, the action of the Bank of England's management in maintaining an exceptionally high official discount rate for the past ninety days seems to have been fully justified by the outcome, and its relaxation of the quotations has naturally been followed by a corresponding decline in the open-market rates at London. That market also notes with satisfaction that the rising tendency of Argentine exchange denoted the ending of the outflow of gold to South America, which was one of the chief dangers against which the Bank of England had to guard, although it was of course the likelihood of New York's taking additional gold which furnished the actual reason for making the official rate as high as London has seen in recent years, except in times of war and disaster. The effect of this improvement in the foreign financial situation has already been seen in the New York money market. While it would appear that London is by no means apprehensive that it may lose gold to America, the lowering of money rates at London has a tendency to depress foreign exchange quotations, and both call and time loans in the New York market have displayed an appreciable weakening.

A short time ago the prospects of ship-subsidy legislation at the present session seemed very slight indeed, but the earnest and outspoken advocacy of the general proposition by President Roosevelt and Secretary Root has seemingly brought about a change. Advices from the capital indicate that some who were formerly antagonistic to the proposition are now veering round to its support, while others have been brought into a state of doubt which will make them good subjects for an energetic propaganda. It is quite within the probabilities now that a ship-subsidy bill will be reported which will secure the support of the Republican members of the House or at least disarm their opposition, in which event its passage may be counted on. At any rate, it seems clear that a measure of this kind has a better chance of passage just now than it has had before at any time in recent years.

In its effort to secure to the Japanese such rights as are guaranteed to them by treaty, the United States government began two actions in San Francisco on Thursday. One of these was brought in the State Supreme Court in the name of a child who had been excluded from the city schools, a mandamus being asked for to compel his admission to one of the schools from which he was excluded. In the other case a bill in equity was filed in the Federal Circuit Court in which all the school authorities were made defendants. In this bill the ground is taken that the state of California having expressly provided by statute that all schools must be open to all children of school age resident within the districts in which the schools are respectively located, the privilege of such attendance is one of the rights of residence which are to be enjoyed by Japanese children on the footing of the most favored nation. It is further asked that it be declared that the state of California received certain grants of land and appropriations of money from the federal government upon the trust that they be used for the public schools in California in conformity with the Constitution of the United States and all treaties made by its authority, and that no unjust discrimination be made against the subjects of any nation with which the United States may have entered into treaty stipulations.

There seems to have been some misapprehension as to the results disclosed by the borings on the site of the Gatun dam on the Isthmus of Panama. It will be remembered that the Senate Committee on Interoceanic Canals asked for a report regarding the rumor that an unstable foundation had been found on the site of the great dam. Chairman Shonts, in a report submitted this week, denies the rumor, declaring that nothing has been disclosed by recent examinations affecting the practicability or the permanence of the Gatun dam, though a slight shifting of position at Pedro Miguel might be deemed advisable. It is understood that the contract for the construction of the canal is in a situation to be placed, the only question being as to the financial qualifications of the successful bidders.

While shippers and the public are clamoring for additional transportation facilities and railroad officials are asking for the expenditure of great amounts of capital to enable the roads to meet these demands, the financial market, which is expected to furnish the money, manifests not a little trepidation at the prospect. The present week, indeed, witnessed striking instances of this feeling. The mere intimation that the Southern Railway Company would have to raise and expend a considerable amount if its facilities are to be made equal to the constant growth of its traffic sufficed to cause a rather violent break in the value of its shares, while Chicago & Northwestern shares, as is noted in detail elsewhere, also declined sharply on the announcement of a $25,000,000 issue of new stock with "rights" to the present stockholders. It would, in fact, seem that the congestion of new securities is becoming rather acute. In the space of a few weeks new stock or bonds to the amount of over $300,000,000 have been brought out, the total being made up of offerings by the Northern Pacific, Great Northern, St. Paul, Big Four, Norfolk & Western and Chicago & Northwestern. This, however, seems to be only a beginning. At least half a billion of other securities have been authorized by various companies which are only awaiting a favorable stage in the money market to negotiate them, it being, in fact, understood that in a number of cases the preliminary steps to that end are being arranged.

This time a year ago, in referring to the statistics of our foreign trade for the preceding calendar year, we noted the fact that the totals were in excess of all preceding figures, and, in fact, made new records. A similar story is told by the figures just issued by the Bureau of Statistics of the Department of Commerce and Labor, covering the imports and exports of merchandise, gold and silver for December, 1906, and the twelve months ending therewith. The imports for December were valued at $134,863,708, an increase of over $33,700,000 over those for the corresponding month last year. The exports were valued at $190,264,113. This represented a decrease of a little over $9,400,000 as compared with those for December, 1905, but an increase of over $45,000,000 as compared with those for the corresponding month in 1904. The excess of exports for the month amounted to $55,400,405, a decrease of over $43,195,000 as compared with the corresponding month in 1905, but an increase of over $6,700,000 as compared with December, 1904. Gold imports showed an excess of $5,859,429 over the exports, as compared with one of only $1,360,349 in December, 1905, and an excess of exports amounting to $10,166,643 in December, 1904.

For the twelve months the total imports were valued at $1,321,064,694, an increase of over $141,900,000 as compared with those for the preceding calendar year. The dutiable goods amounted to $728,618,466, an increase of not far from $80,000,000 over those for the preceding year. The exports were valued at $1,798,107,055, an increase of over $171,100,000 as compared with those for the preceding year. The exports showed an excess over the imports amounting to $477,043,261, an increase of nearly $29,200,000 over that for the year 1905. The total foreign trade for the year was valued at $3,119,172,649, a total over $313,000,000 in excess of that for the year 1905, the hitherto record year, and over $631,900,000 over that for the preceding year. The imports of gold exceeded the exports of that metal by $108,990,369, whereas the preceding year the imports exceeded the exports by only $3,498,938, and in 1904 the exports exceeded the imports by $36,408,593. The gold imports in 1906 were $155,550,766, a sum next to the greatest ever recorded, namely, in 1898, when they aggregated $158,163,952. The exports of silver exceeded the imports by $14,685,444, a little over two-thirds the excess on the same side for the preceding year.

CAUSES OF BUSINESS FAILURE.

Experience is often termed the best possible teacher, but there is the drawback about her teaching that the price demanded is not unusually a very high one. This, of course, has been true more especially of lessons taught individually to those who, had conditions been different, might have learned from the careers of others in what directions to seek success and what pitfalls to avoid. Especially valuable, therefore, to those who are resolved to prosper in the business world, are the lessons which may be drawn from the experiences of those who have been unsuccessful in commercial life, and BRADSTREET'S endeavors to account for the failures which perennially strew the path of those engaged in commercial pursuits, of whatever kind. To this end the vast quantity of information and statistics collected by The Bradstreet Company in the course of its operations have been closely analyzed and studied for many years past. The results of the 1906 inquiry, as bearing upon this much-debated question, follow herewith, and will, we think, repay perusal.

Preliminary to taking up consideration of the causes of business failures in the very prosperous year recently closed, it might be well to review some of the statistics of business mortality in 1906 already published in BRADSTREET'S. From them we learn that 9,385 individuals, firms and corporations proved their inability or their indisposition to pay their debts. This was a decrease of 5.9 per cent from 1905, and followed a reduction in the latter year, from 1904, of 4.3 per cent. The number failing was therefore the smallest reported in twenty-three years. The liabilities involved in the failures that occurred during 1906 aggregated $127,173,492, an increase of 4.4 per cent. over 1905, but less by 11.5 per cent. than the gross indebtedness given for 1904. Compared with the very favorable year 1902, when the smallest liabilities in twenty-four years were recorded, the year 1906 showed an increase of 20 per cent., due, it should be explained, mainly to a few large banking suspensions in the past year. The proportion of assets to liabilities in 1906 was 50 per cent., which compares with 53.3 per cent. in 1905, 52.7 per cent. in 1904 and 46.9 per cent. in 1901. These latter statistics, of course, tend to prove, by reason of the small proportion of assets, that the failures were really inevitable consequences of inherent weaknesses in the individual enterprises which collapsed.

Among the most striking exhibits in the entire report, however, is the one showing the percentage of those failing to all of those engaged in business. Of the 1,401,085 individuals, firms and corporations in business in the United States in 1906, only sixty-six hundredths of 1 per cent. of the entire number failed, the proportion for other years being seventy-three hundredths of 1 per cent. in 1905, seventy-nine hundredths of 1 per cent. in 1904, 1.06 per cent. in 1898, 1.40 per cent. in 1896 and 1.46 per cent. in 1893. Thus, despite an increase of 48,138 persons or concerns in business in one year, or 3.5 per cent., the number of those failing decreased 5.9 per cent. Furthermore, while the number of those in business has grown materially larger every year, the insolvent class has not gained, but has really decreased, thus disproving the expectation of increase naturally to be looked for because of the launching of new enterprises. These statistics, therefore, may be said to point to all of three things. One is that business must have been very good in the past few years, which will be readily enough admitted. Another is that better credit reporting, and, presumably, more conservatism in the granting of credit, seem to have had the effect of reducing the probability of failure. Finally, it may be, and no doubt in a great measure it is, true that given the above conditions the commercial community has reached a point where the commercial death rate has been permanently lowered, just as the actual rate of mortality among human beings has fallen off. There is something attractive about this theory, and it is, perhaps, not without a solid basis of fact. Certainly if the spread of better medical knowledge and improvement in sanitary matters have reduced the death rate per thousand, it may not be too much to claim that similar agencies of prevention and control now exerting their effects on commercial life have surrounded the general transaction of business with healthier conditions that seem likely to endure.

Following will be found BRADSTREET'S record of failures yearly since 1881, with particulars as to assets and liabilities, the number in business and the percentage failing:

Year	No. failures	Per cent. increase or decrease	Actual assets	Total liabilities	Per cent. assets to liabilities	Number in business	Per ct. failing
1906	9,385	—5.9	63.1	127.2	50.0	1,401,085	.66
1905	9,967	—4.3	65.0	121.8	53.3	1,352,947	.73
1904	10,417	+6.5	75.7	143.6	52.7	1,307,746	.79
1903	9,775	—1.9	84.1	154.3	54.5	1,272,909	.76
1902	9,973	—6.3	50.4	105.5	47.7	1,238,973	.80
1901	10,648	+7.4	61.1	130.1	46.9	1,201,852	.88
1900	9,912	+2.8	60.1	127.2	47.2	1,161,639	.85
1899	9,642	—16.9	60.1	119.8	50.1	1,125,873	.85
1898	11,615	—11.2	73.1	141.6	51.6	1,093,373	1.06
1897	13,083	—13.3	86.5	158.7	54.5	1,086,056	1.20
1896	15,094	+16.4	147.8	246.9	59.9	1,079,070	1.40
1895	12,958	+1.8	87.6	158.7	55.2	1,053,633	1.23
1894	12,724	—17.9	83.2	151.5	54.9	1,047,974	1.21
1893	15,508	+51.0	231.5	382.1	60.6	1,059,014	1.46
1892	10,270	—17.1	54.7	108.6	50.3	1,035,564	.99
1891	12,394	+16.1	102.9	193.1	53.3	1,018,021	1.21
1890	10,673	—9.0	92.7	175.0	52.9	989,420	1.07
1889	11,719	+10.7	70.5	140.7	50.0	978,000	1.20
1888	10,587	+9.7	61.9	120.2	52.0	955,000	1.10
1887	9,740	—7.8	64.6	130.6	50.0	933,000	1.04
1886	10,568	—4.9	55.8	113.6	49.0	920,000	1.15
1885	11,116	—4½	55.2	119.1	46.0	890,000	1.25
1884	11,620	+13.0	134.6	248.7	54.0	875,000	1.32
1883	10,299	+34.0	90.8	175.9	52.0	855,000	1.20
1882	7,635	+28.0	47.4	93.2	51.0	820,000	.93
1881	5,929	....	35.9	76.0	47.0	780,000	.76

It should be added and understood that these statistics refer to failures in the proper sense of the term. BRADSTREET'S definition of a commercial failure is that there must be some loss entailed on creditors of individuals, firms or corporations engaged in legitimate mercantile occupations. Under this classification, failures of professional men (such as physicians, lawyers and actors), farmers, stockbrokers, real-estate dealers, bucket shops, and old bankruptcies passing through the courts, have no place. Any or all of the above may be, and in fact are, dissociated from the recognized and legitimate commercial life of the country, and should not be, and have not been, included in BRADSTREET'S failure data. Comparison of the commercial failure reports made up by BRADSTREET'S with those issued by other concerns, cannot, therefore, be properly made. Also, it may be said that these statistics do not deal in any degree with indefinite or unproved conditions. Failures merely to succeed, without loss to creditors, are not covered or included here, because of the impossibility of the registration of such occurrences in a conclusive form.

Given the above definition of a failure as a guide, it may be said that these statistics do not point to any increase in strain, due either to the increase in the number of persons in business or to the numerous consolidations effected in the past decade increasing the competition with and presumably the tendency to failure on the part of small enterprises. One conclusion may be that the country has grown in population and wealth so greatly as to have made up for the apparently increased competition in some lines. Confirmatory of this view is the fact that competition as an assigned cause of failure has been less marked than for over a decade past. Of course these statistics must be taken for what they show to have been the case in a series of prosperous years, and until the current of general trade and industry sets toward depression, we see no probability that the general results embraced in BRADSTREET'S statistics bearing upon this point will be changed by the pushing to the front of the menacing specter of competition by the trusts and combines with the small individual trader. Apropos also of this feature of yearly decreasing business mortality, the increase of the number of those in business considered, it might reasonably be urged that these statistics have value as bearing upon the assertion, so frequently made, that the larger portion of those who enter business ultimately fail. In showing, as they do, that the business death rate in the past eight years has been less than 1 per cent. annually, and has never been over 1½ per cent., they of course absolutely discredit the correctness of the aforesaid tradition and prove it to be entirely untrue.

SOME TESTS OF ACCURACY.

The collated figures of the capital employed by those failing in 1906, in the United States and Canada, show that 9,723 of the 10,624 individuals, firms and corporations suspending, or about 91.5 per cent., had a capital of only $5,000 or less. In 1905 the proportion was 91.7 per cent., and the constancy of these statistics over a period of years is illustrated by the fact that in the past eight years the proportion so failing has fluctuated between 90 and 94 per cent. Six per cent. of those failing had capital between $5,000 and $20,000, and 1.7 per cent. employed between $20,000 and $50,000. As to the liabilities involved, it is found that 62.7 per cent. of those included in our tables owed less than $5,000 as against 65.2 per cent. in 1905, while 37.3 per cent. of all failing had liabilities of $5,000 or more, as against 34.8 per cent. in 1905. As regards the actual number, it is found that the number failing in 1906 with less than $5,000 liabilities is 11 per cent. smaller than in the year 1905, while of those having $5,000 or more liabilities, the number is about the same. These figures would seem to show that the strain on those of larger liabilities was rather more pronounced than in the case of the smaller, and this conclusion is apparently borne out by the percentages, which reveal that 28 per cent. of all affected had liabilities of between $5,000 and $20,000. These figures also seem to reflect an increase of the credit allowed to larger traders as compared with 1905 and the six preceding years. The final test of the credit rating come when the statistics are brought into comparison with the various grades of credit assigned to each subject in the whole group. From this we learn that 9,615 out of 10,624 failing in the United States and Canada in 1906, or 90.5 per cent., had only a very moderate or no credit rating whatever. This compares with a proportion of 91.7 per cent. in 1905, 91.4 per cent. in 1904 and 86.6 per cent. in 1903. The number failing rated in Good Credit in 1906 was 933, or 8.8 per cent. of the whole, which compares with 7.6 per cent. in 1905, 7.7 per cent. in 1904 and 11.8 per cent. in 1903. The latter year, it may be recalled, was a year of strain and reduced demand, and it is evident that 1906, while a year of great activity, was also one of tension in the money market, which reënforces the suggestion made elsewhere that high money rates may have had a directly unfavorable effect upon the solvency of those possessing a grade of credit above the very lowest allowed.

WHY MEN FAILED IN 1906.

Failures in business may be and are caused by a variety of influences, not all of which are inherent in the individual, though taking the failures in the aggregate, experience has proved that normally about four-fifths of all failures are consequences of the faults of those failing, while one-fifth came from influences beyond the control of the individual. Eight causes are assigned as attributable to the failing subject, while three are to a large degree beyond his control. These causes are grouped as follows:

A.—DUE TO FAULTS OF THOSE FAILING.
- INCOMPETENCE (irrespective of other causes).
- INEXPERIENCE (without other incompetence).
- LACK OF CAPITAL.
- UNWISE GRANTING OF CREDITS.
- SPECULATION (outside regular business).
- NEGLECT OF BUSINESS (due to doubtful habits)
- PERSONAL EXTRAVAGANCE.
- FRAUDULENT DISPOSITION OF PROPERTY

B.—NOT DUE TO FAULTS OF THOSE FAILING.
- SPECIFIC CONDITIONS (disaster, etc)
- FAILURE OF OTHERS (of apparently solvent debtors).
- COMPETITION.

Examination of the causes of failures in 1906 makes it appear that eight causes due to faults of those failing accounted for 79.7 per cent. of all, while three causes beyond the control of those failing accounted for 20.3 per cent. In 1905 the proportions were respectively 80 and 20 per cent.; in 1904, 77.1 and 22.9 per cent., and in 1903, 77.9 and 22.1 per cent. The chief single cause of failure in 1906, as, indeed, in all years, was Lack of Capital, which produced 35.9 per cent. of all failures, as against 33.4 per cent. in 1905, 32.2 per cent. in 1904 and

The total number of failures due to each of the causes named, with assets and liabilities, in each division of the United States, is as follows:

32.5 per cent. in 1903. Showing, as these figures do, a higher percentage of failures due to Lack of Capital than in any preceding year since 1891, they furnish testimony to the fact that monetary conditions in 1906 bore with great force upon traders in general, more heavily, in fact, than for fifteen years before. The next prominent cause of failure in 1906, Incompetence, effected 22.3 per cent. of all failures, as against 24.4 per cent. in 1905. Unwise Credits, Extravagance and Neglect all showed smaller proportions of failures resulting from these causes than in 1905, while Fraudulent Disposition, Speculation and Inexperience exhibited slight increases. It is to be noted that Specific Conditions, a cause outside of the failing trader's control, were responsible for 17.3 per cent. of all failures, against 16.3 per cent. in 1905, while Undue Competition has only 1 per cent. charged to it, the smallest percentage for over a decade past.

In the matter of liabilities, Lack of Capital figured most prominently with 30.9 per cent. of all, as against 33 per cent. in 1905. Specific Conditions accounted for 17.9 per cent. in 1906, as against 15.5 per cent. in 1905, while Fraudulent Disposition was responsible for a very notable increase in liabilities, rising from 8.2 per cent. in 1905 to 16.2 per cent. in 1906, the greatest proportion ever recorded. This marked change, no doubt, reflects the swelling of liabilities caused by the inclusion of four heavy bank failures, all due to dishonesty of banking officials. On the other hand, Incompetence, which accounted for 21.6 of the liabilities in 1905, appears with only 15.5 per cent. of the failure damage in 1906. Failures of Others, which occasioned only 2 per cent. of the failures, furnished 8.8 per cent. of the liabilities, whereas in 1905, with about the same proportion of failures, they contributed only 4.5 per cent. of the liabilities. Of the other causes it may be said that Inexperience and Neglect caused increases in liabilities, while Unwise Credits, Extravagance, Speculation and Competition created smaller losses than in 1905.

IN CANADA.

Lack of Capital, the most prolific cause of business failure in Canada, as, indeed, it is in the United States, was less hurtful in 1906 than ever before, as only 50.6 per cent., or about one-half, of the failures was due to this cause, against 55.2 per cent. in 1905, 62.2 per cent. in 1904 and 69.6 per cent. in 1903. On the other hand, Specific Conditions caused 13.6 per cent. of the failures, as against 7.3 per cent. in 1905, 5.3 per cent. in 1904 and 4.3 per cent. in 1903. Incompetence was less hurtful, in that 16.4 per cent. of the failures were caused by that, as against 18 per cent. in 1905. Other causes productive of fewer failures were Inexperience, Extravagance, Neglect and Competition, while Unwise Credits, Failures of Others and Fraudulent Disposition caused increases. As to liabilities, Lack of Capital caused 53.9 per cent. of all failure damage, as against 45.4 per cent in 1905, a directly contrary movement to that shown as to number of failures. Here Incompetence is, however, found less hurtful, contributing only 16.2 per cent. of the liabilities in 1906, as against 24.1 per cent. in 1905. Specific Conditions were less hurtful as regards liabilities than as regards failures, and only 9.9 per cent. of the failure damage was classed as due to that cause, as against 7.6 per cent. in 1905.

RECORD RAILWAY GROSS EARNINGS.

The story of railway gross earnings in 1906 may be epitomized in the one word "expansion," which was indeed the chief characteristic of the year's operations. Prosperity prevailed on every side, all parts of the country sharing in a remarkable degree. Great preparations were made for an enlarged volume of traffic, motive power was considerably increased, rolling stock was greatly augmented and terminal facilities were improved, but as the year progressed it became very evident that the country's growth outdistanced the preparations made by the railways to take care of it. Therefore, in the latter part of the twelve-month period, traffic congestion, which gave rise to no end of complaints, ensued. Happily, however, operating conditions throughout the year were almost ideal, the two winter seasons being very open ones. Business attained vast proportions, industrial operations were conducted on a huge scale, so much so, in fact, that the usual seasonal suspensions, such as occur in the summer months, were of very short duration, and crop yields were of record volume. On the other hand, there were some adverse factors. Thus, the coal miners' strike, which took place in April, extended over a goodly section of the country, but fortunately the effects thereof were confined to those roads whose interests are peculiarly identified with the coal trade; then, too, the San Francisco catastrophe occurred on April 18. On balance, however, the two adverse factors mentioned were heavily outweighed by the general activity of trade and industry, the final result being that the year 1906 was the best in the annals of railway history.

Now, while the returns for the full calendar year are not particularly complete—nor could one expect them to be at this early date—sufficient details are available to depict the trend in figures for the year as compared with other previous similar periods. In fact, a month or more will elapse before conclusive returns will be published. As it is, however, reports of practically identical roads—comparatively few of the more important systems being included—give gross earnings for 1906 that aggregate $973,217,759, the gain over 1905, also a very active year, being $109,697,472, or 12.7 per cent. This increment becomes all the more remarkable when it is recalled that at the outset of 1906 many observers were fearful lest the pace set in 1905 would be too brisk for 1906 to overcome. The facts prove that the achievements of 1905, and for that matter any other year, were not only overcome but entirely eclipsed, the results giving rise to the characterization of the United States as a new country.

But what might be termed the tale of a decade's progress can be more aptly told by figures than by letterpress. Thus, take the ratio of increase in gross earnings over a series of years, beginning with a low-point period, 1896, and we get this record:

	Increase		*Increase*
1896	1.4	1902	8.0
1897	7.5	1903	11.5
1898	8.1	1904	*1.4
1899	9.7	1905	6.9
1900	9.5	1906	12.7
1901	10.5		

* Decrease.

It will be noted that of the past eleven years only one reported a decrease, a small one, which was due to the comparative depression that existed during the last half of 1903 and the first six months or so of 1904, the turn in the downward tendency coming in August of the last-mentioned year.

This table gives all the returns for identical roads thus far made for 1906:

	1906	1905	*Inc.*
Northwestern	$92,736,584	$79,705,761	16.3
Central-western	164,564,892	150,837,652	9.8
Trunk lines	292,950,607	266,834,820	9.7
Southern	157,859,109	138,389,009	14.1
Southwestern	115,933,401	102,366,528	13.2
Pacific	149,173,166	125,386,517	18.9
Total	973,217,759	863,520,287	12.7

It will be observed that all the sections report increases of goodly proportions. Each of four groups returns gains in excess of 10 per cent., the Pacific, northwestern, southern and southwestern, whose respective increments are 18.9 per cent., 16.3 per cent., 14.1 per cent. and 13.2 per cent. The other increases are 9.7 per cent. for the trunk lines and 9.8 per cent. for the central-western roads.

On the present occasion we have omitted mention of the returns for any one month because the outcome for the entire year is vastly more important, but, nevertheless, the record of monthly receipts, together with the trend indicated month after month during a period of years, is set forth in the following:

	1906 *Inc.*	1905 *Inc.*	1904 *Dec.*	1903 *Inc.*	1902 *Inc.*	1901 *Inc.*	1900 *Inc.*
January	10.4	6.1	3.8	10.1	7.6	8.1	15.5

attention, the fact is that the following table, which contains all the leading gains for 1906 as compared with 1905, will illustrate better than words what the tendency was as regards the separate roads:

Canadian Pacific	$13,032,463
Northern Pacific	*8,666,785
Baltimore & Ohio	8,936,266
Great Northern	6,987,767
New York Central	6,303,500
Louisville & Nashville	6,048,927
Southern	5,549,424
Illinois Central	5,269,260
Missouri Pacific system	4,069,404
Lake Shore & Michigan Southern	3,849,200
Grand Trunk system	3,569,236
Wabash	2,888,795
Michigan Central	2,803,200
Missouri, Kansas & Texas	2,699,327
Texas & Pacific	2,642,536
Canada Northern	2,310,700
Denver & Rio Grande	2,138,058
Cleveland, Cincinnati, Chicago & St. Louis	2,077,200
Minneapolis, St. Paul & Sault Ste. Marie	2,058,485
Total	91,760,839

* Eleven months only.

Only one road, the Buffalo, Rochester & Pittsburgh, returns a heavy decrease—$1,088,942—the loss being due in large part to the fact that the coal miners' strike along the company's lines was long drawn out. In conclusion, it may be stated that the outlook for railway gross earnings for the next six months at least is very favorable, and the signs point to an easing of the car shortage, which will permit the roads to operate on a more profitable basis.

SECRETARY ROOT DECLARES FOR A DOUBLE TARIFF.

An interesting gathering, which furnished the occasion for the enunciation of some important doctrine, convened at the national capital on Monday. This was the National Convention for the Extension of the Foreign Commerce of the United States. It is understood that more than a thousand delegates were named to the convention by governors of the several states and by various commercial organizations, and of these a majority were present when the convention was called to order. The central purpose of the convention is set forth in its title, but among other objects of a cognate nature which it will strive to promote are the development of an American merchant marine, an international parcels post, reciprocity consular reform, arbitration and the restriction of armaments.

Of the addresses delivered before the convention, the most noteworthy on many accounts was that of the Secretary of State, which was subsequently indorsed by President Roosevelt in a characteristic speech. In this address Mr. Root dwelt upon the subject of our relations with the countries to the south of us, particularly Cuba and Santo Domingo, and the questions of improved communications with South America, ship subsidies and consular reform, treating them along lines which recent addresses of his have rendered more or less familiar. His most significant utterance, however, was on the general subject of the tariff. He said that he did not think that the broad subject of reciprocity could be considered and discussed without going into a consideration of the whole form of our tariff law. In his judgment, he said, the United States must come to a maximum and minimum tariff. A single straight-out tariff was, he said, all very well in a world of single straight-out tariffs, but we have passed on during the course of years into a world for the most part of maximum and minimum tariffs, and with our single-rate tariff we are left with very little opportunity to reciprocate good treatment from other countries in their tariffs, and very little opportunity to defend ourselves against bad treatment.

The adoption of the policy of a maximum and minimum tariff would, the Secretary said, free us from one serious difficulty which arises from the negotiation of reciprocity treaties. When we make a reciprocity treaty with one country, agreeing to receive its products at less than our regular rates, we are immediately confronted by another country equally friendly with us and to which we cannot with good grace refuse similar treatment, and so long down the list. The result is that there is a tendency, by means of successive reciprocity treaties, to change the whole form of the tariff and to change it without that full, general and deliberate discussion of the effect upon all American interests which there ought to be in dealing with this complicated and interwoven question. In short, Mr. Root said the maximum and minimum tariff would enable us to deal equitably with all countries, as we are friendly, and ought to be friendly, with all countries.

Secretary Root's address was received with evident expressions of approval, and suggestions bearing in the same direction were made by other speakers. The significant thing about the Secretary's speech is that it was made by the chief official of the administration under the President, and that it gave definite and coherent expression to a policy which has been heretofore applied sporadically and in individual instances by particular conventions.

RAILROAD CAPITAL REQUIREMENTS.

In a recent communication to the governor of the state of Minnesota, Mr. James J. Hill, president of the Great Northern Railway Company, returns to the charge and reiterates his already pronounced opinion that the railways of the country are being used to their utmost capacity, and that additional terminals and tracks would furnish the best if not the only means of overcoming the congestion in business which is the subject of so much complaint. Whatever this gentleman has to say on the subject of transportation and its problems merits attention. In fact, he possesses a marked gift of putting such matters in a non-technical way which is calculated to insure an understanding thereof by the portion of the public which has no direct knowledge of them. In the present case Mr. Hill calls attention to the fact that railroad building has fallen off while business at large has increased by leaps and bounds. This, he adds, is not the result of either accident or design. The investor simply declines to put his money freely into enterprises under the ban of unpopularity and even threatened with confiscation or transfer to state control. This feeling, he urges, must be removed and greater confidence established in respect to investments in railroads. The congestion in traffic and the clamor for relief which results involve a great business problem, the greatest of its kind, in Mr. Hill's opinion, which the nation has ever faced. Its solution presents difficulties of several kinds—financial, mechanical and physical. To obtain the ground needed for enlarged terminals in towns and cities at prices which are not prohibitive, to secure adequate amounts of rails and other construction material, or to procure a sufficiency of labor to man the different departments both in construction and operation, are a few of the very serious matters which have to be encountered.

As for the cause of the freight congestion which seriously impedes the business of the country, there seems to be no doubt in the mind of this expert authority. He sets forth that in the past ten years there has been an increase of 118 per cent. in the number of tons moved one mile each on the railroads, and an increase in the total tonnage transported of 95 per cent. There are 35 per cent. more locomotives, 23 per cent. more passenger cars and 45 per cent. more freight cars. On the other hand, the total single-track mileage has gained only 21 per cent. in the decade. Still more important is the fact that the total amount of track is not growing as it should in proportion to the vast increase in traffic. It is pointed out in the article that whereas between 1880 and 1890 the aggregate of all tracks grew about 77 per cent., or at the rate of 7 per cent. per annum, the increase between 1890 and 1904 was only 30 per cent., equal to 2 per cent. per annum, while for the past year the increase, as estimated, will prove to be a little under 1½ per cent. In other words, the figures seem to support the conclusion that railroad construction work of the kind most needed has fallen off when the demand was greatest. In Mr. Hill's words, "the limit of service of a common carrier has been reached when it has moving at all times over its system as many cars as can be run on its tracks with safety and transferred and dispatched from its terminals and junction points without unreasonable delay. Beyond that point increase of business cannot be handled by increasing cars and engines." In fact, he contends that there is enough rolling stock, and that the chief difficulty is not in that direction.

To this expert authority the obstacles to an adequate transportation service in this country center in a deficient trackage. He urges with much force that additions to the total mileage, including the extensions of terminals, should be not less than 5 per cent. per annum. In five years this would call for the construction of about seventy-five thousand miles, which, taking land for terminals, equipment and so forth into consideration, he estimates would cost $75,000 per mile, and necessitate an expenditure by the railroads of no less than $5,500,000,000 in that period, or a yearly average of $1,100,000,000. These conclusions and the statistics with which they are supported are not precisely new, but they are in the present case set forth with a cogency and force which deserves and commands attention.

A CHICAGO & NORTHWESTERN STOCK INCREASE.

In October, 1906, the stockholders of the Chicago & Northwestern Railway Company ratified a proposition to increase the authorized common stock of the corporation by $100,000,000, making the amount issuable of that class of its shares $177,604,880, which with the outstanding preferred stock would bring the total share capitalization of the company up to a round $200,000,000. It was stated at the time that it was not intended to make any immediate issue of new stock. Nevertheless, the fact that the Northwestern, while its management did not seem disposed to follow the example of the St. Paul and extend the system to the Pacific coast, had considerable additions to its lines under construction or planned, was calculated to support the conclusion that a portion of the newly authorized stock would sooner or later come upon the market in some way. In the case of this company there was doubtless less necessity for selling new shares at once than was the case with other important systems which have in the past two or three months taken such action for the purpose of raising additional capital, the stockholders, no later than last May, having subscribed for $16,267,400 new common stock in order to provide for improvements and additional equipment, which, it was claimed, would finance its needs in that respect for some time to come.

Within the last two weeks Wall street has, however, heard well-defined reports that the conservatism of the Northwestern management in this respect was to be modified, and that "rights" to subscribe for a substantial amount of new common stock would be soon offered to the shareholders. It was, indeed, argued that there was reason for prompt action in the matter even if the company was not in any immediate need of funds with which to prosecute its improvement and extension work. Knowledge of the fact that the authorities of several western states were disposed to obstruct the freedom with which the railroad corporations have added to their capital, as is actually being done in Minnesota in the case of the Great Northern Railway's recent share issue, and the further possibility of legislation prohibiting the sale of new stock except to the highest bidder (the provision which is contained in the Massachusetts corporation law), would, in fact, furnish a strong inducement for the Northwestern management to grasp the opportunity for providing the capital which will be needed in the next year or so, while it could be done in a way calculated to give the stockholders the benefit of taking the new issue at par.

It is, however, significant that these intimations of "rights" on Northwestern shares should have been followed by a decline in the market value of the common stock, which ranks as one of the highest grade of investment shares with which Wall street is acquainted. From around 205 the price fell off to 195, and when, on last Tuesday, it became definitely known that the stockholders, both preferred and common, were granted the privilege of taking $25,000,000 new common at par, to the extent of 25 per cent. of their holdings, the quotation went off further to 190½, and later in the week sold at as low as 187½. The stock market, in other words, again showed very plainly that it is surfeited with new stock issues, and that the difficulty of financing an immense amount of additional securities, with the money market as narrow as it is at present, appeals much more strongly to the imagination of the speculative community than does the advantages which "rights" present for present stockholders, the value of the privilege in this case being calculated, on the basis of the current market value of the common stock, at about 19.

RECENT LEGAL DECISIONS.

[*Prepared for* BRADSTREET'S.]

Telephone Wire—Removal—Ejectment.

The New York Court of Appeals held, in the case of Butler vs. Frontier Telephone Company, that an action of ejectment would lie to compel the removal of a telephone wire strung across the plaintiff's premises twenty to thirty feet above the ground though no structure supporting it stood upon the plaintiff's lot, and that the prompt removal of the wire after suit was brought would not defeat the action, the rights of the parties being governed by the facts as they existed when it was commenced.

Street Railway—Cost of Paving.

The Supreme Court of the United States held, in the case of Fair Haven & Westville Railroad Company vs. City of New Haven, that the imposition upon street-railway companies by the Connecticut act of July 1, 1895, of the cost of paving and repaving that part of the streets occupied by their tracks, was a valid exercise of the power reserved by the state to alter or amend the charter of a street-railway company which required such company to keep the street between its tracks and two feet on each side in good and sufficient repair.

Accident—Trolley—Liability—Jury.

The New Jersey Court of Errors and Appeals held, in the case of Weinberger vs. North Jersey Street Railway Company, that where the driver of a vehicle approaches with intent to cross a trolley track on which a car is running in his direction, and where from the distance of the car, and assuming that it is furnished with brakes and a man to apply them, he may reasonably determine that he has acquired a right to cross first, it is a question for the jury whether the facts justifying that determination are established by the evidence and whether the driver in proceeding to cross exercised a reasonable judgment.

Slander—Bank—Repetition—Evidence.

The Supreme Court of Iowa held, in the case of German Savings Bank vs. Fritz, that where, in an action by a bank for slander consisting of an imputation on its credit, no connection was shown between the alleged slanderous communication and a subsequent run on the bank, it was proper for the court to exclude the evidence relating to the run and limit the jury to a consideration of damages to the bank's business reputation, and that where special damages sustained by a bank were due to the repetition of a slander concerning its credit by persons to whom defendant made his statements derogatory to the bank, such repetitions being actionable in themselves, the consequences thereof were not chargeable to the defendant.

Libel—Corporation—Special Damage.

The New York Court of Appeals held, in the case of The Reporters' Association of America vs. The Sun Printing & Publishing Association, that a corporation may maintain an action of libel against a newspaper for the publication of matter assailing its management or credit and inflicting injury upon its business or property, and if the language complained of be of such a defamatory nature as directly to affect and cause pecuniary injury, it need not set out in its complaint specific damages. The court held, however, that it does not necessarily follow from the fact that the plaintiff's name was mentioned in a newspaper article which was libelous per se as to other parties whose names were mentioned in connection with the plaintiff's, that the plaintiff may maintain an action of libel therefor without alleging and proving special damage.

Montana Mining Decision.

In the case of The Montana Mining Company, Limited, vs. St. Louis Mining & Milling Company of Montana, just decided by the Supreme Court of the United States, there was involved a dispute over a narrow strip of rich mineral ground connected with the Drumlummon gold and silver mine in Lewis and Clark county, near Helena, Montana. One of the points involved in the case was the right to follow a vein when it led to other ground than that upon which its apex was located. In the case before the court the apex was on ground owned by the St. Louis company, but as it descended it crossed the vertical side lines of the Montana company. The final decision was in favor of the Montana company, the court holding that a contract between the companies provided that the Montana company should have the land and the minerals in it without regard to the usual procedure as to apex claims.

BUSINESS NOTES.

Output of Pig Iron.

In 1906 pig-iron production reached record figures, the output being estimated at 25,350,000 tons by the *Iron Age*, the returns of which are usually very close to the actual output. The figures for 1906 exceed those of 1905 by 10 2 per cent., the total output in that year being 22,992,380 tons, against 16,497,033 tons in 1904 and 18,009,352 tons in 1903. In 1896 the output amounted to 8,623,127 tons. Comparing the production of last year with that of 1896, the gain in favor of the former period works out at 194 per cent. The production (in tons) for a series of months as per the *Iron Age* is set forth in the following, the difference in the grand totals being due to the fact that in the monthly totals the figures of production by charcoal furnaces do not appear:

	1906	1905	1904
January	2,058,893	1,781,817	921,241
February	1,994,032	1,597,343	1,203,449
March	2,165,632	1,936,264	1,447,065

Total	24,812,984	22,502,136	15,536,044

Business Prospects Here and Abroad.

According to the London *Statist*, trade is exceedingly good all over the world. This British observer says that even if crops should prove bad in the United States this season, a single short harvest would not materially retard the advance of affairs here; if the crops should prove good, 1907 will probably prove to be the most prosperous ever known. In Canada everything points to a continuance of progress. In Mexico there is likewise every reason to expect a further advance, while in Argentina, Chile and Brazil the outlook is favorable. Upon the European continent trade is likely to go on improving during the year. Even in Russia trade is good. "In Germany there has been great speculation, no doubt, and the progress made has been marvelous. It is possible, of course, that the extreme protectionist tariff which came into force at the beginning of last year, together with the rampant speculation, may cause a setback. But at the present time there are certainly no signs of anything of the kind. Banks and manufacturers are increasing their capital and enlarging plants, while the Prussian state railway authorities, always cautious, have placed orders on a very large scale for rolling stock, showing that they anticipate an immense growth of traffic. In Australia and our other colonies everything is likewise most prosperous. Australia, for example, is having a succession of years as prosperous as the years of drought lately experienced were disastrous. In India the prospects are likewise good. They are also good in Japan and in China. In short, wherever we look trade is good, and the indications point to further improvement."

The Manufacture of Clay.

The total capital employed in the manufacture of clay products, according to the census report of 1905, was $230,882,977, and 118,449 wage earners were employed, the wages paid being $53 823,670; materials consumed were valued at $32.907.961, and manufactured products were valued at $135,-352,854. These figures represent an increase at the census of 1905 compared with that of 1900 of 56 per cent. in capital, 12.1 per cent. in the number of wage earners, 36 per cent. in wages, 43.6 per cent. in the cost of material and 41.7 per cent. in the value of products. The number of establishments decreased 14.3 per cent. Ohio was the leading state in the production of clay products. In 1905 its products were valued at $25,686,870, or 19 per cent. of the total for the country, as compared with $16,480,812, or 17.3 per cent. of the total, in 1900. Pennsylvania was second, with products valued at $18,039,187, or 13.3 per cent. of the total, an increase over 1900 of $3.957,343, or 28.1 per cent. Clay products are divided into two main classes, one consisting of brick, tile and terra cotta and the other of pottery products. Of the total value of clay products, $109,518,341 was for the brick, tile and terra-cotta and $25,834,513 for pottery products. Of the brick, tile and terra cotta, the most important item was common brick, the value of which was $51,239,871. Fire brick, valued at $11,752,625, was second; sewer pipe, at $8,416,009, third, and vitrified paving brick, at $7,255,088, fourth.

CURRENT BUSINESS NEWS.

Commercial.

Concerning the great congestion of American cotton piece goods at Shanghai, Special Agent W. A. Graham Clark says that to send in any very optimistic reports as to the situation there would be misleading. He writes: "After seeing the stocks on hand, and interviews with the leading merchants, dealers and bankers, it can be stated that if no further goods are thrown on the market the stocks on hand will gradually ease off until they get down to a weight that can be handled. The sagging tendency of the market is evidenced by the resales, which show a heavy drop.

While the Bagdad Railway still lingers on its way eastward, the fertile delta of the Euphrates is being slowly but surely developed by the Daira Sanieh of the Sultan. Large new areas are being brought under cultivation, the riverine trade is increasing rapidly, and the railway, when it reaches its goal, will traverse for the last 200 miles of its route a district where much has been done to repair the neglect of centuries. With the opening up of the country to trade and the increase of cultivation, the demand for mechanical appliances of every description is bound to increase, and the *Egyptian Gazette* says there is already a considerable demand for oil pumps at Basra and Bagdad.

Henry Nordlinger & Co., in their monthly review of coffee conditions, say they now expect to see 16,500,000 to 17,000,000 bags Rio and Santos coffee come into sight during the current crop year. That crop would be a record-breaker, and would compare with 15,439,000 bags brought in in 1901-02.

Foreign crop conditions as published Tuesday in Broomhall's Liverpool *Corn Trade News*: United Kingdom—Weather is mild, and the outlook for crops is satisfactory. France—There are some complaints of weeds and vermin, but otherwise the outlook is favorable. Supplies are moderate, but sufficient for present requirements. Germany—There are no complaints heard, and supplies of native wheat are moderate. There is a fair demand for foreign grains. Austria-Hungary, Roumania and Bulgaria—Snow covering is sufficient. Russia—In the southwest there are moderate complaints, while elsewhere the crop outlook is mostly favorable, there being a good snow covering. Arrivals are rather light. Italy and Spain—Outlook is favorable. India—Recent rains in the United Provinces have ceased, and the outlook for crops has improved. North Africa—There are some complaints heard as a result of excessive rains.

Shrinkage in farm values in New York state during the last twenty-five years is placed at $200,000,000 by the state commissioner of agriculture, who attributes it to the fact that the rural population has been declining, while that of the city has been increasing. At the same time many of the rural population have been going to the west to work lands obtained at nominal prices. This situation is now changing and many such people are turning their attention to New York lands. The fact is also pointed out that the quantity of milk demanded for the supply of the large cities is constantly increasing. Thus, the number of cans of crude milk, plus the number of cans of cream and unsweetened condensed milk, all estimated as milk, required for the New York markets in 1906 was 20,081,997 forty-quart cans, or 803,279,880 quarts, or 2,200,766 quarts daily.

Broomhall's Argentine agent cables that the wheat harvest in the north is progressing favorably. The total outturn is reckoned as being 15 per cent. over that of last year, with the quality above the average. The corn situation is unfavorable.

Financial.

This table, taken from the London *Economist*, gives figures of bank clearings at the English cities named:

	1906	1905	*Increase*
Country cheques cleared in London	£992,313,000	£932,685,000	£59,628,000
Manchester	293,616,100	263,585,000	30,030,100
Liverpool	188,738,500	203,648,900	†14,910,400
Birmingham	58,622,400	55,559,600	3,062,800
Newcastle-on-Tyne	54,758,500	63,466,200	†8,707,700
Bristol	31,025,500	31,164,000	†138,500
Total	1,619,074,000	1,550.109,200	68,964,300

† Decrease.

The Bank of England, which raised its minimum rate of discount on October 19 from 5 to 6 per cent., on Thursday reduced it to 5 per cent.

The Philadelphia Clearing House Association has decided to admit trust companies and state banks to clearing-house privileges. The conditions are that the trust company or bank shall carry in its vaults in actual cash a 5 per cent. reserve of its deposits and in some bank or banks approved by the association balances to equal 10 per cent. of its deposits. The associate members will not be allowed to clear direct, but through one designated member bank.

The London *Express* prints conspicuously in a recent issue comparisons of the wealth of the United States and other countries. It cites the estimate that the wealth of Great Britain is increasing at the rate of $7,000 000 weekly, while that of the United States is increasing at the rate of $10,000,000 daily.

The sixty savings banks of New Hampshire had deposits of $75,945,665 on December 31, 1906, an increase of $5,666,674 during the year.

Hon. George A. Cox has retired from the presidency of the Canadian Bank of Commerce, while retaining his seat on the board of directors, and Mr. B. E. Walker, who has for twenty years been the general manager of the bank, has been elected president. Mr. Alexander Laird, who for the past four years has occupied the position of assistant general manager, succeeds Mr. Walker as general manager.

A membership in the New York Cotton Exchange sold for $12,700 within the week. The previous sale, during the closing days of the old year, was made at $14,500. On August 6, 1906, a sale was made at $17,000, and in the early part of that year there were sales as high as $23,000. Near the close of 1905 a record of $23,500 was made.

Directors of the New York, Chicago & St. Louis on Wednesday declared a dividend of 4 per cent. for the year on its second preferred stock, and 5 per cent. on its first preferred stock. The dividend on the first preferred was the same as that declared in former years, but the second preferred disbursement was 1 per cent. greater than that of the past four years. In 1901 the stock received 2 per cent.; prior to that year, nothing.

The New York Stock Exchange announces that Oregon Railroad & Navigation Company preferred stock has been stricken from the list.

Railroads.

A law has been promulgated for the construction of a railway from Lima to Huacho, Peru, with branches to the ports of Chancay and Supe. It guarantees the contractors 6 per cent. per annum and thirty years' exclusive control of the railway. The projected road will be of great commercial advantage to the city of Lima and its suburbs.

Governor Johnson, of Minnesota, on Monday received a long letter from James J. Hill, president of the Great Northern, in which Mr. Hill deals exhaustively with the railroad problem, and says it would require an investment of $1,100,000,000 a year for five years to provide the railroads of the country with means to handle properly the business already in sight, not allowing for future growth.

The total miles of track of all street railroads, statements for which are given in Poor's Manual for 1905, aggregate 31,608.03 miles, of which 30,675.17 miles are located in the United States and 932.86 miles in the Dominion of Canada. The share capital of the railways in the United States is $1,955,960,884, and their bonded debt $1,540,090,497, while the share capital of the Canadian roads is $41,055,797, and their bonded debt $25,253,069, making the total capitalization of all street railways in the United States and Canada $3,562,360,247.

Common ownership of all freight cars is in effect the plan to increase traffic facilities advocated by the following roads, who have agreed to pool their cars: Rock Island, 42,000 cars; 'Frisco system, 50,000; Chicago & Eastern Illinois, 20,000; Chicago & Alton, 11,000; St. Paul system, 46,500; Baltimore & Ohio, 40,000; Erie, 53,000; Harriman system, 70,000; Pennsylvania system, 120,000; Atchison, 40,000; Illinois Central system, 63,000. These railroads committed to the pooling plan own 542,500 freight cars out of a total of 1,800,000 in the country.

Industrial.

Western railroads have agreed to grant increased wages to engineers aggregating between $5,000,000 and $6,000,000 a year. The increase will affect between 15,000 and 20,000 engineers on all the railroads west of Chicago to the Pacific coast, north to the Canadian border and south to the Gulf of Mexico.

Miscellaneous.

The number of immigrants landed in the United States in 1906 was 1,215,684, the largest number in any one calendar year. The gain over 1905 was 15 per cent., and over 1904, 65 per cent.

STATE OF TRADE.

[A Summary of Special Telegrams to BRADSTREET'S.]

Retail and wholesale trade, industry and transportation alike feel the effect of varying adverse weather conditions, which retard or check activity and make the congestion visible some time ago in railroad matters even more acute. These conditions are not, of course, unusual at this season of the year, but are productive of especial comment and trouble just now because of the comparisons made with the wonderfully open season of January, 1906. The entire northwest has struggled with a series of snowstorms, followed by intensely cold weather; the central west and southwest have had weeks of heavy rains, culminating in swollen rivers and impassable country roads, while at the south the complaint has been that the weather has been unseasonably warm, and lower temperatures are necessary for fullest activity. In the northwest coal trains have had the right of way, and grain movement has been light, one result being firmer prices for wheat, while bad weather, damaging to corn and oats, has been a stimulus to prices of coarse grain. The reports from the winter-wheat crop are not conclusive. Very heavy rains, followed by sleet and ice, are reported in parts of the winter-wheat belt. In Texas, too much moisture has caused rank growth and complaints of bug damage.

The comparative quiet now witnessed in many lines is not unwelcome to many, who have been kept pushed steadily to fill orders. Building is quiet when compared with the activity of a year ago at this time, and hardware and lumber dealers have hopes of catching up with their orders. Relatively the most active line at present is that of dry goods, particularly cottons, which are strong and tending upward, with the mills heavily sold ahead, while the shoe trade is rather backward, though weather conditions of the past month should in the end be beneficial to this line as to all kinds of rubber wear. A new buying movement is apparently under way in pig iron, and structural material has also improved. Buying by car builders indicates confidence on the part of railways that present transportation activity will continue into 1908. Steel-rail orders booked have been large. Money is easier at most centers, and currency is returning from the country, except in parts of the northwest and in the south Atlantic states. In the former section country banks are reported borrowing at high rates, and this condition is expected to continue till the grain moves from the farms in the spring. European money markets are also working toward ease. Collections are irregularly slow, feeling the weather conditions even more than new demand.

A decade of expansion in railway gross earnings was crowned in 1906, when revenue from traffic eclipsed preceding records. Preliminary returns of all roads thus far making reports for the complete calendar year give gross earnings that aggregate $973,217,000, the gain over 1905, also an active period, being 12.7 per cent. The story of progress since 1896, a low-point period, is forcibly impressed by the ratios of gain shown in each year since, and including 1906. Thus, in the year first mentioned the increase amounted to 1.4 per cent.; in 1897 it was 7.5 per cent.; in 1898, 8.1 per cent.; in 1899, 9.7 per cent.; in 1900, 9.5 per cent.; in 1901, 10.5 per cent.; in 1902, 8 per cent., and in 1903, 11.5 per cent. In 1904, however, a small decrease—1.4 per cent.—was shown, but 1905 returned a gain of 6.9, which was capped by the increase of 12.7 reported for 1906. Motive power and rolling stock were augmented and terminal facilities were improved, but business expanded to such proportions that traffic congestion toward the latter part of 1906 became more marked than ever.

The textile markets are strong and fairly active for an ordinarily quiet time. Cotton goods are strong, and print cloths, prints, percales and plain cottons tend upward. Woolen goods for men's wear are opening for fall and note fair demand. Raw wool is steady, with a fair business doing. High prices abroad and in the west are sustaining features. While cotton futures are lower on the week by from 30 to 50 points on large movement, liquidation and less satisfactory cables, spots, though reduced 10 points, regained the loss and are practically unchanged, owing to the continued good demand for actual cotton, good spinning grades of which are scarce as rarely before. Advices from Fall River are that present spot cotton prices and quotations for cloths are less than ordinarily indicative of real margins of cost, because for good cotton for manufacture into fine goods much higher prices are really paid.

There is some irregularity in the shoe and leather trades. Thus, union sole is active, while oak and hemlock are rather quiet. Patent-leather manufacturers are behind on orders. Hides are in pretty strong shape. Foreign green salted grades are higher than domestic goods. New England hides are taken as fast as offered, but southern hides are neglected. In the shoe trade there is some holding back visible, not due so much to prices as to money-market conditions and conservatism. The market is full of buyers, who are looking around. Manufacturers are said to be 20 to 25 per cent. behind on orders as compared with a year ago at this time. Southern trade is particularly backward. Shipments are 9 per cent. behind 1906.

Last week some branches of the iron and steel trades displayed an incipient tendency to weakness, but this week renewed confidence set in. Thus, cast-iron pipe, which had been rather quiet, is more active, and some good-sized contracts have been placed, while additional business is pending. Demand for structural material also shows improvement, particularly in the west, where specifications are coming in more freely. Railway interests are the most liberal purchasers, demand being for bridge work and car building. Large orders for new buildings are said to be pending. An eastern mill has advanced its price on shapes to 1.85 cent at mill, which is the quotation heretofore prevailing at tidewater. Buying of pig iron, chiefly malleable, foundry and basic, for distant delivery has progressed still further, the Chicago district reporting a particularly heavy aggregate. Prices for these grades, except in isolated cases, are being firmly maintained—are higher in fact—and practically all markets feel the impulse of the movement. However, Bessemer and gray forge pig are off 50 cents a ton at Pittsburgh. In the south the car situation has improved, thus insuring the movement of a large tonnage that should have been delivered some time since. Spot pig iron brings fancy premiums everywhere. Steel bars are firm and in good demand, but bar iron continues irregular and some western mills are reported making concessions. Large orders for steel rails are said to be pending, but business for the week was only fair. The mills are well sold up, and it is figured that orders now booked total 2,500,000 tons, in addition to the 250,000 tons carried over from 1906. In the Pittsburgh district the supply of steel appears to have improved, the open weather having permitted outputs to be increased. Inquiries for steel cars are very large, and some construction works are inquiring for plates for delivery as far off as 1908, which would indicate that the railroads are quite confident of continued prosperity. Old material is still weak at some points, but the firmness in and active demand for pig iron will probably prove a sustaining influence. Coal and coke are in good demand at firm prices, but weather conditions and railway freight congestion tend to reduce supplies. Copper prices continue to move upward, the quotation on Lake ranging between 24¾ and 25¼ cents the pound, with even higher prices prevailing where prompt shipment is demanded.

Foreign trade in 1906, as predicted, broke all records, the total of imports and exports for the calendar year just closed being $3,119,172,649, a gain of 11.1 per cent. over the best previous year. Exports aggregated $1,798,107,955, a gain of 10.5 per cent. over 1905, while imports aggregated $1,321,064,694, an increase of 12 per cent. on the preceding year. Imports proved slightly larger than expected because of the enormous volume of December receipts, which exceeded those of November by 12 per cent., and those of December, 1905, by 33 per cent. December exports were next to the largest month's total ever reported, but fell 4 per cent. behind December, 1905.

Pressure of offerings from the new Cuban sugar crop is reflected in the market for raw sugar here, which is 6 points lower on the week, centrifugals selling at 3½ cents. Refined is now at 4.62 cents, and with the wide margin here shown and the downward tendency of the market for raws, a lowering of refined prices is indicated.

The New York stock market is dull and inclined to be very weak on the announcement of new stock issues or the prospect of additional creations of securities by various other railways. A certain amount of support was given to the Harriman group, but Amalgamated Copper was depressed by the failure to increase the dividend rate. Bonds continue to be dull and neglected, easier money having as yet failed to stimulate an investment demand. Foreign exchange is irregular on the lowering of the Bank of England rate, demand sterling being 4.85.50.

Bank clearings for the week ending with January 17 aggregate $3,439,375,367, 1 per cent. under last week and 10 per cent. below the same week last year. Excluding New York City, the total is $1,246,096,388, 1.3 per cent. in excess of last week and 6.4 per cent. over last year.

Business failures for the week ending January 17 number 234, against 283 last week, 279 in the like week of 1906, 304 in 1905, 266 in 1904 and 253 in 1903.

Wheat, including flour, exports from the United States and Canada for the week ending January 17 aggregated 2,636,460 bushels, against 4,073,110 bushels last week, 3,448,862 bushels this week last year, 1,138,974 bushels in 1905 and 4,690,200 bushels in 1902. For the past twenty-nine weeks of the fiscal year the exports are 104,633,074 bushels, against 77,237,654 bushels in 1905-06, 38,015,198 bushels in 1904-05 and 159,267,684 bushels in 1901-02. Corn exports for the week are 1,906,873 bushels, against 1,296,187 bushels last week, 5,944,571 bushels a year ago and 3,186,529 bushels in 1905. For the fiscal year to date the exports are 29,007,148 bushels, against 54,505,421 bushels in 1905-06 and 24,705,409 bushels in 1904-05.

IN CANADA.

Wholesale trade is quiet, but movements of spring goods on orders are heavy, and seasonable weather will ultimately help retail trade, though at the moment heavy snows affect transportation, especially in the northwest. Canned goods tend up in price, and some Canadian butter has been brought back from England because of higher prices at home. Montreal reports some reorders of winter goods, and the outlook for spring in dry goods is very favorable. Toronto reports a large spring business in prospect with the northwest. Prices of eggs are high, as stocks are light. Winnipeg reports snowstorms blockading the roads and affecting trade, but trade later will be helped by this. Collections are fairly good despite slow grain movement. Retail trade is good in British Columbia. Labor scarcity is complained of. Failures for the week number 23, as against 24 last week and 36 in this week a year ago. Clearings aggregate $79,951,879, a decrease of 8.2 per cent. from last week, but a gain of 5.6 per cent. over this week a year ago.

TRADE REPORTS.

At New York the business in dry goods is fair in all departments, but collections are backward. Raw silk is a little more active. Business in all lines of men's furnishings is good and prices continue high. While stocks of furs have been reduced by cutting prices, a considerable quantity will be carried over. Groceries are less active. Orders for Easter confectionery are numerous and collections are fair. The extraordinary prosperity of 1906 was only experienced to a fair extent in the wine and spirit trades There is a general shortage in domestic wines and a large increase in the importation of Irish and Scotch whiskeys. Flour is quiet. Butter is off 4 cents on increased receipts. Poultry continue to arrive in poor condition, and prices are unsettled. Eggs advanced 3 cents on a good demand in a limited market. Receipts of live stock are up to the average, and fat steers are very firm in price. Arrivals of dressed meats are ample for requirements. The coal trade still complains of the car shortage. Demand for rubber goods has improved owing to the weather. Hides and skins continue firm in price and there is no surplus stock in sight. Copper is advancing. In the tin and sheet-metal trades there is also a stiffening of prices, but not sufficient to restrict business and manufacturers are receiving more than the usual number of orders. Machinery dealers are also busier than usual and electrical goods move freely. Finished steel is less active, but pig iron continues in demand. Collections since the opening of the year are slow. Tobacco is quiet, stocks are low and prices are very firm. Wrapping papers are in less request, but there is good demand for other sorts. The real-estate market is inactive, and business in the building trades is practically at a standstill.

The following telegrams show trade conditions at the cities mentioned for the week ending January 18:

BOSTON.—In the dry-goods market the increasing strength of cotton fabrics is a notable feature. Further advances have been made on prints, percales and plain cottons, and all lines show an upward tendency, demand being urgent for early deliveries, and mills generally are sold up through the spring. Stability seems assured for at least six months, and buyers are anxious to get goods as quickly as possible. Cotton yarns are very strong, and buyers offer extra prices for spot deliveries. Dress-goods jobbers are receiving increasing orders from cutters-up, who have booked a good volume of first orders from retailers. Men's-furnishings business at wholesale is active and strong. Union sole leather is showing more activity than other lines, owing to activity of sole cutters in covering orders. Patent-leather manufacturers are still having difficulty in filling orders, owing to lack of sunlight, which is indispensable in the course of manufacture. Shoe manufacturers are giving their attention to the one hundred and more buyers in the Boston market. Orders are still less than last year, and conditions are not expected to change materially until all old stocks are wiped out. Although the market for paper continues rather quiet in tone, incidental to the stock-taking season, the situation is regarded as healthy and promising so far as future trade is concerned. Demand for the various lines of paper stock is moderately active. Manufacturers are buying somewhat more freely, but there still seems to be an inclination on the part of some to limit purchases to current wants. In the house-furnishing trades there is little demand for goods for immediate shipment, but some orders are being taken for early spring delivery. Jobbers of electrical goods are busy and collections are good. Demand for authracite coal is good, but bituminous is easier, prices remaining unchanged. Business in iron and steel is good, structural steel being very active. A still further advance in copper is looked for. Paints are in fair demand and prices are firm. Demand for lumber is fair, with southern lumber more active than other lines. The general provision market shows a fair demand, but some weakness in tone is noted. Flour prices continue low and some dealers are obliged to make concessions to secure business.

PROVIDENCE.—Machinery and tools are in good demand. Cotton goods are steadily advancing and supplies are not plentiful. In rubber goods trade is not particularly active, owing to weather conditions. Collections are fair.

PORTLAND, ME.—Ice cutting is in full operation, the quality being excellent. Continued cold weather is helping the movement of heavy winter goods in hands of country merchants. City retail trade in clothing, hats, millinery and similar lines continues quiet. Wholesalers look for more than average spring business.

PHILADELPHIA.—There is little change in textiles. Wool is firm and desired stocks are low. Demand for cotton yarns is strong and prices are well maintained. Dry-goods jobbers report a quiet week, with collections rather draggy. Flour is firm, in sympathy with wheat, and the market for the time being is in millers' hands. Buyers are taking only what they actually need. Chemicals and dyestuffs rule firm, and business is quite active in heavy grades. Paints and glass are dull, but the market is strong and prices firm. Lumber dealers say that transportation facilities have improved slightly, but difficulty is still experienced in getting orders filled quickly. Prices are stiff to advancing and demand rules strong. Goatskins are still scarce, commanding high prices. Glazed kid has advanced owing to increased price of raw skins. Leather is strong, with a not overabundant supply. Shoe manufacturers are fairly busy, but weather conditions up to now have been against both wholesale and retail dealers. Tobacco sells well. There are many inquiries for goods and some hesitation at placing orders because of high prices, but they are eventually obtained, as all large factories are still behind on orders. Collections are slow. Liquor sales have been heavy since the first of the year, with prices well maintained but no effort to increase them. Collections are only fair. All departments of the iron business show marked activity, strong prices and good prospects. Open weather has been favorable to transportation, and imports have given relief to urgent demands. Business in coal is good and prices are firm.

PITTSBURGH.—Stronger conditions have developed in the iron and steel market. The indications are that there will be a continuance of activity. During the week some 10,000 tons of Bessemer and basic iron, mostly for second and third quarter delivery, were sold, the former at $22 and the latter at $21.50 at the valley furnaces, producers having shown a disposition to shade figures previously quoted. There is no let-up in the activity among the finishing mills, and a continued good demand prevails. Orders placed now are not being pressed very hard, as delivery cannot be had for months. Consumers of coke are drawing heavily on contracts, and there is a continued heavy movement, with prices firm at present quotations. Prices for pig iron at the valley furnaces for present delivery are nominally as follows: Standard Bessemer, $23; chilled basic, $22; No. 2 foundry, $25, and gray forge, $21.50. Standard Connellsville coke is quoted at $3.50, and foundry coke at $4 to $4.25, at the ovens.

BUFFALO.—Retail trade shows some improvement. Manufacturers and jobbers report an active demand, and inventories for the year show very satisfactory results. Indications are favorable for the coming year.

BALTIMORE.—Dry goods are active. Because of the advance in prices of prints dealers are anxious to place orders. Collections are fair, except from eastern South Carolina. Local retail trade in notions and dry goods is normal. Linseed oil is firm and tends upward, because of increased demand and a short seed market. Turpentine remains firm and receipts are rather light. Collections are fair. Eggs continue high. Potatoes are cheap, owing to weather conditions. Clothing manufacturers are receiving a fair volume of spring orders. Local clothiers are materially reducing stocks, being helped by prevailing winter weather, which has also greatly assisted the movement of rubber goods. Shoe jobbers report a slight increase in the number of spring orders as compared with January, 1906, with immediate shipments about equal. Retail business is not up to the usual. Receipts of leaf tobacco are light, with a continued active demand at fair prices. Collections are slow. Harness manufacturers are busily engaged on old orders and new business is fair. Collections fair. Business in woodenware is active, prices steady and collections fair. Crockery and glassware trade report the usual number of spring orders, though the season has not fully started. Collections, however, are slow. Demand for building material is active, and numerous buildings are being erected in the residential sections. Demand for drugs has increased. There is a better feeling regarding money, demand for which continues strong.

CINCINNATI.—The rising river seriously affects collections and retards shipments. Checking on banks for country uses has materially lessened. Many factories are closed and jobbing business is disturbed.

CHICAGO.—Snow blockades in the northwest, cold weather and bad roads in most parts of the west, and soft weather and muddy roads in other sections, have checked the distribution of merchandise. Railroad transportation is slow, as the roads are giving more attention to rushing coal to famine districts than to moving any other class of freight. But with all of the drawbacks trade in general has been good for the season and reflects a large consumption of goods, while values hold with remarkable steadiness. There is activity and strength in the pig-iron trade, with sales of over 25,000 tons for delivery in the last half of the year, one large machinery manufacturer buying 10,000 tons. Sales for the last half of the year are in some instances from $2 to $3 lower than for spot iron. Some of the furnaces here are sold up for nearly the whole season. In addition to the construction of one new stack in this district, announced last week, there also comes notice of another large one to be built. The market for iron is strong, with sellers able to dictate prices. Structural material has come in for more activity, western railroads placing orders for 16,500 tons during the week. Specifications have also been forwarded more freely, the Illinois Steel Company receiving orders for 50,000 tons from one industry. Cast-iron pipe makers have received large orders for their output, and have covered their sales by securing the raw material. The coal and coke markets are strong, with no surplus offerings and an active trade. Trading with lumbermen is good, especially in hardwoods, as there are lighter stocks than usual. In groceries, paints, oils and drugs a fair business is under way. Eggs have advanced and poultry and butter declined. Reports from the interior indicate that too much wet weather is deteriorating corn in the cribs. Hogs, cattle and sheep show no change in values, with receipts somewhat better. Money is easy. Funds are returning from the country in good volume. Collections are irregular.

PEORIA.—Jobbers and retail merchants report business starting out satisfactorily. Cold weather in the last few days has stimulated trade. Collections are fair.

LOUISVILLE.—Continuous rain and bad weather cause quietness in retail and jobbing lines. Clothing manufacturers are running full force on spring goods. Dry-goods jobbers report spring orders coming in freely. Whiskey dealers and retailers report business opening up well at good prices. Money is tight. The banks have plenty, but hold strictly for 6 per cent. Collections are fair.

ST. LOUIS.—General conditions continue favorable. In dry goods, shoes, hats and millinery spring orders through traveling men are of good volume, and prices are well maintained. Bad roads and wet weather have retarded trade with country merchants. Hardware, lumber and all grades of building material continue in active demand at firm prices. Retail trade, especially among department stores, is quiet, and trade is being forced by winter clearance sales. Banking institutions in St. Louis report money conditions as satisfactory, although there is less borrowing of late. As far as can be learned the ice and sleet has not damaged the wheat crop to any great extent.

TERRE HAUTE.—Receipts from reduction sales now in progress more than offset the usual after-holiday quiet in business, which, however, was not very marked. Recent mild weather and heavy rains have started vegetation to growing. Oil fields in adjacent territory are still attracting attention of prospectors, but progress in this direction is retarded by the weather.

WICHITA.—Trade is better than at this date last year, but collections are very backward.

MILWAUKEE.—Trade, jobbing and retail, is improving. Collections are fair. Money is easier.

KANSAS CITY.—In leading wholesale lines trade is fully up to expectations, and, in fact, some increase is shown over a year ago. A large number of country implement dealers are in the market, attracted by the implement dealers' convention and low railroad rates. Therefore sales of all kinds of farm machinery are heavy. Live stocks receipts are good and prices are firm. Retail trade is retarded by inclement weather. Money is in good demand and rates are normal.

SIOUX CITY.—Retail trade is quiet, wholesale business is satisfactory and the outlook is excellent. Collections are fair to good.

DAVENPORT.—Trade, retail and wholesale, is quiet, due principally to disagreeable weather. Collections are fairly good.

ST. PAUL.—All lines are doing a fair business. Dry-goods shipments are heavy. Collections are good in sections, but on the whole they are only fair. Most houses report a decrease compared with a year ago. Gilt-edge paper finds no bidders in St. Paul at 6½ per cent., which is the rate quoted for loaning money by the banks. Business is at a standstill in North Dakota, snow being from three to five feet on the level. There is no money in sections, and country banks are borrowing from city banks at from 8 to 10 per cent. to tide them over. The situation is not likely to improve till spring, as only the wheat in elevators will be marketed.

MINNEAPOLIS.—Dry-goods and notion houses are making large shipments on spring account. Rubber goods are in excellent demand. The shoe trade is very fair with excellent prospects. Drugs and hardware are more quiet. Implement dealers are preparing for an active spring trade. Collections are disappointing, and from some northern localities, like North Dakota, are small. Reports from that state as to general business are quite discouraging. The flour trade is good for the season. Manufacturers using iron and steel are busy.

OMAHA.—Wholesale trade in all lines shows an improvement over the previous week. In retail lines clearance sales are the feature. Business is now being stimulated by more seasonable weather. Building operations continue quite active, and labor is in good demand. Collections are fair to good.

LINCOLN.—Trade and collections are fair.

SIOUX FALLS.—Trade is quiet, and collections are slow.

OKLAHOMA.—Retail trade is better than the average. The outlook for spring trade is highly promising. Collections are backwards.

CHARLESTON.—Wholesale merchants report trade good, though sales are not large. The fertilizer business is slow in moving this year on account of shortage of cars. Collections are slow.

RICHMOND.—Wholesale dry-goods and notion houses have commenced spring shipments, travelers are out, and orders are liberal—in most instances are two or three weeks in advance of last season. Loose leaf tobacco is active, offerings are large and prices are good, even for the common grades, and for the better grades quotations are higher than they have been this year. Collections are good, considering the season, and show an increase over last year.

AUGUSTA.—Trade shows improvement. Collections are fair.

ATLANTA.—Warm weather is retarding retail trade in winter goods and causing uneasiness as to the future peach crop, as some trees are already in bloom. Collections are still dragging.

JACKSONVILLE.—Trade is more active, with some improvement in freight deliveries and collections. Demand for money is brisk at full rates.

BIRMINGHAM.—Southern foundry No. 2 pig iron is quoted at $23 for first-quarter delivery. Demand is strong. Trade in all lines reported fair, with collections a little slow.

MOBILE.—Jobbers report a decided increase in sales, which compare very favorably with last year's. Collections are also improving. Retail sales are not active owing to warm weather. Worms are reported as beginning to play havoc with storm-swept timber.

MONTGOMERY.—All trades are quiet. Warm weather retards retail trade in winter goods. There is a noted improvement in building lines, contracts being let during the past week for two twelve-story office buildings. Collections are slow.

CHATTANOOGA.—A slight improvement is noted in wholesale and retail trade. Demand for money is active. Collections are fair.

NASHVILLE.—Wholesale houses are getting a fair amount of orders, but report collections as unsatisfactory. Retail trade, especially clothing and dry goods, feels the effects of unseasonably warm weather.

MEMPHIS.—Warm weather is delaying retail trade, which is dull. Merchants are endeavoring to sell winter goods at reduced prices. Drummers are in the country, but wholesale business is only fair. Collections are slow. Cotton is moving slowly. Warehouses and railroad platforms are congested owing to the car shortage, which also delays the movement of lumber.

LITTLE ROCK.—Unseasonable weather and rain has caused both retail and wholesale trade to show a decrease by comparison with this week last year. Collections are slow.

NEW ORLEANS.—Jobbers report business somewhat light, particularly in produce lines, the weather continuing too warm for handling perishable goods. Retail trade is below the average and collections are somewhat slow. Exports of lumber and grain during the past week have been heavy.

FORT WORTH.—Trade is active and jobbers report satisfactory collections.

DALLAS.—Jobbers in all lines report excellent trade. The movement of spring goods is exceedingly heavy. Trade is quiet with retailers, as the weather has been warm and unseasonable during the past week. Collections are only fair, on account of warm weather. Wheat has attained a rank growth and green bugs are reported as having considerably damaged the crop, but the reports are thought to be largely exaggerated.

SAN FRANCISCO.—Business conditions are excellent. Building operations are hampered by unusually inclement weather. Collections are good.

SEATTLE.—Trade is keeping up very well and collections continue good. Large spring orders are being placed. Many large houses are increasing their capital in order to cope with the growing trade.

SPOKANE.—The scarcity of cars and the fuel shortage is curtailing business quite seriously. Real estate continues to move freely. Collections are slow to fair.

TACOMA.—The fuel shortage is keenly felt. Business in all lines is active and jobbing trade shows a substantial increase over last year.

PORTLAND, ORE.—Winter weather of unusual severity has temporarily retarded building operations and retail trade. Collections continue good, with excellent prospect for spring trade.

TORONTO.—Wholesale trade is still quiet, while there has been a rather better movement at retail. Spring goods are being sent out, and dry-goods orders coming forward are for large and well assorted lines. In other deparments of wholesale trade the movement is good for this time of year. Canned fruits have advanced and higher prices are expected for canned vegetables. The increase in freight rates has added 2 cents per hundred pounds to the price of sugar. Until recently the weather was unfavorable to the movement of retail winter goods, but there has been an improvement during the past few days. A big spring business is coming from the north and the west. Country trade continues a little quiet. Receipts of provisions are still light. Eggs and cheese hold very firm. Stocks of cold-storage eggs are light and prices are expected to go higher. Hides and skins are slightly lower. Wool is firm and quiet. There has been a big business in fruit. The firmness in oranges has been the feature of the trade. Collections are generally good.

MONTREAL.—Wholesale lines continue quiet, but well up to the average. Spring shipments are going forward well. Sorting trade in winter dry goods is beginning to open up. Values generally hold firm. Stocks of cottons are still light and Canadian mills are working hard to catch up with orders. The December business in dry goods was the best in years, and to judge from present appearances the spring trade is going to be equally satisfactory. There is no change in hardware, retail lines moving well, and the metal market is fairly active and firm. Groceries are quiet, with teas firm and the market almost bare of raisins and currants. Sugar is steady at the recent decline. City retail trade has shown more activity, and collections are generally satisfactory. Butter is rather firmer, although the demand is still quiet. Canadian stocks are now returning from England. Cheese is very strong, and Canadian stocks are light. Flour is quiet and steady, and grain dull. Eggs are firm at the high prices ruling. Accumulated stocks of potatoes have sent the market lower.

VANCOUVER-VICTORIA.—General trade continues active for this time of the year. The wholesale movement is light, but retail stocks are going out briskly. Collections are good. Values are generally firm. Prices for all kinds of country produce are high and showing an advancing tend-

ency. Hogs are scarce and firm. The lack of labor continues to affect provincial industries.

WINNIPEG.—Not only has business been affected by the usual after-holiday dullness, but snow blockades throughout the country have held up retail trade in all directions. The snow is welcome and trade will be better for it. Wholesale business is quiet, but the houses are busy with spring lines. Many lines of trade suffered from slowness of deliveries in 1906, and in some kinds of groceries stocks were insufficient. Payments are fairly good, notwithstanding the slow movement of grain.

FINANCIAL.

Money Market.

Favorable bank statements seem to be the rule at the moment. The New York Clearing House averages of last Saturday were decidedly of that order, and as the banks have this week gained cash both from the Treasury and the interior, the estimated increase being some $14,000,000, it is expected that to-day will result in another good showing. The fact that the Bank of England's discount rate was reduced on Thursday from 6 per cent. to 5 per cent. and that the weekly return was a good one, together with the ensuing easing of the London money market, also had an effect on sentiment. Rates for call money have been easier, the maximum being 5 per cent., while most of the renewals were at 4 per cent., this figure being shaded to 3 per cent. at the end of the week. Most of the interest, however, centered in time money. Borrowers are rather indifferent, and though lenders sought at first to keep rates for this kind of accommodation at 6 per cent., they seem in some cases to have been led, by the absence of demands, to shade the figures, and 5¾ was accepted, while the 6 per cent. rate seemed to apply only to loans on industrials. Mercantile paper is more active, and free offerings of prime names are taken at about 6 per cent.

New York Banks.

The increases of $10,578,900 in cash holdings and of $8,492,875 in the surplus reserves of the New York Clearing House banks, shown by last Saturday's bank statement, agreed with the general expectation of a favorable showing for the week which the document covered. In fact, the gain in the cash averages corresponded very closely with the preliminary estimates as to the actual movements of money between the banks and the interior and Treasury. Another feature of the statement was that the change in the item of loans was a rather nominal one, in the form of a decrease of $858,000. This was construed as indicating that stock-market liquidation had offset the effects of new borrowings by syndicates and others. The increase of $8,344,100 in deposits, it is true, did not agree very well with the changes in the other items, but as the reserve required was only $2,086,025 greater than the week before, the above substantial gain in the surplus was the result. The figures of the statement compare as follows with those of the preceding week:

	January 12	January 5	Changes
Loans	$1,048,808,700	$1,049,667,500	D. $858,800
Specie	177,601,600	172,951,400	I. 4,650,200

New York Securities Market.

During the present week activity on the Stock Exchange has been moderate in volume, while the tendency of prices was, in the main, toward a lower level. The developments included a relaxation in call money rates, and the indications are that last Saturday's decidedly favorable bank statement will be followed up by a further gain in the cash and reserves in to-day's Clearing House averages. The reduction of the Bank of England's discount rate from 6 to 5 per cent. had a favorable influence, although it is recognized that New York could not hope to take gold from London, and it is also noted that foreign interests are not disposed to take hold of American stocks. The improvement in the money market failed, however, to have any stimulating effect on speculation in view of a number of developments, some of them unfavorable in their nature, and others so construed by the street. The announcement of a $25,000,000 issue of Northwestern stock, with 25 per cent. "rights" at par for the stockholders, had the effect which is now customary in connection with such operations, the stock of that company having had an immediate decline. Later in the week there were sharp breaks in the Southern Railway and Erie issues. The former stock was affected adversely by apparently exaggerated reports about the issue of a large amount of new securities, bonds to the total of $50,000,000 being spoken of, and also by apparently unfounded reports that the preferred dividend might be reduced. In the case of Erie the unsettling factor was the dissolution of the underwriting syndicate for the second issue of 4 per cent. convertible bonds and the distribution of the securities among the members, which, as the bonds are quoted at a price far below the subscription, naturally had a disturbing effect. Another incident was the failure of the Amalgamated Copper directors to increase the quarterly dividend on last Thursday, the stock, which had sold up to above 118 on anticipations of such action, declining to 112. The Gould stocks were a weak feature and continued to droop on neglect and on the circulation of adverse reports as to the pending litigation in Missouri and the financial plans in connection with the Wabash system. The United States Steel stocks, on a moderate amount of trading, were, on the other hand, somewhat firmer than the majority of the list, and the so-called Harriman stocks, particularly Southern Pacific, had support, at first, which was as true in a measure of St. Paul. In the later trading these securities, however, eased off, and on Friday the entire list broke again on renewed bearish pressure, with a certain amount of actual liquidation. Various reports were circulated as to the position in the market of various important interests. It was, for instance, claimed that one of the largest New York banking elements was not favorable to the bull side because of the further large amounts of capital which will have to be provided for the railroads and the difficulty in disposing of masses of new securities in a narrow money market, and in the face of the agitation directed against corporations, and more especially against the railways. On the other hand, the Harriman interest and its allies were claimed to be still bullish so far as the market is concerned, though there was nothing, of course, to substantiate the above theories, save the fact that the Morgan stocks, as they are called, were weak features, while the Harriman group, as already stated, was relatively well supported.

Foreign Exchange.

Owing to the more favorable conditions as to rates for money, the tendency of exchange was to advance in the early days of the present week. There was a fair demand for remittances, and the supply of commercial bills was not very large. Under these circumstances the actual selling rate for demand sterling rose from 4.84.80 to 4.85.25. Later in the week the improvement in the money market at London naturally had an effect on exchange rates at New York. The hardening of long sterling, which went up from 4.80.50 to 4.81, was, in fact, a precursor of the reduction of the Bank of England rate from 6 to 5 per cent., which was duly announced on Thursday. This news was followed by a further rise in the rate for long sterling to 4.81.25@4 81.40. On Friday the market was steady at a fractional advance.

POSTED RATES OF LEADING DRAWERS FOR LONG AND DEMAND STERLING.

Jan. 12	Jan. 14	Jan. 15	Jan. 16	Jan. 17	Jan. 18
4.81 @ 4.85½	4.81½ @ 4.86	4.81½ @ 4.86	4.82 @ 4.86	4.82 @ 4.86	4.82½ @ 4.86½

ACTUAL BUSINESS BANKERS' DEMAND STERLING.

4.84.80 @ 4.84.90	4.85.00 @ 4.85.25	4.85.10 @ 4.85.25	4.85.10 @ 4.85.25	4.85.25 @ 4.85.40	4.85.50 @ 4.85.60

ACTUAL BUSINESS BANKERS' SIXTY-DAY STERLING.

4.80.40 @ 4.80.55	4.80.60 @ 4.80.70	4.80.75 @ 4.80.90	4.81.60 @ 4.81.75	4.81.25 @ 4.81.50	4.81.25 @ 4.81.50

Closing quotations on Friday for actual business in other classes of bills were: Cables, 4.86.25; commercial bills, 4.80⅝@4.81½; francs, 5.22½@5.18¾ less 1-16; reichsmarks, 93¾@94¾.

The Bank of England on last Thursday reduced its minimum discount rate to 5 per cent., the figure having stood previously at 6 per cent. since October 19, 1906. The weekly return of the bank showed a gain of £508,824 in specie and a rise in the proportion of reserve to liability from 39.97 per cent. to 45.30 per cent. The figures also indicated that the market had repaid about £3,000,000 of loans to the bank. In the London open market rates for money are decidedly easier, call loans being quoted at 3½@3¾ per cent., while discount was 4⅝@4¾ per cent., though the rates were fractionally firmer on Friday. The Bank of

France this week reported a decrease in its gold of 8,250,000 francs. Its rate is still 3 per cent., the Paris market figure for discount being the same. At Berlin the bank rate is 7 per cent., but the market is easier at 5 per cent.

The Bureau of Statistics of the Department of Commerce reports the imports and exports of merchandise, gold and silver for December and the year ending therewith, with comparisons for 1905 and 1904:

TWELVE MONTHS.

Crude	118,664,999	102,264,625	6,777,980	5,350,942
Naphtha	25,114,155	26,828,456	2,210,620	2,058,402
Illuminating	827,727,219	858,829,713	52,312,873	53,618,510
Lubricating	146,715,235	110,901,506	17,801,564	13,707,165
Residuum	63,292,493	66,733,457	1,909,957	1,963,497
Total	1,181,514,101	1,165,557,757	81,013,004	76,698,516

Cotton exports for the periods set forth in 1906 and 1905 were as follows:

DECEMBER.

	Bales	Pounds	Values
1906	1,328,727	689,567,387	$73,151,302
1905	1,094,503	566,560,847	67,004,367

FOUR MONTHS.

1906	4,275,004	2,221,788,548	232,680,249
1905	3,586,272	1,858,492,896	204,634,033

The average export price per pound of cotton in December was 10.6 cents, as compared with 11.8 cents in December, 1905. For the four months ending with December the price was 10.5 cents, against 11 cents for the corresponding period in the preceding year.

Statistical Situation of Cotton.

The aggregate world's visible supply of American and other cotton last week, as made up by the New Orleans Cotton Exchange, is shown, with comparisons:

Week ending	Jan. 11, 1907	Jan. 4, 1907	Jan. 12, 1906
American	4,268,127	4,153,303	4,082,451
Other kinds	1,105,000	1,067,000	1,343,000
Total	5,374,127	5,218,303	5,425,451

Of the world's visible supply, as above, there were afloat for or held in various countries on the dates given the following quantities:

	Jan. 11, 1907	Jan. 4, 1907	Jan. 12, 1906
Great Britain and continent	2,659,000	2,531,000	2,764,000
Egypt	252,000	249,000	204,000
India	463,000	454,000	726,000
United States	2,000,000	1,982,000	1,731,000
Total	5,374,000	5,218,000	5,425,000

Following will be found the movement of cotton into sight for the week and season, as compiled by the New York Cotton Exchange:

	This week	Last week	Last year
Week	447,841	434,748	219,467
Season	9,175,628	8,727,787	7,642,433

New York's Foreign Trade.

IMPORTS.

	1907	1906
Dry goods	$3,827,756	$3,712,594
General merchandise	11,939,471	10,996,013
Total week ending January 12	15,767,227	14,708,607
Previously reported	18,935,525	12,934,606
Since January 1	34,702,752	27,643,213

EXPORTS.

	1907	1906
Week ending January 15	$12,981,302	$14,182,952
Year to date	24,212,612	26,641,602

Boston Shoe and Leather Market.

Hemlock sole is only fairly active. Sole cutters are in the market for union sole, and considerable activity is reported. Oak sole is quiet. Grain leathers are in normal request. Splits are still scarce for new orders and immediate delivery. Patent-leather manufacturers are still behind on their orders, largely due, it is said, to unfavorable weather. Hides are apparently more than holding their own. Selections of buffs are held for 13¼ cents. Southern hides are neglected. New England hides are taken as fast as they come into the market. Foreign green salted hides are higher than domestic hides. The shoe market is enlivened by the presence of representatives from over a hundred different wholesale houses. While some orders have been placed, the majority have not reached conclusions and appear to be holding back. It does not appear to be a matter of price so much as high money and ultra-conservative methods that is causing the delay. Manufacturers are from one-fourth to one-fifth short of the orders on hand at this time last year. While business is of fair volume for the present, manufacturers will in a few weeks be dependent upon the new orders to keep their factories fully employed. Wholesalers reaching southern trade are particularly conservative. Shipments this week show an improvement over last week, but are over 12,000 cases less than in the corresponding week last year. The *Shoe and Leather Reporter's* figures are given herewith: Last week, 93,520 cases; preceding week, 91,945; last year, 107,705; total for 1907, 185,465; total for 1906, 204,441; decrease, 18,976.

Boston Wool Market.

Wool is moderately active, with transactions distributed over many different grades. Worsted and woolen manufacturers are in the market, the latter making more inquiries than of late. Prices continue very strong, further strength being added by the opening of the London sales, which were fully up to the level of the November series for high grades and slightly higher on low crossbreds. Boston is still the cheapest market in the world for most grades of wool, and this advance in London has still further widened the differences between similar grades of foreign and domestic grades, foreign quarter bloods, based on the advance, being available at about 58 cents, while the domestic quarters are fully 2 cents below. All foreign markets are still on a high basis, though there has been a slight reaction in Australia since the holidays. It is now estimated that the purchases for this country in South America will be 50 per cent. of last year's total. Manufacturers are buying actively in foreign markets, and are pressing dealers on this side for deliveries on domestic grades bought some time since, showing that manufacturers' stocks have reached a very low point. There is still talk of contracting in the west, and Boston dealers have obtained a few clips, especially in Idaho, where the price paid was 17@18 cents, but actually the contracting thus far done is less than for two years. Western growers are very firm in their ideas, and dealers are disposed to hold off for a while. Prices show very little change beyond a settling down to the basis of the poor selections which are left, and available grades are held very firm. Worsted wools are in very light stock, and this is all that prevents a large business being done in that class of wools. There is a good demand for Australian wools in the Boston market, but stocks are very small, and the majority of the recent arrivals have been for manufacturers' account. Among the sales of the past week were fine and fine medium Idaho and Montana clothing wools at 22½@23 cents; small lots of fine washed and unwashed delaines; unwashed unmerchantable and XX and above; fall Texas at 22@23 cents; middle counties California at 21@22 cents, and scoured at 70 cents for fine territory and 66@67 cents for fine medium territory.

BUILDING IN 1906.

Building for 1906 shows an increase of 1 per cent. over 1905. The small percentage of gain is due to the heavy decrease in building in New York City. If Manhattan and the Bronx were excluded the increase would be 8 per cent. Official reports to *Construction News* from thirty-nine leading cities show that permits were taken out for the construction of 139,457 buildings, involving a total cost of $556,873,721, against 132,418 buildings, aggregating in cost $553,388,390, for 1905, an increase of 7,039 buildings and $3,485,331, or 1 per cent. This is unquestionably the high record for building operations in this country. The increase in 1905 over 1904 was 40 per cent. The figures in detail are as follows:

	No. 1906	Cost, 1906	No. 1905	Cost, 1905	P. ct. gain
New York†	3,810	$133,108,025	4,576	$163,180,971	*18
Brooklyn	11,784	71,468,115	12,227	70,608,430	1
Chicago	10,447	64,298,330	8,337	63,455,020	1
Philadelphia	17,363	40,711,510	16,958	34,822,235	16

Spokane	1,813	3,831,859	1,863	3,905,908	..
Total	139,457	556,893,721	132,418	553,388,390	1

* Loss. † Includes Manhattan and Bronx.

In twenty-seven cities, it will be seen, there were increases for the year ranging as high as 76 per cent., while in ten there were losses. It is significant that in New York City there was a decrease of 18 per cent., while the other principal cities show gains. As a result of the open winter building continues active in all sections, and people who are familiar with the situation in the leading cities predict that the results for 1907 will be equally satisfactory.

ELECTRICAL GROWTH IN 1906.

"In accordance with its usual custom, the *Electrical World* presents herewith some data and estimates bearing upon the industrial and commercial development in electricity during the past year. It must be admitted that 1906 is a difficult year upon which to make calculations, so far as the earnings of public-service corporations are concerned, for the reason that the basic year 1902 is now rather remote, the figures for that year being the last compiled by the United States Census Bureau. On the other hand, the figures as to manufacturing are much more authentic, as the government statistics for 1904 have become available. The past year has, however, been one of such extraordinary growth and expansion, no one can claim to be able to average very closely the product of 800 manufacturing concerns and the earnings of some 12,000 to 15,000 public-utility companies. Still, with well-determined bases, a result may be presented which cannot be very far out of the way. If anything, the subjoined figures would appear to be unduly conservative, but that is a safe way to get at them.

"As to electrical manufacturing, it may be noted that the authentic government figures for 1904 show a total of $159,551,402. Our own estimate was $175,500,000, but as the government figures are taken at a 'factory valuation,' it will be seen that our guess was in reality an extraordinarily close one. Assuming a general 20 per cent. increase for 1905, that year was estimated by us to have a product worth $217,400,000, which may have been high, but was probably near the realities. But revising the figures, taking the actual items of 1904 as a basis and assuming for 1905 a gain of only 10 per cent. and for 1906 a gain of 20 per cent., the following result is reached:

ELECTRICAL PRODUCTION, 1906.

Dynamos	$16,928,500
Motors	27,520,200
Transformers	5,898,500
Switchboards	4,971,200
Batteries	5,601,900
Carbons	3,578,400
Arc lamps	2,078,200
Incandescent lamps	9,178,200
Electric-lighting fixtures	7,002,000
Telephone apparatus	21,000,000
Telegraph apparatus	1,466,700
Insulated wires and cables	45,566,000
Electric conduits	3,189,400
Fuses and lightning arresters	1,920,800
Resistances, heating and cooking	1,753,900
Electrical instruments	6,606,300
Circuit fittings	4,653,600
All other products	36,000,000
Total	204,920,800

"This certainly is bedrock and doubtless far below the mark. For example, the General Electric, Westinghouse and Western Electric companies, according to their published reports, had a joint output in 1906 somewhere in the vicinity of $150,000,000, more or less, leaving a very small balance to be made up by nearly 800 other concerns, some of them producing millions of dollars' worth annually. It is reasonable to estimate, therefore, that the public paid about $250,000,000 for its electrical apparatus in 1906.

"The next element of calculation relates to the earnings of the public-utility corporations. Here the fluctuations and variations are very wide. Many even of the largest of these, outside of telegraphy, showed a gain of from 20 to 30 per cent. in their gross earnings. Our total estimate for 1905 was about $720,000,000. The figures are given in detail below, with those of 1906:

	1905	1906
Telegraph and cable	$45,000,000	$50,000,000
Telephone	140,000,000	165,000,000
Electric light	135,000,000	175,000,000
Street and other railways	325,000,000	360,000,000
Isolated plant supply	75,000,000	100,000,000
Miscellaneous services	25,000,000	40,000,000
Total	745,000,000	890,000,000

"To the unpracticed observer some of these items may look high, but none of them show heavy percentage gains over the authentic figures of 1902. In that year the street railway earnings were over $250,000,000, and a steady 10 per cent. gain would show nearly $370,000,000. As to telephony, 5,000,000 subscribers at $30 a year would show $150,000,000, but the average yield is higher than that per station. The revival in electric light in 1905-06 has been enormous, and the increases have been heaviest in the largest systems. Hence, taking all things into consideration, it would look as though the American public paid out in 1906 for its electrical goods and service an amount somewhere in the vicinity of $1,150,000,000. It seems quite probable that the grand total will reach the value of $1,250,000,000 during the year 1907."

YEARLY SLAUGHTERING COMPARISONS.

The preliminary calculations of the *Price Current* make it appear that the western slaughtering of hogs by regular packing establishments in 1906 indicated a total of 25,600,000. The commercial slaughtering of cattle and sheep is mainly at four points, Chicago, St. Louis, Kansas City and Omaha. The total number of such animals slaughtered at these places exceeded the record for the preceding year to the extent of 168,000 cattle and 237,000 sheep—the gain in the number of hogs for all western packing being, approximately, 115,000. Taking the number of cattle and sheep slaughtered at the four centers, and the total western killing of hogs, the yearly aggregates compare as follows, for years indicated, according to compilations of the Cincinnati *Price Current* (three figures omitted):

	Cattle	Sheep	Hogs	Total
1889	2,688	1,476	12,690	16,854
1890	3,373	1,622	16,980	21,975
1891	3,356	1,879	15,180	20,415
1892	3,911	2,112	13,750	19,773
1893	4,104	3,278	11,080	18,462
1894	3,959	3,565	15,265	22,789
1895	3,590	3,695	15,285	22,870
1896	3,627	4,299	16,230	24,156
1897	3,711	4,654	19,640	28,005
1898	3,553	4,647	23,510	31,710
1899	3,786	5,019	22,215	31,020
1900	4,053	4,798	23,265	32,116
1901	4,491	5,276	25,410	35,177
1902	4,619	5,832	21,230	31,681
1903	4,833	5,827	21,470	32,130
1904	4,553	5,465	23,795	33,813
1905	4,826	5,879	25,485	36,190
1906	4,994	6,116	25,600	36,710

THE BEET-SUGAR INDUSTRY.

According to a report on the beet-root sugar industry of the country, contained in a recent bulletin of the Department of Commerce and Labor, the production of beet-root sugar increased in the five years between 1900 and 1905 not less than 233 per cent., while the number of establishments increased 70 per cent. in the same period. Instead of being only a comparatively small part of the sugar production, beet root furnishes more than 50 per cent. of the increase during the period covered by the report.

Although the manufacture of beet sugar in the United States has been carried on continuously since 1870, it has been within the past decade only that the industry has shown indications of really being past the experimental stage. In 1879 four factories were in operation, as shown by the census of 1880. From unofficial sources it appears that up to 1898 the greatest number of establishments in operation was nine, but, according to the census report, the number had increased to thirty by 1900 and to fifty-one by 1905. The industry has had its greatest period of growth from 1898 to the present time. The capital invested in the beet-sugar industry in 1880 was only $365,000; by 1900 the amount had increased to $20,141,719, and in 1905 it was $55,923,459. The value of products, which amounted to $282,572 in 1880, had increased to $7,323,857 by 1900, and by 1905 had reached the sum of $24,393,794.

While the wage-earners in this industry were paid only $62,271 in 1880, they received $1,092,207 in 1900 and $2,486,702 in 1905, in addition to which over $11,000,000 was distributed among the farmers in the beet-raising sections in payment for beets, and nearly $2,000,000 was paid for limestone, sulphur, coke and fuel.

At the census of 1905, compared with that of 1900 (which covered the sugar campaign of 1899-1900), the number of establishments increased 70 per cent.; the capital invested, 177.6 per cent.; the total wages paid, 127.7 per cent.; the cost of materials, 201.6 per cent., and the value of products, 233.1 per cent. In 1900 beet sugar was manufactured in thirty factories distributed over eleven states, while in 1905 there were fifty-one factories in twelve states. The greatest increase in number of establishments has occurred in Michigan, the gain being from nine in 1900 to nineteen in 1905. The following statistics are interesting for comparison:

United States	1905	1900	*P. ct. of inc.*
Number of establishments	51	30	....
Beets—Acres	240,757	135,305	77.9
Tons	2,175,417	794,658	173.8
Cost	$11,345,785	$3,485,320	225.5
Products, total value	$24,393,794	$7,323,857	233.1
Granulated sugar—Pounds	496,618,314	115,686,356	329.3
Value	$23,493,373	$5,580,527	321.0
Raw sugar—Pounds	11,223,607	47,771,719	76 5
Value	$431,229	$1,642,054	73.7
Molasses—Gallons	9,609,542	3,551,856	170.6
Value	$221,097	$25,102	780.8
Beet pulp	$202,070	$21,822	826.0
All other products	$46,025	$54,352	15.3

In 1905, compared with 1900, the aggregate value of all products increased 233.1 per cent. The quantity of granulated sugar increased 329.3 per cent., and the average selling price was slightly lower than that reported in 1900. The very large increases in the values reported for molasses and beet pulp are directly traceable to the increased use of these articles as stock food. The amount realized from the sale of beet pulp in 1905 was $202,070. Estimating the output of pulp from the past season's crop at one-half the weight of the beets, it should have brought over $1,500,000. If the stock-raisers of this country were properly impressed with the food value of the pulp there would be a demand for every ton of it, as there is each year in Germany and other foreign beet-raising countries.

In 1853-54 the world's production of sugar was 1,420,558 long tons, of which 201,000, or 14.1 per cent., were accredited to the beet. The increase from this source has been steady and rapid. In 1899-1900 the world's production was 8,560,109 long tons, of which 3,056,294, or 35.7 per cent., were from cane and 5,503,815, or 64.3 per cent., from beets. In 1904-05 the production of beet sugar was 51 6 per cent. of the total crop. Between 1853 and 1905 the production of cane sugar increased 279.6 per cent. and in the same time the production of beet sugar increased 2,349.1 per cent. More than 50 per cent. of the world's production has been taken from beets during each campaign since 1888-89.

Although experiments were made in this country as early as 1830, the first successful factory was erected in 1870.

Of the attempts before that year, the first one recorded was made in 1830, when a small factory was erected in Philadelphia. In the one year during which the establishment was in operation only a few hundred pounds of sugar were produced. In 1837 a factory was erected in Northampton, Mass., but it proved a failure and was abandoned about 1840. The next attempt was made in 1852-53, in a factory purchased in England and moved to Utah, but there was no successful production of beet sugar in this country until 1889. The next factory was erected at Chatsworth, Ill., in 1863. This factory was operated with indifferent success until 1870, when it finally failed. It was then moved to Freeport, Ill., where it was operated for one year, after which it was moved to Black Hawk, Wis. Its career in Wisconsin was short; after one year the enterprise failed and later part of the machinery was removed to California.

The conclusions of the bureau are that, on the whole, the industry seems to be thoroughly established in most of the states, and the increased production is steadily reducing the amount of sugar imported from other countries. In view of what has already been accomplished, and with the intelligence of American farmers directed toward more scientific methods of beet culture, and the ingenuity of American manufacturers constantly improving the methods of extracting the sugar from beets, it is reasonable to expect that the time is coming when the United States will be producing every pound of sugar which is consumed within its borders.

COTTON SPINDLES IN THE UNITED STATES.

The Census Office reports the results of the official inquiry into the cotton-spinning industry for the crop year ending August 31, 1906. Possibly the most remarkable fact in this report is that of the 25,811,681 spindles in the 1,732 establishments engaged in spinning cotton last year, only the insignificant number of 561,585 spindles, or a little more than half a million, were idle. The geographical distribution of the establishments and spindles by states is shown by the following table:

	Establishments	*Spindles, total*	*Spindles active*	*Spindles idle*
United States	1,732	25,811,681	25,250,096	561,585
Alabama	68	870,154	851,986	18,168
Arkansas	11	17,324	13,180	4,144
Connecticut	86	1,181,913	1,174,527	7,386
Georgia	138	1,573,450	1,546,998	26,452
Illinois	34	31,488	31,488	....
Indiana	19	134,188	126,688	7,500
Kentucky	14	85,092	82,692	3,000
Louisiana	12	95,200	92,700	2,500
Maine	34	931,576	912,593	18,983
Maryland	14	156,396	134,112	22,284
Massachusetts	210	8,904,725	8,790,793	113,932
Mississippi	26	165,188	147,474	17,714
Missouri	26	14,016	14,016	....
New Hampshire	46	1,320,027	1,296,445	32,582
New Jersey	27	435,813	417,679	18,134
New York	112	852,826	802,254	50,572
North Carolina	251	2,396,703	2,341,792	54,911
Ohio	29	....	....	....
Pennsylvania	124	316,235	288,143	28,092
Rhode Island	76	2,173,868	2,130,958	42,910
South Carolina	141	3,367,204	3,345,075	22,129
Tennessee	37	258,794	212,062	46,732
Texas	52	101,759	93,687	8,072
Vermont	15	107,172	102,264	4,908
Virginia	33	253,206	253,206	....
All other states	97	57,764	47,284	10,480

Seven of the states in which cotton mills are located have more than a million spindles each. Massachusetts, with 8,904,725 spindles, has more than one-third of the total number in the United States. This state has more active spindles than all the southern states combined. Next to Massachusetts stands South Carolina with 3,367,204 spindles, followed by North Carolina with 2,396,703 spindles. These are followed in turn by Rhode Island, Georgia, New Hampshire and Connecticut. Alabama falls just below the million spindle class, as do Maine and New York.

BRADSTREET'S

PUBLISHED WEEKLY BY

THE BRADSTREET COMPANY,

NOS. 346 AND 348 BROADWAY, NEW YORK.

Berlin, 23 Charlotten-Strasse.
London, 137 Cheapside, E. C.
Melbourne, 231 Flinders Lane.
Paris, 20 Boulevard Montmartre.

TERMS: $5.00 PER YEAR IN ADVANCE.
Remit by Express Money Order, Draft, P. O. Order or Registered Letter.

Communications regarding editorial matters should be addressed to the Editor; all others to the Publishers.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, JANUARY 26, 1907.

There has been somewhat more legislative activity at the national capital during the last week or ten days, an indication of the fact that the members realize that the session is gradually drawing toward its end. At this stage the activity is mainly seen in the work in committees, where legislation is being put in shape for enactment. One measure that would have aroused much criticism almost any time before within the last four decades went through both houses without occasioning any remarks of consequence. This was the amendment to the legislative appropriation bill increasing the salaries of senators and representatives 50 per cent. The measure went first through the House, where it was passed on a rising vote by a majority of 41. A sufficient number did not call for the yeas and nays, so that the members did not have to go on record. A few days later the Senate passed the amendment by a vote of 53 to 21. The senators did not shrink from a roll call as did the members of the House. It is proper to add that the amendment also carries ratable increases in salary for the Vice-President, the Speaker of the House and the members of the Cabinet. Against the latter increases there certainly could be no valid objection at any time.

One of the most agreeable among recent incidents of a public nature has been the visit of Secretary of State Root to Canada, where he has been most hospitably treated, and where, also, he has left behind impressions of a very gratifying character. Mr. Root has explained that his visit had no political or diplomatic aspect whatever, but he has of late played so much in the rôle of a plenipotentiary at large that the appearance of the head of our department of foreign affairs in the territory of our northern neighbor has naturally been invested with a certain amount of international interest. Mr. Root has to all appearance made the acquaintance of many of Canada's leading public men, so that in the event of future diplomatic discussion being necessary he will not be dealing with strangers, and the social occasions in which he has participated have afforded opportunities for exchanges of sentiment of a kind to be heartily welcomed, and of which it goes without saying that Mr. Root has made excellent use.

Mr. Root struck a particularly happy note in his address to the Canadian Club at Ottawa on Tuesday when he said that he spoke the sentiment of millions of his own countrymen in saying that they look upon the great material and spiritual progress of Canada with no feelings of jealousy, but with admiration, with hope and with gratification. There have been in the past, he added, and in the nature of things there will arise in the future, matters of difference between the two nations. It could not be otherwise with adjacent seacoasts, with more than three thousand miles of boundary upon which we march, and with the spirit and temper of empire builders dominating both peoples. But it should be remembered that differences of environment and differences as to the understanding of fact rather than intentional unfairness may be counted upon as being at the basis of the issues that may arise, and the great fact should not be forgotten as an earnest of the future that within a few years from now we shall be able to celebrate the anniversary of a hundred years of peaceful fellowship.

Announcement was made this week by the finance department of the city of New York that $30,000,000 of 4 per cent. bonds of that municipality would be offered for public bids on February 1. In view of the comparatively low tenders which have been secured for recent bond offerings by the municipal authorities of the largest city in the country, there is naturally more or less curiosity about the price which New York City is likely to secure for the present issue of its funded debt. It will be recalled that in the early part of last year a similar 4 per cent. bond issue by the city resulted in an average price of about 101⅜, the income return upon the securities averaging around 3.94 per cent. At that time, however, the strain upon the money market, which was pretty constantly maintained throughout 1906, had already asserted its influence, and the bids, under the circumstances, were, therefore, considered to be fairly favorable. It would be natural to expect, however, that in view of the easier tone of the general money market at present and the indisposition of the market to absorb large new issues of railroad bonds, the coming offering of New York City bonds would be placed at a higher figure than the last one.

Once again there is a change in the executive management of the Panama canal enterprise. The resignation of President Shonts to become president of the Interborough-Metropolitan Company has been followed promptly by the announcement that the offices of chairman and chief engineer of the Isthmian Canal Commission will be combined and that the appointment will be given to Mr. Stevens, the present chief engineer. Mr. Shonts, in retiring, declares that his duty at Panama ended when the work was so organized that nothing remained to be done except the execution of a contract with responsible contractors for the construction of the canal. It may be of interest to note that down to the first of the present month the government spent about $32,000,000 in what may be called preliminary work. Of this amount about $4,500,000 was expended for government and sanitation, $7,000,000 in the construction of quarters and other buildings, wharves, docks, sewers, etc., about $12,000,000 in permanent plant, over $4,500,000 for miscellaneous material and supplies, and about $1,500,000 in improvements at Panama and Colon, the cost of which will be ultimately refunded to the government. From the correspondence between them it would seem that Mr. Shonts leaves his Panama work with the good wishes of the President.

The Interstate Commerce Commission sent to Congress yesterday its first report on its investigation of discriminations and monopolies under the joint resolution of March 7 last. The report, which deals with bituminous coal carriers east of the Ohio river, reaches the conclusion that the ownership of or interest in coal properties or coal traffic by carriers or their officers or employees has brought about discrimination, injustice and inequalities in the service to independent operators, and has prevented many persons who desired to engage in mining coal from doing so. The commission recommends that carriers be required to make public their system of car distribution, showing how the equipment for coal service is divided between the several divisions, and how in times when the supply of equipment does not equal the demand the same is divided among the mining operations; that a fair, just and equitable rating of mines be required, and that provision be made for the representation of owners of mines at the rating thereof, and that, after a reasonable time, carriers engaged in interstate commerce be prohibited from using "individual" or "private" cars for the handling of coal traffic. Finally, it is urged that, after a reasonable time, carriers be prohibited from owning or having any interest in any operated coal properties, except such as are exclusively for their own fuel supply, and that ownership by officers or employees of common carriers of any coal properties, or any of the stock of coal companies, along the line of road by which they are employed be forbidden.

In the apparent absence of congressional power to enact a federal measure regulating the business of insurance, President Roosevelt urges that a model insurance law be enacted for the District of Columbia. He suggests that a bill be framed on the lines of the so-called Ames bill already introduced in the House of Representatives, but revised so as to include in it all the desirable features of the so-called uniform bill. In the opinion of the President such a measure, with proper modifications adopted after expert revision, could be enacted into a law so comprehensive and just that it would stand as a model of equity. There seems to be much to commend in this view. Such a law as that proposed would not strain the limits of federal power, and would exert such influence as it might attain by the wisdom and beneficence of its provisions as those should be disclosed by the test of operation.

Some statistics regarding the extent to which children are employed in gainful occupations are given in a recently issued census bulletin. It appears that the total number of such children between the ages of ten and fifteen years was 1,750,178 at the date of the last census. Of these 1,054,446 were employed as agricultural laborers, forming thus the largest class of all. In domestic service 138,065 found employment, while 128,617 were classified simply as laborers, all but 17,059 of these being boys. Speaking generally, the percentage of breadwinners is greater among foreign than among native children. While there are restrictions upon the employment of children in most states, there are few legal restrictions applicable to children over fourteen years of age, and by the time they reach the age of fifteen about one-half of the boys and one-fifth of the girls have become workers. The cotton mills furnish employment to children to a greater extent than any other manufacturing or mechanical industry. Of the total number of child cotton-mill operatives 80.4 per cent. were reported from two comparatively small areas. The New England states contained 30.8 per cent., and three southern states—North Carolina, South Carolina and Georgia—contained 49.6 per cent.

RAILWAY NET EARNINGS LESS SATISFACTORY.

In view of the quite general increases in the wages of railway employees and the higher cost of materials, the earnings returns, particularly those regarding net receipts, will be watched with a greater degree of interest than in the recent past. Now, while expansion is still the order of things so far as railway revenues are concerned, it is noteworthy that receipts display a tendency to somewhat more moderate increases than those that recently prevailed, say, for instance, in the period back of September, 1906. When analyzing the returns, however, one should not forget that current comparisons are made with a time of great industrial and commercial activity, when, in fact, the railways were persistently engaged in piling up large gains and large traffic receipts. With these conditions in view it is not surprising to find that the ratio of increase in gross earnings for November amounted to but 7.2 per cent. and that the net earnings advanced only 3.2 per cent., which latter percentage of gain is smaller than that reported during any month of 1906. It is to be remembered, however, that operating conditions in November, 1905, were practically ideal, that business was remarkably brisk, and that the railways were permitted to carry over a large proportion of the gross receipts to the net. Thus gross earnings in the month mentioned advanced 10.2 per cent., while the net returns increased 12.5 per cent. So it will be observed that the ratios of change are only moderate by contrast, and to say that increases continue to be reported is simply another way of making clear the fact that earnings are still of large proportions. What changes will be displayed in coming reports, those for December and thenceforth, only the future can tell, but in any event forthcoming returns will be more closely scanned, as it was not until December 1 that many of the increases in employees' wages became effective.

Results as regards gross receipts, net revenue and operating expenses in November, 1906 and 1905, the latest month for which we have conclusive reports, are set forth in the following:

	1906	1905	*Inc. p. ct.*
Gross receipts	$135,537,161	$126,372,507	7.2
Operating expenses	88,835,256	81,124,044	9.5
Net earnings	46,701,905	45,248,463	3.2

Thus it will be seen that gross earnings in November last aggregated $135,537,161, the gain being $9,164,654 over November, 1905, when the increase, as compared with the figures for the like month in 1904, was 10 per cent. In 1904 the St. Louis World's Fair tended to heavily expand passenger traffic, and therefore gross earnings. Operating expenses show a rather moderate advance—9.5 per cent. Net earnings aggregated $46,701,905, a gain of $1,453,442, or 3.2 per cent., over November, 1905.

Dividing the gross earnings returns into groups, we get the following results for the various sections of the country:

	1906	1905	*Inc.*
Northwestern	$8,753,771	$8,060,987	8.5
Central-western	10,680,351	10,432,304	2.4
Trunk lines	30,972,692	29,425,910	5.2
Eastern	2,901,651	2,635,048	10.0
Coal roads	10,858,388	10,732,527	1.1
Southern	23,467,304	22,011,437	6.5
Southwestern	23,766,521	21,580,875	10.1
Pacific	24,136,303	21,493,419	12.2
Total	135,537,161	126,372,507	7.2

Every group shows a gain over November, 1905, the three heaviest being those of 12.2 per cent. reported by the Pacific roads, the 10.1 per cent. by the southwestern lines and the 10 per cent. returned by the eastern roads. Next in importance are the gains of 8.5 per cent., 6.5 per cent. and 5.2 per cent. contributed by the northwestern, southern and trunk lines respectively. The gains reported by the central-western roads and the hard-coal carriers are really of small proportions, being only 2.4 per cent. for the first named and 1.1 per cent. for the latter.

The showing as regards net earnings for November, 1906 and 1905, is as follows:

	1906	1905	*Inc.*
Northwestern	$2,998,996	$2,994,520	.1
Central-western	3,093,621	3,468,713	*10.8
Trunk lines	9,817,956	9,509,419	3.2
Eastern	895,558	931,162	*3.8
Coal roads	4,240,408	4,377,335	*3.1
Southern	6,451,375	7,117,655	*9.3
Southwestern	8,848,572	8,026,399	10.2
Pacific	10,355,419	8,823,260	17.3
Total	46,701,905	45,248,463	3.2

* Decrease.

Four groups report decreases, the central-western, the southern, the eastern and the anthracite coal, the losses being 10.8 per cent., 9.3 per cent., 3.8 per cent. and 3.1 per cent. respectively. Another group, the northwestern, barely remains within the increase column, the increment reported being only one-tenth of 1 per cent. But, then, the traffic congestion up in the northwest has been more marked than in any other section of the country. The leading increases are contributed by the Pacific roads, 17.3 per cent.; by the southwestern lines, 10.2 per cent., and by the trunk lines, 3.2 per cent.

Despite the tendency to smaller increases since September, it is noteworthy that the showing for the eleven months of 1906 is a remarkable one—the best on record, in fact. Thus for the period mentioned the gain in gross receipts averages 12.4 per cent., while the advance on net earnings amounts to 18.6 per cent. This table shows the trend of affairs since January, 1906, and down to the last report, that for November:

	Per cent. inc. Gross	Net
January	20.3	44.0
February	26.8	70.9
March	12.0	14.0
April	5.2	4.3
May	9.3	11.8
June	11.0	13.0
July	13.1	17.1
August	12.5	11.9
September	8.0	5.0
October	11.3	9.7
November	7.2	3.2
Average	12.4	18.6

Many roads show very large increases in gross receipts as contrasted with November, 1905, the statistical story in this respect being set forth in the subjoined:

Southern Pacific	$1,606,019
Pennsylvania system	1,137,200
Atchison, Topeka & Santa Fe	774,167
Union Pacific	537,061
Rock Island	517,755
Canadian Pacific	493,040
Louisville & Nashville	467,082
Missouri, Kansas & Texas	367,136
Baltimore & Ohio	334,581
Grand Trunk of Canada	314,376
Missouri Pacific	294,194
St. Louis & San Francisco	284,634
Norfolk & Western	264,336
Erie	225,015
Canada Northern	174,900
Wabash	158,120
Atlantic Coast Line	143,605
Southern	126,605
St. Louis & Southwestern	124,949
Central of New Jersey	115,785
Philadelphia, Baltimore & Washington	112,400
Denver & Rio Grande	110,984
Seaboard Air Line	105,534
Total	8,789,478

The only important decrease is that of $131,546 reported by the Lehigh Valley.

Heavy increases in net earnings for November, 1906, as contrasted with the figures for the like month in 1905, are put out in the following table:

Southern Pacific	$1,219,714
Union Pacific	405,615
Missouri, Kansas & Texas	295,283
Pennsylvania system	211,700
Baltimore & Ohio	203,718
Rock Island	181,621
St. Louis & San Francisco	131,199
Atchison, Topeka & Santa Fe	124,906
Kansas City Southern	106,515
Missouri Pacific	98,795
Erie	98,571
Louisville & Nashville	71,625
St. Louis Southwestern	62,716
Philadelphia, Baltimore & Washington	50,900
Total	3,262,878

The more important decreases in net are given in the annexed:

Illinois Central	$271,555
Southern	251,780
Minneapolis, St. Paul & Sault Ste. Marie	173,460
Atlantic Coast Line	169,665
Pittsburgh, Cincinnati, Chicago & St. Louis	136,210
Wabash	107,652
Canadian Pacific	98,188
Lehigh Valley	89,221
Seaboard Air Line	86,561
Reading	83,317
Central of Georgia	70,090
West Jersey & Seashore	69,300
Mobile & Ohio	51,266
Total	1,658,265

From all of the foregoing one may readily conjecture that the pace set in 1906 was a very rapid one, and therefore many are asking the question whether the corresponding returns during 1907 will measure up to the high marks set in 1906.

THE PRESIDENT'S SUBSIDY MESSAGE.

It was announced last week that a message in favor of ship-subsidy legislation might be looked for from the President, who has seemingly fallen into the habit of writing special messages to an extent never indulged in by former occupants of the presidential chair. About the wisdom and the efficacy of the habit there may be more than one opinion; for the moment the subject-matter of the latest message is of more importance. In it the President directs the attention of Congress to the great desirability of enacting legislation to help American shipping and American trade by encouraging the building and running of lines of large and swift steamships to South America and the Orient.

Mr. Roosevelt points out that the great continent to the south of us, which should be knit to us by the closest commercial ties, is hardly in direct commercial communication with us at all, its commercial relations being almost exclusively with Europe. Between all the principal South American ports and Europe lines of swift and commodious steamships subsidized by their home governments ply regularly, and there are no such lines of steamships between those ports and the United States. In consequence, the President says, our shipping to South American ports is almost a negligible quantity, so that in the year ending June 30, 1905, more than 3,000 steamships and sailing vessels from Europe entered the port of Rio de Janeiro; no steamships and only seven sailing vessels entered from the United States, and of the latter, two were in distress. The prime reason for this state of things, Mr. Roosevelt says, is that those who now do business on the sea do business not in a world of natural competition but of subsidized competition.

In the view of our Chief Executive, state aid to steamship lines is as much a part of the commercial system of to-day as state employment of consuls to promote business. Our commercial competitors in Europe pay in the aggregate, he says, $25,000,000 a year to their steamship lines, and under the proposed legislation the United States will pay relatively less than any of its competitors pays. It is suggested further that American ships do not have to contend merely against the subsidization of their foreign competitors, but that the higher wages and the greater cost of maintenance of American officers and crews make it almost impossible for our people who do business on the ocean to compete on equal terms with foreign ships unless they are protected as their fellow countrymen who do business on land are protected. It must be confessed that the question raised by the President here is not by any means new. Whether the settlement of it is to be made upon the lines that he has laid down in his message is, however, a matter that lies still in the future.

THE INTERSTATE COMMERCE HEARINGS.

More than ordinary attention is being paid to the testimony brought out at the different hearings which are being conducted by members of the Interstate Commerce Commission in connection with the investigations which that body is making into the finances and inter-relations of the Pacific railroad systems and the rates charged by those corporations for transporting freight both to the Pacific slope and Rocky mountain points. It must be considered that the investigations have not gone far enough as yet to justify any decided conclusions as to what they will ultimately bring out or the effect thereof either upon the future rulings of the commission or additional legislation by Congress. It would seem, however, that the representatives of commercial interests in the Pacific northwest are very earnest in their efforts to make the investigation of practical value and are vigorously combating the contentions of Mr. James J. Hill, of the Great Northern, and other railroad men, in regard to both the causes by which traffic is delayed and the schedules of rates which are adhered to by all the transcontinental lines. At the same time some very interesting allegations have already been elicited, not the least important of which are the declarations by operating officials of the various lines that owing to the unprecedented growth of traffic the Pacific railroads have practically reached the limit of their capacity with their present facilities. Such, for instance, was the declaration by one of the higher officials of the Northern Pacific, that the only remedy for the congestion of freight business which exists at the western end of that system would be to double-track its entire Pacific division, the expense of such a procedure being estimated at $75,000,000. Statements of this character, of course, might tend to maintain the feeling in financial circles that, heavy as have been the borrowings by railroad corporations, and their accompanying emissions of new securities, there are bound to be still more striking exhibitions of the same tendency, provided, of course, the money markets are able to supply the additional capital with sufficient rapidity and to withstand the strain which the putting forth of so many new bonds and stocks entails.

In this connection not a little talk is heard regarding the influence upon the

minds of investors of the investigations into the corporate managements of certain of the larger railroads and the revelations that are being made as to the financial and other deals which the magnates of the railroad world have engineered during the past few years. It is understood that the next move on the part of the Interstate Commerce Commission will be to take the testimony of Mr. Harriman and others who have been the principal actors in such performances, and the additional information which it is expected will be obtained from these sources is naturally awaited with a great deal of interest not only by Wall street but by the general public as well. It is to be remarked, however, that a more hopeful feeling seems to prevail as to the effects of the investigations, both in respect to clearing up differences between railroad corporations and their shippers and in the influences which will be brought to bear upon the financial management of such corporations.

OVER 12,000,000 BALES OF COTTON GINNED TO JANUARY 16.

The most important contribution to the literature of the cotton trade for some time past was made this week in the shape of the ginning report, giving the quantity of the 1906 growth of cotton ginned to January 16, 1907. This proved to be 12,167,887 bales, a gain of 2,169,776 bales over the preceding year, and a decrease of only 600,813 bales from the record crop of 1904-05. The following table gives the respective quantities of the 1904, 1905 and 1906 growths of cotton ginned to the date mentioned:

	Ginned to January 16,		
	1907	1906	1905
Alabama	1,215,672	1,202,627	1,413,834
Arkansas	764,520	535,422	825,019
Florida	60,428	74,270	81,855
Georgia	1,602,713	1,695,336	1,898,397
Indian Territory	364,215	303,297	447,929
Kansas	....	18	....
Kentucky	1,424	1,218	1,882
Louisiana	887,737	483,820	982,598
Mississippi	1,363,895	1,095,402	1,576,533
Missouri	40,051	36,978	44,203
North Carolina	588,315	638,049	704,801
Oklahoma	380,605	288,171	313,810
South Carolina	887,192	1,093,482	1,144,514
Tennessee	252,501	248,171	297,443
Texas	3,744,988	2,281,550	3,019,944
Virginia	13,631	15,300	15,938
Total, United States	12,167,887	9,998,111	12,768,700
Total crop ginned	.....	10,697,013	13,697,310

The following table gives the amount ginned to January 16, compared with the estimate of the total crop as made by the government last November, with the excesses or deficiencies from the estimate, by states:

	Gov't crop estimate, bales	*Ginned to Jan. 16, bales*	*Excess over estimate*	*Decrease from estimate*
Virginia	13,000	13,631	631	....
North Carolina	537,000	588,315	51,315	....
South Carolina	875,000	887,192	12,192	....
Georgia	1,578,000	1,602,713	24,713	....
Florida	54,000	60,428	6,428	....
Alabama	1,252,000	1,215,672	....	36,328
Mississippi	1,484,000	1,363,895	....	120,105
Louisiana	930,000	887,737	....	42,263
Texas	3,944,000	3,744,988	....	199,012
Arkansas	791,000	764,520	....	26,480
Tennessee	260,000	252,501	....	7,499
Missouri	43,000	40,051	....	2,949
Oklahoma	380,000	380,605	605	....
Indian Territory	405,000	364,215	....	40,785
Total	12,546,000	*12,167,887	95,884	475,421

* Includes 1,424 bales ginned in Kentucky and Kansas.

The amounts of the preceding two seasons' growth ginned after January 16 were respectively 698,902 and 928,610 bales, so that if an amount equal to that ginned last year after this date is handled, a crop of 12,866,789 bales is indicated; while if as much as was ginned after this date two years ago comes in, a crop of 13,096,497 bales is likely. Inasmuch as the crop of the season of 1905-06 was a comparatively short one, it seems fair to allow more than came in a year ago, but not quite as much as two years ago. An average of the two years' ginning after January 16 would be 813,756 bales, which, added to this year's quantity already ginned, would indicate a crop of 12,981,643 bales. This figure is one quite generally accepted in the light of present knowledge. This would be about 435,000 bales larger than the estimate of crop made by the government, which, as will be seen from the figures of ginning compared with estimated crop above given, has already been surpassed in six states and nearly equaled in six more. These calculations, of course, are based upon the final figures of government ginning for the past three seasons. An interesting exhibit in this connection may be had by comparing the quantity reported ginned (including linters) in the past three years with the final commercial crop figures made up at the end of the season, which follows:

	Crop, ginned	*Commercial crop*	*Ginning compared with com'l crop*	
1903-04	10,015,721	10,011,374	Excess,	4,347
1904-05	13,697,310	13,565,885	Excess,	131,425
1905-06	10,697,013	11,345,988	Deficit,	648,975
Total	34,410,044	34,923,247	Net deficit,	513,203

If an underestimation of the quantity ginned is shown this year, it is not impossible that the commercial crop of 1906-07 will run well up to 13,000,000 bales; but with the poor quality of much of this season's crop, and good trade, the chances are that a yield of this size will not prove burdensome, though the chances favor an increase in the quantity carried over to next season as compared with that held at the beginning of the 1906-07 season.

SHORT-TERM NOTE CREATIONS.

One of the principal financial developments of the past week was the news, which the Wall street market received on last Tuesday, that the Southern Railway Company had negotiated a loan in the shape of $15,000,000 of three-year 5 per cent. notes. The additional information in regard to the matter was that the notes had been placed at about 97 per cent., and that, counting the commission paid to the bankers who negotiated the transaction, the company was paying about 6½ per cent. for the loan. In fact, the current market quotations for the notes have been such that they would seemingly net investors in the issue about the figure in question by way of interest return.

This arrangement has naturally been the subject of a good deal of comment. In fact, the securities of the Southern Railway Company were the objects of an effective bear raid last week and suffered a rather severe decline in consequence, the movement being based upon reports of further large borrowings by the company, and on surmises that large additions to its funded obligations would compel the management to reduce or even suspend the present dividends of 5 per cent. per annum which are now paid on the $60,000,000 of preferred stock. It is to be observed that the New York banking interest which is most conspicuously identified with the Southern Railway Company was quoted as having emphatically denied that any such step had been considered, it being furthermore claimed that the earnings of the company for the current fiscal year, though not making as good a showing in respect to net revenues as in the preceding twelve months, are, nevertheless, entirely adequate for the maintenance of the regular 5 per cent. dividends on the preferred. That the Southern Railway system requires the outlay of a large amount of new capital, in order to enable it to bring its system into shape to take care of its constantly increasing volume of business, admits of no doubt. Indeed, the decline in the market price of the company's stocks was started by the publication of a statement by its new president, Mr. Finley, in which he called attention to the necessity of such outlays, despite the fact that last spring $20,000,000 of the new development and general mortgage bonds were issued and sold for like purposes, the tone of his utterances creating a decided impression that a new emission of securities would soon be forthcoming.

In arranging for a large amount of fresh capital for improvements and equipment, the Southern Railway Company is only following the example of a number of other companies. Moreover, it is pretty generally known that additional negotiations of the same general character have been set on foot, and that in view of the narrow and unsatisfactory bond market and the marked disfavor with which fresh issues of stock are received, even when offered for subscription by the old stockholders on very advantageous terms, the tendency is to resort to short-term notes such as the Southern Railway has just placed. This movement, in fact, duplicates the one of a couple of years ago, when a number of leading railways throughout the country adopted the same expedient in order to obtain needed supplies of new capital. The extent to which such short-term notes are being emitted is shown in the following partial record of such transactions since January 1. The companies and the amounts of notes they have sold, with the interest rate thereon and the time the obligations run, are as follows:

	Rate, per cent.	*Time, years*	*Amount*
Chicago & Alton	5	5	$6,000,000
New York, New Haven & Hartford	5	4	23,000,000
Boston & Maine	5	1	3,000,000
Southern Railway	5	3	15,000,000
American Telephone & Telegraph	5	3	25,000,000
Total	..	..	72,000,000

Wall street, however, believes, and is perfectly correct in that respect, that these incidents are merely a beginning, and that there will be a great mass of new securities put out by railroads and similar corporations, a large proportion of which may take the form of short-term notes.

AN UNNECESSARY INCIDENT.

One of the features of the Kingston earthquake affair which it will take time to explain, and more than that to eradicate from the memory of those who have had knowledge of the circumstances, is the peculiar action of Governor Swettenham, of Jamaica. A mission of aid and mercy on the part of the United States navy, as represented by Rear-Admiral Davis, was cut short by a communication to the latter from the governor. In this letter the governor of Jamaica requested the withdrawal of the American warships and their crews, who had worked in a pure spirit of self-sacrifice and good will to do good to their fellowmen oppressed in a particular locality by a shocking calamity.

It is gratifying to note that the action of the governor of Jamaica finds little support in circles more representative of the state of British public opinion than he happens to be. An official dispatch from Sir Edward Grey, the principal Secretary of State for Foreign Affairs, declares that his majesty's government are causing official inquiries to be made as to the authenticity of a letter purporting to be written by the governor of Jamaica to Admiral Davis, commanding the United States squadron in Jamaican waters, and deeply regretting, if the published text should prove correct, that a British official should have addressed such a letter to the gallant Admiral, who had rendered valuable assistance to British subjects at a time of great suffering and distress, and that he is very certain that his feeling of regret is shared by everyone in Great Britain.

The pros and cons of the Jamaican situation will be considered carefully by those most competent to pass upon them, and upon their deliberations it may not be proper for us to intrude. Incidents of this kind would seem to be, to say the least, unnecessary, and they sometimes create an amount of friction which it takes no little time to overcome. Happily the relations of the two great nations mainly interested have been, and are, too conspicuously friendly for the circumstance to create more than a passing ripple, except among those most closely involved. It is worth noting that the action of the American officials has been characterized by strict self-restraint. At the same time, the Navy Department has thought it proper to record the fact that the action of Admiral Davis in landing, under the circumstances, is not without precedent, and that similar action has heretofore elicited expressions of gratitude from British colonial governors.

ENGLISH COTTON GOODS IN 1906.

Manchester, January 10. — Those engaged in the staple industry of Lancashire look back upon a year of prosperity in practically all branches. The year 1905 was of course a record year for large gains in both spinning and manufacturing, and although, perhaps, in 1906 the profits were hardly so large, yet machinery was fully employed at a wide margin of gain. A satisfactory feature of the year was that there was no shortage in supply, and the outlook now is favorable for large crops from most of the countries where the raw material is grown. The year opened with a rather quiet demand for both cloth and yarn. Both spinners and manufacturers were fairly well off for orders, and later demand improved, and in various sections producers added to their strength. About the middle of the year quite a scarcity occurred in certain counts of American yarn, with the result that sellers were able to obtain extreme rates. In consequence of this feature, manufacturers who use bought yarn were rather unfortunately situated, and their margin was cut into by spinners. Those makers of cloth who both spin and weave had a distinct advantage and their profits were high. The year closed with a rather uncertain tone. Owing to the large increase in production there were fears that there would be an oversupply, and it remains to be seen if consumption will keep pace with the larger output.

Foreign trade in piece goods amounted to about the same as in the previous twelve months of record shipments. The only falling off in exports of any consequence was to China, but it would appear that

buyers overbought in 1905. India took about equal to 1905. Several continental outlets increased their takings, notably Turkey. The demand for South America showed some improvement, and shipments were heavier than in the previous year. Throughout the twelve months a larger turnover in home-trade goods prevailed, and this helped to clear the increased production. Employment being healthy in most industries, the spending power of the population was greater, with the result that large wholesale houses met with much better trade.

This table, taken from the British Board of Trade returns, exhibits the increase, in yards, in Great Britain's export of cotton piece goods during the past three calendar years:

1906	6,261,295,000	1904	5,591,822,000
1905	6,196,783,900		

A feature was the increase in 1906 over 1905 in printed and dyed goods. As a matter of fact, less bleached and gray cloths were shipped in 1906. The principal cases of increased takings for the year as compared with 1905 follow (in yards):

Turkey	102,744,000	Australia	18,517,000
Argentine Rep.	33,824,000	Venezuela	18,184,000
Colombia	26,180,000	Madras	15,132,000
Egypt	24,469,000	Belgium	13,716,000

The instances of decreased shipments are:

China	152,308,000	Dutch E. Indies	20,240,000
Bengal	70,366,000	Japan	18,538,000

In 1906 shipments of yarn, in pounds, were larger than for 1905 and the year before, as will be seen from the following table:

1906	235,373,100	1904	163,901,400
1905	225,190,500		

The following are the chief instances of increased shipments for the year as compared with 1905 (in pounds):

Netherlands	2,310,000	Roumania	1,500,000
Japan	2,244,000	France	1,454,000
Germany	1,501,000		

The following chief decreases were China, 2,891,000 pounds, and Turkey, 2,012,000 pounds.

Home-trade American yarns were active and producers met with a healthy trade at prices which left a wide margin of profit. Shares in cotton-spinning companies improved in value, and hardly any concern is worse off than at the end of 1905. The remunerative business may be accounted for to some extent by the fact that new looms got to work more quickly than spindles. A feature of the demand was the run on ring descriptions. The results of ninety spinning companies show that about 17 per cent. was made on the share capital. This is much the same as the rate of gain in the year before. In addition to big dividends, several companies paid bonuses to their shareholders. Export trade in yarns kept up very well, and, as in cloth so in yarns, the shipments compare very favorably with the previous year's enormous shipments. In the Bolton section, which uses yarn made from Egyptian and sea-island cotton, producers, on the whole, had a more profitable period than in the preceding year. A healthy trade was experienced throughout, and spinners, owing to their lengthy order lists, were able to hold out for prices which left a wide margin of profit between raw cotton and the finished yarn.

The year was remarkable for the projecting of numerous new cotton-spinning companies, and the spindleage was considerably increased. More looms were also added, but it is thought that the larger production of yarn in due course will hardly be taken off by the loom extensions.

EDITORIAL NOTES

Better conditions have been apparent in the workings of all the money markets here and abroad for the past fortnight. The principal actual development in the European situation this week was the reduction of the Bank of Germany's rate from 7 to 6 per cent., though this, of course, was a natural corollary to the lowering of the Bank of England's rate and the completion of the January settlements throughout the German empire. The Bank of England, it might be noted, did not make any change in its discount rate on Thursday, the figure being allowed to remain at 5 per cent. At the same time the institution's return was a satisfactory one, showing a further gain in proportion of its reserve, which is now 48.91 per cent.; and, as a consequence, the tone of the London money market is cheerful, though there is an apparently eager demand for loans, which prevents any appreciable relaxation in open market rates at the British capital, and would explain in a measure the reluctance of the Bank of England's management to mark down its discount quotation any further at this juncture. In our own financial situation the improvement both in supplies of funds and in the tendency toward a lowering of interest rates has been more pronounced. The two special features in the New York money market this week have been the increased offerings of time funds and an accompanying concession as to rates on the part of lenders, together with the reappearance of considerable buying of commercial paper, though the news that the Treasury will require the banks to repay $30,000,000 of special government deposits after February 1 exercises a somewhat modifying influence on sentiment.

Wall street, on last Wednesday, naturally exhibited some unfavorable feeling as to the decision of the Minnesota courts whereby the question of the legality of the Great Northern Railway Company's new issue of stock has to be submitted to the State Railroad Commission for approval. The court in making the decision overthrew the contentions of the railway management, and though this is in no sense liable to affect the validity of issues which the company had made in the past, apparently on its own sole authority, the matter seems likely to have far-reaching consequences. The stock market was to a certain extent reassured by the news that an appeal had been taken, and, furthermore, holds to the belief that the company's management can demonstrate the propriety and even the necessity of the present increase, the funds thereby obtained being urgently needed to supply additional facilities for the sections the road serves, while it is also argued that if the commission disallows the company's application it can place short-term notes or bonds in an amount adequate for its immediate financial requirements. Not the least important consideration in the matter, however, is the possibility of legislation in the northwestern states which will place decided obstacles in the way of new issues of shares by railroads and other corporations in that section, involving the sale of the same to the old stockholders at par, and thus giving them a valuable privilege in the form of "rights." The suggestion is heard that in Wisconsin and in Minnesota also acts may be adopted which will conform their statutes on the subject to those of Massachusetts, where, as is well known, a corporation desiring to raise new capital by means of a stock issue is obliged to sell the additional shares at public auction to the highest bidder. Such enactments, it is evident, would put an end to the rather flourishing industry in "rights," which has been responsible in a large degree for the inflation in the market values of certain leading railway shares. The danger of such legislative proceedings would, furthermore, go far to explain the rather precipitate measures which were adopted by the St. Paul Company in carrying out the recent offer of its new common stock and the subscription for the same.

The New York Cotton Exchange this week took action on the subject of the exchange's contract grades which it is asserted will go far to counteract the bad impressions which have been created at the south particularly, by recent attacks upon that organization's form of contract. By votes of 265 to 24 and of 222 to 67, the exchange on Wednesday, January 23, decided to cut off certain low grades from its contracts and also to abolish all quarter grades. The changes which are provided to take effect on contracts for delivery in January, 1908, and thereafter provide that the full grades of white cotton deliverable on contract will be fair, middling fair, good middling, middling, low middling and good ordinary, while the half grades will be strict middling fair, strict good middling, strict middling, strict low middling and strict good ordinary. Of tinged cotton the grades deliverable will be strict good middling, good middling, strict middling, middling, strict low middling and low middling. Of stained cotton only the middling and strict low middling grades will be deliverable. Section 106 has been altered to read that "in determining the grades of cotton submitted to the classification committee or to the appeal committee on classification, sand, dirt and gin cut shall be taken into account, the deduction for gin cutting to be a half grade or more according to its extent." The amendment proposing to have three revisions yearly of the classification was defeated because of the lack of a two-thirds majority, though a majority of those voting were in favor of the change, as shown by the vote of 163 in favor to 123 against the amendment. The present by-law, therefore, stands, providing for revisions on the second Wednesday in September and the third Wednesday in November.

Some rather interesting developments have occurred in the local traction situation at New York City. The announcement was unexpectedly made on last Wednesday that Mr. T. P. Shonts, chairman of the Panama Canal Commission, had resigned that important post to become president of the Interborough-Metropolitan Company, Mr. August Belmont, now the executive head of the company, taking the place of chairman of the board. Besides this there are rumors that the New York, New Haven & Hartford Railroad Company, which at present gains its entrance to the metropolis over the lines of the New York Central from Woodlawn to the Grand Central Station, is planning to acquire one of the new subway routes laid out by the Rapid Transit Commission. The Third avenue line is the one which the New Haven is endeavoring to secure, as it would give the company a route from beyond the Harlem river to the Brooklyn bridge and thus enable the company to convey its passengers, perhaps with a change of cars, from the northern limits of the city to its heart. A further rumor in regard to the matter is that in pursuance of such a scheme the New Haven management is likely to obtain control of the Manhattan Transit Company, a corporation which, it is understood, owns a franchise investing it with somewhat vague privileges that, nevertheless, might be useful in the execution of plans such as those which are outlined above. The fact that a change occurred some weeks ago in the control and management of the Manhattan Transit Company, and that the New York, New Haven & Hartford Railroad Company has just placed a considerable amount of new short-time notes and is considered likely ere long to announce an increase in its share capital, is also considered to be significant.

The thirty-first annual issue of Alfred B. Shepperson's "Cotton Facts" is, as usual, a veritable mine of statistics and other information pertaining to the cotton trade of the world, and is a handy little volume which no one in the cotton trade can afford to be without. In addition to the usual weekly, monthly and yearly statistics of movement at home and abroad, brought down to a late date, there are several special features of the present volume deserving notice. Mr. Shepperson's review of the season of 1905-06, in dealing with the many subjects of interest, calls attention to the fact that although the goods trade as a whole was prosperous in the past season, and the good judgment of the American planters in marketing slowly was rewarded by a gain of 2 cents per pound in price over the preceding season, the spindles of both Europe and the United States were not run to their fullest capacity, falling behind in this respect the year 1898-99, which was a period of very low prices. He points out, also, that while home trade in cotton goods was excellent, export trade was disappointing, owing to reduced takings by other countries than China, which alone took 70 per cent. of our exports. He makes a critical review of the Agricultural Department's system of crop reporting, and estimates that the commercial crop of the United States will be at least 12,750,000 bales. An interesting feature is a map showing the steadily onward march of the Mexican cotton boll weevil, which, starting at Brownsville, on the Rio Grande, in 1892, has now overrun Texas and is firmly intrenched in Louisiana, Arkansas and Indian Territory. An exhaustive description is also given of the pest's appearance, habits and methods of feeding, and the remedies suggested, such as early planting, burning of stubble and improved methods of cultivation. Reviews of the rapid advance of cotton manufacture in Japan and of the imports of and uses for Peruvian and Egyptian cotton are also among the other items of interest in this attractive and exceedingly useful compilation.

RECENT LEGAL DECISIONS.

[*Prepared for* BRADSTREET'S.]

Sunday Law—Note—Consideration.

The Kentucky Court of Appeals held, in the case of Hale vs. Harris, that the maker of a note could not defeat payment because the note was delivered on Sunday unless he surrendered the consideration received for it.

Ground Lease—Tenant—Building.

In the recent case of Precht, Executor, vs. Howard, the New York Court of Appeals held that a tenant under a ground lease who has erected a dwelling-house on the land has no right to remove it in the absence of a provision in the lease giving that right.

Statute of Frauds—Contract—Agency.

The Supreme Court of North Dakota held, in the case of Schmidt vs. Beiseker, that a contract by which one employed another to appear at a public sale of land and bid in and purchase land in the name of the first party, but to pay for it with his own money, which was to be refunded to him as soon as the amount was ascertained, the person making the purchase to be paid a fixed sum for his compensation, was a contract of agency, and was not within the statute of frauds.

Bankruptcy—Trustee—Locality.

The Supreme Court of the District of Columbia held, in the case of Bryan vs. Curtis, Administratrix, et al., that a trustee appointed by the United States District Court for Texas could not maintain a suit in the District of Columbia to require the Secretary of the Treasury to pay over to him moneys appropriated by Congress to pay judgments of the Court of Claims in favor of the administratrix of the estate of the deceased bankrupt, such administratrix being a resident of and deriving her authority as administratrix from the courts of Texas, of which state the bankrupt was also a resident.

Foreign Corporation—Service—Process.

The Supreme Court of Louisiana held, in the case of Curtis vs. Jordan, that when a foreign corporation conducts a regular business in a state at a permanent place of business, a service of process made at such place upon its agent, in connection with a matter growing out of such business, is good if the same service would be good as against a domestic corporation, and that an act requiring surety companies of other states and of foreign countries to appoint an agent upon whom service of process might be made, and an act authorizing service to be made upon the Secretary of State, did not provide an exclusive but an additional mode of service.

Pilots—Voluntary Association—Negligence

The Supreme Court of the United States held, in the case of Guy vs. Donald, that the members of a voluntary unincorporated pilot association, which under the state laws could neither select nor discharge its members, nor control nor direct them in the performance of their duties as licensed pilots, whether technically partners or not, were not liable to the owners of piloted vessels for the negligence of each other, because, instead of taking their fees as they earned them, such fees went into a common fund, and, after deducting expenses, were distributed to the several members according to the number of days they respectively were on the active list.

Combination—Purchase—Intent.

The Supreme Court of Illinois held, in the recent case of Dunbar et al. vs. The American Telephone & Telegraph Company et al., that a purchase by a corporation in its own name, or in the names of others as trustees or agents, of the majority of the stock in another company, for the purpose of controlling the latter and preventing competition between itself and the other company, was unlawful and would not be upheld by the courts, and that the fact that the obtaining of the control of one corporation by another for the purpose of stifling competition between the two would not result in a complete monopoly, because there were other concerns engaged in the same business, did not render the transaction lawful.

City—Ordinance—Regulating Trade.

The Supreme Court of Louisiana held, in the case of The City of Shreveport vs. Dantes, that under a charter containing the grant of power to regulate by general ordinance the use of sidewalks, streets and public ways, and to keep the same free from obstructions, an ordinance reasonable in terms may require hucksters and peddlers who sell small articles of merchandise of limited value, such as cakes and candies, in the streets and other public places, not to loiter and be in the way; that all who carry on business in the public streets can be required to carry on their business in conformity with the rules of "propriety, good neighborhood and good manners"; that an ordinance to that end relating to a class is neither discriminative nor unreasonable, and that, reasonably enforced, the ordinance is an incentive to industry and not in restraint of trade.

Insurance—Casualty—Condition.

In the case of Kennedy vs. The Fidelity & Casualty Company of New York, recently decided by the Supreme Court of Minnesota, it appeared that a condition in a casualty insurance policy provided that "no action shall lie against the company as respects any loss under this policy unless it shall be brought by the assured himself, to reimburse him for loss actually sustained and paid by him in satisfaction of a judgment, within sixty days from date of such judgment and after trial of the issue." The court held that the policy constituted a contract of indemnity and that payment and satisfaction of the judgment might be made to the assured by the execution and delivery of promissory notes, if executed in good faith and so accepted by the judgment creditor, and that thereupon a cause of action accrued in favor of the assured and against the company.

Sidewalk—Bicycle—Ordinance.

The Supreme Court of Indiana held, in the case of Millett vs. City of Princeton, that the fact that a municipal corporation adopted and treated as in force an ordinance limiting the speed at which bicycles might be ridden on the sidewalks, and prohibiting bicycle riding on the sidewalks except in a prescribed district, did not make it lawful to ride a bicycle on a stone, brick, plank or gravel sidewalk within the excepted district, nor make the city liable in damages to a pedestrian injured by a bicyclist violating the section governing such cases, and that where a city had sidewalks of brick, stone, planks and gravel, and also sidewalks constructed of other materials, and had legal power to regulate bicycle riding only on the sidewalks of such other materials, a general ordinance assuming to regulate bicycle riding on sidewalks must be construed only as referring to those over which the city had such power.

Note—Execution—Evidence.

The Supreme Court of Indiana held, in the case of Digan vs. Mandel, that when a person other than the payee thereon brings suit on a promissory note, the specific title alleged must be proved as laid. The case was one where the execution of the instrument was denied under oath by way of answer to a suit by the assignee of a person on a note originally payable to a bank and by it indorsed to that person without recourse long after it became due, and which the plaintiff alleged had been given to the person mentioned, and made payable to the bank in question by inadvertence and mistake. The court held that proof of the maker's signature and possession by the assignor three years after date and of the assignment, with a denial of title by the bank referred to, failed to show that the note was ever executed, because it failed to show or to raise any inference of delivery to the assignor as evidence of a debt due him, and because the alleged debt was not proved.

Consideration—Civil Law—Contract.

The Supreme Court of Louisiana, in which the civil law prevails, held, in the case of Murray et al. vs. Barnhart, that the civil law, differently from the common law, requires that the consideration of a contract be serious and not out of all proportion to the value of the contract; that, therefore, in a contract of more than $100 in value the traditional $1 consideration of a common-law contract is looked upon by the civil law as not being a serious consideration—that is to say, as not any consideration at all—and that the same may be said of $2 for the privilege of retiring at any time from such a contract. The court said, therefore, that in an oil and gas lease the obligation of the lessee to complete one well within one year would be held to be purely potestative, and as such to entail the nullity of the contract, where he at the same time reserves to himself the right to retire from the contract at any time on paying $2, and this notwithstanding that the consideration of the contract is stated to be $1 cash in hand paid, the receipt whereof is acknowledged.

BUSINESS NOTES.

Commerce of Port of New York.

The statement of foreign commerce at the port of New York during the year ending December 31, 1906, compared with 1905, is as follows:

	1905	1906
MERCHANDISE.		
Imports entered for consumption, free	$304,166,380	$333,372,998
Imports entered for consumption, dutiable	316,450,213	359,517,281
Imports entered for warehouse	94,316,622	96,503,756
Withdrawals from warehouse for consumption	78,062,373	91,024,389
Exports, domestic	545,708,317	611,106,914
Exports, foreign, free	6,871,805	4,851,924
Exports, foreign, dutiable	7,108,581	6,536,759
GOLD AND SILVER.		
Imports of gold, foreign	16,591,758	46,034,663
Imports of gold, domestic	707,083	48,778,753
Imports of silver, foreign	5,399,290	4,496,414
Imports of silver, domestic	173,939	79,204
Exports of gold, foreign	4,798,674	1,203,210
Exports of gold, domestic	34,376,176	5,650,956
Exports of silver, foreign	2,320,413	5,423,886
Exports of silver, domestic	36,426,771	42,070,829
DUTIES		
Collected on direct importations	134,607,428	154,596,147
Collected on withdrawals from warehouse	49,074,425	54,970,761

The Glass Industry.

There are 400 different establishments engaged in the manufacture of glass in the United States. These turned out in 1905 products valued at $79,607,998, or approximately $200,000 each on the average. The census report (Bulletin 62) dealing with this subject shows the course of growth during a period of fifty years beginning with 1850. In this time the average number of wage earners has increased from 5,668 to 63,969, and total wages have grown from somewhat more than $2,000,000 per annum to $37,288,148. In comparing the six different decades it appears that the latest ones have been slower of growth. The most significant growth in capital occurred from 1880 to 1890, when the amount invested was more than doubled, showing an increase of 17.9 per cent. The period for the greatest increase in the number of establishments occurred between 1860 and 1870, when 79.5 per cent. measured the gains. Since 1870 there has been an addition of 50 per cent. to the number of establishments, but an increase of more than six times the amount of capital invested. In other words, there has been growth in the size of the individual establishments along with the increase in the amount of capital. From the standpoint of the wage earner the decade between 1880 and 1890 was one of the greatest prosperity. In that period wages increased 128.4 per cent., against 37.7 per cent. from 1890 to 1905. In fact, the two latest decades have been periods of comparatively slow increase.

Trade in Manchuria.

Consul Straight, of Mukden, reports that under the influence of the present progressive administration there should be a great increase in production and purchasing power in southern Manchuria, American merchants and manufacturers should enter the field at once and place their goods on the market before their competitors have become too firmly established. Personal representation is all-important, particularly at the present time, not only that goods may be placed on the market under the most favorable circumstances, but that by constant vigilance valuable interests may be protected. Firms with offices at the points of importation, foreign representatives traveling in the interior, and native agents at Tiehling, Mukden, Liaoyang, Kuangchengtzu and Hsinmintun would be better able to watch the demand and cater thereto than the merchants who are content to make their sales from Shanghai and remain in comparative ignorance of the local conditions governing the trade they are endeavoring to secure. Labor-saving devices would be welcomed in Manchuria as nowhere else in China, for the population is scant as compared with other portions of the empire. The Liao valley is one of the richest agricultural areas in the world, and the broad plains stretching from Newchwang to the north are capable, with improved methods, of greatly increased production. Rye, barley and sorghum millet yield large annual crops, and it is proposed to introduce alfalfa, sugar beets, cotton and various cereals. Several of the highest provincial authorities have suggested that it would be mutually beneficial if manufacturers of agricultural machinery should send their representatives with a number of implements to tour the country, demonstrating their use at frequent exhibitions. Such an enterprise would meet with the approval of the viceroy, and could doubtless be undertaken under the auspices of the provincial administration. In the other treaty ports of China there are old-established firms with regular connections, and at such places it is not always easy for the newcomer to build up a paying business. Manchuria, however, is practically virgin territory. There are opportunities for trade as well as for investment. If direct shipments were to be made to Dalny or Newchwang, there would be a saving in time and transshipping charges. Agricultural development should be followed by industrial activity, and those merchants who avail themselves of the desire of wealthy Chinese to associate themselves with foreigners and study local conditions should be well rewarded. Mr. Straight says he has recently received information, apparently trustworthy, that there are large deposits of gold, silver, soda and coal, with a plentiful supply of timber, in the area between the headwaters of the Liao and the Taluho, a branch of the Amur, about 200 miles from the terminus of the China Eastern Railroad at Hsinmintun.

Rand Gold Output.

This table gives the actual value of gold produced in the Transvaal during the years mentioned:

	1906	1905	1904	1903
January	£1,820,739	£1,568,508	£1,226,846	£846,489
February	1,731,664	1,545,371	1,229,726	834,739
March	1,884,815	1,698,340	1,309,329	923,739
April	1,855,785	1,695,550	1,299,576	967,936
May	1,959,062	1,768,734	1,335,826	994,505
June	2,021,813	1,751,412	1,309,231	1,012,322
July	2,089,004	1,781,944	1,307,621	1,068,917
August	2,162,583	1,820,496	1,326,468	1,155,039
September	2,145,575	1,769,124	1,326,506	1,173,211
October	2,296,371	1,765,047	1,383,767	1,208,669
November	2,265,625	1,804,253	1,427,947	1,188,571
December	2,336,961	1,833,295	1,538,800	1,215,111
Addendum	....	....	33,766	....
Total	24,579,997	20,802,074	16,054,809	12,589,248

In 1901 the output amounted to only 1,014,687 ounces, and in 1902 it reached 7,253,665 ounces. It will be seen that all previous records were eclipsed by the heavy output of 1906, and the tendency, as revealed by the monthly figures, is toward further marked expansion.

Waste of By-Products.

In the new and rapidly developing country of British Columbia, Consul L. E. Dudley, of Vancouver, finds in commercial enterprises a degree of wastefulness that appalls one who has been accustomed to the economical methods of older communities. This leads him to write that but little attempt is made to utilize by-products in any of the enterprises in the province. Mr. Dudley calls attention to a few of the opportunities that exist for making fortunes from materials that are at best thrown away, more often disposed of at considerable cost of labor and expense. Thus there are in the province from 1,200 to 1,500 coke ovens and the number is constantly increasing, yet there is no attempt made to utilize the coal tar, which is available in large quantities. Persons familiar with the numerous valuable articles of commerce which coal tar yields can but wonder that some chemist with capital does not seize upon the opportunity presented. There are now many smelters at work night and day in several portions of British Columbia. Most of the ores smelted contain sulphur, which must be disposed of before the ores can be successfully treated. The ores are roasted, and the sulphur is vaporized and allowed to pollute the atmosphere, and often to kill the vegetation in the vicinity. Yet there is a great demand for sulphur and sulphuric acid. At the sawmills there is much waste. At most mills a large fire burns from year's end to year's end consuming the waste. Of course as much of this waste is sold to the people in the vicinity of the mills for firewood as they will buy, at very reasonable figures. Some time ago Mr. Dudley visited, at Bellingham, Wash., a large plant which was distilling tar, pitch and turpentine from the Douglas fir. It would seem that a similar plant near each of the sawmills might result in the utilization of some part of the waste that is now disposed of by fire. In the salmon fishing the heads, tails, fins and offal are mostly wasted. Some attempts have been made upon a small scale to utilize some of this by-product by saving the oil and turning the residue into fertilizer, but Consul Dudley has seen no attempt to make fish glue nor other valuable products. It is not alone in the salmon fishing that waste occurs, but in the halibut, herring and other fisheries as well. In taking halibut, many dogfish, as well as other varieties, are caught. But there is no market for them, and overboard they go.

CURRENT BUSINESS NEWS.

Commercial.

Within the next thirty days several cargoes of coal will be received on Puget Sound to relieve the fuel shortage now existing at Tacoma and Seattle. According to advices received Friday, the steamer Lyria sailed from Moji Monday with 1,000 tons of coal. The steamship Quito is to bring 5,000 tons, and the steamship Pleiades is due February 1, with 1,000 tons of coal. Never before in the history of Tacoma has coal had to be imported from the Orient.

Germany's exports to the United States in 1906 increased nearly $27,000,000, rising to $152,832,454, against $126,133,198 during the year 1905, or 21 per cent. The increase over 1904 was $41,000,000, or 37 per cent. The increase, it is said, will enable the Imperial Secretary of State for the Interior to ask the Reichstag to accept moderate concessions from the United States in return for benefits to be derived from Germany's reciprocal treaties. Most of the lines of exports show proportionate increases, particularly chemicals, textiles, dress trimmings, laces, hides, glove leather, chromos and metal ware. The Berlin district alone shows increases in exports from $2,887,000 to $14,152,068.

The returns of Japanese foreign trade for the first ten months of 1906, just issued by the consulate-general of Japan in London, show that the total commerce amounted to $337,718,553, as compared with $329,048,856 in the corresponding period of 1905, an increase of about 3 per cent. The exports advanced from $123,461,644 to $164,022,949, and the imports fell from $205,587,725 to $173,695,604. The chief declines in the imports are $13,305,011 in raw cotton, $9,193,524 in rice, and $5,152,650 in leather. On the other hand, sugar increased $5,048,506. Practically all the export groups exhibit an advance. Silk goods have gone up $15,152,904, cottons $1,906,694, lacquered, porcelain and earthen ware $1,407,877, and coal $677,416. Another notable increase is $3,805,115 in copper shipments.

Foreign crop conditions as published Tuesday in Broomhall's Liverpool *Corn Trade News* follow: United Kingdom—Outlook satisfactory. France—Weather is unseasonably mild, but outlook is satisfactory. Germany—Weather is mild, but outlook is good. Hungary—An official report for the week ending the 15th said the weather is seasonable and outlook for crops good, except where damaged by mice. Roumania—An official report for the week ending the 15th said the crop outlook is very favorable. There is good snow covering. Russia—There is a splendid snow cover, except in the southern coast belt. Arrivals at ports are small. The government is still actively buying grain for the famine districts, mostly rye. Italy, Denmark, Spain, India and Australia—Outlook is favorable. Portugal—There was some damage at the time of seeding owing to drought, and importation of wheat is expected. The corn crop is about exhausted, and imports are necessary. Argentina—It is generally believed that there will be a reduction in duty on corn, and negotiations have already commenced to form a commercial treaty with the United States. Russia—A cable just received from Odessa reports a severe storm, with much snow and increased freezing. Loading is greatly delayed.

An increase in prices of all grades of fine writing paper, amounting approximately to 10 per cent., will soon be made, according to an announcement made public by one of the largest writing paper manufacturing companies in the country. Other firms are expected to follow.

A southern contemporary, in writing of improved methods of farming in Mississippi, declares that a few years ago cotton farmers quit work as soon as the crop was picked and did nothing until about March 1, but luckily these old customs have changed. No plowing for the next crop was done until spring opened and the birds were singing, but such is not so now. Farmers break their land in the winter, turning all weeds and trash under, thereby getting advantage of an extra amount of fertilizer and making the land much easier to work. Improved farming implements have been introduced, the old-time single stocks having been discarded.

Broomhall is rather bullish on wheat. On January 8 he said: "With stocks in consuming markets in a moderate compass and prices on a distinctly lower level than was the case at the opening of last year, buyers must reckon upon sellers holding with more confidence. Prospective requirements abroad during the period ending April 30, 1907, are 19,200,000 quarters, or, if the consumption be reckoned as low as 1,100,000 quarters per week, the total would be 18,700,000 quarters, compared with a prospective supply of 16,500,000 quarters, involving a draught upon the European stocks in merchants' and millers' hands of 2,200,000 quarters." Broomhall predicts a steady decline in the reserves of merchants and millers during the spring months, and as these are already in moderate compass in the United Kingdom and quite small on the continent—Germany, Belgium and Holland holding only 4,910,000 bushels, compared with 8,510,000 bushels last January, and France, in all, only 2,100,000 bushels—the effect of the draught this season should be more marked than has been the case in some former years.

It is officially announced that the port of Zeebrugge, Belgium, will be opened to commerce on July 1 with appropriate fêtes. Zeebrugge is the harbor of the new Bruges-Heyst canal, which will be available for sea-going ships of the largest size, and which cost about $8,000,000.

Famine conditions in China are growing worse, according to the dispatch received at the State Department from Mr. Rodgers, the American Consul-General at Shanghai. Among other things needed for the relief of the sufferers is seed wheat for planting.

The Hamburg-American Steam Packet Company and the Hamburg-South American Steamship Company have decided to establish a service between New York and Brazil. It was announced from Berlin recently that the Kosmos Steamship Company, which was established under the auspices of the North German Lloyd and Roland Companies of Bremen in the latter part of 1905, would begin a service between Bremen and the westerly coast of South America on January 26.

On Thursday Broomhall cabled that corn crop prospects in Argentina showed further deterioration. The strike in that country, too, is becoming general and serious apprehension is expressed.

The export of grain has been prohibited by the authorities of the province of Kiang-si, China, in consequence of the rice and other crops being largely failures, furnishing only one-third to one-half the average yields.

Financial.

It is evident that the trust companies of New York state have complied with the new law, for there is an increase in the specie holdings of $23,127,593, an increase of $7,600,000 in legal tenders and an increase of $20,809,895 in the item "due from banks and bankers," the comparison being based on the figures as of January 1, 1907, and January 1, 1906. The leading items compare with January a year ago as follows:

	Increase
Bonds and mortgages held	*$3,281,740
Stock and bond investments	527,203
Loans on collateral	341,384
Other loans	8,813,123
Due from banks and bankers	20,809,895
Specie	23,137,593
Capital stock	1,050,000
Due banks and bankers	4,015,227
Surplus fund	14,830,278
Deposits subject to check	18,293,637
Certificates of deposit	*5,600,086
Due trust companies	6,890,092

*Decrease.

The new capital issues in Germany during 1906 did not reach the level of 1905. As compiled by the *Frankfurter Zeitung*, they amounted to £140,654,000, as against £155,324,000 in 1905 and £90,690,000 in 1904. The decrease last year was wholly in interest-bearing paper, issues of which amounted to £92,839,000, as compared with £119,973,000 in 1905. The large figures for 1905 were mainly due to the Russian and Japanese loans of that year. On the other hand, stock issues aggregated £47,815,000, as against £35,351,000 in 1905. The following table exhibits the issues in detail for three years (three figures being omitted):

	1906	1905	1904
Home government loans	£33,448	£22,734	£14,143
Foreign government loans	8,180	33,819	4,352
Municipal and provincial loans	21,489	20,912	10,838
Mortgage bank obligations	16,856	25,932	24,436
Miscellaneous obligations	12,864	16,505	9,962
Bank stocks	14,498	10,172	10,072
Railway stocks	2,123	553	3,445
Industrial stocks	31,214	24,626	13,280

The turnover at the German clearing houses in 1906 amounted to £2,101,700,000, as compared with £1,800,000,000 in 1905 and £1,631,000,000 in 1904.

The report of the Pennsylvania State Banking Department shows that the total deposits in banks, savings institutions and trust companies of Pennsylvania as of November 26 last amounted to $666,143,525, an increase of $24,425,809 over the corresponding figures of the previous year. The surplus of all the institutions aggregated $125,026,339, an increase of $8,794,460, and the undivided profits totaled $32,308,451, an increase of $3,568,592. The total resources of the 1,808 banks, trust companies and building and loan associations of the state aggregate $1,810,760,000, of which $1,115,146,779 is represented by the 640 national banks.

The Imperial Bank of Germany on Tuesday reduced its discount rate from 7 to 6 per cent. President Koch says the bank will probably be in a position to make a further reduction in February. The rate had been raised to 7 per cent. on December 18, the president added, for several reasons: First, to prevent the withdrawal of gold for America; second, to check excessive speculation in commercial and industrial undertakings, and, finally, to limit the demands of the Imperial Treasury on the Imperial Bank Seven per cent. was only once before fixed in the history of the present institution, December 19, 1899. The 6 per cent. rate was announced on October 10, and was an advance over the 5 per cent. rate fixed September 18, which in turn succeeded the 4½ per cent. rate fixed May 23. Before then the rate was 5 per cent. In this week one and two years ago the bank's rate was reduced 1 per cent. The bank's official discount rate at this time for a series of years has been as follows:

	Per cent.		*Per cent.*
1907	6	1900	5
1906	5	1899	5
1905	4	1898	4
1904	4	1897	4
1903	4	1896	4
1902	4	1895	3
1901	5	1894	4

A Boston Stock-Exchange seat was sold Saturday last for $38,500. This is the highest price yet paid for a seat on that exchange.

The aggregate mortgage tax receipts for six months under the recording tax law, from July 1 to January 1, were $2,333,817. The amount collected during the corresponding period of 1905 and 1906 under the previous mortgage tax law was $514,459. The following are counties making the largest collections: New York, $1,309,474; Kings, $512,530; Queens, $109,889; Westchester, $76,130; Erie, $43,985; Nassau, $36,107; Richmond, $26,358; Monroe, $21,094; Onondaga, $20,523; Albany, $11,054; Schenectady, $10,543; Oneida, $8,134.

Directors of the Metropolitan West Side Elevated Railway Company, of Chicago, have declared a quarterly dividend of three-quarters of 1 per cent. on the preferred stock The last dividend paid by the company on its preferred stock was on February 28, 1903, when 1½ per cent. was disbursed for the half year.

The Butte (Mont.) Stock Exchange opened for business on Monday.

Brown Brothers and the Guaranty Trust Company have purchased $4,500,000 4 per cent. ten-year car trust certificates of the Atlantic Coast Line Railroad Company.

The stock of the Granby Consolidated Mining, Smelting & Power Company, Limited, was ordered listed on the New York Stock Exchange Wednesday. The amount of stock accepted is $10,308,100, which has recently been changed from $10 certificates to $100 certificates. A balance of $3,191,900 outstanding in $10 certificates will be admitted as soon as transferred.

It was considered significant that one of the leading curb industrials, Mackay Companies, was also taken off the curb on the same day. Many other of the prominent curb stocks, it is said, will soon be dealt in on the Stock Exchange.

The eighty-six trust companies of New York State show a decrease in total resources during the period from November 14 to January 1 of about $10,000,000, as shown by their reports of condition filed with the State Banking Department.

In the listing of the stock of the Mackay Companies in the New York Stock Exchange, Wednesday, there was brought out the interesting information that the company is the largest stockholder in the American Telephone and Telegraph Company. This is the Bell holding company. In addition it was shown that the Mackay Companies has stock holdings in a large number of important subsidiary Bell companies.

This table, taken from the *Journal of Commerce*, gives a summary of February's disbursements, with comparisons with the same month a year ago:

	1907	1906	*Increase*
Industrials	$19,943,321	$17,508,935	$2,434,386
Railroads	17,831,644	17,095,572	736,072
Street railways	1,668,578	1,506,307	162,271
Total	39,443,543	36,110,814	3,332,729

On account of the necessity for immediate funds to be devoted to the relief of the Russian famine sufferers, it is understood that a new internal loan of $25,000,000 will be issued before the Russian Parliament assembles, probably in February. It will not be opened to public subscription, but will be absorbed by the state savings banks, the free balances of which are now said to be $35,000,000. The issuance of the remainder of the contemplated $70,000,000 internal loan to meet the budget deficit will be deferred until the amount of the revenues of 1907, on which the actual extent of the deficit depends, are more exactly ascertained.

Railroads.

The initial experiment with the Erie's new electrical line from Rochester to Avon, a distance of nineteen miles, was made on Tuesday and proved successful. But one car was operated, and the trip was made without mishap of any kind. The Erie Company is now making arrangements for the extension of the electric service to Corning, a total distance of ninety-four miles, and the Avon-Mount Morris extension is expected to be completed within the next sixty days.

Ninety new engines, seventy-five for freight and fifteen for passenger service, have been ordered by the Burlington for 1907 delivery.

Theodore P. Shonts will retire on March 4 as chairman of the Isthmian Canal Commission and become president of the Interborough-Metropolitan Company. John F. Stevens, the chief engineer of the canal, will take over the duties of Mr. Shonts when the latter leaves the government service.

Some of the things to be expected from the McAdoo tunnels under the Hudson river were set forth Wednesday by their builders, the Manhattan & Hudson Railroad Company. They include the running of trains through the upper tunnels from Jersey City as far as Ninth street, possibly Fourteenth, Manhattan, by September 1, the use of all metal, side entrance, partially strap hangerless cars, and the fact that the tubes when completed will be employed by the Pennsylvania, Erie, Lackawanna, and possibly the Jersey Central railroads, for the transfer of their travelers.

The Tehuantepec National Railroad has been inaugurated by President Diaz, of Mexico. The construction of the railroad was undertaken with the active aid of the Mexican government with a view of bringing into Mexican territory a share of the transcontinental traffic between the Atlantic and Pacific. Its importance as a competitor of the transcontinental lines in the United States is recognized by American railroad men. The railroad connects the Gulf of Mexico with the Pacific port of Salina Cruz.

Industrial.

An increase of wages affecting 10,000 employees and adding $400,000 to the company's yearly payroll has been adopted by the Interborough Rapid Transit Company, to go into effect February 1. Since the strike of 1905 there have been several increases in the wages of the lower classes of labor, but this is the first time so comprehensive a change has been made, all the important classes being included except the motormen. The latter are already receiving what the company considers liberal compensation, $3.50 a day for between eight and a half and nine and a half hours' work. The changes are entirely in rate, the number of hours of works remaining the same.

Miscellaneous.

The London *Chronicle* announces the discovery of a process for extracting nitric acid from the atmosphere in such a way as to make it available for commercial, industrial and agricultural purposes. It is asserted that the new process has supereminent advantages over all other processes aiming at the same result. It is the outcome of original researches by Sir William Crookes, supplemented by experiments by Professor von Krowalski and electrician Moscicki, of Fribourg University.

According to a London (Eng.) dispatch, an interesting decision, holding a newspaper responsible for wrongly advising a reader who asked for financial advice, was given by Lord Chief Justice Alverstone, Thursday. The defendant, a publication, invited its readers to apply to the city editor for financial guidance. The plaintiff accepted the invitation and was sent to an outside stockbroker, to whom he intrusted $7,000 for investment. The money was never invested, and the lord chief justice, in his decision, ordered the repayment of the full amount to the plaintiff.

STATE OF TRADE.

[A Summary of Special Telegrams to BRADSTREET'S.]

While weather conditions are still a bar to widespread activity in trade and industry, evidences of improvement in spring demand and enlarging shipments are a feature of the week. Additionally favorable items are an expansion in the grain markets, long stagnant, based apparently on better export inquiry; rather more cheerful advices from south Atlantic states heretofore reporting trade and collections backward; a decided easing of time money rates, with a resumption of demand for commercial paper, and good reports from the winter-wheat crop, which looks well in the Ohio valley and promises excellently in Texas. Current weekly returns of gross railway earnings, partial as they are, show gains over the extremely good reports of last January, but net earnings are being whittled down by increased cost of operation, following moderate gross receipts of preceding months. Large jobbers in dry goods at the east report better trade; jewelry men, who have had good collections on winter sales, report buyers pushing for spring goods and some factories running overtime, and paper mills are crowded with orders. Colder weather south has helped retail trade, and that section, aside from a few localities, has done well this year, having had a next-to-record cotton crop selling at good prices. Retail clearance sales have been a feature at many northern markets, but bad roads, following long-continued rains, have affected country trade and may cause some carrying over of winter goods. In the northwest heavy snows have checked wheat movement, and coal trains still have the right of way in that section, the result being beneficial to western coal trade, but checking sales and collections, particularly in the Dakotas. In the Ohio valley rains and floods have retarded demand and transportation and caused heavy damage, but the failure of the expected freeze to follow the floods is a good point for winter wheat. Collections are irregular and will continue so till roads become passable again. These conditions, aside from the immensely heavy rains, are, however, normal for a winter period. In the southwest trade is good and the outlook for spring is excellent. Some Texas banks are loaning large sums of money in New York. On the Pacific coast more favorable weather has helped building operations, but in the rest of the country there is rather less activity foreshadowed in building than a year ago. Stock markets are stagnant; something like a congestion of new railroad securities is threatened, but the bond market tends to improve, while that for stocks is dull and weak.

Buying of pig iron, particularly malleable Bessemer and basic, for delivery in the last half of the year continues to be of goodly proportions, the chief factors in the movement being the Chicago and Pittsburgh districts. In the New York market spot pig iron and supplies for nearby deliveries appear to be easier, and reports indicate that the small quantity of business offered was taken at concessions. At the same time more spot iron is available in the Birmingham district. While business is good, consumers who happen to be partly covered are more disposed to await developments before making long commitments, and in the central west some furnace interests seem inclined to offer slight inducements to buyers to cover for the entire second half of the year. Cold weather has caused the banking of some furnaces, while floods in the Ohio valley have interfered with operations of foundries in the Cincinnati district. Sales of steel rails are somewhat larger, the new business placed within the week being in excess of 75,000 tons, and in the west a few small lots of standard sections brought as high as $30 the ton. Light rails are also in good demand. In all finished lines specifications are of goodly volume. Railway interests are liberal buyers of structural material for bridge work, and the general outlook for this branch is deemed encouraging. Galvanized sheets are up 10 cents the 100 pounds, and blue annealed sheets are to be advanced 5 cents. Tinplate for third-quarter delivery is in good demand, a premium of 10 cents the box being paid. Pipe is active, and some good-sized contracts for the larger sizes for gas and oil lines are looked for. In the west the supply of crude steel is short, but in the Pittsburgh district matters in this respect have improved. Old material continues weak. Coal and coke are in good demand. New business in copper is lighter, as consumers are covered for some time ahead. Quotations for future supplies range from about 24½ to 25¼ cents per pound, the latter figure being for lake. Prompt deliveries, however, would command higher prices. Lead and spelter continue scarce.

Strength of demand for actual cotton is still the dominating feature, and the market is 10 points higher on the week, despite heavy movement and a government ginning report showing 12,167,000 bales ginned to January 16, a gain of 2,169,776 bales over last season, and only 600,183 bales less than the quantity ginned in the record crop season of 1904-05. Trade opinion now inclines to a crop of 13,000,000 bales, against the government estimate of 12,546,000 bales. In six states the government estimate has already been surpassed by the ginning returns, and in six more the ginning is almost equal to the estimate. The demand for spinable cotton is good, however, and with good trade the crop of 13,000,000 bales may not be burdensome, though visible supplies at the close of the season may show an increase over the year before. There is also a tendency to increase estimates of mill consumption, especially in Europe, where leading authorities have added 200,000 bales to the season's estimate.

The markets for textiles are still very strong as a whole. Business with jobbers in cottons, dress fabrics, linens and silks is of full volume at leading eastern markets, and higher prices for prints, ginghams, cotton blankets and other lines are apparently no bar to sales. Demand for prints is reported in excess of the supply. Cotton yarns are strong. Some men's-wear worsteds for fall have opened well at slightly lower prices, but this hardly applies to all goods, which are expected to realize as high quotations as a year ago in view of the strength of clothing wools. Carpets have been advanced. Woolen clothing fabrics do not sell quite as freely as worsteds.

Reports from the shoe and leather trade reflect irregularities due to varying weather conditions. Wet weather has helped western footwear distribution, rubber goods sharing in the benefit. Eastern shoe men report that orders for spring filed in the past two weeks have been below expectation. Shoe shipments are 10 per cent. behind 1906. Sole leather prices are being insisted upon; there is some tendency toward checking sales.

Grain markets display more life than for five months past, and prices of wheat are up 2 cents. Weather conditions have been responsible, checking receipts and offerings from the northwest, but export trade has been better, due partly, perhaps, to reports of intensely cold weather in Europe, and behind all this, despite realizing late in the week, which shaded the gains made earlier, there is a feeling that the grain speculation is going to broaden and lift the market out of the rut it has long been in. Corn has been stronger, in sympathy with wheat, also being helped by the reports of damage to condition by rainy weather west and also by light receipts. Oats have also been helped. Wheat flour has followed wheat and is held higher, but is dull, because buyers and sellers are apart. BRADSTREET'S report of exports shows a heavier movement of wheat (the grain) from the Atlantic coast, but not a bushel has gone from the Pacific coast this week, though flour has moved well from Puget sound ports. In provisions, cotton-seed oil has advanced 2 cents. Coffee is firmer for futures, but unchanged for spots. Raw sugar from Cuba has sold freely at the low basis noted last week and quotations have been shaded slightly, and the feeling is that as Europe has not come down, a steadier market is possible soon. Refined sugar has sold better than of late, owing to stocks being reduced.

Floods have done much damage in the Ohio valley from Pittsburgh south, but the greatest damage has been the delay caused in shipping and the shutdowns forced upon manufacturing concerns by high water. Cincinnati reports a vast amount of cleaning up necessary, while Louisville reports that one-seventh of the city was under water at the time (January 23) when the river began to fall, making it the most serious flood since 1884. Evansville and cities south thereof all report damage great in adjoining districts, and very high water is looked for in the lower Mississippi valley. High water, however, now will be less damaging than if it appeared in planting time.

Paper manufacturers and dealers are active with orders ahead. Writing paper has been advanced 10 per cent. Some large manufacturers of news paper are heavily oversold at below present prices, which are 2¼ cents for roll and 2½ cents for sheets. Paper stock shows some improvement. Twine is strong in price and heavily sold ahead.

Stock quotations at New York, after showing much irregularity all week, developed a weaker tone on the decision of the Treasury to recall $30,000,000 of special government deposits from the banks in the near future. Governmental interference with and investigation of railroad matters, and the likelihood of further large emissions of stocks, bonds and notes to provide money for improvements, also affect sentiment, tending to make railroad stocks less popular and to divert attention to industrials. Bonds are a little more active on the easier condition of the money market. Foreign exchange has been strong and is steady at a slight reaction, demand sterling being 4.85.65.

Bank clearings for the week ending with January 24 aggregate $3,371,236,546, 2 per cent. under last week and 5.4 per cent. below the same week last year. Excluding New York City, the total is $1,144,812,910, 8.1 per cent. less than last week, but 7.7 per cent. over last year.

Business failures for the week ending January 24 number 252, against 234 last week, 276 in the like week of 1906, 228 in 1905, 242 in 1904 and 230 in 1903.

Wheat, including flour, exports from the United States and Canada for the week ending January 24 aggregated 3,328,255 bushels, against 2,636,460 bushels last week, 3,433,585 bushels this week last year, 1,101,587 bushels in 1905 and 3,639,679 bushels in 1902. For the past thirty weeks of the fiscal year the exports are 107,961,329 bushels, against 80,675,239 bushels in 1905-06, 39,116,785 bushels in 1904-05 and 162,907,363 bushels in 1901-02. Corn exports for the week are 2,064,883 bushels, against 1,906,873 bushels last week, 5,633,265 bushels a year ago and 3,035,733 bushels in 1905. For the fiscal year to date the exports are 31,072,031 bushels, against 60,138,686 bushels in 1905-06 and 27,741,142 bushels in 1904-05.

IN CANADA.

More than ordinary activity is shown in Canadian trade. Shipping on spring orders is active, and at the same time reorders for winter goods are noted. A great shortage of mill labor and of men for railroad building is reported. Northwestern Canada reports a good winter trade, the only drawback being slow deliveries of goods, caused by railroad blockades. Montreal reports all manufacturing industry active, with stocks of cottons light and higher prices probable. Groceries are active and canned goods advancing. Fancy spring goods are active at Toronto, neckwear and shirts being heavily ordered. Seasonable weather helps country trade in Ontario and the western provinces. Stocks of goods in the northwest are very short. Industry is very active in British Columbia, and population and the mining industry show great growth. Failures for the week number 18, as against 23 last week and 33 in this week a year ago. Clearings for the week aggregate $73,951,706, a decrease of 7.5 per cent. from last week, but a gain of 1 per cent. over this week a year ago.

TRADE REPORTS.

Dry goods in New York are fairly active and reorders are numerous. The advance in prints has not restricted buying, and demand almost exceeds the supply, some qualities of goods being scarce. Woolen fabrics for fall and winter wear are freely ordered, and large orders have been placed for medium-priced goods. There is little inquiry for raw silk from manufacturers, who are believed to have sufficient stock on hand to keep them going for some time to come. Spring orders are being placed for wholesale notions, but just now actual business is small. Rag and shoddy mills are buying only to meet immediate demands. Wholesale grocers report quiet trade, but retail business is up to the average and prices of canned goods are firm. Confectionery is very active. Butter is more inquired for and recovered the drop in price of last week. Receipts of fresh eggs are increasing, but demand is good and prices are unchanged. Wholesale flour continues quiet, the wheat market making millers unwilling to offer concessions, and jobbers do not care to buy at present figures except for actual needs. Receipts of live stock and dressed meats are liberal, but shippers are still hampered by car shortage. In the drug and chemical trades the changes made necessary by the recent act are being smoothly effected, and there is no disturbance or curtailment of business in consequence. Manufacturers of jewelry report an active business, but retail trade is more or less quiet. The brass and copper trades are unsettled owing to the high price of the raw material. Stock-taking in the hardware and cutlery trades somewhat interferes with business. Copper has further advanced, and other metals are strong and active. Orders for months to come are booked for pig iron, and scrap material is in very fair demand. Demand for automobiles is steadily increasing, and to meet it new factories are being built. The rapid development of this industry has caused such an enormous consumption of aluminium that the supply is inadequate to the demand. Wholesale paper continues in good request and collections are satisfactory. Real estate is inactive, but there is a slight increase in the number of plans filed for new buildings. General conditions in the hide and leather trade are good and business is active. In the boot and shoe trades, rubbers and heavy goods are in better request.

The following telegrams show trade conditions at the cities mentioned for the week ending January 25:

BOSTON. — Business in dry goods is active, retailers and cutters-up showing an earnest disposition to cover their requirements in advance. Cotton goods of all grades are in large demand. Mills are sold far ahead. Ginghams and fine fabrics are scarce and backward in deliveries. Some lines of ginghams and percales have been advanced. Demand for prints has been heavy in anticipation of an advance in prices. Some lines of flannelettes have opened at 7 cents, compared with 6¾ cents a year ago, and cotton blankets are quoted 5 to 7½ per cent. over last year. Men's-wear worsteds for the coming fall and winter opened in some lines at lower quotations than last year, but the opinion is expressed that for the same quality of goods lower prices are not likely to be fixed. Demand for woolens has not materialized to the extent expected, worsteds still being most generally wanted. Cheviot or unfinished worsteds and mercerized worsted fabrics are being inquired for.

Dealers in sole leather are making sales at nearly the full current quotations; this means an actual increase in cost to buyers of one-half to 1 cent per pound. Leather dealers report an improvement in sales. Hides are easier and buying is more free. Western jobbing houses have not placed as many supplementary orders as was hoped. Many frankly state that they are well stocked on nearly all lines and sizes. Sample orders have been placed freely. Jobbers in paper report a good volume of business for January. Writing paper is up about 10 per cent. The mills are said to be full of orders, with transportation delays continuing to interfere more or less with deliveries of stock. No complaints are heard in regard to the supply of water. Trade in paper stock has been moderately active. Some good-sized orders have been placed by paper manufacturers, but in general, orders have been for moderate quantities. Trade in furniture, carpets and upholstery is quiet at present, but prospects are favorable for an active spring business; collections are fair. Lumber is quiet. In the iron and steel lines prices are firm, but buying is moderate. Copper still continues to advance on active demand. Linseed oil is up, but business in paints is quiet. Wholesale liquor dealers report a fair demand for all grades; collections are rather slow. Leaf tobacco continues firm and there is a demand for all goods that are reasonable. Manufacturers of confectionery have had a successful business during the past year. Several new factories have been opened, and no large failures are reported.

PROVIDENCE.—Collections in the jewelry trade compare very favorably with previous years at this season. Orders for the coming season are plentiful and show a healthy tone in trade, and some houses are again working overtime. Machinery and tool trades continue in a favorable condition. Anthracite coal has advanced from $6 to $7.25 per ton on good demand, owing to cold weather. Lumber, iron and steel are active.

PORTLAND, ME.—Wholesale dry and fancy goods are a little quiet. Other lines report an average business. Collections are about fair.

PHILADELPHIA.—Wool is fairly active, with prices strong. Demand for cotton yarns continues and textile mills are busy. Dry-goods jobbers report trade fair but collections poor. Flour is firm but dull, buyers claiming that prices are too high, but millers are not disposed to make concessions at present price for wheat. Chemicals and dyestuffs continue fairly active and the market rules firm. Drugs are very active and prices firm. Paints and glass are unchanged, the volume of business being moderate, but there is a good inquiry for future delivery. Prices show no material change. Lumbermen say they are quite busy and report having closed large contracts for spring delivery. There is still a good demand for current needs, and the market rules strong. While there is a plentiful supply of hides and skins, qualities are not first-class, which causes a slight decline in prices. Goatskins continue scarce, with prices stiff and demand good. The price of raw kid skins is still high, and the finished product is advancing with less activity. Leather continues active, with supply short, prices high and a brisk demand. Wholesale shoe dealers report brisk business so far this year; retailers are fairly busy. Tobacco trade has not fully opened up. Salesmen are out and secure some business, but the volume is not large. Cigar factories are securing new orders; many are still behind on old ones, and are expected to be in the market for tobacco before many days. High prices continue and there appears to be no prospect of reductions, as stocks of all kinds are scarce. Collections are slow. Liquor sales by distillers have shaded off for the week; wholesalers in most cases are still busy and look for more trade as long as the cold weather holds. Collections are not so free. The demand in all branches of the iron business continues to be an active one, the supply of pig iron especially being scarcely equal to it. Prices are high and strong. Cold weather has had the usual effect of making business brisk for domestic coals. Bituminous in general is in good condition, prices being firm. The car supply is somewhat better.

PITTSBURGH.—So far as the Pittsburgh district is concerned, the iron and steel situation is characterized by continued firmness. In the pig-iron market sales aggregating probably 5,000 tons, mostly basic and malleable iron, for last half of year delivery, were made during the week, and negotiations are on for some large transactions in the near future. In most finished lines there is a good buying movement and an increased inquiry. In the coke market prices remain firm and there has been a free movement, which has been facilitated by open weather. Pig iron at the furnaces for spot delivery is quoted as follows: Standard Bessemer, $23; chilled basic, $22; No. 2 foundry, $25, and gray forge, $21.50. Standard Connellsville furnace coke is quoted at $3.50, and foundry coke, $4 to $4.25.

BUFFALO.—Retail trade shows fair results. Jobbers report liberal orders for spring delivery, and manufacturers in nearly all lines are working to their full capacity, and in some instances, particularly in the iron line, are behind in their shipments. Collections are fair. A severe storm did much damage here this week.

BALTIMORE.—Jobbers of dry goods and notions report a satisfactory business for spring. Leaf tobacco receipts continue light, with demand strong for better grades. Collections are slow. Spring orders for millinery are fair. Some buyers are now in the city. A very active trade is expected next month. Collections are fair. The wholesale grocery trade is quiet, with collections slow. Harness makers are busy. Prices are firm, but collections are slow. Crockery and glassware are steady. Wholesale liquors show an improvement. Collections are fair. Car-service and weather conditions cause a shortage in produce. The local oyster market is quiet, but early activity makes the business for the season to date equal to that of last year. Shoe jobbers report business of fair volume, though stocks outstanding are more than normal. Prices are steady and collections fair. Manufacturing clothiers are busily engaged preparing for February and March shipments, and with receipts of late spring orders, the volume of business for the first month of 1907 about equals that of 1906. Collections are only fair. Continued cold weather has assisted retail clearance sales. Wholesale druggists report good business, with a slight improvement in collections. Demand for money is active; the supply is larger. Bond houses report a more active demand.

CINCINNATI.—Owing to the flood general business and many manufacturing plants are paralyzed. The receding waters left heavy deposits of mud which must be cleared away before traffic can be resumed. Country banks continue to send in heavy deposits and to check against them lightly. Wheat in the surrounding country never looked better.

CHICAGO.—Activity in iron and steel circles and moderate business in general jobbing and manufacturing lines are features of the week. With irregular weather, bad roads throughout the country and a scarcity of cars, it is natural to expect a quieting down in distribution to interior trade and a let-up in the buying of goods. Warm weather has interfered with consumption of heavy winter apparel throughout the west, and in the northwest there has been so much snow and cold weather that buyers have been unable to get out. Coal is being rushed to those sections, and it is put ahead of all other freight. This makes coal trade better. Pig iron is active, 50,000 tons, mostly malleable, having been sold this week for delivery in the last half of 1907, the basis being close to $24 for No. 2 malleable Bessemer. A large agricultural-implement maker took 18,000 tons. Finished iron and steel are selling freely, and specifications are readily furnished for plates, sheets and bars. New business in steel rails is also good at $30 for standard sections. Crude steel is in short supply here. Orders for structural material to the extent of 25,000 tons have been placed. Lumber of all kinds is having a large sale and is quite firmly held. Groceries are being consumed freely. Butter and poultry are higher, but eggs are lower, as are cattle and sheep. Hog prices are irregular. Receipts of cattle and hogs decreased, while those of sheep increased. Money is easier and currency is coming from the country fairly; some is also being shipped. Commercial paper is in better supply. Collections are fair.

PEORIA.—Trade in most lines is good, but country roads are in bad condition, making it difficult for farmers to get into town. Country merchants say that collections are slow, and jobbers also make the same complaint.

LOUISVILLE.—This city, as well as all other Ohio river towns, has passed through the greatest flood since 1884. The river here reached 41.4 feet in the canal and began to fall Wednesday, January 23. Nearly one-seventh, or about 2,000 acres, of the incorporated limits of the city was under water at that date. Estimates of damage done vary, but $200,000 is thought conservative. Many factories in the submerged portion of the town have been forced to close down. Business in nearly all jobbing lines is good. Dry-goods merchants report spring business good, and large shipments are being made. Hardware wholesalers report business fairly good for this time of year. Whiskey dealers and distillers report large demand at high and increasing prices. Demand for aged goods in reputable Bourbon brands is greater than the supply. Drug jobbers say business is as good if not a little better than at this time in 1906. Clothing manufacturers report a very fine spring trade. Collections, however, are only fair.

ST. LOUIS.—Manufacturers and jobbers of shoes report very satisfactory orders for immediate shipment. Advance orders for dry goods and kindred lines are somewhat in excess of last year. Continued wet weather has created bad country roads, thus retarding retail trade and making collections slower than was anticipated. There seems to be a let-up in plans for future building. Money is easier and the supply promises to be ample for handling legitimate business.

KANSAS CITY.—Shipments of spring orders in dry goods and kindred lines are in excess of a year ago. Trade in hats, caps, boots and shoes is active, and business in other lines is fully up to expectations. Country collections range from fair to good. Discount sales continue in retail circles.

MILWAUKEE.—Trade in jobbing lines shows some improvement. Retail trade is still quiet. Collections are fair.

SIOUX CITY.—The weather is more seasonable. Retail trade is quiet; wholesale trade is satisfactory. Collections are fair.

DAVENPORT.—Trade is quiet, but not especially so, considering the season. Manufacturers are busy and the unemployed are few. Collections range from fair to good.

ST. PAUL.—No branch of trade is doing a very active business at this time. Facilities for shipping spring dry-goods orders are not good, and orders for some points are being held up on account of the inaccessible condition of branch lines. Many salesmen are reported snowbound for days at a time. Collections continue backward, with practically none from either North or South Dakota or northern Minnesota. Up-to-date collections are not equal to those of last year. However, money is a little easier.

OMAHA.—General trade is about normal. The outlook is very promising, but collections are a little quiet just at present.

LINCOLN.—Retail trade is quiet. Jobbers in several lines report good orders as a result of salesmen's first trip since the holidays, and sales are fully up to those of last year. Collections are fair.

CHARLESTON.—Wholesale dealers report trade and collections somewhat improved, though extensions are still being sought. Retail trade is good.

RICHMOND.—Wholesale dealers in dry goods and notions have their travelers out with spring samples, and orders generally are liberal despite advanced prices. Collections in Virginia are as good as the usual after-holiday season, but in eastern North Carolina collections are not good in any line and requests for extensions are numerous. Jobbers of hats, caps and gloves are busy and their shipments are larger than for the same season last year. Tobacco continues active and prices are good. Retail trade is not good.

AUGUSTA.—Retail trade is quiet, but wholesale is fair. Collections are fair.

ATLANTA.—Cooler weather has stimulated retail trade. Jobbers report orders coming in more freely. Collections are better, and the general outlook for spring trade is improving.

JACKSONVILLE.—Excepting for a few days at Christmas, remarkably warm weather has prevailed throughout the winter, affecting demand for clothing and heavy goods. Otherwise trade is normal and collections are fair.

BIRMINGHAM.—Very little southern foundry No. 2 can be had for immediate delivery; sales are being made at $22 to $25. Demand is strong for future delivery at $18. Trade in general is fairly good. Collections are a little slow.

MOBILE.—Local jobbers report booking good business for future delivery, with spot shipments very few. Collections are fairly good. Exporters of lumber report prices firm, and a material increase in shipments to Central American countries, owing to the hurricane of September. Prices on naval stores are firm.

MONTGOMERY.—Wholesale trade in all lines shows some improvement over previous week. A large amount of fertilizer is being sold, but there is some delay in shipping, owing to a shortage of cars. Collections are fairly good.

CHATTANOOGA.—Trade continues to improve. Collections range from fair to good.

MEMPHIS.—Business, wholesale and retail, is fair. Collections are slow. Money is tight.

NASHVILLE.—Wholesale trade in all lines shows reasonable activity. Retail business is responding to more seasonable weather. Collections are fair to good.

LITTLE ROCK.—Unusually warm weather has injured retail trade in dry goods and clothing, but sales of hardware and agricultural implements are large. Collections are fairly good. There remains only about 50,000 bales of cotton unpicked. The grade, owing to bad weather, is very low. As yet no preparations for a new crop have been made.

NEW ORLEANS.—Retail trade is dull and jobbers are doing little except to prepare for spring business. Collections are improving slightly and money is easier.

FORT WORTH.—Unseasonable weather has caused dullness with retailers, but jobbers report activity. Collections are fair.

DALLAS.—Reports from all sections regarding the condition of wheat indicate that the acreage is greater, and a larger yield is looked for. In the fruit belt of eastern Texas fear is expressed that continued warm weather will cause the trees to bud, and a later frost would be disastrous. Trade in all lines is active and collections are fair.

WACO.—All trades report a fair volume of business. Collections are fair to slow. Prospects for the grain crop are good. Continued warm weather may catch some retailers overbought in heavy wearing apparel.

SAN FRANCISCO.—Reconstruction is hampered by the condition of the streets, and retailers are complaining of car service. Nevada mines are very active.

SEATTLE.—With warmer weather, building operations have been resumed and show considerable activity. The usual January clearance sales are much in evidence, making business lively.

SPOKANE.—Trade is active and the outlook is good. Collections continue fair.

TACOMA.—Trade continues fairly active. House building is again a pronounced feature.

PORTLAND, ORE.—Weather conditions are now normal and business in all lines is satisfactory. Building operations continue active. Collections are good.

TORONTO.—Trade here is large for this time of the year. Usually there is little doing outside of the sending out of spring shipments, but there is now a fair to good reorder trade for winter lines, which have been favored by more seasonable weather. Orders for the more fancy of spring goods have been very heavy this year. In some lines there may be difficulty in supplying the entire demand. Orders for men's neckwear and shirts have been unprecedentedly heavy. The market for all lines of cottons holds very firm. It is reported that general stocks throughout the country are light, and this being the case a good reorder business in spring goods should open up early. One of the features of general conditions is the big demand for house furnishings which has prevailed for some time. The carpet and furniture men report a particularly good business. The grocery trade is good, with canned goods still the center of attraction. In almost all lines stocks are light. The hardware trade has shown little change, metal and general quotations are firm in tone; collections are good. Sleighing is good in most parts of the province and there is a resulting good movement in retail lines; collections, too, are fair to good. Deliveries of all kinds of country produce are inclined to be light, and eggs, butter and cheese are firm. Hogs are still scarce. Wool, hides and leather are about steady, with trade inclined to be quiet.

MONTREAL.—Sorting trade has shown more life, and spring business is taking on a better tone as shipping becomes more general. There is continued great activity in all branches of manufacture, and operations are hampered by the shortage of labor which prevails in all parts of the country. This shortage is affecting railway construction, which is a great factor in present industrial operations. Textile manufacturers complain and blame these conditions for slow deliveries. Stocks of cottons and of white goods are light and prices are likely to go higher. To meet the reorder trade that should follow shipping there is a very light accumulation of goods. Hardware is fairly brisk. There is a good demand for metals. Steel and iron are very firm and expected to advance further. The grocery trade is fair for this time of the year. Evaporated apples have advanced. Canned goods hold very firm. Sugar is steady

and in fair demand. Collections are generally satisfactory.

VANCOUVER-VICTORIA.—Trade along the Pacific coast has still a quiet tone, although there is a good retail movement in all lines. Industrially the province is very busy. Lumber shipments are exceedingly heavy and prices hold firm. Collections are good. Provincial centers of population have, during the past year, shown remarkable growth. The mining industry of the province also showed great growth.

WINNIPEG.—So far this winter western Canada has been blessed with the most seasonable of weather, and there has been on this account a very good movement of all lines of winter goods. The movement would have been heavier, however, had not frequent snow blockades considerably affected transportation. The shortage of railway cars was responsible for light deliveries of wholesale stocks all through the fall, and now that snow blockades occasionally hold up the railroads, stocks in some lines are grievously short. Every day adds to the need for new railroads. General spring trade looks very promising. Collections are generally fair.

FINANCIAL.

Money Market.

Although Secretary Shaw has announced that commencing February 1 the banks will be called upon to return the $30,000,000 of special deposits made prior to January 1, it is understood that these repayments will be spread over a considerable period, perhaps until the end of March, so that any strain on the money market will be avoided. It is argued, moreover, that gains by the New York banks from the interior and the Treasury will be sufficient to make the repayment of the extra government deposits comparatively easy. During the past week there have been further transfers of funds from interior points to New York, which, with gains from the Sub-Treasury, would indicate an increase of about $5,000,000 in cash, and it is accordingly believed that to-day's bank statement, while it may not be as favorable as that of last Saturday, will be a good one. There was a further lowering of rates, the renewal figure for call money declining to under 3 per cent., though it ran up to about 4 per cent. on Friday. Time money was offered with a great deal of freedom, and lenders appeared to be much more anxious than borrowers, as is shown by the fact that in some cases short-term arrangements could be made at below 5 per cent. Considerably more business is being done in commercial paper, though the supply of prime names is not large, and there is a good deal of variation as regards the buying demand from interior cities.

New York Banks.

Last Saturday's New York Clearing-House averages were better than the money market had anticipated, the increase of $18,198,000 in the cash items considerably exceeding the estimated actual gain. In fact, it was the general conclusion that the item reflected a return to the banks of money temporarily in active circulation during the holidays. The unexpected feature of the statement was an expansion of $15,148,500 in loans, which was presumably accounted for by the transfer of stock-market borrowings from London to New York. This, with above gain in cash, caused an increase of $33,512,000 in deposits, this item agreeing remarkably well with the other changes. As a result the reserve requirements were $8,378,000 larger, but, nevertheless, the surplus reserve increased $9,820,000, for which reason the statement was construed as decidedly favorable. The figures compare as follows with those of the preceding week:

	January 19	January 12	Changes
Loans	$1,063,957,300	$1,048,808,700	I. $15,148,600
Specie	192,610,600	177,601,600	I. 15,009,000
Legal tenders	86,458,700	83,269,700	I. 3,189,000
Deposits	*1,042,434,400	1,008,922,400	I. 33,512,000
Circulation	53,631,900	53,690,900	D. 59,000
Total reserve	279,069,300	260,871,300	I. 18,198,000
Reserve required	260,608,600	252,230,600	I. 8,378,000
Surplus reserve	18,460,700	8,640,700	I. 9,820,000

The following compares the statements for the respective weeks in 1907, 1906 and 1905:

	Jan. 19, 1907	Jan. 20, 1906	Jan. 21, 1905
Loans	$1,063,957,300	$1,025,595,500	$1,098,811,500
Specie	192,610,600	189,968,300	224,029,800
Legal tenders	86,458,700	84,138,600	90,657,800
Deposits	*1,042,434,400	1,029,369,300	1,163,815,200

Foreign Exchange.

The further easing of the New York money market has naturally affected the exchange market. There was a decidedly good buying demand for remittances early in the week, and while posted quotations remained unchanged, the actual rates for bankers' demand sterling showed considerable strength, rising to 4.86 on last Monday. The market, however, reacted from this advance and showed more or less irregularity in the succeeding days, though it finally became steady at a concession from the early rise. The supply of commercial bills has been only moderate. The action of the exchange market was, to a certain extent, affected by the fact that, in spite of the favorable Bank of England return, the open money market at that city exhibits a decided demand for remittances.

POSTED RATES OF LEADING DRAWERS FOR LONG AND DEMAND STERLING.

Jan. 19	Jan. 21	Jan. 22	Jan. 23	Jan. 24	Jan. 25
4.82½ @ 4.86½	4.82½ @ 4.86½	4.82½ @ 4.86½	4.82½ @ 4.86½	4.82½ @ 4.86½	4.82½ @ 4.86½

ACTUAL BUSINESS BANKERS' DEMAND STERLING.

4.85.90 @ 4.86.00	4.85.75 @ 4.86.00	4.85.70 @ 4.85 85	4.85.60 @ 4.85.75	4.85.70 @ 4.85.80	4.85.60 @ 4.85.75

ACTUAL BUSINESS BANKERS' SIXTY-DAY STERLING.

4.81½ @ 4.81¾	4.81.50 @ 4.82.00	4.81.50 @ 4.81.90	4.81.25 @ 4.81.50	4.81.40 @ 4.81.50	4.81.50 @ 4.81.55

Closing quotations on Friday for actual business in other classes of bills were: Cables, 4.86.25; commercial bills, 4.80¼ @ 4.81¾; francs, 5.22½ @ 5.19¾ less 1-16; reichsmarks, 93⅞ @ 94¾.

The Bank of England's discount rate remains unchanged at 5 per cent. The institution this week gained £1,438,701 in specie. Its proportion of reserve to liability increased from 45.30 per cent to 48.91 per cent., and the return reflected a further reduction of £1,985,000 in the borrowings of the market from the bank. In the London open market call money is firm at 4½ @ 5 per cent. and discount is quoted at 4¾ @ 4⅞ per cent. The Bank of France this week reported a gain of 2,650,000 francs in gold. Its rate remains at 3 per cent., and the Paris market for discounts is also 3 per cent. At Berlin the bank rate was reduced from 7 per cent. to 6 per cent., while the market for discount is 4¾ per cent.

New York Securities Market.

There has been a great deal of irregularity in stock prices this week. At the outset they developed a good deal of strength, recovering in most cases the declines which had occurred in the preceding week. By Tuesday, however, they again became dull and manifested a good deal of variability, moderate strength and equally moderate weakness succeeding each other with rapidity, while the trading was almost entirely professional. On Friday there was a further exhibition of weakness, the selling, though it was mainly for short account, being accompanied by a certain amount of renewed liquidation, which was accounted for on the theory that the action of the Secretary of the Treasury to make the banks repay $30,000,000 or so of special government deposits, beginning on February 1, had taken a step likely to militate against any continued easing of the money market. It might be remarked that the early strength had been based largely upon the exceedingly good bank statement of last Saturday and the promise it afforded of a further lowering of the rates of interest for time and call loans. These expectations were, indeed, realized, and it might be noted that the midweek dullness was contemporaneous with the lowest quotations for call money which had been seen in months and with a disposition on the part of lenders on time to modify their terms as to rates. In banking quarters, however, there is apparently no general desire to see the money market become decidedly easy. It is urged that while the financial situation abroad has improved, there is still a great demand for money at London, and that center might readily draw gold from this side if the New York market rates fell to a still lower level. In this view of the case, the action of the Secretary of the Treasury, referred to above, might have in reality a favorable effect in averting any gold outflow. It is also urged that during the next two months the New York banks in all probability will receive a considerable addition to their cash from the interior and the Treasury, and that the repayments of the deposits will be spread over six weeks or so, rendering the operation comparatively easy and unlikely to produce any real disturbance in the loan market.

Leading subjects of stock-market discussion continue to be the investigations of and revelations concerning railroad management and rates, and the necessity which so many companies rest under of providing for improvements on a large scale through the issue of new securities in enormous volume. An instance of the first sort of influence was a decision in Minnesota denying the right of the Great Northern Railway to make its proposed stock issue without authority from the State Railroad Commission. It was noted, however, that this, though at first it weakened the Hill stocks, did not have a permanent effect, Great Northern being supported and the decision appealed from, so that the stock rallied in fair shape. As regards new emissions of securities, the principal incident was the placing of $15,000,000 of 5 per cent. notes by the Southern Railway, though there were many rumors of similar transactions by various companies, among which Erie was prominently named, this having an adverse effect on its shares. The so-called Harriman stocks were inactive, awaiting the further investigation of the transcontinental companies by the Interstate Commerce Commission, while Reading, of the old-time favorites, was the most active, one of the features in it being the sale of a large block, supposed to be liquidation, by a tired speculative holder, the stock being presumably taken by

prominent banking interests. Canadian Pacific was also unsteady on unexplained selling. Amalgamated Copper was decidedly strong and nearly recovered its 2 per cent. dividend on Thursday. The traction stocks were also prominent, the Interborough issues showing weakness at first, but holding somewhat better after announcement of the change in the presidency, referred to elsewhere.

Boston Stock Market.

Statistical Situation of Cotton.

The aggregate world's visible supply of American and other cotton last week, as made up by the New Orleans Cotton Exchange, is shown, with comparisons:

Week ending	*Jan. 18, 1907*	*Jan. 11, 1907*	*Jan. 19, 1906*
American	4,243,706	4,268,127	4,042,431
Other kinds	1,136,000	1,106,000	1,383,000
Total	5,379,706	5,374,127	5,425,431

Of the world's visible supply, as above, there were afloat for or held in various countries on the dates given the following quantities:

	Jan. 18, 1907	*Jan. 11, 1907*	*Jan. 19, 1906*
Great Britain and continent	2,816,000	2,659,000	2,833,000
Egypt	245,000	252,000	200,000
India	475,000	453,000	737,000
United States	1,944,000	2,000,000	1,655,000
Total	5,480,000	5,374,000	5,425,000

Following will be found the movement of cotton into sight for the week and season, as compiled by the New York Cotton Exchange:

	This week	*Last week*	*Last year*
Week	395,192	447,841	196,488
Season	9,570,820	9,175,628	7,838,921

Grain on Passage.

To	Wheat and flour	Corn, bush
United Kingdom	15,920,000	5,440,000
Continent	10,240,000	8,457,000
Total week ending January 17	26,160,000	13,897,000
Preceding week	27,280,000	15,853,000
Corresponding week 1906	28,160,000	16,745,000

New York's Foreign Trade.

IMPORTS.

	1907	1906
Dry goods	$3,572,499	$3,271,067
General merchandise	13,577,891	8,287,914
Total week ending January 19	17,150,390	11,558,981

Since January 1	37,770,064	51,135,136

Boston Shoe and Leather Market.

Sales of sole leather have been checked by an advance of ½@1 cent per pound on nearly all grades in the actual selling price. Quotations were increased some time ago, but cost to buyers had not been advanced to the full extent. The leather trade as a whole is reporting an increase in business as compared with the previous four or five weeks. Hides are weaker and buying has shown an improvement. Ohio buffs are quoted at 13 cents. The representatives of western houses are beginning to return home after having inspected the designs and prices of local sales offices. So far the amount of supplementary orders received is said to be disappointing. Shipments continue to fall behind those of the same period last year. The *Shoe and Leather Reporter's* figures this week are as follows: Last week, 89,421 cases; preceding week, 93,520; last year, 100,319; total for 1907, 274,886; total for 1906, 307,760; decrease, 32,874.

Boston Wool Market.

The market is at present rather quiet, though no more so than might reasonably be expected when the small stocks of desirable domestic wools are considered. Staple three-eighths and half blood wools are in good demand and would sell freely if they were available, but stocks are so well sold up that there is little doing. Clothing wools are moving moderately at about the same prices as have ruled for several weeks, 22@23 cents for fine and fine medium Montana and Idaho. The market is generally very firm. There are further reports of contracting, principally in Utah and Idaho, the wool clip in northern Utah having sold at 33 cents to a mill interest. Utah contracts are being generally made on a basis of 21@22 cents and Idaho at 17@18 cents, but there is less interest than in former years at this time. Among the sales of the week have been fall Texas wools at 22@23 cents, some eight months' Texas at 23 cents, and small lots of twelve months' Texas at 72@73 cents, scoured. Some new fall California wools are arriving and will cost 57@58 cents, scoured, here, but nothing has yet been done in the way of sales. There is considerable interest in the samples of new Australian wools which are now arriving, and some of the direct shipments via London and via Vancouver and San Francisco are already in Boston, with other shipments due next week. Some sales have been made of 64s to 70s at 43½@44 cents, but the larger part of the arrivals are on order direct to the mills. There is a very good inquiry for fine merino Australian, but none is available. New Montevideo wools are quoted at about 42@43 cents for No. 1 and No. 2, and 40@41 cents for No. 3. The London sales have held up very firmly for desirable grades, and it is estimated that the cost here of wool bought in London will be from 3 to 7 cents above what the same grades of wool will cost direct, yet it is reported that very large purchases have been made in London for this country, some estimating at least 15,000 bales. All grades in London are being held at full prices, and indications are that the closing on wools suitable for this country will be higher than the opening.

Trade Openings Abroad.

Consul Louis Goldschmidt, of Nantes, advises that American carriage manufacturers could probably do an excellent business in that part of France. He writes: "Considering the prices of carriages made here, one may without exaggeration say that these sell for about double the price of similar vehicles built and sold in the United States. An ordinary two-wheeled cart of good construction sells from $80 to $100, and better ones with fine workmanship and finish sell at $200 and $300. All work about these is hand labor, and consequently expensive. They are durable and safe, but lack the comfort of some modern American vehicles. There should be a good market all over France for American-made speedometers, odometers, clocks and annunciators for automobiles and other vehicles. The best way to introduce such goods is through a special representative, who should visit the different manufacturers and dealers in vehicles and establish agencies for the sale of these articles. The Nantes consulate would be glad to receive any catalogues printed in French for filing and distribution to interested parties. In regard to recording meters, it is well to remember that the only measurement in France is kilometers, or 0.62137 of a mile."

Consul Alfred A. Winslow reports that there will be a large demand for builders' hardware, cement, lumber, structural iron or steel, etc., in Valparaiso, Chile, for the next two or three years, and believes it will pay the American producer to study the field.

In response to inquiries from the United States as to trade possibilities in Brazil for iron fencing, Consul-General G. E. Anderson says there is undoubtedly a good field for American business. Already considerable fence is imported, it being largely used. The custom continues of having great iron and stone walls around the homes, the entrance being through heavy iron gates. The trade in iron fencing is considerable and is worth attention in the United States, both in the way of supplying ornamental and strong fences ready for immediate erection and in the way of supplying iron bars and bands necessary for the local manufacture of such fences.

BUSINESS DEPRESSION AND CYCLICAL LAW.

A writer declares in a recent number of the *Coal Trade Journal* that "among the older men in the iron and kindred industries of the 'good old, rare old days,' belief in the 'law' of trade cycles was as firm and undoubted as was belief in their religious faith. Viewed from the aspect of economic laws and the operation of natural and other forces, much of what the old-time believers in the theory asserted can be explained. But why, one naturally asks, do we seem to have years of fatness and plenty and then of famine and distress in trade matters? One thing is certain: A study of the calendar of trade for the last century discloses a more or less regular recurrence of years when prices were upward, crops were bountiful and the people prosperous, followed by a period when conditions were the reverse. There are, however, factors to be taken into account that have an undoubtable bearing on the topic and consideration of which will modify any theory, however specious or seemingly inexorably operative in natural law.

"During periods of extraordinary demand and of profitable prices for commodities, whether of field or factory, there is a stimulus to multiplication of productive capacity. This goes on until capacity to produce more than equals demand. Then prices fall, wages decline in sympathy, with a corresponding declension of consuming power, because everybody feels the necessity of economizing. Then, by war, cataclysm, or from some other cause, there is a quickening of demand. Factories start at full capacity; wages rise; consuming power per capita increases; enterprise is encouraged; speculation appeals to the imaginative.

"The whole people becomes more or less saturated with enthusiasm, and hazards are taken by the unthinking in defiance of the admonitions of the forethoughtful and wise. Then a crash comes. Money in coin is hidden away; credits are restrained; payments are demanded on due or overdue accounts; property declines in value, because everybody wants to sell at the same time for realization purposes to meet pressing obligations. Large numbers are without employment; others are fearful of loss of work. Wages are reduced; purchasing power is curtailed; nobody will buy what he does not actually need; factories stand idle, and investment eats itself up in interest.

"These events have chased each other, alternating between prosperity and adversity, throughout the years of the most remarkable century in the annals of mankind.

"The world has increased in wealth in the face of appalling destruction by war and cataclysms of nature, fire and flood. Business system, as a result of telegraph and telephone, perfected postal system and coöperative solidarity of bankers, has sustained credits and arranged a credit system that brings all the nations into support of each other.

"The application of science to mining and manufacturing, the growing of crops, the generation of cattle and nurture of fruits; diffusion of intelligence, a more orderly system of trading, restriction of credits to recognized periods of short duration; increased production of gold, marvelous increases in the output of metals and coal, enormous expansion of manufactured products, and large acreage brought under tillage by irrigation and under intensified and more scientific auspices—all these have contributed importantly in bringing about an equilibrium that tends to stability of conditions.

"These observations have little to do with the aspects of the cycle theory in its concrete phase, but a large part in its broader one. Periods of uprise or down-trend of prices must, as long as the law of supply and demand is operative, depend initially on causes that reflect trade conditions by sympathetic influence. Trade cycles seemingly operate in periods respectively of four, seven, eight, nine and eleven years, varying in intensity of uprise and down-trend of prices and demand. Sometimes these operate rapidly, and again slowly, until the maximum or minimum is reached.

"For instance, we had, during the nineteenth century, periods that fluctuated from 1834 to 1837 upward, downward until 1843, upward until 1850, up again until 1854, down until 1851, then, under enormous demand incident to war and reconstruction, until 1870, when disturbance of monetary conditions and enormous debt, public and private, brought around the pay days. Then we had panicky times until 1879-80, what is called in the iron trade a 'boom' until the beginning of 1885, then a depressed condition until 1888, a period of upward prices and activity until the midsummer of 1892. From thence until the beginning of 1897 we had depressed and distressed conditions.

"According to the cycle theory, we should see a retrograde movement in 1908, and probably will see a period of conservatism set in for a time, but we are due for a period of restraint on enterprise for a period that should—according to the theory, mind you—culminate about 1915, then an uprise until 1918, then down until 1924.

"There are other forces to be estimated, however. The change in national geography and world history; the hysterical energy to adopt new devices, to magnify human achievements by mechanical forces; the building of canals that divorce continents, that bridge hemispheres and bring earth and sky into harmony—the necessity for magnifying means of transportation and communication, with larger ships and heavier locomotives and trackways, auto-wagons and a multitude of other things too numerous to mention, is creating a demand for iron and steel and coal and coke and all the things that the conquering of continents for civilized man from the barbarian imply and create uses for. We are in a period of constructive energy among men of all tribes and peoples and nations. It is the result of knowledge that brings about order and system, prudence and frugality."

ORE RECEIPTS AT LAKE ERIE PORTS.

The figures compiled by the *Marine Review* from the returns sent in by the various dock companies show that iron-ore receipts at Lake Erie ports during the season of 1906 were 32,076,757 tons, out of a total movement of ore by lake of 37,513,595 tons. Lake Erie docks on December 1 held a balance of 6,252,455 tons. During 1905 the total output shipped by lake was 33,476,904 tons, of which Lake Erie docks received 28,941,259 tons and held a balance on December 1, 1905, of 6,438,967 tons. During 1904 the total by lake was 21,226,591 tons, of which Lake Erie docks received 17,932,814 tons and held a balance on December 1 of 5,763,399 tons. The reserve of 6,252,455 tons on Lake Erie docks December 1 is ample for winter consumption. Never in the history of the trade has 5,000,000 tons gone forward from dock to furnace during the winter season, and, moreover, furnace stock piles are abundant.

As compared with last year the receipts at Lake Erie ports show an increase corresponding closely to the increase in total shipments for 1906 over 1905. In the matter of tonnage received the three leading ports retained their relative positions of 1905, ranking Ashtabula, Cleveland and Conneaut. Cleveland, however, made a gain, reducing the lead of 519,034 tons which Ashtabula held in 1905 to 228,691 tons last year. Conneaut, on the other hand, fell back relatively to both of the leading ports. Since 1903 the order of precedence has undergone a complete cycle of changes. In 1903 it was Cleveland, Ashtabula, Conneaut; in 1905 and 1906, Ashtabula, Cleveland, Conneaut.

Shipments to furnaces between May 1 and December 1, 1906, aggregate 27,615,392 tons, compared with 24,311,720 tons in 1905, with 16,658,806 tons in 1904, with 16,903,013 tons in 1903, with 18,423,364 tons in 1902, and with 14,204,596 tons in 1901.

The shipments to furnaces during the season of navigation as referred to are determined in this way: First we have the amount of ore on lake docks before the opening of navigation, May 1 last, 1,791,030 tons; add to this the receipts of the season just closed, 32,076,757 tons, and the total is 33,867,847 tons; deduct the amount on dock December 1, 6,252,455 tons, and we have 27,615,392 tons as the amount that was forwarded either direct or from dock to furnace yards. It is, of course, understood that the difference between the total output of 37,513,595 tons, which was shipped from the Lake Superior mines during 1906, and the receipts of 32,076,757 tons at Lake Erie ports, is ore that went to places other than Lake Erie ports, such as the furnaces at Detroit and South Chicago. The following tables show receipts at Lake Erie ports and amounts on docks during four years past.

IRON-ORE RECEIPTS AT LAKE ERIE PORTS—GROSS TONS.

Ports	1906	1905	1904	1903
Toledo	1,423,741	1,006,855	508,793	652,305

The shipments of iron ore by water from the Lake Superior region for 1906 were 37,513,595 tons. The following table shows the shipments for four years:

	1906	1905	1904	1903
Escanaba	5,851,950	5,307,938	3,644,267	4,277,561
Marquette	2,791,033	2,977,828	1,997,301	2,007,346
Ashland	3,388,106	3,485,344	2,288,400	2,823,119
Two Harbors	8,180,125	7,779,850	4,556,542	5,120,656
Gladstone	....	5,118,385	4,169,990	3,978,579
Superior	6,083,057	....	553	35,816
Duluth	11,220,218	8,807,559	4,649,611	5,356,473
Total by lake	37,513,595	33,476,904	21,226,664	23,649,550
Total by rail	....	876,552	596,175	640,328
Total shipments	....	34,353,456	21,822,839	24,289,878

The table does not include shipments to Lake Erie ports from the Lake Superior Corporation's Helen mine in Canada on the Michipicoten range.

CAPE COD CANAL.

"Attention has been again directed to the project for cutting a ship canal across Cape Cod, by the recent announcement that a prominent financier, who controls the transportation interests in this city, has become interested in the scheme, and is prepared to furnish the necessary capital to put it through," says the *Scientific American*. "It takes only a glance at the map of the New England coast to understand why the opening of this canal is desired both by maritime and naval interests, and particularly by the former. The passage from Long Island sound to Boston and northern New England ports must now be made around Cape Cod, where navigation is rendered perilous by the stormy waters, the fogs and the swift tides off the cape. Moreover, the cutting of the canal would shorten the distance between New York and Boston by 140 miles on the sea route and by seventy-six miles over the route through the sound. It is estimated that at present the annual tonnage of coastwise trade which passes around Cape Cod is about 22,000,000 tons. As the greater part of this consists of coal, it is certain that the opening of the canal would mean the supplying of fuel to the mills of northern New England at a considerably lower rate than is now possible. The advantage to passenger traffic

would lie in the fact that travelers who left New York in the evening would be landed in Boston next morning without having to make the uncomfortable early morning change from boat to train.

"Commencing at Buzzards Bay, the route of the canal extends across the narrowest part of Cape Cod to a terminus at Barnstable, on Cape Cod bay. The entrance on Buzzards bay will call for about four and a half miles of dredging through the shoals, and the length of the canal proper from shore to shore will be about seven and a half miles; the total length of the canal from deep water to deep water being thus about twelve miles. The survey follows the valleys of two rivers, with a maximum deviation of not more than half a mile on each side of a tangent drawn from terminus to terminus.

"The canal is to have a depth throughout, at low tide, of twenty-five feet. The minimum width at the bottom is to be 125 feet, and there will be four passing stations to accommodate vessels going in opposite directions, where there will be a maximum width of 350 feet on the surface. The borings, which have been of a very extensive character, indicate that the sub-surface is composed entirely of gravel, sand and loam, free from quicksands, rock ledges and bowlders. The average height of the ground above tidewater level is nine feet, and it is the easy character of the excavation which accounts for the comparatively low estimated cost of the canal, which can be built in three years at an outlay of $12,000,000.

"An important point to be considered in connection with any canal in the northern states is that of the formation of ice during the coldest weather of the winter. Fortunately, there is a variation of four feet in the respective rise and fall of the tides in Buzzards bay and in Massachusetts bay, the range being about nine feet in the former and five feet in the latter waters. Moreover, the times of high tide are different. There will, therefore, be a constant current through the canal which, with the passage of shipping, will serve to prevent the canal from being closed by the ice."

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, FEBRUARY 2, 1907.

To all appearance the prospects for a satisfactory adjustment of the questions recently raised by Japan have improved within the week. At a conference on Thursday last between the President and Secretary Root on the one hand and the members of the California delegation to Congress on the other, the situation was discussed at some length, and the fact was disclosed that negotiations were well under way between the United States and Japan for a settlement of some of the matters which have led to friction between citizens of the two countries. The President and the Secretary made it clear that the success of the negotiations would depend to a great degree upon the attitude of the San Francisco school authorities and the nature of the concessions they were willing to make. Mr. Roosevelt gave the members of the delegation to understand that he looked for their coöperation to prevent a continuance of the anti-Japanese agitation while the negotiations were pending, and his suggestions produced a very decided effect.

As the result of what was said at the conference, the members of the delegation telegraphed to the two leading school officials of San Francisco to come to Washington for a conference with the President, and they sent messages to the governor of the state and the leaders in the legislature urging that no drastic or denunciatory measures be passed concerning the Japanese question. The governor of California responded with a special message recommending that all legislative action concerning Japanese matters be deferred for the present, and in both houses of the legislature proposals dealing with the subject which had been previously introduced were withdrawn. Thus far the situation has been well handled by the administration at Washington, which has convinced the Japanese government of its absolute friendliness. The existing treaty with Japan will expire on March 12, and it is the hope of the administration to have concluded before that date a new treaty under which coolie immigration to the United States from Japan will be restricted, while the island empire will be entitled to bar from entry a certain class of laborers from the United States. A substantial concession to Pacific coast sentiment will thus be obtained, while the equality of the two nations as negotiators will be recognized.

The conferences between the American and the German tariff commissioners at Berlin ended on Friday of last week. It appears from a statement made by the American commissioners that while no commercial treaty has been negotiated, because they had been given no authority to make such a treaty, yet in the course of the proceedings there has been established a basis upon which a commercial treaty might be concluded, provided the consent of the Reichstag and the American Congress should be given. Neither government has made any committals, but the understanding reached is such that if the two governments should desire to enter into a commercial agreement the preparatory work has been done. It may be added that the sessions of the conference have been harmonious from the beginning and that nothing has occurred at any point to interfere with the cordial and friendly relations originally established. The sessions have been largely devoted to an interchange of information as to the customs methods of the two countries and the reasons therefor. Both the German and the American commissioners are convinced that even if no commercial agreement or treaty should follow, the interchange of views and information has been of the utmost value in furthering a continuance of the friendly commercial relations between the two nations.

An understanding appears to have been reached between the powers signatory to the last Hague convention regarding the programme for the Second Peace Conference, which is to meet later in the year. Professor De Martens, the well-known Russian international jurist and councilor of state, has been sounding the foreign offices of the various powers, and seems now to have practically completed his work. It is not known yet when the conference will meet, dates from May to July having been suggested but none apparently agreed upon. It may be said, however, that neither the question of international disarmament, including that of the restriction of armaments, nor the Drago doctrine, will be placed upon the list of subjects to be considered at the conference. At the same time, an effort will be made to have them discussed on the initiative of the delegates themselves, with, of course, the consent of their principals. It is believed to be the hope of the Washington authorities that such a consideration of the subjects mentioned can be brought about.

Uncertainty seems to prevail yet as to whether the Panama canal will be constructed by private contractors or under the direct supervision of the government. An impression seemed to gain currency for a time that the contract to build the canal had already been conditionally awarded to one particular contractor. A statement issued from the White House by Secretary Loeb a few days ago contradicts this notion. It is said that thus far no decision has been made even that the contract would be awarded to any of the bidders. One bid, that of the contractor referred to, is declared to have been so hopelessly defective that it could not be considered, and he was given time to complete it in such shape as to enable it to receive consideration. In case it should be put into such shape it will be considered, together with the bid of another contracting combination, and then, after careful examination, whichever bid seems most advantageous may be taken, or both bids may be rejected and the canal be constructed under direct government supervision. In the latter case, the government would use contractors simply as agents. The real object in contracting the work, the statement says, is to have assembled a large number of the best specialists in each class of work, and the prime consideration will be the ability and fitness shown in a variety of directions by the men making the bid.

Mr. James J. Hill, president of the Great Northern Railway, is quoted as expressing himself as confident that the attacks which are now being made upon his corporation by the Minnesota authorities will come to naught. At the same time, the action whereby the attorney-general of the state seeks to force the Great Northern management to make application to the railway commissioners for authority to issue its proposed new stock, has been supplemented by another proceeding in which it is sought to annul the charter of the St. Paul, Minneapolis & Manitoba Railway, the original nucleus of the Great Northern system, and the corporation by which the greater part of the mileage included therein was constructed. The avowed object of this latest suit, it seems, is to do away with the succession of alleged stock-watering operations, which the authorities claim have marked the history of the enterprise. In this particular, however, the Great Northern management seems confident of its ground, and the expressions from that quarter are to the effect that no particular harm can come to the property. In addition to this, it is also pointed out that what the northwest wants most emphatically at this time is increased railroad facilities, which can only be provided by the creation and sale of new securities, and that obstacles which would tend to diminish the confidence of investors in such securities, as is undoubtedly the result of the steps taken by the Minnesota authorities, are to be deprecated, especially at this juncture.

Regulations governing the construction and filing of freight and passenger tariffs have just been promulgated by the Interstate Commerce Commission. These regulations prescribe many details in reference to the form and contents of the tariffs to which it is unnecessary to refer here. It may be said, however, that under them no rule or regulation is to be included which in any way or in any terms authorizes substituting for any rate named in the tariff a rate found in any other tariff or made upon any combination or plan other than that stated in specific terms in the tariff of which the rule or regulation is a part. Another general requirement is that the terminal charges and allowances, together with all other charges and rates which in any way increase or decrease the amount to be paid on any shipment, shall be set forth in separate tariffs. Speaking generally, the regulations aim at insuring definiteness and precision in statements made in railway schedules.

A victory for the German government's colonial policy was scored in the elections held on Friday of last week. Reballotings will be necessary in many of the constituencies, so that a definite statement of the result is not as yet possible. The parties supporting the government have, however, gained a number of seats, while the Socialists have lost a number. The largest numerical gain in votes was made by the Centre party, while the Socialists cast a larger total vote than any other party. Their voting strength is not, however, represented in the number of seats held by them. The elections for the second Douma are now in progress in Russia. No trustworthy indication as to the final result are as yet possible, but if early reports can be relied upon, a strong conservative vote is being cast in the country districts. In a circular issued this week Premier Stolypin declares that the Douma is the main factor in the regeneration of law and order in the state; that the Czar has no idea of dissolving or abolishing it, and that the chief aim of the government is the improvement of the position of the peasants.

THE DECLINE IN STOCKS.

Although extensive liquidation did not accompany the general and sharp decline which was seen in New York stock market quotations during the present week, there was, nevertheless, ample evidence that considerable holdings of the higher priced railway stocks were disposed of for the account of speculators who had become hopeless as to the maintenance of exaggerated values for such securities. Wall street, in fact, appears to be growing pessimistic regarding the situation. Continued large emissions of new stock, bonds or short-time notes by railroad and other corporations create more or less of a feeling of timidity on the part of investors and bearishness among professional speculators. The question which the street is disposed to ask is, whether the railroad and other companies which are putting out this great mass of new securities with which to finance improvement work will be able to show net earnings on the present scale should there be a check to the general prosperity of the country, with a falling off in railroad traffic and a decreased demand for the products of the industrial organizations. Under such circumstances the stock market would naturally tend to become bearish in sentiment even though the declines continue to be, on the whole, moderate and gradual, and are checked from time to time, as was the case in the middle of the present week, by covering on the part of the already much extended short interest, which was prompt to buy in against its contracts for a time and equally ready to put them out again.

The week has, however, seen the lowest prices since the opening of the year, quotations in some cases being as much as fifteen points below the high figures of only a month ago. The following tabulation exhibits the course of some of the more active trading stocks, the quotations being presented including the highest prices at which the securities in question sold in 1906, together with the high of the early part of last month and the low records made this week:

	High, 1906	*High*, 1907	*Low*, 1907
Atchison	110½	108¼	98¾
Baltimore & Ohio	125⅜	122	114⅜
Erie	50⅞	44¼	33⅝
Louisville & Nashville	150½	145⅛	132½
Missouri Pacific	106¾	92¾	85
Reading	164	139⅛	118½
Southern Pacific	97½	96¼	90¼
Union Pacific	195⅜	183	168⅞
Amalgamated Copper	118¼	121⅞	110⅜
United States Steel	50¼	50⅜	42¾
United States Steel pfd.	113¼	107¾	104

From this it will be seen that the eleven given stocks are, on an average, ten points lower than they were at the beginning of 1907, and sixteen points under the high quotations of the preceding year, a result which is all the more remarkable because of the steady manner in which money has eased, call loans having been quoted at as low as 1¾ per cent. on last Thursday. Moreover, there have been no evidences as yet of a shrinkage in railroad traffic or of any change in the general business situation which would produce such effects upon stock market values. It is indeed urged that the decline which the market has suffered is the result of manipulative operations for the bear account. In fact, it might be said that the way quotations have been marked down through heavy selling by large operators resembles in some degree the way in which the same interests put stocks up by main strength in last autumn's market. At the same time it would be impossible for speculators of this class to bring about such results if it were not for the noteworthy absence of buying power, which, as stated above, is undoubtedly a consequence of the present enormous creations of new capital and securities.

THE POSTAL COMMISSION'S RECOMMENDATIONS.

At the last session of Congress a joint postal commission was appointed to investigate and report to that body its conclusions regarding the operation and effect of the existing law relative to second-class mail matter, and what changes, if any, should be made therein. The investigation thus authorized has resulted in a report suggesting one of the most comprehensive, not to say sweeping, revisions of the postal laws and administration touching second-class matter ever recommended to Congress. The changes proposed are embodied in a measure which is submitted with the report. The commission, however, does not conclude its suggestions with those touching second-class mail matter, but suggests that the whole business system of the postal service should be examined and overhauled by a set of expert accountants and statisticians to be secured from the ranks of those professions outside of the department, and the bill proposed by it provides for the appointment of a joint commission of Congress to investigate the entire postal system.

Some of the more important changes in the existing law regarding second-class mail matter are deserving of notice. It is provided in the bill submitted with the report that a newspaper or other periodical may be in part composed of advertisements which are permanently inserted in or attached to the same, but that such advertisements shall not constitute more than 50 per cent. of the superficial area of any issue of the publication, and that no advertisement shall be printed on card, cloth or any substance other than paper, nor upon paper of greater weight than the text of such publication. So, while a newspaper or other periodical may be composed of parts or sections, these must be of the same size, form or weight of paper, and must, when taken together, form one complete and identifiable whole. A supplement may, however, be inclosed or folded with a regular issue of a newspaper or periodical, but no supplement is to be composed of or contain advertisements, but it must be confined to matter germane to the regular issue and supplied in order to complete matter left incomplete in the main body of the publication.

With each issue of a newspaper or other periodical the publisher is to be allowed to mail at the second-class rate of postage samples of such issue, but not to exceed 10 per cent. of the total number of the copies of each issue mailed by him to actual subscribers, as the same appears by a sworn statement of such issue required to be submitted to the postmaster at the office of mailing. Envelopes are not to be printed on any other substance than paper, and except in the case of maps and plans illustrative of the text, are not to be of a different form from the main body of the publication. The second-class rate is refused to periodical publications consisting wholly or substantially of fiction. The commission takes the view with regard to this class of matter that the classification which puts a complete novel in one class and a novel published serially in another class is a false one.

In the view of the commission, there are four cardinal defects in the present system of charges for second-class mail matter. The difference between the second-class rate and the next higher rate, the third-class rate, is too great. In other words, the second-class rate is relatively too low. Wholly dissimilar services are performed for the same rate. Substantially similar services are charged different rates. The second-class rate is probably too low, absolutely speaking. The mere fact that the next higher rate, that for printed matter, is 800 per cent. greater than the periodical rate, creates, the commission says, an almost irresistible temptation to give all printed matter the periodical form. The report suggests the appointment of a postal appeals commission in the Post Office Department to which publishers, whose applications for the admission of mail matter to second-class rates have been denied by the Postmaster-General, may appeal, and which shall determine such appeals with respect to matters of fact as well as of law. Authority is also given to the Postmaster-General to require opinions from the postal commission upon questions of law respecting the classification of mail matter and the right to admission to the second class.

Some of the changes above proposed, such as those restricting the proportion of advertisements and requiring uniformity in the weight of the paper used, are distasteful to publishers of periodicals and will be earnestly antagonized, while to others no objection is made. Touching the wider question of a general overhauling of the postal system, the opinion of the joint commission, which coincides with that of the Postmaster-General, would seem to be entitled to very great weight. Of the importance of the service from a fiscal point of view there can be no question. Its administration involves the expenditure of $175,000,000 of the people's money, and, according to the commission, at the rate at which the postal service is growing, it will not be many years before the annual expenditure will be $250,000,000 or even $300,000,000. Any light that expert examination may be able to throw upon the administration of so large a system cannot be unwelcome or without use.

FOREIGN TRADE AND CONSULAR REPORTS.

The pressure of competition in foreign trade of late years has caused attention to be directed in an especial way to the functions of the consular service in relation to commerce and to the most available means of rendering that service more efficient. The movement for consular reform led last April to the passage of the Reorganization act, which, as our readers are aware, while shorn of some of its most desirable features in the course of its progress through Congress, yet constituted a long step in the desired direction. The act itself has been much strengthened by the establishment by Secretary Root of an efficiency record of consular officers which is to be made a factor in the promotion, transfer and retention in office of persons in the service, and by the regulations promulgated by President Roosevelt in June last to govern the appointments and promotion of consuls-general and consuls. It is pointed out by a well-informed writer in the current *Atlantic Monthly* that the administrative action taken has already given earnest of the future in one of the most important branches of consular activity, namely, in the production of official reports having in view the promotion of our foreign trade interests

Attention is directed by the writer referred to, Mr. John Ball Osborne, to the fact that the promotion of foreign trade as a cardinal point of state policy is no new thing. Here, as in so many other directions, we find traces of the foresight of Secretary Marcy, who, a half century ago, in transmitting to Congress his first annual report on the commercial relations of the United States, said: "The interests of commerce can be viewed as secondary to none and can scarcely be fostered with a care too sedulous." It was twenty-three years later that Secretary Evarts urged as a means of promoting foreign trade the frequent publication of consular and diplomatic reports on commercial and kindred subjects of general interest, the continuance of the practice of furnishing items of commercial information and abstracts of reports to newspapers, and the supplying of chambers of commerce by means of circular letters with information of immediate interest. These suggestions of Secretary Evarts were given effect by an appropriation; in response to instructions a large amount of material was contributed by consuls, and in October, 1880, the first number of the "Monthly Consular Reports" appeared. In 1898 a very marked advance in the timeliness and interest of the government's consular publications was made on the recommendation of Mr. Frederic Emory, whose name is well known to readers of this journal. In January of that year there was established a daily periodical containing freshly received consular reports. The publication of these reports has been of the greatest value in promoting the foreign trade of the country. It may be remarked that the duty of publishing the consular reports has passed from the State Department to the Department of Commerce and Labor, while the work of editing them is divided between the Bureau of Trade Relations in the former and the Bureau of Manufactures in the latter department.

In the view of Mr. Osborne, while the trade reports made by American consuls are unsurpassed in respect of practical value, there are features of foreign consular reports, and particularly in relation to their dissemination, which are deserving of attention. Some of the most complete and valuable expositions of commercial and industrial situations in foreign countries are to be found in British consular reports, and the method of distribution by sale individually at a nominal price has certain advantages over the gratuitous

distribution of a collection of reports. German consular reports are marked by the scholarly thoroughness of the nation, though they are criticised for heaviness and lack of promptness, though by Germans only, be it said. Indeed, it is pointed out as a curious fact that alleged defects in the consular services of the great commercial nations are nearly always exposed by their own writers.

Two features of the German system are indicated as meriting careful consideration. One is the utilization of the services of commercial attachés who are experts appointed by the government to increase the utility of each of the more important consulates as a focus for the collection of information of practical value to German manufacturers and exporters. Commercial attachés with similar duties, though with a diplomatic status, are maintained by the British government at the embassies at six capitals, though it is now intimated that these may be withdrawn and located in London, whence they may be sent on special missions, as occasion warrants. A suggestion for the appointment of officials of a similar character was made by Acting Secretary of State Loomis early in 1905, but it has not yet been acted upon.

Another feature of the German system which the writer regards as worthy of serious attention is the practice of placing secretly at the disposal of home merchants and manufacturers certain classes of commercial information before it is made accessible to foreign competitors. Whenever the government considers it desirable to give preference to the business interests of the empire, the information reported by the consuls or commercial attachés is printed on slips marked "confidential," and then distributed among the several chambers of commerce and other commercial bodies for the use of their members, notice of its existence being generally inserted in the local press. Until recently no attempt was made by our government to discriminate in favor of American citizens in the dissemination of trade intelligence, but less than a year ago the Bureau of Manufactures adopted, in reference to a limited class of trade intelligence, a policy similar to that of Germany. This departure is commended as wise and patriotic for the reason that it furnishes an effective way of protecting home industrial and commercial interests in the international struggle for wider markets. The suggestion is, at any rate, worthy of attention, particularly in view of the fact that criticism of the indiscriminate publication of trade advices has been not infrequent abroad.

DETAILS OF A RECORD TRADE YEAR.

The final returns of foreign trade in 1906 do not differ much as to totals from those issued earlier in the present year, but amplified statistics show some interesting variations from the 1905 records. Briefly summarized, the imports of merchandise in 1906 gained 11.9 per cent. over those of 1905, while exports gained 10.8 per cent. The total of all foreign trade marks an increase over the largest aggregate hitherto reported (that of 1905) of 11.1 per cent., and the grand aggregate considerably exceeds three billions of dollars. Following will be found the details of imports and exports for the calendar years 1906 and 1905:

	1905	1906
Imports—Free of duty:		
Foodstuffs, crude, and animals	$118,487,262	$116,070,276
Foodstuffs, prepared	2,982,277	3,316,594
Materials for use in manufacture	298,803,734	332,962,633
Manufactures for use in mfre	80,580,246	105,073,325
Manufactures for consumption	24,961,419	28,148,872
Miscellaneous	4,649,197	6,224,002
Total, duty free	530,464,135	591,795,702
Dutiable:		
Foodstuffs, crude, and animals	20,094,682	22,047,892
Foodstuffs, prepared	151,736,537	137,203,537
Materials for use in manufacture	105,774,022	114,976,189
Manufactures for use in mfre	115,710,311	144,461,694
Manufactures for consumption	252,225,984	306,661,827
Miscellaneous	3,138,879	3,462,409
Total, dutiable	648,630,415	728,813,548
Free and dutiable:		
Foodstuffs, crude, and animals	138,581,944	138,118,168
Foodstuffs, prepared	154,718,814	140,520,131
Materials for use in manufacture	404,577,756	447,038,822
Manufactures for use in mfre	196,200,557	249,535,019
Manufactures for consumption	277,187,403	334,810,669
Miscellaneous	7,788,076	9,686,411
Total, all imports	1,179,144,550	1,320,609,250
Duties collected	277,495,236	314,788,036
Exports—Domestic:		
Foodstuffs, crude, and animals	155,216,866	177,216,268
Foodstuffs, prepared	315,664,895	344,096,464
Materials for use in manufacture	480,129,393	524,602,516
Manufactures for use in mfre	213,108,894	248,897,752
Manufactures for consumption	429,781,924	470,633,393
Miscellaneous	5,520,650	7,574,147
Total, domestic	1,599,422,622	1,772,720,530
Foreign goods imported:		
Free of duty	13,703,092	13,223,603
Dutiable	13,865,081	12,303,810
Total, foreign	27,568,173	25,527,413
Total, all exports	1,626,990,795	1,798,247,943

Very close agreement in the matter of gains shown is to be noted between the free and dutiable imports, the former gaining 11.5 per cent., while the latter increased 12.3 per cent. It is to be noted also that in duty-free imports practically the entire gain on 1906 over 1905 was in crude or partly manufactured materials intended for use in manufacture, foodstuffs imports falling off slightly. Very much the same tendency is shown in dutiable imports, foodstuffs falling off, while materials for manufacture increased, though the gain in imports of these materials over 1905 is only 17 per cent., while the increase in articles ready for consumption is 21 per cent. Taking imports as a whole, foodstuffs are shown to have fallen off by almost 5 per cent., while materials for manufacture have gained 16 per cent., and articles ready for consumption have gained 20 per cent. Duties on all imports increased 13.3 per cent. A little over one-fifth of all imports were of foodstuffs, one-third were of crude raw materials, and one-fourth were of goods ready for consumption.

In exports the features also are that while crude foodstuffs and food animals gained 14 per cent., manufactured foodstuffs increased 9 per cent. Crude materials for use in manufacture gained 9.4 per cent., manufactures for further use in industry gained 16 per cent., and manufactures ready for consumption gained nearly 10 per cent. The really striking feature of this summary is that while raw materials for manufacture make up less than one-third of all exports, the shipments of manufactures ready for consumption amount to 26.51 per cent. of all. Still another comparison is afforded if crude foodstuffs, food animals and crude raw materials are grouped together and compared with the total of exports of partly manufactured foodstuffs, partly manufactured materials for use in manufacture, and finished goods. Such a classification results in a proportion of 40 per cent. of the former and 60 per cent. of the latter. In other words, two-fifths of the country's exports are crude products and three-fifths are of partially or wholly finished goods. This condition is one which seems bound to become more pronounced as the years elapse; in other words, as the country grows as a manufacturing power the tendency is toward a growth in exports of the products of manufacture, and even where foodstuffs go abroad they are likely to assume a different form from that of earlier years. Thus, as an example, the outlook is for relatively larger shipments of wheat in the form of flour than in the shape of grain. One very important exception to the marked tendency this way, however, may be found in the exports of raw cotton, though—thanks to large takings of cotton cloth by China—even here a gain in the manufactured product is found.

WHERE OUR MANUFACTURES GO TO.

During the calendar year 1906 the exports of domestic manufactures from the United States aggregated $719,000,000, which was 41 per cent. of the total exports in that year. This is a large proportion, the heaviest, we believe, that there is record of, not only as to quantity, but as to the proportion of the whole trade involved. For the fiscal year ending June 30, 1906, the exports aggregated $1,717,953,382, of which manufactures aggregated $686,023,169, or 39.93 per cent. In the following table, prepared by the Bureau of Statistics of the Department of Commerce, the exports of all products by leading countries and by grand divisions are compared with the exports of manufactures, the percentages the latter make of the former being also given:

Countries	*Exports of domestic products*	*Exports of manufactures*	*Per ct. of mfres*
United Kingdom	$578,023,505	$133,459,935	23.09
Germany	232,403,778	55,632,220	23.93
Canada	146,175,015	90,485,933	61.90
France	96,453,755	30,002,357	31.11
Netherlands	95,197,392	43,431,231	45.62
Mexico	57,418,646	40,406,657	70.38
Belgium	49,208,063	15,132,479	30.76
Italy	47,362,491	12,723,262	26.87
Cuba	46,377,277	25,624,220	55.25
Chinese empire	43,660,764	41,812,222	95.98
Japan	37,056,290	21,318,797	56.17
Argentina	32,575,959	32,120,383	98.60
British Australasia	28,936,236	25,674,635	88 74
Denmark	22,902,135	3,372,633	14.72
Spain	19,091,070	2,294,236	12.02
Russia	18,756,098	9,188,474	49.00
Austria-Hungary	14,764,131	6,356,741	43.06
Brazil	14,422,089	11,990,315	83 15
Panama	12,410,168	10,069,715	81.14
British South Africa	11,699,508	8,421,805	71.98
British West Indies	9,616,665	3,404,307	35.40
Chile	8,657,723	7,903,391	85.53
Sweden	7,435,051	3,201,778	43.06
Hong-Kong	7,032,833	2,089,184	29 70
Norway	6,012,026	1,324,480	22.03
Philippine Islands	5,458,867	3,759,688	68.87
Grand divisions			
Europe	1,189,254,885	318,503,047	26.78
North America	294,546,176	182,121,776	61.83
Asia	104,804,873	78,530,251	74.93
South America	74 745,589	64,328,906	86.06
Oceania	35,060,348	29,711,707	84 74
Africa	19,541,511	12,827,488	65.64
Grand total	1,717,953,382	686,023,169	39.93

Naturally, the percentage of manufactures exported is highest to the countries and grand divisions which are least advanced in manufacturing industry. Thus South America, of the grand divisions, takes the largest proportion—86.06 per cent.—Oceania following with 84.74 per cent.; Asia next with 74.93 per cent.; Africa comes fourth with 65.64 per cent., North America fifth with 61.83 per cent., and Europe last with 26.78 per cent. Of the individual countries Argentina takes the largest percentage of American manufactures—98.60 per cent.—China coming next with 95.98 per cent. The United Kingdom, of our larger customers, takes only 23.09 per cent. of our goods in the form of manufactured products, but despite this small percentage the total purchases of these goods exceed those taken by China in the proportion of 3 to 1, and those of Argentina in the proportion of 4 to 1. Spain takes only 12 per cent. of its purchases from us in the form of manufactures, but its total purchases are less than 4 per cent. of those of Great Britain.

A WONDERFUL INDUSTRIAL REPORT.

Neither surprise nor disappointment was caused by the failure of the United States Steel Corporation's directors to increase the quarterly dividend upon the common stock of that organization. Indeed, the action taken in that respect at last Tuesday's meeting had been fully anticipated. It is furthermore realized, even by the speculative community, that the policy of the management in accumulating a surplus of extraordinary dimensions, while the organization is enjoying to the fullest extent its share of the prosperity which now exists in the iron and steel trades, is a wise provision against inevitable years of poor business, and also enables the corporation to proceed with the large amount of improvement and construction work it now has on hand, especially the erection of the new plant at Gary, Ind., upon which, it seems, $5,000,000 has thus far been expended, while about $27,000,000 of the sum appropriated for the purpose is still available. In fact, the United States Steel Corporation is financially in a signally strong position, being able to provide for improvements and additions to its plants without being under the necessity, as is the case with the large railroad and many of the industrial companies, of having to go into the market to raise money for the purposes referred to.

The quarterly report, covering the results of the three months ending December 31, proved, however, to be something of a surprise. A good showing was expected, but the actual figures ran beyond anticipation, the net for the quarter being $41,744,964, as compared with $38,114,624 for the September quarter, the latter amount being until now the high record as to the earnings of any quarter in the corporation's existence. The detailed statement for the quarter just ended, compared with the September quarter, and with the three months ending December 31, 1905, is as follows:

Quarter ending Dec. 31,'06	*Sept.* 30,'06	*Dec.* 31,'05
Net earnings	$41,744,964	$38,114,624	$35,278,688
S. F. sub. companies	522,525	578,053	435,056

Total surplus	97,475,395	78,598,719	71,144,534

The net earnings of the corporation for the years 1906, 1905, 1904 and 1902 compare monthly and quarterly as follows:

	1906	1905	1904	1902
January	$11,856,375	$6,810,847	$2,868,213	$8,901,016
February	10,958,275	6,629,453	4,540,673	7,678,583
March	13,819,840	9,585,586	6,036,346	10,135,858
First qr.	36,634,490	23,025,896	13,445,232	26,715,457
April	12,581,902	9,017,925	6,863,833	12,320,766
May	14,041,601	10,602,187	6,256,518	13,120,930
June	13,501,530	10,665,004	6,370,374	12,220,362
Second qr.	40,125,033	30,305,116	19,490,725	37,662,058
July	12,242,098	9,035,168	6,314,771	12,041,913
August	13,158,850	10,985,901	6,262,957	12,972,729
September	12,713,666	11,218,513	6,226,204	11,930,847
Third qr.	38,114,624	31,240,582	18,773,932	36,945,489
October	14,984,926	12,400,306	7,250,204	12,652,707
November	13,482,464	11,827,215	7,117,418	10,686,906
December	13,277,574	11,051,167	7,099,011	8,646,146
Fourth qr.	41,744,964	35,278,688	21,466,633	31,985,759
Year	156,619,111	119,850,282	73,176,522	133,308,763

Nor would it seem that the prosperity the company has enjoyed in the last part of 1906 is likely to show any diminution during the first half of the current year. The unfilled orders on hand December 31 are stated to have been no less than 8,489,718 tons, which is a decided gain upon the figures at the end of the September quarter, which were 7,936,884 tons. It might be added that, according to current report, large amounts of additional orders have been booked since January 1, so that there is a prospect that the figures at the end of the March quarter will equal, if they do not exceed, the new high record which has just been set in this respect.

The unfilled orders on the books of the corporation, as shown in the quarterly reports since those figures were first published, have been as follows on the dates mentioned, in tons:

Dec. 31, 1906	8,489,718	June 30, 1904	3,192,277
Sept. 30, 1906	7,936,884	Mar. 31, 1904	4,136,961
June 30, 1906	6,809,589	Dec. 31, 1903	3,215,123
Mar. 31, 1906	7,018,712	Sept. 30, 1903	3,278,742
Dec. 31, 1905	7,605,086	June 30, 1903	4,666,578
Sept. 30, 1905	5,865,377	Mar. 31, 1903	5,410,719
June 30, 1905	4,829,655	Dec. 31, 1902	5,347,523
Mar. 31, 1905	5,507,560	Sept. 30, 1902	4,843,607
Dec. 31, 1904	4,695,203	June 30, 1902	4,791,993
Sept. 30, 1904	3,027,436		

It is to be noted that the December quarter's earnings, after liberal appropriations for additions and improvements and the payment of all charges, sinking funds and the regular dividend upon the preferred stock, amounted to no less than $22,366,058, equal to 4.4 per cent. upon the $508,302,500 of outstanding common stock, this amount comparing with 3.59 per cent. earned on the common in the September quarter, and 3.22 per cent. in the December quarter a year ago. Moreover, taking the results of the four quarters which complete the year 1906, the Steel Corporation is shown to have earned $156,619,111 net, as compared with $133,308,764 in 1902, which was the highest record heretofore made by the organization. In fact, the results of the year, after all appropriations, charges and preferred dividends, amounted to $80,439,644, a sum equal to 15.83 per cent. upon the common stock, as compared with 9 per cent. applicable to the common in 1905 and 1.22 per cent. in 1904. In short, the showing, both for the quarter and for the full year, is one of extraordinary prosperity for the Steel Corporation; but while it would seem that the directors might with perfect propriety adopt a more liberal policy in regard to the distribution of profits among the common shareholders, the reasons given above for an adherence to a conservative policy are generally appreciated by the financial community.

EDITORIAL NOTES

The sale of $50,000,000 three-year 5 per cent. notes by the New York Central & Hudson River Railroad Company and its controlled roads was not an unexpected event. As was pointed out in these columns last week, it was altogether within the probabilities that the railroads which were obliged to raise large amounts of new capital with which to pay the cost of additional facilities and equipment would find it advisable to sell short-term notes in lieu of endeavoring to dispose of bonds, which under existing bond market conditions could only be placed at a considerable discount. It is therefore easy to understand the course of the Vanderbilt roads' management. Through J. P. Morgan & Co. of New York and their foreign associates they have just placed notes at the above rate and maturing February 1, 1910, of which the New York Central is responsible for $25,000,000, the Lake Shore & Michigan Southern issuing $15,000,000 and the Michigan Central $10,000,000. The important fact in the matter, however, is that the bankers who took the entire block were able to announce within twenty-four hours that they had resold the entire amount of the notes, foreign interests being credited with taking a considerable portion thereof. There is, of course, a commission to the bankers; that is in such cases a necessity. At the same time the fact that investors on both sides of the Atlantic have so quickly absorbed the whole of the issue seems to give point to the ideas expressed a week ago about the popularity of securities of this class with investors, foreign and domestic.

The weather is a perennial source of interest, conversation or remark, and this year no less so than in other periods, when striking differences and changes from the normal are to be noted. In our own country some marked variations have been shown within comparatively short distances, and European cables tell of some remarkable happenings which stamp the new year as an abnormal one. The early winter in this country was a cold one in the latitude of New York, but was mild early in January, as, indeed, was the case in the northwest. Later on, however, the latter section was visited with storms which tied up traffic to a remarkable extent. At the same time that the northwest was buried in snowdrifts the central west had tremendously heavy rains, resulting in overflowing rivers, while the Pacific coast sent in its contribution in the shape of a snowstorm in the neighborhood of San Francisco. Only this week there have come newspaper reports of heavy snows in the California desert the like of which the traditional oldest inhabitant fails to recall. Real winter weather was not reported in the south until after the middle of January. Until the present week there was little or no snow in the winter-wheat region, in this respect resembling January a year ago. Perhaps the most notable reports are, however, those which indicate that Great Britain and the continent of Europe have had a more than ordinarily severe winter. Passenger trains have been lost in snowdrifts in Scotland as in our own northwest, and intense cold has been experienced far south of the ordinary line. Only a week ago advices told of heavy snows in Italy, the sides of Mount Vesuvius were covered, and five inches was reported falling in Rome, with heavy precipitation in Athens and Constantinople. Cold approaching arctic temperatures was reported throughout Russia, and the Black sea was said to be frozen at Odessa. Reports have also come to the effect that the use of ice breakers was necessary to keep open the canals of Venice. All in all, the year has started in with a number of happenings out of the ordinary in the matter of the world's weather, and men of science, no less than the ordinary wayfarers, may find material for study in the numerous illustrations furnished, that 1907 has been something of a record maker or breaker in the matter of meteorological phenomena.

The going into effect of the pure food law has called for a number of rulings as to the meaning and intent of the law as regards a number of preparations now on the market. One of the latest decisions by the Department of Agriculture has been called forth by the request of a manufacturer of cereal-coffee, who asked for an opinion on the use of the hyphenated name, and as to whether or not he was entitled to use this as a label on a cereal substitute for coffee. In replying the secretary says: "It is held that since the product mentioned is not a coffee, it cannot properly be called by the term mentioned. Regulation 20 provides that a distinctive name shall be given no false indication of character. The use of the name 'cereal-coffee' might be taken to indicate that the product is coffee or has the properties of coffee, and hence the use of the term does not comply with the definition of distinctive name. Even if the product consist in part of coffee the name would not be proper. It would be held to be in violation of regulations 17 and 20. It is suggested that products of this nature be designated 'imitation coffee.' In such case the word 'imitation' should be in uniform type, on uniform background and should be given equal prominence with the word 'coffee.' The word 'imitation,' therefore, forms a part of the name, and should immediately precede or immediately follow the word 'coffee.'"

One of the important additions made this week to the mass of new securities which are being offered for subscription consists of $40,000,000 of American Telephone & Telegraph Company's 4 per cent. convertible bonds, being part of an authorized issue of $150,000,000 of such bonds. Prominent bankers in New York and Boston present the bonds for public subscription at 92½, a simultaneous offering being also made on the London and Amsterdam markets. The new security, which can be converted, at the holder's option, into the company's stock at $140 per share for the latter between March 1, 1909, and March 1, 1918, is redeemable by the company at 105 and accrued interest after March 1, 1914. It therefore belongs to the rather popular class of convertible bonds and is sufficiently attractive, so far as price is concerned, to be assured of a good reception on the part of the investing public, even though there is at the moment almost a surfeit of new securities coming on the market. It will be recalled that not many weeks ago the same organization sold $25,000,000 of 5 per cent. three-year notes, while it also has $20,000,000 notes bearing a like rate which mature on the coming May 1, which will, of course, be retired with part of the proceeds of the $65,000,000 of newly created notes and bonds. That the various operating telephone companies, of which the American, or, as it is often called, the Bell Company, is the parent organization, are being called on to make enormous and constantly growing outlays for extensions and improvements is well understood, but the heavy amount of new capital which the controlling company requires emphasizes the fact. In stating the company's position, its president, Mr. F. P. Fish, calls attention to the fact that whereas the number of subscribers served by the American Company and its affiliated concerns was 2,528,715 at the end of 1905, the estimated total in December, 1906, was 3,054,000, being, in fact, an unprecedented growth, one which would appear to furnish an ample explanation of the magnitude of the concern's capital requirements. It may be mentioned incidentally that negotiations are reported to be under way for the absorption by interests allied with the Bell Telephone of one of the largest of the so-called independent telephone organizations, located principally at Rochester, N. Y., which was planned to create an extensive system in competition with the American Telephone & Telegraph Company.

Although belonging to the realm of rumor rather than that of ascertained fact, not a little interest has been shown in the intimations now current in Wall street and in railway circles that the differences which have existed for some two years past between the Gould and the Harriman interests have been practically adjusted. It will be remembered that the determination of the Gould party to build the Western Pacific Railway from Salt Lake City to San Francisco as a Pacific coast outlet for the Missouri Pacific and the other lines comprising the Gould system was the cause of the rupture, and the dropping of Mr. George J. Gould and his associates from the directories of the Union Pacific, Southern Pacific and other Harriman roads. Significance is consequently attached to the news that the opposition which the Southern Pacific has shown to the Western Pacific's obtaining a right of way over its property has been withdrawn. Furthermore, the reports which are in circulation point to a possible arrangement whereby the Wabash Railroad may be enabled to make use of the Baltimore & Ohio lines to establish a connection between Pittsburgh and the present western terminus of the Western Maryland, and thus obviate the costly task of building a link of that kind in order to carry out the plan of bringing the Gould system to Atlantic tidewater. Whether the above is substantially correct or otherwise, or what inducements were offered on either side, cannot, of course, be stated, though it would seem natural for the Gould interest to seek for a much needed Atlantic outlet in the above way, even though the deal may involve the subordination of the Western Pacific, when completed, to the general policy under which the Pacific lines controlled by Mr. Harriman and his coadjutors are operated.

RECENT LEGAL DECISIONS.

[*Prepared for* BRADSTREET'S.]

Owner's Liability—Water Spout.

The Maryland Court of Appeals held, in the case of Mylander vs. Beimschla, that a property owner was not liable for injuries to adjoining property by a water spout, which originated while his property was in possession of a tenant, unless he had agreed to make repairs.

Convict Farm Leases—Constitutionality.

Under a constitutional provision allowing the state legislature to place convicts on state farms and "buy farms for that purpose," the Supreme Court of Mississippi, in the case of State ex rel. Greaves vs. Henry, sustained the right of the legislature to lease farms on which to work convicts.

Interest in Land—Agency—Purchase.

The Supreme Court of Nebraska held, in the case of Johnson vs. Hayward, that a contract by which a person employs an agent to negotiate for the purchase of real estate is not a contract for the creation of an estate or interest in land, or trust or power over or concerning lands, within the meaning of the statute of frauds.

Carriers—Inspection—Interstate Commerce

The Supreme Court of the United States held, in the case of New Mexico ex rel. McLean et al. vs. Denver & Rio Grande Railroad Company, that the prohibition against the receipt by common carriers, for transportation beyond the limits of the territory, of hides, which did not bear the evidence of inspection required by the New Mexico act of March 10, 1901, was a valid exercise of the police power and did not violate the commerce clause of the Federal Constitution.

Insolvency—Creditor—Federal Question.

The United States Circuit Court of Appeals for the First Circuit held, in the case of Miller vs. Clifford, that a suit by several creditors of an insolvent bank to enforce the statutory double liability of stockholders, which prayed an accounting in favor of all creditors and a pro rata payment to them, with repayment to stockholders in case of a surplus, did not present a case of separable controversy as to the rights of a single non-resident stockholder which the latter might remove to the Federal court.

Combination—Anti-Trust Law.

The Supreme Court of Nebraska held, in the case of Cleland vs. Anderson, that an association of retail dealers in lumber, organized to prevent its members from being subjected to competition of wholesalers, which required a fixed amount of stock continuously carried to entitle a dealer to membership, and levied upon and collected from wholesale dealers a penalty in case they made sales to consumers directly, or to retail dealers not eligible to membership in the association, was unlawful, as being in violation of the Nebraska anti-trust act.

Sleeping-Car Company's Liability.

The Supreme Court of Georgia held, in the case of The Pullman Company vs. Schaffner, that it is the duty of a sleeping-car company to exercise reasonable care to guard the personal effects of the passengers from theft, and that if through the want of that care such personal effects as a passenger may properly carry with him on his journey be stolen, the company will be liable therefor. According to the court, the personal effects which a passenger may carry with him on his journey may include articles of personal adornment, such as jewels, and if a piece of jewelry suitable to be worn for the personal adornment of the passenger becomes injured or broken during his travels so that he cannot use it in the usual way, it does not lose its character as an article which he may properly carry on his person, nor will the carrier be relieved of its duty to exercise reasonable diligence to protect the passenger in his possession of the same.

Lessors' Liability—City—Regulations.

In the case of Clark et al. vs. Gerke et al., recently decided by the Maryland Court of Appeals, it appeared that by agreement certain property in Baltimore was leased for ten years, with the privilege of four more, and the lease and agreement provided for certain repairs and alterations definitely described in specifications. In order to make these repairs a permit was requested from the city authorities, with the result that the side walls were pronounced to be unsafe and dangerous, and the building was condemned by the building inspector. The specifications for repairs made no provision for the side walls other than to require some underpinning at designated places in the cellar. The question arose whether the lessors or the lessees were to pay for the removal and rebuilding of that portion of the building which was condemned and ordered removed by the inspector of buildings. The Court of Appeals held that, under the circumstances of the case, the lessors should be required to pay the expenses made necessary in order to comply with the municipal building regulations.

Life Insurance—State Laws.

The Supreme Court of the United States held, in the recent case of The Northwestern National Life Insurance Company vs. Riggs et al., that the Missouri statute as to life insurance which cuts off any defense by a life-insurance company based upon false and fraudulent statements in the application, unless the matter misrepresented actually contributed to the death of the insured, is not repugnant to the Fourteenth Amendment, and that the state could make such provisions apply to foreign life-insurance companies doing business in Missouri under its license.

Chattel Mortgage—Record—Bankruptcy.

The United States Circuit Court of Appeals for the Eighth Circuit held, in the case of First National Bank vs. Connett, that where, under a state law, a chattel mortgage must be recorded to be valid against creditors, it is required to be recorded within the meaning of the amendment of 1903 to section 60a of the bankruptcy act, defining an illegal preference, where the other conditions concur, as a transfer by an insolvent within four months of the filing of a petition in bankruptcy against him, and providing that where the preference is in a transfer, the period of four months shall not expire until four months after the recording or registering of the transfer, if by law such recording or registering is required.

Assumption of Risk—Jury.

The Supreme Court of Minnesota held, in the case of Atlas vs. National Biscuit Company, that the question of assumption of defect in machinery and of appreciation of risk is ordinarily one of fact not to be arbitrarily decided by rules of law, but by proper submission to the jury. In the case before the court, it appeared that the plaintiff, a minor, with limited experience in the employ of defendant, had for about three months operated an unguarded machine which conveyed pans to him and carried them away after he had greased them by the use of burlap on his hands. The burlap caught on and was wound around a revolving sprocket wheel, and drew his hand and crushed one finger between that wheel and the chain passing over it. The court held that these circumstances presented a question of fact for the jury.

Land—Personal Property—Reclaim.

The New York Court of Appeals held, in the case of Davis et al. vs. Bliss, that a vendor who had the right under a conditional sale to reclaim personal property of the vendee after his default in payment of an installment of the purchase price, might assert that right as against an owner of real estate to whose premises the vendee had attached it in such a way that, under ordinary circumstances, it would become a part of the realty, the owner of the realty having parted with nothing on account of it. The property in question, in this case, was a gasoline engine. The court held that on the refusal of the landowner to deliver the property an action of conversion would lie against him, but that the recovery in such action would be limited to the amount due from the vendee on the purchase price at the time of conversion.

Contract—Delivery—Delay—Waiver.

The United States Circuit Court of Appeals for the Seventh Circuit held, in the case of The Victor Chemical Works vs. Hill Clutch Company, that under the general rule, in the absence of other agreement, when materials are to be furnished at a definite time under contract and are delayed, the purchaser may elect either to receive the goods so delayed in delivery or to reject them, and may sue for the breach in either case unless the goods are accepted under circumstances which amount to a discharge of the contract or waiver of the default, and that a clause in an executory contract, that the acceptance of machinery when delivered was understood to constitute a waiver, operated to settle by mutual agreement the meaning and effect of an acceptance by the purchaser of the property, which was delivered by the vendor later than the time stipulated in the contract, and would be conclusively construed to be a waiver of all damages for the delay.

BUSINESS NOTES.

The Piano Trade.

According to *Music Trades*, the end of the year 1906 found piano manufacturing everywhere rushed with work, a condition that also prevails in lines allied with the piano trade. The year saw an added triumph for the grand piano, which was made in larger numbers than ever before, while art styles have been in increased demand, and splendid specimens of artistic piano product were manufactured to order in large numbers. The piano output of the year is estimated at from 250,000 to 300,000. One of the handicaps to manufacturing in the year was the manner in which prices for raw material and supplies of all kinds advanced. This has not only affected the piano trade, but other lines as well. Nearly everything that goes into the making of a piano, brass instrument or talking machine is more expensive than formerly.

Trade with Cuba.

The Bureau of Statistics of the Department of Commerce and Labor gives out a statement of trade between the United States and Cuba for the calendar year 1906, in comparison with that of previous years:

	Imports from Cuba	*Exports to Cuba*
1906	$85,055,205	$46,491,944
190	95,857,856	44,569,812
1901	74,950,992	32,644,345
1903	57,228,291	23,504,417
1902	48,619,588	23,051,623

The decline in imports from Cuba last year is said to be due to lower prices prevailing for sugar. Our own export trade to Cuba continues steadily to increase. The principal articles of export to the island are now iron and steel products, reaching nearly $8,000,000 last calendar year; wheat flour, $2,600,000; lard, $2,600,000; lumber, $2,200,000; soft coal, $1,600,000; boots and shoes, $1,600,000; cars and carriages, $1,300,000; corn, $1,190,000; cattle, $990,000; cotton cloth, $892,000; other cottons, $484,000, and so on.

Cost of Government.

In a preliminary statement on the wealth, debt and taxation of the United States for 1902, issued by the Census Bureau this week, an interesting summary is given of the receipts and expenditures of national, state and local governments. The aggregate receipts were $1,778,352,930, and expenditures $1,773,959,369. These totals, it is stated, include the amounts paid by one division to an other, which results in a duplication of approximately $69,222,019. The character and the total receipts from general revenues are shown as follows: The general property tax, $706,660,043; special property and business taxes, $62,327,400; poll taxes, $16,579,786; liquor taxes, $55,241,306; other licenses and permits, $19,841,343; fines and forfeits, $7,962,322; subventions and grants, $60,984,892; donations and gifts, $2,901,919, and from all other sources, $2,127,150. The officials of the Census Bureau explain that the figures for states, counties and cities are in all cases compiled from reports of actual receipts and payments. Those for cities containing less than 8,000 inhabitants and for other minor civil divisions are in part estimated.

Price of Copper and Production Thereof.

According to the *Engineering and Mining Journal*, "the reason for the present extraordinary price for copper is easily determined. The production of North America in 1906 was only 3.2 per cent. in excess of the production in 1905, while consumption increased at a considerably greater rate (just how much it is not yet possible to say), and at the beginning of 1906 the American market was bare of stock of refined metal, except the comparatively insignificant quantity that is always necessarily on hand. The present outlook is for a prolonged continuance of the high level of price. Consumption shows no diminution, so far as can be judged from trade reports, and there is no great prospective increase in output. Arizona and Michigan both produced in 1906 to their full limit. Montana cannot do much more until the new smelting capacity now under construction is completed. Utah is troubled by the smelter-smoke question. The Balaklala, of California, will scarcely be producing before midsummer. Ely, Nevada, will not begin to produce until 1908. Alaska will probably show a considerable increase in production, and Idaho will forge further ahead. At present there is no good ground for forecasting a larger percentage of increase in 1907 than there was in 1906. In 1908, when the disseminated ores of Bingham, Utah, and Ely, Nevada, will be yielding copper, when Shasta county, Cal., will be producing at its maximum, when the smelting capacity on the Pacific coast will be greatly increased and larger supplies of ore will be coming from Alaska, we may expect an important gain in the production; but who can say what the consumption will be then? During the next ten years Alaska is going to be a great factor in the production. The reports of reliable engineers on its deposits are strongly optimistic. The production of Alaska increased from 4,703,600 pounds in 1905 to 6,250,000 pounds in 1906. However, the latter figure did not give the territory its full credit, inasmuch as much of its ore goes to Vancouver island smelters and appears in the Canadian production. Making allowance for that, the production of Alaska in 1906 was about 8,000,000 pounds."

Shipbuilding in 1906.

The best sources of information indicate that about 2,100 vessels were built last year throughout the world. The total tonnage was 3,172,450 tons. During 1905, 1,900 vessels were constructed with a total tonnage of 2,732,146 tons. For purposes of comparison the following table, showing the country, vessels and tonnage for the last two years, is given:

	Vessels, 1906	*Tonnage*, 1906	*Vessels*, 1905	*Tonnage*, 1905
United States	207	464,671	146	368,775
United Kingdom *	820	1,850,000	795	1,623,168
Germany	361	360,980	310	312,400
Holland	222	116,192	195	92,522
Japan	137	96,132	146	47,458
France	84	85,348	78	101,073
Norway	76	56,023	64	52,670
Italy	55	37,854	22	58,193
Austria-Hungary	42	19,738	15	27,675

* Estimated.

The United States shows an increase of sixty-one vessels as compared with 1905, while the increase in Great Britain's output amounted to only twenty-five vessels, though its total output was almost four times that of the United States, and three and one-fourth times as large again as the output of Germany.

Savings of the American Soldier.

"The American soldier is not highly paid, yet he is a thrifty chap," says the Seattle *Times*. "Last year 54,260 enlisted men saved and deposited with the paymaster's department $1,495,228. This is a very respectable sum and represents about 12 per cent. of the total pay of all the enlisted men for that period. Had every enlisted man made a deposit the average saving for the year would have been $27.50, but that is the least interesting feature of the system. The figures show that the soldier can deposit, under the law of 1872, only sums of $5 and over. As the pay is small, the total deposits for the year show that the saving habit is continuous with many enlisted men. These deposits bear interest at the rate of 4 per cent. a year, but they cannot be withdrawn until the soldier receives his discharge. Last year there was repaid to the soldiers the sum of $1,168,236; interest was also paid to the amount of $70,112. The number of men discharged is not given, but the amount repaid shows that their average savings must have been considerable. Since the enacting of the law of 1872 the total deposits have amounted to $27,789,553, and discharged soldiers have received $1,582,993 in interest on deposits withdrawn. There remains on deposit with the Paymaster-General the sum of $2,911,737."

Olive Oil Shortage.

Consul D. R Birch, of Malaga, reports that no Spanish olive oil will find its way into the American market during 1907. The present crop, now being pressed, is so small that very little oil, if any, will be available for exportation. There are no statistics on the subject, and thus accurate figures cannot be given, but local exporters say the yield will be barely sufficient for home consumption. The cause of the poorness of the crop was a long drought, followed by untimely rains, the heavy thunderstorms of last September being responsible for the loss of a large portion of the fruit. These conditions mark the low limit of production for Spanish oil in this section. Not during the past twenty years has such an unfavorable situation confronted the Malaga growers and exporters. The crop of the previous season was also exceedingly short, but of sufficient size to warrant some shipments at high figures. An idea of the extent to which the industry has been paralyzed may be gathered from consular invoice figures. The crop of 1902 made sales to the United States alone of 24,517 barrels, while but one shipment of seventy-five barrels went out during the past year. This was of the quality known as "manufacturing" or "machinery" olive oil, as the better quality for edible purposes is not shipped from Malaga.

CURRENT BUSINESS NEWS.

Commercial.

Theodore P. Shonts declared at a dinner in Chicago that by purchasing supplies in this country the Panama Canal Commission had added $12,000,000 of business per year to American industries, and predicted a great increase in American trade with Latin-American countries. He declared that the Panama canal is as safe from disease now as any other part of the tropics, and safer than many parts of the United States.

A parcels post convention having been concluded between the United States and Ecuador, to take effect March 1, 1907, the Postmaster-General announces that on and after that date packages for Ecuador will be transmitted in the mails dispatched from this country. Postage must be prepaid in full at the following rates: In the United States on packages for Ecuador, 20 cents for each pound or fraction of a pound; in Ecuador on parcels for the United States, 50 milesimos of an Ecuadorian condor, gold, for each pound or fraction. Parcels post for Ecuador will be made up at New York and San Francisco.

Broomhall thinks North America still holds the key to the situation on wheat. He says it will be called upon for 140,000,000 bushels during the next twenty-eight weeks and wonders if we can supply it at current prices. He still adheres to the opinion that our winter-wheat yield has been overestimated.

A Winnipeg dispatch indicates that the Canadian government intends to put the Canadian in as advantageous a position as possible in competing for the export trade. This dispatch states that the Manitoba authorities will within a week or so announce their intention to build a direct line from Winnipeg to Hudson Bay, which, it is claimed, will save the farmers fully 30 cents a bushel on all export grain.

Broomhall's weekly report on foreign crops, published Tuesday, was as follows: United Kingdom—The crop outlook continues satisfactory. France—Crop conditions are satisfactory, but the frequent weather changes are considered unsuitable, and holders are firm. Germany—Owing to recent severe frost and unusual fall in temperature, with absence of snow, damage is feared in some quarters, but nothing definite reported. Generally believed buyers are purchasing Argentine wheat freely. Hungary—Some anxiety is expressed regarding the condition of the crop, owing to recent very severe frost and the fact that snow covering is light. Roumania—Frost still continues, but owing to good snow covering no damage to crop reported. A semi-official report indicates that the corn crop for this year amounts to 120,000,000 bushels, against 56,000,000 bushels last year. An average crop is about 72,000,000 bushels. Russia—The severe cold recently reported has moderated some, and there is plenty of snow covering. Arrivals at ports are small. Traders expect the government is going to make larger purchases of wheat for the famine districts. Italy and Spain—The crop outlook continues favorable.

Cigar manufactories in the United States have doubled their output in eight years, the number for the fiscal year 1905-06 being 8,070,672,649, as compared with 4,063,169,097 for the year ended June 30, 1898.

The German government has again extended to the United States her minimum tariff, which will remain in effect until Congress has had an opportunity to arrange a treaty with Germany.

The German Bureau of Statistics estimates Germany's foreign trade for the year 1906 as follows: Imports, $2,085,000,000, an increase of $225,750,000; exports, $1,561,000,000, an increase of $1,500,000.

Authorities on coffee conditions anticipate an increase of probably half a million bags in the visible supply for the report of the supply of stocks in the world's market as of February 1, 1907. The quantity reported for January 1 a month ago was 14,377,932 bags. With half a million added the total would be 14,878,000. Comparison of the visible supply, by months, for the latest three years up to February 1, estimating the above figure for that date in 1907, is as follows:

	1906-07	1905-06	1904-05
July	9,636,563	11,265,510	12,361,454
August	9,948,053	11,465,641	12,580,148
September	10,756,653	12,102,496	13,492,498
October	12,153,621	12,624,693	14,266,592
November	13,165,786	13,006,841	14,350,926
December	13,808,836	13,090,349	14,086,730
January	14,377,932	12,647,595	13,916,399
February	14,878,000	11,931,631	13,621,720

The Western Union and Postal Telegraph companies have notified the Produce Exchange management and other senders of commercial messages that the New York to Chicago rate on such messages will be raised from 25 to 40 cents. The new schedule went into effect Friday. It makes the rate on commercial messages the same as that on personal messages, and the change was necessitated, it was said at the Western Union offices, by the railroad rate bill, which forbids discrimination in interstate commerce. Previously the Produce Exchange and other organizations with a large business have received a cut rate. The new rule makes no difference in the charges for leased wires.

The following summary table has been prepared by the British Board of Trade, showing the total imports and exports of merchandise of the principal countries for which the particulars can be given up to October, 1906, inclusive, and referring in all cases to the same period, viz, the ten months ended October. The corresponding figures for 1905 are added for comparison:

Imports—	1905	1906
Belgium *	£95,505,000	£102,371,000
France	154,520,000	170,735,000
Italy	66,557,000	78,405,000
Egypt	17,669,000	19,679,000
United States	204,108,000	222,180,000
Japan	43,049,000	36,311,000

Receipts of wheat in bushels at the chief primary points for December and January, and from July 1, 1906, compared with the same months and the same period last year, were as follows:

	1906-07	1905-06
December	23,416,762	22,871,901
January	13,705,739	18,155,205
Month's change (decrease)	9,711,023	4,716,696
From July 1 to January 31	175,642,637	181,178,483

Financial.

Thomas C. Dawson, formerly United States minister to Santo Domingo, but recently transferred to Colombia, has returned to Santo Domingo, where he will enter upon the negotiation of a treaty between the United States and Santo Domingo. The terms of it will be such that ratification by the United States Senate will probably follow. The treaty will replace the one now pending before the Senate. It will give this government a degree of responsibility in the matter of collection of customs that will give some security to any bankers who underwrite a bond issue for the payment of the Dominican debt. Kuhn, Loeb & Co., of New York, have agreed to underwrite the issue to the extent of $20,000,000 at 96.

The chartered banks of Canada showed a larger increase in general business in 1906 than in any previous year. The complete figures show that December 31 the total current loans and discounts were $701,627,000, compared with $600,000,000 at the end of December, 1905, a gain of $101,627,000. The increase was due almost wholly to Canadian trade. At the end of December, 1906, the deposits totaled $655,000,000, an increase of $98,700,000 in the twelve months. The paid-up capital of Canadian banks is now $95,509,000, an increase of $10,215,000 for the year.

Announcement that a night bank will be opened by the City Bank & Trust Company of New Orleans is made by its president. The bank will be open continuously from 10 a. m. until midnight.

Easier money conditions in St. Petersburg are indicated by the retirement of paper money, of which the government hopes to call in $125,000,000, or possibly $150,000,000, during the year. During the last fortnight $25,000,000 of paper money was burned, another $25,000,000 will be placed in the furnace within a month, and the remainder will be destroyed later in the year.

New York bank clearings in the month ending January 31 were $1,600,000,000 less than in the corresponding month last year. In January, 1906, the wild up-bidding of stocks had much to do with the enormous total of that month's check exchanges. In January, 1907, the insistent liquidation had much to do with the reduced total of exchanges.

The members of the New York Produce Exchange appear to be overwhelmingly in favor of the proposition to introduce trading in stocks.

The federal government of Brazil has publicly declared its guarantee of the £5,000,000 sterling loan in behalf of the coffee states of Rio and Minas. This loan has been under negotiation for the past sixty days and is now finally guaranteed by arrangement between the federal and the state government. United action on the part of the coffee states of Sao Paulo, Rio and Minas together with the federal government, in support of the coffee valorization project, is thus confirmed.

Fifteen Chicago national banks reporting their condition as of January 26 show aggregate increase of $7,650,000 in deposits as compared with November 12, 1906, an expansion of $7,268,000 in total loan account and a gain of $700,000 in cash resources. As compared with aggregate figures of January 29, 1906, deposits show increase of $9,300,000, loans an increase of $9,191,000 and cash resources a decrease of $573,000. Aggregate totals January 26, 1907, are: Deposits, $330,303,763; loans and discounts, $216,272,209; cash resources, $140,245,642. National bank increases over previous call in percentages are as follows: Deposits, 2.3 per cent.; loans, 3.4 per cent.; cash, .5 per cent.

The relatively high interest rates which ruled for the year 1906 makes interesting the following tabulation showing the approximate average interest rates to commercial borrowers in the year 1906 in the principal monetary centers of the United States:

	Quarter				
	First	*Second*	*Third*	*Fourth*	*Aver.*
Baltimore	5.45	5.45	5.625	5.875	5 60
Boston	5.55	5.55	5.75	5.95	5.70
Chicago	5.20	5.35	5.55	6.70	5 70
Cincinnati	5.25	5 50	5.75	6.00	5.625
Detroit	5.45	5.70	5.30	5.35	5.45
Los Angeles	5.25	5.75	5.80	6.60	5.85
New Orleans	6.00	6.125	6.375	7.00	6.375
New York	4.925	5.152	5.597	6.946	5.655
Philadelphia	5.75	5.75	6.00	6.00	5.875
Seattle	7.00	7.00	7.00	7.00	7.00
St. Louis	5.50	5.55	5.65	6.00	5.675
Average	5.575	5.717	5.854	6.311	5.864

"'It is safe to say that 75 per cent. of all the railroad financing for this year at least has either been arranged or provided for, and not more than 25 per cent. is yet ahead of us.' This is the statement of a financier whose calculations are always good and whose sources of information are excellent, and whose statement in this case seems to be supported by the known facts," says the *Wall Street Journal*. "In the list of 75 per cent. already arranged or provided for must be considered the Hill lines with approximately $153,000,000; Chicago, Milwaukee & St. Paul with $100,000,000; Chicago & Northwestern with $25,000,000; New York Central with $50,000,000; New York, New Haven & Hartford with $67,000,000, of which $26,000,000 has already been obtained by the sale of notes and $41,000,000 is soon to be obtained by the sale of stock; the Southern Railway with $15,000,000, and various other lines which have had lots ranging from $10,000,000 down."

A bank which will have a capital and surplus of $2,000,000 each and will take its place immediately as one of the large banks of the city, with deposits aggregating more than $20,000,000, will open early in May, in the new Trinity Building, at 115 Broadway. It will be called the National Copper Bank, and will represent most of the large copper-mining interests in all parts of this country and Mexico.

Chicago bank clearings broke all records. The January clearings aggregated $1,040,404,771, compared with $986,844,841 for January, 1906.

Call money on Thursday dropped to 1¾ per cent., the lowest rate since the week of July 21, 1906, when it touched 1½ per cent.

Secretary Ely, of the Stock Exchange, announces that Atchison, Topeka & Santa Fe Railway Company debenture mortgage 4 per cent. bonds, series E, Des Moines & Minneapolis Railway Company first mortgage 7 per cent. bonds of 1907, Milwaukee, Lake Shore & Western Railway Company convertible debenture bonds of 1907, Mexican Central Railway Company collateral trust 4½ per cent. bonds of 1907, and Chicago, Burlington & Quincy Railway Company $108,000 Denver Division 4 per cent. bonds of 1922, have been stricken from the list.

The total real-estate valuations of the different boroughs of New York City, as made up by the tax department, follow:

	1906	1907	*Increase*
Manhattan	$3,851,101,031	$4,078,106,001	$227,004,970
Bronx	344,745,002	375,356,030	30,611,028
Brooklyn	1,037,803,022	1,089,511,420	81,706,398
Queens	151,030,705	205,577,520	54,946,815
Richmond	44,845,380	51,081,161	6,235,331
Total	5,400,127,590	5,800,632,132	400,504,542

The figures do not include the assessment on special franchises, which is certified to the tax department after April 1.

Transactions in stocks on the New York Stock Exchange in January amounted to 23,014,797 shares, an increase of 2,756,258 shares as compared with the previous month, but a decrease of 15,533,071 shares as compared with January, 1906.

Wm. A. Read & Co.

INVESTMENT SECURITIES

25 Nassau Street, New York

BOSTON CHICAGO BALTIMORE

The following is a comparison of the total dealings in stocks for January of this year and the same month in previous years:

1907	23,014,797	1903	16,006,389
1906	38,547,868	1902	14,763,391
1905	20,765,538	1901	30,207,603
1904	12,235,741		

Dealings in railroad and miscellaneous bonds were the smallest of any January for the past ten years, and 50 per cent. less than in the corresponding month last year. Bond dealings for January compare as follows with the same month in previous years:

1907	$53,266,000	1902	$94,030,500
1906	105,326,600	1901	94,851,450
1905	138,589,000	1900	47,782,600
1904	79,926,000	1899	144,784,740
1903	66,830,500		

Northern Pacific Railway Company subscription receipts for new stock, first installment 5 per cent. paid, have been admitted to quotation in the unlisted department of the Stock Exchange. Transactions will be upon a percentage of the par value of the new stock. The buyer, on paying for these receipts, is to deduct 95 per cent. to cover the unpaid installments.

Railroads.

The Chilean Congress has approved the bill providing for the construction of the proposed longitudinal railway, which will cost $37,500,000, 5 per cent. interest being guaranteed by the government on the capital. Representatives in Santiago of Belgian, German and native syndicates are preparing to bid for the whole or part of the work. Congress gave the President authority to enter into contracts for the construction of the road, subject only to the approval of the Senate. The longitudinal railway of Chile will run from the frontier of Peru to the Straits of Magellan, a distance of about 2,600 miles from the northern to the southern terminus, with spur lines to coast ports and into mining districts and agricultural areas.

According to the *Brazilian Review*, the new administration of the government will prosecute work on new through lines north and south, also east and west throughout the country. Some of the work is to be carried out by the Ethelberga syndicate, composed of London and French bankers, who financed loans for the government in 1904 and 1905, and by the Great Western Brazil Railway. The latter is already making preliminary surveys between Pesqueria, the terminus of the old government line, and Tocantins, with the intention of extending ultimately to Arica on the Pacific.

Industrial.

It is predicted that 40,000,000 tons of ore will be moved next season, a sum that exceeds the movement of last season by about 3,500,000 tons.

The year 1906 was notable for the largest addition to the British mercantile marine in effective tonnage and size and power ever recorded in any one year. The total addition to the register was 1,550,000 tons. The merchant steamers turned out of the shipyards represent 1,800,000 tons gross, an advance of 12½ per cent. on the production of 1905.

"Virginia leads the south in the manufacture of boots and shoes, and the center of the industry in that state is Lynchburg," says the *Manufacturers' Record*. "It is announced that before next summer that city will have six shoe factories, with facilities for turning out 7,000,000 pairs of shoes annually as soon as the necessary labor has been secured."

Of the 928 labor unions making returns to the *American Federationist* for December, 1906, with an aggregate membership of 77,586, there were 4.1 per cent. without employment. In the preceding month 1,226 unions, with a membership of 101,691, reported 1.8 per cent. unemployed. In December the ratio of unemployed was 2.75 per cent.

A Census Bureau report indicates that there are 2,018 manufacturing establishments in New Jersey, 60 per cent. of which are under corporate management. Capital invested is $521,000,000; average number of persons employed during the year, 239,113, of whom 71 per cent. were men, 24 per cent. women and 3 per cent. children under sixteen; average yearly wages for all industries, $488, an increase of $18 over the preceding year. Average annual earnings show an advance of 6 per cent. for each year since 1899.

STATE OF TRADE.

[A Summary of Special Telegrams to BRADSTREET'S.]

Irregular weather conditions make for numerous cross currents in retail trade, but there is evidence of enlargement in some lines of spring business, notably cotton goods, demand for which is limited only by capacity of mills, wholesalers or jobbers to deliver. Manufacturing lines are actively engaged, and numerous reports come of a very large business for a mid-winter month, considering the already heavily sold-ahead condition of so many lines. In fact, numerous centers report business for January at wholesale as exceeding January a year ago, despite interruptions to traffic by heavy snows, rains and floods in various sections. So far as the present and immediate future is concerned, the situation loses nothing by comparison with preceding years at this period. There is evidence, however, that doubt as to the permanency of some commodity prices, the sentimental effect of the stock market decline, and the disposition toward legislative action regarding corporate interests, have made for a sensitive feeling, which is, perhaps, not entirely offset by the satisfaction felt at the large business already booked for 1907.

In iron conditions vary with the material and sections reported, so far as future business is concerned. The annual report of the leading interest was a wonderfully strong one, the report showing an unprecedented volume of orders on hand on December 31, which is said to have been further increased since. For prompt delivery iron and steel everything is, of course, sold up, and finished lines are strong, with advancing tendencies, more particularly at the west. In crude forms there is an easing of prices for third-quarter delivery, but no diminution of strength as regards nearby months. In the shoe trade conservatism in buying for spring is shown, but this is a tendency brought about partly by price conditions, and partly by changes in trade methods, attributable in a measure to the first-mentioned cause. The receding of the waters has made for a resumption of trade and industrial activities in the Ohio valley, where much damage was done, and where the cleaning-up process is now in order. Interest as regards high water is being transferred to the lower Mississippi, which is now receiving the weight of the floods in that river's tributaries. Colder weather and clearance sales have stimulated trade east and north. In the northwest trade, traffic and collections feel the effects of heavy snowfalls, coming on top of an acute car shortage, though that section appears to be gradually winning out, except in parts of the Dakotas. Reports as to the ice harvest at the east are better than earlier seemed possible, owing to sharp, cold weather. There is little change to be noted in crop reports. The cold weather of last week has been succeeded by rains or snow, and the wheat belt has had a better snow covering than at any previous time this winter. The money situation has likewise displayed irregular conditions. Call loans at New York fell to the lowest point in seven months, but, on the other hand, time money hardened slightly, due partly to February disbursements, in a measure to preparation for new security issues, and perhaps, finally, to increasing needs in trade lines. Railway gross receipts, despite the interruptions to traffic, show fair increases on the phenomenally good returns of a year ago, but net returns for December show only small increases.

The markets for textiles are strong, with cotton goods leading and displaying remarkable strength. Prints, percales, ginghams and, in fact, all lines of cottons sell freely at high prices. Dress fabrics of silk, worsted and linen sell well. Woolens are not so active. Men's furnishings and hats sell freely. Furs have been helped by cold weather. Rubber footwear, neglected last winter, sells actively. Shoes are doing well at retail, but buying from eastern manufacturers is conservative, and shipments are 10 per cent. behind 1906. Leathers are active and export demand is a feature. Hardware and machinery men find conservatism in the placing of new business, growing out of the feeling that metal prices are high, but have very heavy orders on hand to fill. The paper trade is active, and the only drawback is the inability to get goods in the quantity and time desired. Immediate demand for lumber feels seasonable conditions, but future business booked is large. Cold weather has helped the coal trade. Wool is quiet but very firm on the strong close of the London sale and the small stocks held at eastern points.

On the whole, the situation as regards pig iron is easier. Deliveries in the east have improved, and demand for prompt iron in that territory has undergone a reduction, while competition from Shenango and Mahoning valley furnaces is more active in the Chicago district, all of which has tended to check the movement toward abnormally high prices. Prices oversea are also lower, and recent arrivals of foreign iron were sold at a concession. Nevertheless, the market has experienced a good buying movement for second-half delivery, the central west leading in this respect, demand being from foundry and malleable Bessemer interests, but it is said that the bulk of the business was placed at figures that are somewhat under those recently prevailing. At the same time Pittsburgh reports the sale of 13,000 tons of Bessemer, basic and malleable iron for second, third and fourth quarter delivery, the prices being $21.50 to $21.25 respectively, which indicates a slight shading. The supply of steel from independent interests is a little better, and billets at Pittsburgh are off 50 cents a ton. Finished lines are in excellent shape as regards orders booked. Satisfactory orders for structural material are being received, but competition from independent mills is quite strong. New business in steel rails is not heavy, but premiums are being offered for fairly prompt supplies, and this latter statement applies to plates. The leading interest reports its volume of unfilled orders as of December 31 last to be the largest on record, 8,489,000 tons, which is 7 per cent. in excess of the figures as of September 30, 1906, and a gain of 11 per cent. as compared with the showing at the end of December, 1905. Iron skelp is up; merchant pipe, pipe casing and boiler tubes have been advanced $2 per ton; wrought iron pipe is $4 a ton higher; blue annealed sheets have been increased $1 and galvanized sheets $2. Independent tinplate interests have added 10 cents per box to goods sold for third-quarter delivery. The movement of coke was hampered during the week by the inability of the railways to move supplies, and higher prices prevailed in some quarters. Coal is in good demand. New business in copper for future delivery is not large, as consumers generally are pretty well covered for the time being, but anything like prompt supplies command high premiums.

The grain markets all display marked steadiness, taking the week as a whole. Light receipts, due to continued blockades growing out of snowfalls or car shortages, are the keynote of the strength which has now been manifest for ten days past. Cold weather in Europe was also a factor. Price changes are very slight. Corn was steady early on light receipts, sympathy with wheat and poor Argentine crop reports. Oats are up ¾@1 cent on the week.

Speculatively-dealt-in staples show little change on the week, though sympathetic effects of Wall street liquidation are traceable in the price movements this week of cotton and coffee. Spot cotton has not weakened at all, but old crop futures are 20 to 25 points lower, partly because of large receipts and also because of some selling by tired or weakened speculators with interests in other markets. Coffee has eased slightly on crop movement and for other reasons mentioned above. Sugar has been steady in the face of large Cuban production and offerings, while refined has hardened slightly on good demand. Provisions and hog products are higher on reduced receipts of hogs. The pack so far this season is 1,000,000 behind that of last year.

Stock market activity at New York is restricted and highly professional. Prices, however, are irregular and unsteady, which seems to be the outcome of the pessimistic sentiment created by the enormous amount of new securities which are being brought out by railroad and other corporations. The excellent quarterly statement of the United States Steel Corporation had little influence. Bonds continue very dull, the market being overweighted with new issues, though the prompt absorption of $50,000,000 New York Central 5 per cent. notes was a feature. Foreign exchange was weak, demand sterling selling down to 4.84 and becoming steadier at a recovery to around 4.84.40.

Bank clearings for the week ending with January 31 aggregate $2,949,239,663, 12 per cent. under last week and 16 per cent. below the same week last year. Excluding New York City, the total is $1,079,945,653, 5.6 per cent. less than last week, but 4 per cent. over last year.

Business failures for the week ending January 31 number 211, against 252 last week, 228 in the like week of 1906, 239 in 1905, 216 in 1904 and 208 in 1903.

Wheat, including flour, exports from the United States and Canada for the week ending January 31 aggregated 2,102,216 bushels, against 3,328,255 bushels last week, 3,056,208 bushels this week last year, 945,358 bushels in 1905 and 3,702,368 bushels in 1902. For the past thirty-one weeks of the fiscal year the exports are 110,063,545 bushels, against 83,727,547 bushels in 1905-06, 40,062,143 bushels in 1904-05 and 166,609,731 bushels in 1901-02. Corn exports for the week are 2,157,677 bushels, against 2,064,883 bushels last week, 8,289,359 bushels a year ago and 5,302,503 bushels in 1905. For the fiscal year to date the exports are 33,229,708 bushels, against 68,428,045 bushels in 1905-06 and 33,043,645 bushels in 1904-05.

IN CANADA.

Canadian trade is good; winter goods are moving well, despite snow blockades in the northwest, and a record spring trade is looked for. Good roads and real winter conditions in the eastern provinces help trade in heavy goods, and a fair reorder trade is doing with wholesalers. Canadian cotton goods are strong at the recent advances. Canada has 1,000,000 pounds of wool for export, and a market is being sought in England. Fully 20,000 packages of Canadian butter have been brought back from England to Montreal. Toronto reports a satisfactory trade at wholesale, retail business is good all through Ontario, and collections are also good. Snow blockades hurt trade in the northwest, but the largest spring trade on record is looked for. Trade is good in British Columbia, but labor is scarce. Failures for the week number 26, as against 18 last week and 24 in this week a year ago. Clearings for the week aggregate $68,129,645, a decrease of 8 per cent. from last week, but a gain of 6.2 per cent. over this week a year ago.

TRADE REPORTS.

At New York business in dry goods is quiet, especially in worsteds and woolens. Cotton goods, however, continue brisk and collections are good. Raw silk is weaker and business is limited. Millinery trade conditions are good. The recent cold spell helped to lessen stocks of furs. Wholesale notions are fairly active, but there is some complaint of slow collections. Mills are not yet inquiring for rags and shoddy. Wholesale grocers report sales fully up to the average and prices well maintained. Retail trade has been more active, and only a few failures in that line are reported. Manufacturers of confectionery are working to their full capacity. The wholesale flour trade is very quiet, millers not being disposed to offer any concessions in price, which action on their part seems justified by the condition of the wheat market. Demand for live stock is good, but shortage of cars interferes with full supplies. Receipts of butter and cheese are up to the average and equal the demand. Some thousands of boxes of cheese were exported during the week. Receipts of eggs are more liberal. High prices in the brass and copper trades continue to keep business unsettled, and as the trade believe that they will not hold, buying is limited to actual wants. In the hardware and cutlery trades business has been of very satisfactory proportions and compares favorably with that of January, 1906, which was the best for many years past. Metals are in less demand, and lower prices are looked for. Pig iron is quiet, but steel is fairly active. Machinery dealers and manufacturers find a more conservative spirit among buyers, but they have sufficient orders on hand to keep them busy for some months to come; collections are easier. American hemp twine is quiet, but orders previously booked keep factories going. Cotton cordage is very scarce and the market is oversold at full prices. In the tobacco trade stocks are low and prices high, and purchases are kept close to actual wants. The furniture trade is fairly active, but has fallen off somewhat. In some quarters collections are a little slow. Real estate is fairly active, but in the speculative building trade conditions have not materially changed, and one large operator has suspended. Demand for spot lumber and all kinds of building materials is, owing to weather conditions, limited, but orders for future delivery are liberal. In the paper trade business in January was better than the average; prices tend upward.

The following telegrams show trade conditions at the cities mentioned for the week ending February 1:

BOSTON.—Trade in dry goods is of large volume and is limited in many lines by a scarcity of stocks and inability to get the product promptly from the mills. Cotton cloths are strong and prints, percales and ginghams sell freely at advanced prices. In dress fabrics the demand for panamas, voiles, fancy worsteds and mohairs is active, and difficulty is found in getting sufficient supplies. Silks are in good demand. Manufacturers of women's garments have orders in large amount and are busy. Jobbing trade in men's furnishings and hats is exceptionally active. Visiting shoe buyers are conservative in their ideas for future needs and are rather slow in placing orders for next fall, the object being to guard against over-stocking at high prices. Leather is improving, grain leathers being in better request from both domestic and foreign manufacturers. Demand for chemicals is as active as usual at this season and is well distributed throughout the list. Drugs are moving well. Dyes and tanning materials are firm but trade is quiet. In building materials the lime and cement market is quiet, with indications of firmer prices. Turpentine has advanced. The coal market is brisk, owing to continued cold weather. In metals a still further advance in copper is reported; structural steel is promising with many large contracts in prospect. Northern and eastern lumber are more active. Wholesale grocers report trade rather quiet since January and collections are only fair. Some complaint is heard from manufacturers of bakers' supplies, owing to the working of the pure-food law, but it is thought matters will in time be satisfactorily adjusted.

PROVIDENCE.—Manufacturing jewelers continue unusually busy. Collections are good. The worsted goods business is in excellent shapet Woolens are not so active and business is no. particularly satisfactory. Cotton goods of all kinds are in good demand, sales of prints being heavy.

PHILADELPHIA.—Textile mills have plenty of orders, and raw materials are high in price and hard to get. Dry-goods jobbers report a seasonable trade; collections are draggy. Flour is firm and millers are disposed to advance quotations in line with wheat, but buyers are holding off in hope of concessions and taking only what they need for pressing business. Chemical and dyestuff jobbers report a slight lull, prices stiff and margins of profit narrow; collections are poor. Drugs are active and prices satisfactory. Paints and glass are dull, the market waiting for spring developments. Lumbermen say the market is very active for the time of year, retail yards reporting a large increase in volume of orders, while manufacturers and jobbers claim that they are behind in their deliveries. Tobacco orders are not so large as last week, and larger buyers are supplied for months to come. Liquor distillers are busy, withdrawals from bond for present wants are large, and a continuance of cold weather will further increase it. Wholesalers are steadily busy; prices are steady. Leather continues firm, with fair activity and no large stocks. Glazed kid is strong and fairly active, with prices of raw material still high, with proportionately high prices for finished product. Goatskins continue firm. Hides and skins show little change. Shoe dealers report a fair business, with a slight improvement over 1906, activity being noticeable in the rubber line, due to weather conditions, and, as a whole, business is favorable. There is no visible change in the iron market, the insistent demand suggesting that the production is being consumed, and buyers are placing orders for future delivery. Cold weather helps the coal trade; demand is good and prices are firm.

PITTSBURGH.—In the iron and steel market there has been a slight relaxation in the buying movement for finished materials, due in part to the fact that no deliveries can be made on new contracts for several months. Specifications, however, continue to be received in large volume. Inquiries for pig iron continue good, and sales of Bessemer, basic and malleable iron, aggregating about 13,000 tons, were made during the week for second, third and fourth quarter delivery, the price received for Bessemer and basic for third and fourth quarter being $21.50 and $21.25 respectively. Coke market remains strong and present quotations are well maintained. Quotations for pig iron at the valley furnaces for spot delivery are as follows: Standard Bessemer, $23; chilled basic, $22; No. 2 foundry, $25; and gray forge, $21.75. Standard Connellsville furnace coke is quoted at $3.50, and foundry coke at $4 to $4.25.

BUFFALO.—Trade is fairly active and compares favorably with same period in 1906. Collections, however, are slow, due to the fact that merchants generally are operating to the full limit of their capital.

BALTIMORE.—Manufacturers of clothing report sales for January about equal to those of last year. Dry goods are fairly active, the advance in prints increasing the buying, and the demand about equals the supply. In notions, immediate business is of moderate volume, but spring orders are reasonable. Business in men's furnishings is fair, with a firm demand for hosiery and kindred lines. In shoes, wholesalers report fair collections, some cancellations, and business for the month equal to that of 1906. Wholesale druggists say business has not been curtailed by the pure food law. Trade in automobiles shows a material increase for the past year. A better business is reported in rubber and heavy goods. Local stocks of choice hay are small, demand being brisk on full quotations, but low grades are in little demand. Spring orders for millinery are fair, with an increased trade expected for February. Harness manufacturers are busy, but collections are not up to the standard. The last half of January showed an improvement in wholesale liquor sales. The retail line has profited by the more seasonable weather, and this, with numerous clearance sales, has materially assisted general retailers in moving stocks. February finds stocks larger than for the same period of 1906. Money continues in active demand, with the supply somewhat increased. On the whole, the outlook is fairly satisfactory.

CINCINNATI.—Marked improvement characterizes all lines of business. While the receding waters of the flood have in a few instances left badly damaged plants, the work of rehabilitation is active, and in a few days business in those districts will be completely resumed.

CHICAGO.—Cold weather has improved the distribution of heavy winter goods and made for a more cheerful tone in trade. A scarcity of cars east and west is a menace to trade, and there is a great deal of delayed business awaiting movement that may result seriously to both consumers and sellers if not delivered in the near future. There is nothing in the business situation at the moment to cause alarm, but it is felt that a continuation of the agitation against the large railroad and industrial corporations will cause an unsettled feeling that may be expected to restrict expansion sooner or later. Activity continues the feature in iron and steel, accompanied by advances of $2 per ton in boiler tubes, merchant pipe castings, galvanized sheets and steel plates, and $1 a ton on blue annealed sheets and wrought iron pipe and 10 cents a square on galvanized corrugated roofing, and 10 cents a box on tin plate for third-quarter delivery, the latter by the independent interests. Sales of structural materials amounted to 23,500 tons. Increased specifications are noticed, and there is a shortage of crude steel. Cars are scarce and shipments from the mills are delayed. On top of the large purchases of pig iron ast week comes renewed inquiries from large consumers, and the market holds strong. Wire products are having fair sale, but manufacturers are handicapped by a scarcity of raw material. Coke and coal is having a good sale. Lumber and building materials are in fair request for the season. Sales of dry goods, clothing and shoes are liberal, and business for January is ahead of last year. Consumption of groceries is large. Poultry, butter, eggs and potatoes are higher. Hogs are the highest in four years on active buying by packers; cattle are higher, but sheep are ower. Receipts of cattle and sheep decreased, but those of hogs increased. Money is easy, and banks show fair gains in conditions as compared with November. Commercial paper is slow of sale. Collections are irregular and not so good as of late.

PEORIA.—Jobbers report sales satisfactory. Retail trade is rather quiet, and collections are somewhat slow.

LOUISVILLE.—The water in the Ohio river has fallen and most of the submerged district is above water line. Considerable damage was done to Louisville and other places on the river. Business in all wholesale lines is fairly good. Dry goods jobbers report business very good and spring orders coming in freely. Business for January was fully as good and will probably exceed that of 1906. Whiskey dealers and distillers both report large sales for January, and the consensus of opinion is that shipments increased about 10 per cent. over a year ago. Clothing manufacturers have about finished selling their spring output and report a very satisfactory season's business. This market, which has become of considerable size for medium and cheap men's garments, has had a scarcity of labor recently. All factories are running to their capacity. Hardware jobbers report business satisfactory for the past month and shipments for all the dealers will show a small increase over last year. Groceries and drugs are in good demand. Collections are only fair.

TERRE HAUTE.—Country trade in some sections is dull owing to continued rains. Recent cold wave created a demand for coal, though no famine exists. Activity is still evident in the oil fields.

ST. LOUIS.—Conditions with manufacturers and jobbers continue very satisfactory. However, bad weather during January and continued rains have caused a halt in retail trade. While present conditions are satisfactory, there is a feeling of uncertainty among jobbers as regards future business. This feeling is due to the fear that laws adverse to corporate interests may be enacted by the various state legislatures. Collections continue reasonably satisfactory in all lines, and the country districts seem to have ample money with which to conduct their business. Statements of country banks as of January 26 show a healthier condition than has before existed; but it indicates that they are keeping more money at home than heretofore, which naturally reduces their balances in the eastern banks. There has been some talk of injury to the winter-wheat crop on account of continued rains, yet the damage is thought to be only nominal at present.

KANSAS CITY.—Jobbing in leading lines continues good, but collections are a trifle backward. Retail business is retarded by unfavorable weather.

MILWAUKEE.—Jobbers report business very good and improving. Retail trade is still rather quiet.

SIOUX CITY.—Trade is quiet, but the weather is seasonable. Collections are fair.

DAVENPORT.—The best retail merchants have to report is fair business. Special sales in some lines have added a little life to trade, but nothing exceptional. However, manufacturers are busy, and jobbers look forward to a good spring business. Collections are fairly good.

ST. PAUL.—Business in all lines is very active sales being in excess of those of a year ago, and but for the standstill in traffic would be greatly in excess. Collections are beginning to improve, but are still behind those of last year. Money is easier, offers of loans being frequent. The impossibility of traveling on the North Dakota branch lines has induced many salesmen to return from the road.

MINNEAPOLIS.—Most lines report a satisfactory volume of business for the season, although delays in shipping goods are occasioned by the car shortage and snow blockades. Collections are only fair. There is considerable inquiry for lumber, though present shipments are not above the average. The flour trade is fair.

OMAHA.—Seasonable weather has stimulated general trade considerably, and jobbers report orders coming in more freely. Collections are a little slow.

LINCOLN.—Wholesale trade is about normal and collections are fair.

CHARLESTON.—Wholesale dealers report business quiet and only a small volume of spring goods being purchased. Collections are slow.

AUGUSTA.—Retail trade is fair, but jobbing is quiet. Collections are fair.

ATLANTA.—Cool weather has stimulated trade, and all jobbing lines report an increase in orders. Collections are dragging.

JACKSONVILLE.—Business is improving. Orders from the interior are liberal and collections are better. Bank deposits are large and demand for money is good.

BIRMINGHAM.—Southern foundry No. 2 pig iron is scarce for early delivery, $23 being quoted for the first quarter. Trade in general is holding its own, but collections are slow.

MOBILE.—Wholesale trade continues to improve and booking of future orders is up to expectations. The recent cool spell stimulated retail trade, but the winter here has been a remarkably mild one, and retail trade has not been so active this season as formerly.

MONTGOMERY.—Wholesalers report trade and collections as only fair. Retail trade is good.

CHATTANOOGA.—Trade, wholesale and retail, is satisfactory. Collections are good.

MEMPHIS.—Retail trade is quiet, but jobbers report sales increasing; still they are up to those of former years. Collections are slow.

NASHVILLE.—Building material is in healthy demand. Retail dry goods and notions are quiet, but business in jobbing circles is good. Collections are fair.

LITTLE ROCK.—Trade, wholesale and retail, is fairly good, being about equal to that of a year ago. Collections are good.

NEW ORLEANS.—Jobbing trade is light and retail business is only fair. Collections have improved to some extent and money is a little easier. The stage of the Mississippi river is causing some apprehension, but it is generally believed that the Louisiana levees will hold.

DALLAS.—Jobbing trade is good, but retail business is quiet. Collections are fair.

WACO.—All trades report a very satisfactory business. Collections are fair. Crops are favorable.

SAN FRANCISCO.—Building operations are going forward in a satisfactory manner, but are hampered by lack of laborers. Dealers generally report good business. Money is active.

SEATTLE.—The car shortage still retards shipping of eastern Washington wheat into this port. Trade in all lines is brisk. Collections are good.

SPOKANE.—Business continues to be greatly hampered by the inability of the railroads to deliver goods. Collections are slow to fair.

TACOMA.—Retail trade is a little quiet. Inconvenience is felt on account of long overdue shipments resulting from traffic blockades. Collections are fair.

PORTLAND, ORE.—General trade conditions are excellent, both jobbers and retailers reporting an increase over last year's record. Collections are retarded by weather conditions.

TORONTO.—General trade is satisfactory. Dry-goods travelers on the road report conditions excellent. The sorting trade is quite heavy. There has been a big business done here recently for western account. Materials for men's clothing are having an enormous sale, and prices are firm. The outlook favors a big spring millinery trade. Trimmings have advanced 10 to 25 per cent. Ribbons are also higher. Prints are coming forward rather more freely, but they hold firm. The feature of the grocery trade is the sharp advance in canned goods. Stocks are light, and some lines of vegetables are cleared out. Fruits, too, are very firm. There is a good retail trade reported throughout the province, and collections are generally good. Large orders are being placed for spring and summer goods, and shipments are going forward well. Butter holds steady to firm, although the quality of the receipts is not good. Cheese is stiff. There is a shortage in deliveries of oats. Not enough hogs are coming forward to supply the demand, and dressed hold firm at $8.40 to $8.85 per hundredweight for car lots. Cattle prices have picked up considerably lately on account of light runs and a brisk demand. There is now a better demand for exporters than there has been for some time. Wools are steady to firm in sympathy with the European markets. Hides show a slightly easier tone. Leather is brisker, but prices are unchanged.

MONTREAL.—Trade is steady. Spring lines are moving well, and there is every evidence that business will be as heavy as predicted. Continued seasonable weather in all parts of the country has given a good tone to sorting trade in winter lines. Dry goods are active. The recent advance in gray goods and cottons resulted mostly from difficulty in keeping up stocks, owing to heavy demand and shortage of labor. Shortings have also gone up, and there is talk of a further advance in this line. Ribbons are very firm and expected to advance. Plaids and checks are very popular. Canadian knitting mills are very busy and have large orders on hand. Wool prices are firm. Canada will have about 1,000,000 pounds to export from the 1906 clip. Prices are so high that this cannot profitably be used here, and a market is being sought in England. Canned goods have again advanced. The hardware trade is active in all branches and prices generally hold firm for both heavy and shelf goods. The easier tone expected for iron and steel is not yet in evidence and values are firm. Production of pig iron has increased, but not much stock is accumulating. Copper rivets and burs have advanced 2½ per cent. Retail trade here and in the country is generally good, owing to good roads. Little complaint is being heard as to collections. Country produce is slow in coming forward. Receipts of butter are light, but fully 20,000 packages of Canadian butter have returned from England. It is selling at about 24 to 25 cents. Cheese is firm and expected to go higher.

VANCOUVER-VICTORIA.—Coast trade keeps active in all lines. Spring trade is getting on well and it promises to be exceedingly heavy. All provincial industries are very busy, and the shortage of labor is still a big factor. The shipping trade at Vancouver is good for this time of year. Collections are satisfactory.

WINNIPEG.—Snow blockades have greatly interfered with trade. Deliveries of all lines are slow and uncertain. Country retail trade has also been affected. Wherever possible there is a good demand for goods, and it may be supposed that when the roads are once again clear business will be brisk on account of the temporary suspension. It is very evident that spring trade is going to be the heaviest on record. Orders for goods are very large, and, despite adverse conditions, collections from most parts are fair to good.

FINANCIAL.

Money Market.

The banks did not gain this week from the Treasury to the same extent as in the preceding one, and the estimates would show that on the aggregate movement of money there was a loss in the banks' cash holdings of about $1,000,000. One of the features was the continued easing of call money, which on Thursday got down to 1¾ per cent., the lowest rate since last midsummer. At the same time, money on time tended to harden as the week advanced, the rate for three months' funds working up from around 4¾ per cent. to 5½ per cent., while long-time loans, which were negotiated at 5½ per cent., or even a little lower, were in some instances quoted later on at as high as 6 per cent. This resulted, in the main, from preparations for the February disbursements, while there also seemed to be a considerable demand from interests which are participating in the floating of some of the new bond issues. It was noted that foreign exchange developed decided weakness, but owing to the fact that London is experiencing what amounts to a semi-

stringency in its loan market, it is improbable that any large amount of gold should come from abroad, although the engagement of $500,000 specie in London was announced on Friday.

New York Stock Exchange Transactions.

	This week	Last week	Jan. 1 to date	Last year
Stocks, shares	5,758,192	5,900,303	22,903,214	40,202,099
Bonds, R.R. and miscel.	$9,061,000	$10,254,500	$47,361,500	$94,654,900
Bonds, state.	3,000	15,000	21,000	289,000
Bonds, gov.	1,352,000	1,188,500	5,877,500	13,602,100

New York Banks.

In the New York Clearing-House averages of last Saturday the specie and legal tenders together showed a net gain of $3,246,400, which corresponded closely with the estimated increase due to the actual movements of money. The increase of $22,028,100 in the item of loans was construed as indicating that foreign and time loans had been exchanged for borrowings on call. Deposits increased $24,577,200, which amount agreed pretty closely with the changes in cash and loans. The reserve requirements, however, were $6,144,300 larger, and the surplus reserve was consequently reduced by $2,897,900. The figures of the statement compare as follows with those of the preceding week:

	January 26	January 19	Changes
Loans	$1,085,985,400	$1,063,957,300	I. $22,028,100
Specie	196,873,200	192,610,600	I. 4,262,600
Legal tenders	85,442,500	86,458,700	D. 1,016,200
Deposits	*1,067,011,600	1,042,434,400	I. 24,577,200
Circulation	53,543,700	53,631,900	D. 88,200
Total reserve	282,315,700	279,069,300	I. 3,246,400
Reserve required	266,752,900	260,608,600	I. 6,144,300
Surplus reserve	15,562,800	18,460,700	D. 2,897,900

The following table shows the bank holdings on the respective dates:

	Jan. 26, 1907	Jan. 27, 1906	Jan. 28, 1905
Loans	$1,085,985,400	$1,041,113,300	$1,115,643,200
Specie	196,873,200	193,006,400	231,525,200
Legal tenders	85,442,500	84,601,600	92,911,500
Deposits	*1,067,011,600	1,047,112,600	1,189,828,600
Circulation	53,543,700	52,267,400	42,882,200
Total reserve	282,315,700	277,608,000	324,436,700
Reserve required	266,752,900	261,778,150	297,457,150
Surplus reserve	15,562,800	15,829,850	26,979,550

* United States deposits included $16,563,500.

The weekly statement of averages of the banks of this city, Jersey City and Hoboken which are not members of the New York Clearing House Association, but which clear through some of the members, is as follows:

	Jan. 26, 1907	Jan. 27, 1906	Changes from last week
Loans, discounts and investments	$131,682,200	$136,751,500	Dec. $2,493,200
Circulation	2,663,500	2,181,200	Dec. 6,000
Net deposits	141,015,400	146,579,900	Dec. 1,269,300

Foreign Exchange.

The foreign exchange market developed a weak tone as the week progressed. The supply of commercial bills was not especially large, while, on the other hand, the buying demand was, on the whole, moderate. The chief feature in the market was the rather heavy buying of securities, especially the new short-term notes of railway companies, for foreign account, which supplied a considerable amount of exchange, and this led to a weak tone in the market at large. There were no features of interest in the foreign financial situation, the Bank of England's discount rate being unchanged at 5 per cent., while it showed a gain of £647,000 in specie, its proportion of reserve declining, however, from 48.91 per cent. to 48.31 per cent. The market on Friday was firmer at a recovery. The engagement of $500,000 gold in London was announced on Friday.

POSTED RATES OF LEADING DRAWERS FOR LONG AND DEMAND STERLING.

Jan. 26	Jan. 28	Jan. 29	Jan. 30	Jan. 31	Feb. 1
4.82½ @ 4.86½	4.82½ @ 4.86½	4.82½ @ 4.86½	4.82 @ 4.86	4.82 @ 4.86	4.82 @ 4.86

ACTUAL BUSINESS BANKERS' DEMAND STERLING.

4.85.40 @ 4.85.60	4.85.15 @ 4.85.35	4.85.20 @ 4.85 40	4.84.80 @ 4.85.20	4.84.65 @ 4.84.85	4.84.50 @ 4.85.55

ACTUAL BUSINESS BANKERS' SIXTY-DAY STERLING.

4.81.25 @ 4.81.50	4.81.20 @ 4.81.30	4.81.00 @ 4.81.25	4.80.75 @ 4.81.00	4.80.75 @ 4.81.00	4.80.45 @ 4.80.60

Closing quotations on Friday for actual business in other classes of bills were: Cables, 4.85.35; commercial bills, 4.79¾@4.80¾; francs, 5.23⅛ less 1-32@5.20 less 3-64; reichsmarks, 93 11-16 plus 1-32@94½ less 1-64.

In spite of the comparatively good Bank of England statement, money was firm in the London open market this week. Call money is quoted there at 4¾@5 per cent., while discount is 4⅝@4⅞ per cent. The Bank of France this week lost 5,850,000 francs in gold. Its rate is still 3 per cent., the Paris market rate for loans being 4 per cent. At Berlin the bank rate is 6 per cent., and the market for discount 4⅜ per cent.

New York Securities Market.

While money continued easy, the New York stock market in the early part of the present week experienced a further exhibition of bearishness on the part of traders, with attacks on prices and not a little liquidation, particularly in high-priced stocks. The leading securities, such as Reading, St. Paul, Union Pacific, Great Northern and Northern Pacific, all yielded rather sharply under the selling pressure, while certain of the more active specialties, notably Erie and Southern Railway, were decidedly weak. The unsteadiness of Amalgamated Copper, which had previously seemed to have a certain degree of support, was also commented upon and led to unfavorable conclusions about the attitude of the Standard Oil interests toward the market. It was noteworthy that the exceedingly favorable quarterly report of the United States Steel Corporation, which exceeds all records as to the magnitude of earnings, and, furthermore, shows that 1906 was the banner year for the organization, had little or no effect in the market. The Steel stocks, it is true, were comparatively steady, but no speculative interest developed in them, which would in part be explained by the fact that in spite of the admirable showing as to earnings, the directors refrained from making any increase in the dividend on the common. In the midweek, however, it was plain that the liquidation had been pretty well exhausted and that the market was becoming oversold. It was also noted that the prices for a good many of the standard stocks had reached a level at which such securities were attractive to conservative investors, and that not a little buying of that kind was in evidence. Thursday, accordingly, witnessed a rather brisk rally and a recovery from the quotations made early in the week, which in a good many instances had been the lowest since January 1. On Friday, however, there was a renewed selling movement and further declines throughout the list.

In explaining the market's action, Wall street seems to labor under no illusions. It is fully realized that while general conditions as to business, railroad earnings, etc., are fully as favorable as at any time in the past twelve months, and while money is again easy, there is a widespread feeling of timidity about the market effects of the enormous issues of new securities, with which to provide money for improvements, which are being put out by railroad and other corporations. The question is asked on all sides whether, in the event of a reverse in business such as might result from poor crops or other causes, railroad companies which are raising all this additional capital and increasing their fixed charges correspondingly will have net earnings on the same scale as at present. This argument seems to have a good deal of weight with investors and would account in large measure for the limited buying power, although, as already stated, it is not universally accepted, and does not prevent a certain amount of fresh buying of high-grade stocks from appearing at the concessions. No especially noteworthy incidents occurred during the week, which has, in fact, been somewhat barren so far as news bearing on the market is concerned, and current discussion in stock market circles had to deal very largely with the possibility of some future developments in the railroad situation, which seemed to depend largely upon the termination of the sessions of Congress or the state legislatures.

Boston Stock Market.

Prices of principal stocks, with volume of transactions, on the Boston Stock Exchange, have been as follows:

General Mention.

The Liverpool and London and Globe Insurance Company in its fifty-ninth annual statement of its United States branch for the calendar year 1906 shows total assets of $12,335,961, which include real estate amounting to $1,851,697; United States government 4 per cent. bonds, $900,752; state and city bonds and railroad stocks and bonds, $3,578,720; bonds and mortgages, $2,962,950; bank balances and all other assets, $3,041,841. The company reports unearned premiums and all other liabilities, $7,712,310, leaving a surplus of $4,623,651. The surplus is somewhat smaller than last year, but the decrease is not so large as might be expected in view of the fact that the company has paid out fire losses on account of the San Francisco disaster aggregating $4,522,905. The New York directors are Charles H. Marshall, chairman; John Crosby Brown, Walter C. Hubbard, John A Stewart, Edmund D. Randolph. Henry W. Eaton, resident manager.

Fluctuations in American Wheat Stocks.

Increases and decreases of available wheat stocks, United States and Canada, east of the Rocky mountains, with revised comparisons for two preceding years:

Week ending	1907	1906	1905
January 5	+1,155,000	+1,767,000	—48,000
January 12	+83,000	+1,229,000	—908,000
January 19	—1,487,000	+1,130,000	—588,000
January 26	—600,000	—74,000	+7,000

Wheat and Flour Exports.

[Special to BRADSTREET'S.]

The quantity of wheat (including flour as wheat) exported from United States and Canadian ports for the week ending with Thursday compares as follows, in bushels:

Week ending	1907	1906	1905
January 3	4,255,270	3,839,741	1,411,947
January 10	4,073,110	4,768,772	700,950
January 17	2,636,460	3,448,862	1,138,974
January 24	3,328,255	3,433,585	1,101,587
January 31	2,102,216	3,056,208	945,358
Largest exports in 1906, week ending Aug. 30			5,188,817
Smallest exports in 1906, week ending July 19			1,535,967
Largest recorded exports, week ending Aug. 11, 1901			9,039,761
Smallest recorded exports, week end'g Feb. 16, 1905			536,540

Corn Exports, in Bushels.

[Special to BRADSTREET'S.]

Week ending	1907	1906	1905
January 3	1,974,599	6,265,333	3,186,532
January 10	1,296,187	5,342,569	2,932,014

Total	2,128,105	1,721,156	317,944

In addition to the above, 231,706 bushels of oats and 593,701 bushels of barley were exported.

Statistical Situation of Cotton.

The aggregate world's visible supply of American and other cotton last week, as made up by the New Orleans Cotton Exchange, is shown, with comparisons:

Week ending	*Jan.* 25, 1907	*Jan.* 18, 1907	*Jan.* 26, 1906
American	4,360,064	4,443,706	3,905,208
Other kinds	1,142,000	1,136,000	1,458,000
Total	5,502,064	5,479,706	5,363,208

Of the world's visible supply, as above, there were afloat for or held in various countries on the dates given the following quantities:

	Jan. 25, 1907	*Jan.* 18, 1907	*Jan.* 26, 1906
Great Britain and continent	2,818,000	2,816,000	2,702,000
Egypt	245,000	245,000	207,000
India	494,000	475,000	807,000
United States	1,945,000	1,944,000	1,647,000
Total	5,502,000	5,480,000	5,363,000

Following will be found the movement of cotton into sight for the week and season, as compiled by the New York Cotton Exchange:

	This week	*Last week*	*Last year*
Week	392,740	395,192	211,584
Season	9,916,256	9,570,820	8,050,505

Boston Wool Market.

With the firm closing of the London wool sales, which has further strengthened the local market, the attention of dealers is turning to the west, where interest at this time of year generally is centered. The local market, on account of the small stocks, is rather quiet at present, but the presence of leading buyers in Boston would indicate that less is being done in the way of contracting than has been the rule at this time in former years. Considerable wool has been contracted for in Idaho, Wyoming and Utah at 22@23 cents thus far, and in western Idaho at 17@18 cents, but principally by western parties. Such domestic wools as are available are in moderate demand in the Boston market but the selection is limited, and the chief activity among the dealers is the rush of deliveries on old contracts made during the last part of 1906. The firm closing in London has made local dealers sure that their stocks of domestic wools can be disposed of at top prices, when comparison is made with the arrivals of foreign wools at the prices paid abroad. American mills have purchased fine merinos freely abroad this year, but the main part of the purchases in London which will come onto this market are crossbreds, 50s to 56s, and will not be much interfered with by the direct purchases from Australia, which can be brought here at a smaller figure. Shearing has commenced in Arizona, and sales are reported at 20@21 cents, fully 1 cent below last year, but growers are very firm in their ideas. In this market fine and fine medium territories have sold at 21@23 cents, Idaho and Utah at 22@23 cents, Montana at 22@23 cents in small lots, scoured wools at 68@70 cents for fine and fine medium, Ohio XX fleeces at 34@34½ cents, choice unmerchantable at 32 cents, fine unwashed at 26½ cents, unwashed delaine at 30 cents, washed delaine at 37½ cents, three-eighths fleeces at 34½@35 cents, quarter-blood fleeces at 33½ cents for Ohio and 32½ cents for Michigan, staple Oregon at 23@24 cents, middle counties California at 21@22 cents, new fall California at 11@12 cents in the grease, choice white B pulled wools at 52@54 cents, ordinary Bs at at 47@50 cents, and Australian merino, 64s to 70s, at 43½@44 cents.

Boston Shoe and Leather Market.

Recent advances in prices have checked trading in hemlock sole leather. Sole cutters are buying union sole to cover orders as fast as received. Oak sole is held for full quotations. Tanners have caught up to demand on rough leather and the market is only fairly steady. Finished splits are still sold ahead. There is more request for grain leather, both domestic and foreign, buyers taking fair-sized lots, with prospects of better business still to come. Patent and enameled leather dealers are still behind on orders on account of unfavorable weather. Hides are steady and conditions are rather discouraging for those who hoped for material concessions. Sole-leather hides are closely sold up. The visiting shoe buyers are about through with their inspection of the Boston market. It is apparent everywhere that the conservative policy adopted last year will be continued. No disposition to take advantage of present prices has been shown; rather a fear that the present level cannot be indefinitely maintained, and orders have been placed in accordance with conservative estimates of requirements. Prices have not been a hindrance to business, but it is evident that jobbers and retailers are making an effort to have just as few high priced goods as possible on hand when the turn comes, whether it is this year, next year or years from now. Some factories have six or eight weeks' business ahead. The *Shoe and Leather Reporter's* figures continue to reflect the lack of snap and rush as compared with a year ago, viz.: Last week, 88,501 cases; preceding week, 89,421; last year, 101,858; total for 1907, 363,387; total for 1906, 406,618; decrease, 43,231.

LONDON'S BANK CLEARINGS.

A correspondent of the Chicago *Banker* says: "A problem that has agitated the minds of the managers of the London clearing bankers for a generation is now in a fair way of settling itself by the inauguration, on February 19, of the metropolitan clearing. It has always been a matter of surprise that so obvious a necessity to the completion of the clearing system should be wanting. The fact that the drafts payable at the suburban branches of the London clearing bankers have not hitherto been collected through the London clearing house, while those payable at the city offices and country branches have been so treated, has always appeared inconsistent; and the new clearing about to be established was required to complete the London clearing system. The antiquated and expensive mode of collecting, within a narrow radius, by a large army of walk clerks, and by letter within a radius extending a little further out, is inadequate to the present demands. No doubt when the suburban branches of the London clearing bankers were few in number the necessity for reform was not so evident, but the expansion of banking accommodation in recent years has nowhere been so great as in and around London, and the fact that amalgamations have practically placed the whole of the suburbs of London in the hands of the London clearing bankers has done much towards ripening the time for change.

"It is admitted that the scientific mode of collection of cheques through the clearing has done much, if not all, in securing the bankers' cheque the important position it now holds in the currency of the country, and the London clearing bankers are wise in taking this opportunity of making it evident to the public that all cheques drawn on them are clearing cheques.

"The new system, briefly stated, is that deliveries will be made at the clearing house in the early morning of all cheques drawn on the branches of the London clearing bankers and of the London and Provincial Bank (Messrs. Glyn & Co. acting as their agents), embracing a larger area than has hitherto been possible to collect by walk clerks; the head offices will undertake the presentation to their own branches, and the settlement will take place the same day. All branches outside the extended area will in future be treated for clearing purposes as country branches. The benefit of the extended area must commend itself to every one, and the collection will include all remittances received by first post in the morning, all credits paid into the head offices on the previous day and, in addition, any credits that may be paid into the head offices by ten o'clock on ordinary days and on Saturdays by half-past nine o'clock. It may seem at first sight that the outside area, which will of necessity be thrown into the country cheque clearing, will be placed at a disadvantage; this, however, on analysis, proves to be so to a very limited extent, and will adversely affect but few. Drafts on these branches have hitherto been collected through the post or by letters delivered to the head offices of the banks on which they are drawn by the presenting bankers, and were generally delivered to the branches for payment the day following their receipt by the presenting banker; the fate was supposed to be known in the afternoon of the day they were presented; frequently, however, from various causes, advice was delayed and it was seldom safe to conclude that these drafts were paid until the third day after receipt by head office of presenting banker. In case of unpaids, if belonging to a country bank or country branch, they would be posted the same night as received back from the branch on which they were drawn; if belonging to a town customer they might possibly get into his hands the same night, but in the more general way they would not reach him until the following morning. Under the new scheme the country client will be in no worse position with these drafts, as they will be collected through the country cheque clearing, and as it is a rule in that clearing that all unpaid cheques are to be returned direct to the bank or branch whose name is across it, it follows that unpaid cheques belonging to country banks and branches will be received back at the same time as they hitherto were. In the few cases of the town customer referred to above, the delay of the returns will be only a few hours, while compensation will be afforded by the extended area in which the fate will be known the same day it is paid into the account, if received by the presenting banker in time for the metropolitan clearing."

THE 1906 COTTON TRADE OF CHINA.

The reduction in importation of cotton goods into China is not confined to the American product. Much interest and some anxiety have been developed in the United States by reason of the fact that our own export figures show a fall of about $14,000,000 in the value of cotton cloths sent to China in the eleven months ending with November, 1906, compared with the corresponding months of 1905. This falling off was explained by those acquainted with that trade as largely the result of overimportations of cotton goods into China last year, and figures from China just received by the Bureau of Statistics of the Department of Commerce and Labor seem to sustain the assertion that the reduction in China's imports is general and not aimed exclusively at the products of the United States.

The commercial statements of the Chinese government are issued in quarterly and annual statements. The quarterly statements give merely the quantity of certain articles entering the principal ports of China, but do not give the figures of values. They are further complicated by the fact that the figures of imports of the interior and smaller coast cities include the merchandise reshipped thence from the larger ports of China. It is not practicable, therefore, to state from these quarterly returns the aggregate quantity of the various classes of cotton cloths imported into all China. The fact, however, that Shanghai is the principal port of original entry for cotton goods and many other leading articles imported, and that more than two-thirds of the total imports of China enter originally at Shanghai, indicates that an examination of the quarterly figures of imports at that port will give a fair indication of the trend of the import trade of China for the elapsed period of the current year.

These quarterly statements of the Chinese government regarding the imports of the current year have reached the Bureau of Statistics and cover the three quarters ending with September, 1906. A combination of these three quarterly statements indicates that the falling off in imports of cotton piece goods from the United Kingdom, our chief rival in the cotton trade of China, is as great proportionately as in the case of the United States.

The four principal classes of cotton goods which China has been accustomed to draw from the United States and the United Kingdom in any considerable quantities are cotton sheetings, shirtings, drills and jeans.

The quarterly statements in question show that the imports at Shanghai of American gray sheetings, which increased from 990,426 pieces in the nine months ending with September, 1904, to 6,163,820 pieces in the nine months ending with September, 1905, fell to 4,750,744 pieces in the nine months ending with September, 1906. English gray sheetings, the imports of which amounted to 414,811 pieces in the nine months ending with September, 1904, were 343,318 pieces in the same months of 1905, and 283,256 pieces in the corresponding months of 1906. Of Japanese sheetings, imports in the first nine months of 1904 were 115,260 pieces; in the corresponding months of 1905 they were 46,962 pieces, and in the same months of 1906, 93,252 pieces.

Of drills, the imports into Shanghai of the American product were, for the nine months ending with September, 1904, 702,189 pieces; in the nine months of 1905, 2,525,534 pieces, and in the nine months of 1906, 1,680,235 pieces. Of English drills, the imports into Shanghai were, in the nine months of 1904, 78,393 pieces; in the same months of 1905, 215,667 pieces, and in the corresponding months of 1906, 145,654 pieces. Of Japanese drills, the imports into Shanghai in the nine months of 1904 were 37,233 pieces; in the same months of 1905, 81 pieces, and in the corresponding months of 1906, 2,566 pieces.

Of American jeans, the imports into Shanghai in the nine months ending with September, 1904, were 89,860 pieces; in the corresponding months of 1905, 320,070 pieces, and in the same period of 1906, 212,380 pieces. Of English jeans, the import figures were, for the nine months of 1904, 232,962 pieces; of 1905, 640,005 pieces, and of 1906, 340,162 pieces. Of Dutch jeans, the import figures for the nine months of 1904 were 5,688 pieces; of 1905, 63,319 pieces, and of 1906, 18,991 pieces.

Of American gray shirtings, the import figures for the first nine months of 1904 were 61,324 pieces; of 1905, 342,663 pieces, and of 1906, 239,145 pieces. Of English gray shirtings, the imports in the nine months of 1904 were 2,490,674 pieces; of 1905, 5,154,483 pieces, and of 1906, 3,795,241 pieces; and of Japanese gray shirtings, the imports in the nine months of 1904 were 2,740 pieces; of 1905, 3,994 pieces, and of 1906, 1,221 pieces.

A condensation of these statements regarding the various great classes of cotton goods imported at Shanghai—sheetings, shirtings, drills and jeans—shows that the total number of pieces of these four principal classes of cotton goods from the United States was, in the nine months ending with September, 1905, 9,352,087, and in the corresponding period of 1906, 6,882,504, a reduction of 26 per cent.; and that the number of pieces of English goods of these four classes imported was, in the nine months of 1905, 6,353,473, and in the same months of 1906, 4,563,313, also a reduction of 26 per cent. In the case of Japanese goods, the number of pieces of these classes imported was, for the nine months of 1905, but 51,037, and in the corresponding months of 1906 but 97,039—so small a total as so have no perceptible effect, of course, upon the receipts from other countries.

These figures of imports at Shanghai do not, of course, include all of the cotton goods of these principal classes imported into China; but the fact above alluded to, that the other ports include in their figures of imports the foreign merchandise brought from other ports of China, makes it impossible to obtain from the quarterly statements in question the net figure of cottons imported into China as a whole, though the fact that about two-thirds of the general imports of China enter at Shanghai suggests that the above figures may be accepted as a fair measure of conditions in the cotton piece goods trade of China in 1906, compared with 1905.

Another method, however, of determining whether the United Kingdom, our chief rival in the cotton trade of China, is also experiencing a reduction in its shipments of cotton goods to China, is available by an examination of the export statements of the United Kingdom, which have reached the Bureau of Statistics for the ten months ending with October. They show that the number of yards of gray or unbleached piece goods shipped to China in the ten months of 1905 was 311,995,900, and in the ten months of 1906, 216,584,700; of bleached piece goods, in the ten months of 1905, 188,832,500, and in the corresponding months of 1906, 154,564,100; and of dyed piece goods, in the ten months of 1905, 135,895,100, and in the same months of 1906, 140,310,300. Thus the total quantity of piece goods exported from the United Kingdom to China in the ten months' period decreased from 636,723,500 yards in 1905 to 511,459,100 yards in 1906. In values the fall shown by the figures of the United Kingdom is not so great as that shown by the figures of the United States, the value of British exports of cottons to China in the ten months ending with October, 1905, being, in round terms, $41,000,000, and in the corresponding months of 1906, $36,000,000; while in the case of the United States the figures for the eleven months ending with October, 1905, were, in round terms, $31,000,000, and in the same months of 1906, $17,000,000.

FINANCIAL

$40,000,000
American Telephone & Telegraph Company
Convertible Four Per Cent. Gold Bonds
DUE MARCH 1, 1936

Part of an issue limited to $150,000,000. All or any part of the issue redeemable at the option of the Company at 105 per cent. and accrued interest on and after March 1, 1914, upon twelve weeks' notice.

Attention is called to a letter from Mr. F. P. Fish, President, which can be had from the undersigned, which states among other things, that the bonds are convertible at par, at the option of the holder, into common stock at $140 per share after March 1, 1909, and before March 1, 1918, and in the meantime up to thirty days prior to the date of redemption named in any redemption call. If additional stock is issued or sold at a price averaging less than $140 per share, Bondholders will have the benefit of a reduced conversion price.

Interest payable semi-annually on March 1 and September 1 in New York or Boston.

Principal and interest payable without deduction for any tax or taxes which may be imposed by the laws of the United States of America, or of any state, county, or municipality therein, and which the Company may be required to pay or deduct therefrom.

OLD COLONY TRUST COMPANY, Trustee.

Coupon Bonds of the denomination of $1,000 each, with registration provision, and privilege to reconvert Registered Bonds into Coupon Bonds.

Referring to the above, the undersigned offer for public subscription the above Bonds, at the price of 92½% and accrued interest to date of full payment, payable in instalments as follows:

On application	$50 per $1,000 Bond
" allotment	50 " 1,000 "

Balance and accrued interest on or before March 28, 1907.

The subscription list will be opened at 10 a. m. on Tuesday, February 5, 1907, and will be closed at or before 3 p. m. the same day.

The undersigned reserve to themselves the right to close the subscription list at any time without notice and to reject any subscriptions and to allot smaller amounts than applied for.

All subscriptions should be made on the form, which can be obtained from the undersigned, and must be accompanied by a deposit of $50 per $1,000 Bond.

If no allotment be made, the deposit will be returned in full, and if only a portion of the amount applied for be allotted, the balance of the deposit will be appropriated towards the amount due on allotment. If any further balance remains, such balance will be returned. Failure to pay any instalments at due dates will render all previous payments liable to forfeiture.

The Bonds will be delivered by the undersigned upon payment in full therefor.

Application will be made to list the above Bonds on the New York, Boston, and London Stock Exchanges.

For further details regarding the above Bonds, reference is made to the Trust Indenture under which they are issued, and to the letter from F. P. Fish, Esq., President of the Company, copies of which may be obtained at the offices of the undersigned.

Preference on allotment under subscription will be accorded to shareholders of the American Telephone and Telegraph Company to the extent of 1-5, or 20 per cent. of the par value of their holdings of stock in the Company.

A simultaneous public issue of the above Bonds is being made by Messrs. Baring Brothers & Co., Ltd., and Messrs. J. S. Morgan & Co., in London, and by Messrs. Hope & Co., in Amsterdam.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, FEBRUARY 9, 1907.

The contract to construct the Panama canal has not yet been awarded. The bid of one of the contractors is regarded by the administration officials as too high, and to all appearance they have not decided to award the contract to the other party or combination. It is now understood that before anything definite is done there will be a hearing of both contractors and the interests they represent, and in particular as thorough an examination as possible into the qualifications, experience, business standing and achievements of the lowest bidder and his associates, and into the responsibility of his sureties. This investigation may consume a fortnight. In the meantime the notion seems to be growing in government circles that the plan to award the contract to private concerns may be abandoned and that the government may do the work itself.

Late advices seem to indicate that something more was done at the recent tariff conferences in Berlin than simply reaching an amicable understanding upon general points. There is now talk of an agreement having been actually formulated which it will be possible to put into shape for action by the Senate at some date in the near future. Whatever has been done by the United States representatives will, of course, require the affirming action of the State Department, but any suggestions made by the American delegates after a careful survey of the whole situation, such as they were selected to make, would naturally carry great weight. It will occasion no surprise if a reciprocity treaty should be laid before the Senate soon as the result of the recent visit of the tariff commissioners to Germany.

Once again the prospects of currency legislation are engaging attention. The Senate Committee on Finance has taken up the matter and appears to have reached the conclusion that any proposed legislation at the present session must be of the simplest character if it would stand a chance of enactment. No general scheme of credit currency seems to find favor with the committee. Indeed, up to the present the members have devoted themselves mainly to finding out what kind of relief legislation will be acceptable to the legislators on both sides. Thus far two features of a plan seem to have been developed, namely, the removal of the existing restrictions against the deposit in national bank depositories of the government receipts from customs duties, and the enlargement of the amount of national bank notes that can be withdrawn in any one month. There is talk of incorporating these provisions as amendments to a bill providing for an increase in the volume of small bills which passed the House last spring.

It seems likely now that there will be no legislation respecting immigration at the present session of Congress. A Senate amendment proposing an educational qualification is strenuously opposed by the House conferees, while a House amendment waiving requirements as to the amount of money an immigrant must have is antagonized by the Senate representatives. The situation is in the nature of a deadlock, and the prospect is that the pending bill will be allowed to die. In lieu of it an effort will be made to secure the appointment of a commission to investigate the whole question of immigration with the view to laying a basis for future legislation of a comprehensive kind.

Some discussion has arisen regarding the position of the short-term notes of railroad companies, which are at present one of the most popular methods available for raising the funds for improvements, etc., which corporations of that class require. According to some authorities, the notes, as a rule, would, in the event of any disaster to the companies issuing them, possess a claim equivalent merely to that of any general creditor, while others uphold the view that the notes would rank immediately after the junior bonds of the systems responsible for them. It must be admitted that in many cases the first-mentioned theory would seem to hold good, and in a great many instances the popularity of the short-time notes, and the readiness with which they have been absorbed by the investing public, rests upon the fact that before any default could occur in the payment of the principal or the interest thereon the companies would be forced to suspend the payment of dividends upon their stocks. Furthermore, in most instances the surpluses which have been shown by the roads in question over their fixed charges have been so large as to leave no doubt about the practical safety of the notes, and would furthermore render suspension or reduction of dividends on their stocks a very remote possibility. It should also be considered, however, that the terms of the various note issues which have been put upon the market vary a great deal, in some instances being secured by the deposit of general mortgage or other bonds, the ultimate sale of which, whenever the bond market is more favorable for such operations, being relied upon to provide the funds with which the notes will be paid off, either at or prior to their maturity.

Disturbances in Central America have been by no means infrequent in the past, and for the most part have not been of a nature to call for much notice. Last year, however, a treaty was entered into on the cruiser Marblehead, lying off the coast of Salvador, which it was hoped would bring about a new era in Central American affairs. In this treaty it was stipulated, among other things, that any questions arising under it or any new concrete difficulties that might arise between the republics involved, namely, Salvador, Honduras and Nicaragua, should be submitted to arbitration by the presidents of the United States and Mexico. An occasion for the application of this provision has lately arisen. A dispute of long standing has led to trouble between Honduras and Nicaragua, and there is said to be serious danger of war between the two countries in which the other Central American states may be involved. Negotiations are now in progress between the governments of the two republics, and it is understood that the Washington authorities have joined with those of Mexico in an endeavor to prevent the outbreak of hostilities.

Prospects are now much brighter for a settlement of the long-drawn conflict between the principal local traction companies of Chicago and the municipal government of that city. The City Council passed this week the ordinances which were framed some time ago as a result of prolonged negotiations between representatives of the municipality and those of the Chicago City Railway and Chicago Union Traction companies. Under the terms of these measures the voters must at the spring election, early in April, express their approval or disapproval of the compromise. If approved, the extraordinary improvements which are to be made under the terms of the plan must begin within one hundred and twenty days after the election, and it is also provided that in case the city ultimately takes over the properties or transfers them to other corporations, the present companies shall be reimbursed with a profit of 15 per cent. upon all outlays for improvements. It is, of course, impossible to foretell what will be the result of the referendum. It is, however, generally accepted that it is a fair one to both parties, while it is also fully recognized that the matter of giving Chicago a modern traction service in place of the present worn-out system is something of vital importance to the city and its inhabitants. It will be seen that while the advocates of municipal ownership continue to be heard from, the present plan involves the abandonment for a time of ideas of that character in connection with the traction interests of Chicago.

Government receipts have been well in excess of the expenditures for the portion of the fiscal year that has elapsed. The receipts were over $9,275,000 in excess of the expenditures for the month of December, and they showed an excess of over $7,400,000 for the month of January. The receipts for the first seven months of the fiscal year amounted to $383,698,617 and the expenditures to $351,240,209, showing a surplus for the period of $32,458,408. At this time last year there was a deficit of not far from $3,400,000, so that, as will be seen, the balance is well on the credit side of the Treasury's accounts as compared with a year ago.

Not much can yet be learned about the composition of the new Douma as disclosed by the elections thus far held. It appears that a large majority of the urban electors are Constitutional Democrats, while the first elections of landowners show the return of a considerable number of Conservatives. The results so far reached in the larger cities indicate the return of a large proportion if not a majority of members of the Left. Inasmuch, however, as the process of election is indirect and the representatives are not chosen at one time, there is not the same opportunity of gauging the outcome as, for example, in the United States, where the trend of the elections may be determined with substantial accuracy in a night.

The reballoting in the Reichstag elections in Germany has emphasized the victory of the government. There have been further losses in the Socialist representation, so that that party now returns shorn of half its strength. All other political parties seem to have benefited from the Socialist reverses, the Clericals in particular showing up strong. The outcome has been received with demonstrations of approval throughout Germany, particularly in the capital, where the sentiment of the people has been strongly in favor of the policy of the Kaiser and his Chancellor. The new Reichstag will meet on February 19.

STAPLE PRICES STILL RISING.

Insistent demand or, in the absence of new business, large orders booked for delivery for months to come, make for a strong and still steadily rising scale of prices. Perhaps the most notable feature of the entire prices exhibit is the steady strength manifested by so many distinct articles of consumption. Thus, during the month of January, fully one-half of all the 107 staple articles covered by BRADSTREET'S table of commodity prices remained steady and unchanged, while nearly one-third advanced and only one-fifth declined. The result was that ten out of thirteen classes of commodities advanced, while only two declined and one remained unchanged. Consequently the general level of all values, as indicated by BRADSTREET'S approximate index number, is steadily strong at the highest point ever recorded.

BRADSTREET'S approximate index number on February 1, 1907, was $8.9853, a gain of eight-tenths of 1 per cent. on January 1, of 9 per cent. over February 1, 1906, and of 57 per cent. over July 1, 1896. Fluctuations in the index number in the past fifteen years are shown in the following table, which gives the respective swings from high to low and the reverse thereof, as noted by BRADSTREET'S approximate index number:

Jan. 1, 1892	$8.1382	Sept. 1, 1905	$8.2795
July 1, 1896	5.7019	Oct. 1, 1905	8.2298
Jan 1, 1897	6.1164	Nov. 1, 1905	8.2497
July 1, 1897	5.8537	Dec. 1, 1905	8.3014
Feb. 1, 1900	8.2307	Jan. 1, 1906	8.3289
June 1, 1901	7.4181	Feb. 1, 1906	8 2415
Dec. 1, 1902	8.1413	Mar. 1, 1906	8.2321
Aug. 1, 1903	7.7473	April 1, 1906	8.2987
Feb. 1, 1904	8.0973	May 1, 1906	8 3054
July 1, 1904	7.6318	June 1, 1906	8.3203
Jan. 1, 1905	8.0827	July 1, 1906	8.2835
Feb. 1, 1905	8.0805	Aug. 1, 1906	8.3379
Mar. 1, 1905	8 0976	Sept. 1, 1906	8.4428
April 1, 1905	7.9996	Oct. 1, 1906	8 5480
May 1, 1905	7.9700	Nov 1, 1906	8.7409
June 1, 1905	7.9073	Dec. 1, 1906	8.8923
July 1, 1905	7.9160	Jan. 1, 1907	8.9072
Aug. 1, 1905	8.1111	Feb. 1, 1907	8.9853

This table gives the index numbers (prices per pound) at different dates by groups of commodities:

	July 1, 1896	*Feb.* 1, 1906	*Dec.* 1, 1906	*Jan.* 1, 1907	*Feb.* 1, 1907
Breadstuffs	$0.0524	$0.0790	$0.0758	$0.0752	$0.0777
Live stock	.1855	.3125	.3185	.3215	.3245
Provisions	1.3619	1.8536	2.0738	2.0709	2.0903
Fruits	.1210	.1436	.2157	.2010	.2070
Hides and leather.	.8250	1.1750	1.2000	1.2100	1.2062
Textiles	1.5709	2.5121	2.6409	2.6649	2.7048
Metals	.3757	.7015	.8298	.8371	.8413
Coal and coke	.0048	.0071	.0078	.0080	.0082
Oils	.2082	.3008	.3095	.3087	.3181
Naval stores	.0402	.1038	.1088	.1095	.1164
Building materials	.0716	.0804	.0929	.0936	.0926
Chem. and drugs	.6607	.6951	.7083	.7083	.7083
Miscellaneous	.2150	.2770	.3015	.2895	.2899
Total	5.7019	8.2415	8.8923	8.9072	8.9853

Examination of the detailed price table given herewith shows notable strength in textiles and provisions. For the first, the immense demand for and advancing prices of cotton and cotton goods is largely responsible, though it is to be noted that jute and flax are also strong, while some grades of wool and raw silk are lower. In provisions, the strength of hog products is the moving feature. With demand no smaller, the pack of hogs is considerably less than a year ago. Breadstuffs are all higher on the month, and vegetable oils are also stronger. Two important decreases shown are those of hides and yellow pine. In all, thirty-one products advanced during the month of January, while twenty-two declined and fifty-three remained unchanged, as the following table shows:

FEBRUARY 1, 1907, COMPARED WITH JANUARY 1, 1907.

INCREASES.

Wheat	Mackerel	Cotton sheetings
Corn	Codfish	Copper
Oats	Potatoes	Southern coke
Barley	Apples	Linseed oil
Flour	Lemons	Cotton-seed oil
Hogs	Currants	Olive oil
Hogs, carcasses	Cotton	Rosin
Beef, family	Jute	Turpentine
Pork	Flax	Quinine
Bacon	Ginghams	Cotton seed
Lard		

DECREASES.

Beeves	Cranberries	Tin
Sheep	Peanuts	Connellsville coke
Mutton	Hides	Tar
Milk	Wool, Australian	Yellow pine
Butter	Silk	Rubber
Coffee	Steel billets	Ground bone
Rice	Silver	Hay
Beans		

UNCHANGED.

Rye	Print cloths	Nails
Horses	Standard sheetings	Glass
Beef, carcasses	Iron ore	Spruce timber
Eggs	Eastern pig iron	Hemlock timber
Bread	Southern pig iron	Alum
Hams	Bessemer pig iron	Bicarbonate soda
Cheese	Steel rails	Borax
Sugar	Tinplates	Carbolic acid
Tea	Steel beams	Caustic soda
Molasses	Lead	Nitric acid
Salt	Quicksilver	Sulphuric acid
Peas	Anthracite coal	Phosphate rock
Raisins	Bituminous coal	Alcohol
Hemlock leather	Petroleum, crude	Opium
Union leather	Petroleum, refined	Hops
Oak leather	Castor oil	Tobacco
Wool, O. and Pa.	Brick	Paper
Hemp	Lime	

Compared with a year ago, the larger majority of prices are higher, as the following table shows:

FEBRUARY 1, 1907, COMPARED WITH FEBRUARY 1, 1906.

INCREASES.

Corn	Hemlock leather	Connellsville coke
Oats	Oak leather	Southern coke
Barley	Wool, Australian	Cotton-seed oil
Beeves	Jute	Castor oil
Hogs	Silk	Olive oil
Beef, carcasses	Flax	Rosin
Hogs, carcasses	Print cloths	Turpentine
Eggs	Ginghams	Tar
Beef, family	Cotton sheetings	Lime
Pork	Iron ore	Nails
Bacon	Eastern pig iron	Glass
Hams	Southern pig iron	Yellow pine
Lard	Bessemer pig iron	Hemlock timber
Butter	Steel billets	Borax
Mackerel	Tinplates	Carbolic acid
Codfish	Steel beams	Alcohol
Molasses	Silver	Opium
Peanuts	Copper	Quinine
Lemons	Lead	Tobacco
Raisins	Tin	Paper
Currants	Quicksilver	Hay
Hides	Bituminous coal	Cotton seed

DECREASES.

Wheat	Salt	Hemp
Rye	Rice	Standard sheetings
Flour	Beans	Petroleum, refined
Sheep	Peas	Linseed oil
Horses	Potatoes	Brick
Mutton	Apples	Spruce timber
Coffee	Cranberries	Hops
Tea	Cotton	Rubber

UNCHANGED.

Milk	Steel rails	Caustic soda
Bread	Anthracite coal	Nitric acid
Cheese	Petroleum, crude	Sulphuric acid
Sugar	Alum	Phosphate rock
Union leather	Bicarbonate soda	Ground bone
Wool, O. and Pa.		

It will be seen that sixty-six different staples are higher, while twenty-four are lower and sixteen remain unchanged, as compared with a year ago.

FAILURES FEW, LIABILITIES LARGE.

Failures are always numerous just after the close of the year, and this year is no exception to the rule, though it is to be noted that the number of casualties reported in January is the smallest there is record of in that month for fifteen years past. Liabilities, it is true, are heavier than the normal, but this is the result of several failures of associated concerns in the steel and wire business which have swelled the total of failure damage largely.

There were 1,109 failures reported to BRADSTREET'S for the full calendar month of January, 1907, a decrease of 9.8 per cent. from the total of January, 1906, and the smallest total reported in January since 1893. It might be noted in this connection that failures in January this year were slightly fewer than in the exceptionally favorable years 1904 and 1903, which stamps the month just closed as being an unprecedentedly prosperous period. The liabilities for the month aggregated $18,075,595, an increase of 13 per cent. over January, 1906, and the heaviest volume of failure damage reported in January since 1897.

The following table allows of January comparisons of failures, assets and liabilities yearly back to 1893:

	Number	*Assets*	*Liabilities*
1907	1,109	$8,593,134	$18,075,595
1906	1,213	6,636,350	15,360,188
1905	1,199	6,058,467	11,113,964
1904	1,121	9,765,868	17,076,595
1903	1,113	4,538,343	10,529,372
1902	1,343	6,113,284	14,580,064
1901	1,253	6,611,238	12,334,212
1900	1,138	4,166,630	10,256,120
1899	1,252	6,669,748	14,369,596
1898	1,540	7,083,327	14,359,335
1897	1,867	14,581,506	25,490,042
1896	2,147	16,097,359	30.207,250
1895	1,818	14,505,120	24,883,550
1894	1,953	11,913,989	22,516,848
1893	1,130	9,274,163	16,733,942

The failures by groups of states show that there were fewer casualties reported in every section of the country than last year, with the exception of the territories. New York City failures were 13 per cent. fewer in number than a year ago, but the liabilities were more than three times as large as in January last year, owing to the inclusion of the steel and wire companies mentioned above. This increase at New York, in fact, accounts for the entire increase in liabilities over January a year ago. Western liabilities are shown to be less than one-third those of last January, and decreases in failure damage are noted in New England and the far west, while the south shows the only important increase in addition to that reported in the western group.

January	*No.* 1907	*Assets* 1907	*Liabilities* 1907	*No.* 1906	*Assets* 1906	*Liabilities* 1906
New England	130	$282,344	$810,951	155	$570,401	$1,353,010
Middle	328	5,217,122	10,514,587	352	1,796,855	4,540,597
Western	208	1,004,642	1,885,104	210	2,200,470	6,274,304
Northwestern	73	313,867	663,003	99	390,275	655,911
Southern	284	1,417,220	3,509,991	310	1,301,466	2,164,562
Far-western	51	216,689	461,806	84	253,071	500,209
Territories	35	141,250	230,063	20	75,818	167,250
Total, United States	1,109	$8,593,134	$18,075,595	1,230	$6,678,356	$15,655,843
New York City	130	4,409,330	8,809,756	151	819,199	2,452,405
Manhattan and Bronx	119	4,373,530	8,586,527	139	787,174	2,355,681
Canada	104	238,105	570,814	162	485,818	1,170,303

Canadian failures for January number only 104, as against 162 in January a year ago, and liabilities in the Dominion are less than half those of January a year ago.

BULLISH WHEAT STOCKS RETURNS.

Some interesting changes in wheat supplies occurred during the month of January, both at home and abroad. Supplies in the United States fell off about 2,785,000 bushels, owing to light receipts and car shortages. Canadian supplies, however, increased about 1,000,000 bushels, so that North American supplies as a whole decreased only 1,776,000 bushels. This compares with an increase a year ago of 1,301,000 bushels, and a decrease in 1905 of 2,702,000 bushels. One result of this movement has been to narrow the excess shown in total American supplies on February 1 as compared with a year ago, and the excess of 1907 stocks over those held last year is now only about 3,000,000 bushels, whereas the excess on January 1 was over 6,000,000 bushels, and on December 1, 1906, it was over 10,000,000 bushels. Following will be found the statistics of stocks held in the United States and Canada east and west of the Rocky mountains on February 1, 1907, as compared with the same period of the three preceding years:

	East of Rockies	*Pacific coast*	*Total American visible*
February 1, 1907	79,402,000	2,059,000	81,461,000
February 1, 1906	73,151,000	5,295,000	78,446,000
February 1, 1905	54,597,000	3,051,000	57,648,000
February 1, 1904	55,818,000	2,689,000	58,507,000

European stocks decreased heavily during January, the supply on February 1 being only 77,900,000 bushels, as against 87,200,000 bushels on January 1, the falling off being 9,300,000 bushels for the month. The following figures show the American and European stocks of wheat on the first of each month since January 1, 1905, as reported by BRADSTREET'S for the United States and Canada, by Broomhall for Europe and afloat therefor, and the grand total thereof on the same dates:

[Five figures omitted.]

	U. S. and Canada			*Europe*			*Grand total*		
	1907	1906	1905	1907	1906	1905	1907	1906	1905
Jan. 1	83,2	77,1	60,3	87,2	82,8	90,2	170,4	159,9	150,5
Feb. 1	81,5	78,4	57,6	77,9	75,6	86,7	159,4	154,0	144,3
March 1	....	75,4	51,8	....	88,1	86,7	....	163,5	138,5
April 1	....	69,2	46,4	....	90,7	89,8	....	159,9	136,2
May 1	....	55,2	38,5	....	87,7	86,2	....	142,9	124,7
June 1	....	43,7	29,0	....	82,7	82,4	....	126,4	111,3
July 1	....	36,4	20,3	....	74,7	80,2	....	111,1	100,5
August 1	....	43,1	20,9	....	65,3	72,1	....	108,4	93,0
Sept. 1	....	45,2	22,8	....	70,7	73,0	....	115,9	95,8
Oct. 1	....	64,6	38,6	....	83,2	80,2	....	147,8	118,8
Nov. 1	....	73,0	58,2	....	88,1	75,9	....	161,0	134,1
Dec. 1	....	78,7	68,3	....	89,7	83,8	....	168,4	152,1

The interesting points brought out in this table are that the combined European and American supply on February 1 was 11,000,000 bushels smaller than on January 1, and only 5,400,000 bushels larger than on February 1 a year ago, whereas the excess over a year ago on January 1 was 10,500,000 bushels. This relatively decreasing weight of stocks is a feature which has been disclosed for some months past. On December 1, 1906, the excess over the same period of the preceding year was 16,300,000 bushels, on November 1 it was 17,000,000 bushels, and on October 1 it was 28,000,000 bushels. An adequate statistical basis for the recent strength in wheat is therefore easily observable.

In view of the decrease in the visible wheat stocks in this country during January, it is probably worth recalling that, notwithstanding the large size of the crop of 1906, the movement of the crop to primary points is still below that of 1905. This was true, by the way, before the month of January began, so that bad weather and storms cannot have been entirely responsible for the shortage. Between July 1, 1906, and February 2, 1907, there were received at primary points of the United States 170,463,298 bushels of wheat, a decrease of 6.4 per cent. from 1905. During the five weeks from December 29 to February 2 the receipts of wheat were only 15,973,248 bushels, as against 19,395,398 bushels in the same period of last year, a decrease of 17 per cent. In the cereal year to date the receipts of flour at those interior points aggregated 13,312,413 barrels, a gain over the preceding year of about 5 per cent. Reducing the flour to its equivalent as wheat, the receipts of wheat for the cereal year are found to have been 230,369,156 bushels, as against 239,437,783 bushels in the preceding year, a decrease of 4 per cent. This despite the estimates indicating an increase in the yield of 6 per cent. in 1906 over 1905.

NEXT-TO-RECORD BANK CLEARINGS.

Bank clearings were very large in January, next to the heaviest ever recorded, in fact, though, owing mainly to the reduction in speculation at New York, not equaling the enormous aggregate reached in January, 1906. The total for the United States (ninety-seven cities reporting) in that month was $14,911,242,643, a decrease of 8.2 per cent. from January a year ago, but a gain of 5.1 per cent. over the total for December, 1906. The next highest total to that of January this year was recorded in October, 1906.

New York City's total is responsible for the decrease recorded from January a year ago, it aggregating only $9,637,670,884, a decrease of 14.2 per cent. from that of January a year ago. It also fell slightly behind the December, 1905, total. Outside of New York, at ninety-six other cities, the aggregate for January was never before equaled, the total being $5,273,571,759, a gain of 5.2 per cent. over January a year ago, and of 4 per cent. over the largest total heretofore recorded, that of October, 1906. Following are the aggregates of clearings monthly at all cities, compared with the same periods in five preceding years:

[Six figures omitted.]

	1907	1906	1905	1904	1903	1902
Jan	$14,911	$16,245	$11,785	$9,364	$11,032	$10,576
Feb	....	12,379	10,599	7,664	8,420	8,328
Mar	....	12,911	12,855	8,335	9,533	8,884
April	....	12,695	12,672	8,267	9,530	10,881

Oct	....	9,344	8,026	7,496	....	5,066	4,512	3,799
Nov	....	8,607	8,542	6,539	....	4,917	4,514	3,495
Dec	....	9,228	9,689	6,166	....	4,954	4,671	3,668

The clearings by sections compare with the same month a year ago as follows:

New England	Increase 7.2
Middle	Decrease 13.2
Western	Increase 8.0
Northwestern	Increase 5.8
Southwestern	Increase 9.1
Southern	Increase 5.4
Far-western	Increase 13.7
Total, United States	Decrease 8.2
New York City	Decrease 14.2
Outside New York	Increase 5.2
Canadian	Increase 8.5

The middle-states group, it will be seen, alone shows a decrease from January a year ago—13.2 per cent.—due mainly to the heavy decrease at New York, though it might be noted that Philadelphia and Pittsburgh, in that group, also show smaller totals than a year ago. Against this are to be set gains in the far west of 13.7 per cent., in the southwest of 9.1 per cent., in the west of 8 per cent., New England 7.2 per cent., the northwest 5.8 per cent. and the south 5.4 per cent.

There is considerable irregularity shown in the clearings of different cities in the same groups. Chicago clearings were of record proportions for January and exceeded a year ago by 5.3 per cent. Those of Minneapolis decreased 1 per cent., while those of St. Paul increased 18 per cent. In the southern group, Baltimore gained 1 per cent. and New Orleans 2.7 per cent. The gain in this group is largely furnished by the smaller cities. In the far west San Francisco gains 10 per cent., Los Angeles 24 per cent., Seattle 17.9 per cent., Denver 18 per cent., Portland 40 per cent., Spokane 34 per cent. and Tacoma 27 per cent. In the western group, Cincinnati gains 7.3 per cent., Cleveland and Detroit 10 per cent., while Louisville records a fractional loss. In New England, Boston gains 7.3 per cent. In the southwest, St. Louis gains 2.5 per cent., while Kansas City gains 20 per cent.

Canadian clearings for January (eleven cities reporting) aggregate $356,617,021, a gain over January, 1906, of 8.8 per cent. Montreal, the only city showing a decrease, falls off less than 1 per cent.

BANK CLEARINGS AT 113 CITIES FOR JANUARY, 1907 AND 1906.

	1907	1906
Boston	$905,240,383	$843,352,933

A PLEA FOR HIGHER RAILWAY RATES.

Mr. James J. Hill has again made an interesting and important contribution to the current discussion of the railway situation. In an interview regarding traffic conditions in the northwest, the Great Northern's president takes issue squarely with those who blame the railroads for alleged failure to move the year's crops, and denies emphatically that the northwestern roads hold back freight until the close of lake navigation in order to obtain the benefit of a longer haul. The railroads of that section, he points out, are getting all the haul they want, and, in fact, have as much business as they can provide for, which conditions, furthermore, are apparently likely to continue for many months to come. In the opinion of this very competent authority, the reason the crops have not been moved with the rapidity or in the volume which would be desirable is the scarcity of labor, the prospect in that respect being that conditions are apt to be worse next year. In explanation of this latter view, he proceeds to state that excursion rates given by the western and northwestern roads have usually supplied the temporary labor needed in harvesting time, but this year there is a movement in various states for legislation fixing passenger fares at a maximum of 2 cents per mile. If such laws are passed they would apply to labor excursion rates as well as all others, and would result in doing away with the concessions which serve to attract labor for the harvests in the grain-growing sections, adding in no small degree to the already serious scarcity in that respect.

More significant still, assuming that Mr. Hill was not misquoted, are his intimations that an advance of railroad freight rates seems inevitable, coming, perhaps, first on the eastern trunk lines, but probably spreading over the entire country. Wages of railway labor, prices of commodities, and operating conditions have all been steadily making for smaller net earnings. Furthermore, he sets forth that while prices throughout the country have been advancing, charges for transportation show declines, constituting an order of things which cannot last, and resulting in the time being at hand when an advance in rates is unavoidable.

These declarations from one of the masters of the transportation industry will naturally command wide attention. In fact, they are already being commented on in various quarters. It would, indeed, seem that ideas of the same character are entertained by other practical railway men. On the other hand, it is recognized that the difficulties in the way of any general advance in freight rates would be serious if not well-nigh insuperable; and even if reasonable in itself, such action on the part of the railways would tend to add to the anti-railroad agitation which is prevailing in so many directions. The argument that the railroads as a class are suffering, and are liable to suffer still more severely, in respect to net revenues, on account of higher wages and the enhanced cost of commodities and material, while it can be shown in figures, loses much of its force in the light of the increased dividend rates paid by some of the great companies and the expansion of their capital to the accompaniment of methods which in certain instances involve an appearance of stock watering. The subject is one which will doubtless be threshed out in a general public discussion, which will be of considerable practical interest to the business world.

CONGRESS AND CHILD LABOR.

It is only a short while since the Census Bureau published a report on child labor in the United States which attracted widespread attention. The matter was brought to the attention of the House Committee on the Judiciary, which was called on for a report as to whether or not it was within the constitutional power of Congress to enact legislation dealing with the general subject of woman and child labor. That committee has now rendered a report in which it takes the ground that Congress cannot exercise any jurisdiction or authority over women or children employed in the manufacture of goods for interstate commerce shipment, and a fortiori has no authority over such employment in the case of goods destined for interstate shipment.

The committee holds that the jurisdiction over woman and child labor falls within the police power of the states. There is in its view no warrant in the Constitution for the thought or suggestion that Congress can exercise authority over such a matter. If those performing such labor are abused and conditions are such that the same should be improved, it rests for the states to act, and failure by them to do their duty will not justify unconstitutional action by Congress. That body has the power to investigate conditions, ascertain facts and report upon any subject, but this does not confer the power to legislate.

According to the committee, the lives, health and property of the women and children engaged in labor are exclusively within the power of the states, originally and always belonging to them and not surrendered by them to Congress. The assertion of such a power by Congress would, the report says, destroy every vestige of state authority, obliterate state lines, nullify the great work of the framers of the Constitution, and leave the state governments mere matters of form devoid of power. In the view of the committee, the national government is too weak to undertake the exercise of the police power of the states. The division of power originally made was wise and beneficial, time, study and experience approve it, and we should not attempt in an unconstitutional way the destruction of the substructure of the government. The two great domains of police and commerce are, the committee says,

separate and independent, and no warrant exists for the intrusion of one upon the field of the other. To sum up, the committee holds that it would be just as logical and correct to argue that Congress could regulate the age, color, sex, manner of dress, height and size of employees and fix their hours of work as to contend that it could exercise jurisdiction over the subject under consideration. The report is one among a number of indications of a reaction from a tendency to enlarge the jurisdiction of the national government which have come to the surface lately.

A RECORD OUTPUT OF PIG IRON.

Practically every observer of the trend of industrial affairs during 1906 knows full well by now that the output of pig iron in that year broke all preceding annual records. Therefore it is only because we desire to get in evidence the exact fact as to the output that we chronicle the official figures of production which were made public within the week by the American Iron and Steel Association. Thus that well-known organization states that the output of pig iron in 1906 reached a total of 25,307,191 tons, the gain over 1905, also a noteworthy period, being 2,314,811 tons, or 10 per cent. As compared with 1904, a year of comparative depression in the industry, the increase amounts to 8,810,158, or 53.4 per cent., from which it will be gathered that the production in the year mentioned was only 16,497,033 tons, the output in 1904 having suffered a setback of over 8 per cent. from 1903, when the total was 18,009,252 tons. Virtually all of the increase in the production of 1906, as compared with that of 1905, was contributed by steel-making irons, the combined output of Bessemer and basic pig being responsible for a gain of 2,346,897 tons, although the total increase was but 2,314,811 tons, the difference being due to a slight falling off in the production of foundry and forge irons.

This table gives the production by leading states for a series of years:

	1906	1905	1904	1903
Pennsylvania	11,247,859	10,579,127	7,644,321	8,231,500
Ohio	5,327,133	4,586,110	3,977,929	3,287,434
Illinois	2,156,865	2,034,483	1,655,991	1,692,375
Alabama	1,674,848	1,604,062	1,453,513	1,561,308
New York	1,552,659	1,198,068	605,709	552,917
Virginia	483,525	519,210	310,526	541,034
Tennessee	426,874	372,692	302,096	418,368
Maryland	385,709	332,096	293,441	324,570
New Jersey	379,390	311,039	262,294	211,667
Michigan	369,456	288,724	233,225	244,709
West Virginia	304,534	238,179	270,945	199,013
United States	25,307,191	22,992,380	16,497,033	18,009,252

Seven southern states, a few of which are not mentioned in the above, produced 2,775,973 tons of pig iron last year, that sum being 11 per cent. of the whole, which compares with 2,589,398 tons in 1905, or 11.2 per cent. of the entire output of that year, whereas in 1904 the same states produced 13.2 per cent. of the whole. In fact, analysis of the returns shows that the greatest increases have been made by the districts directly contiguous to the Lake Superior ore region. Owing very largely to marked growth in the Buffalo district, New York state furnishes a gain of 354,591 tons. Pennsylvania's output advanced 668,000 tons, Ohio's 740,000 tons, while that of Illinois and Michigan increased 122,000 and 80,000 tons respectively. Alabama added 70,000 tons to its output, but Virginia shows a decrease of 35,000 tons, being the only state to record a shrinkage.

Now, if we take the figures of pig-iron production during the past two decades, we develop a statistical sermon that shows the wonderful growth of the industry. Starting with 1887, we get this exhibit, the figures being in long tons:

1887	6,417,148	1897	9,652,680
1888	6,489,738	1898	11,773,934
1889	7,603,642	1899	13,620,703
1890	9,202,703	1900	13,789,242
1891	8,279,870	1901	15,878,254
1892	9,157,000	1902	17,821,307
1893	7,124,502	1903	18,009,252
1894	6,657,388	1904	16,497,033
1895	9,446,308	1905	22,992,380
1896	8,623,127	1906	25,307,191

Thus in twenty years the output of pig iron has increased 294 per cent., and in ten years it has advanced 162 per cent. In fact, the history of the industry over a period of forty years, or practically since its comparative infancy, shows that, despite the various ups and downs to which the trade has been subjected in that time, the average increase in production has been more than 100 per cent. per decade. This is truly a tale of wonderful development—one that aptly illustrates the trend of the country's chief industry within a little more than a generation.

RENEWED GOLD IMPORTS.

Contrary to the expectations of banking and foreign exchange authorities, there has been in the past ten days a resumption of gold imports from London to New York. At the end of last week $500,000 specie was taken in the London market for the account of New York banking interests. Further arrangements of the same kind have occurred during the present week, though the amounts involved have, on the whole, been unimportant, and the total sum of all bullion secured would seem to foot up less than $1,000,000 in American currency.

At the same time the movement seems to be of considerable importance. While it is realized that the balance of trade is decidedly in favor of the United States, it is also held on all sides that the condition of the London market, or, it might be said, the position of leading foreign financial centers, is adverse to any large flow of specie from the old world to this side of the ocean. It may be noted that India is a keen competitor with New York for the new gold which has arrived at London, and that the small amount of bullion which American bids secured was in a large measure due to a demand from India and South America sufficiently large and eager to bring in bids beyond the figures which New York banking interests were willing to pay. Besides this, the rates for money at the British capital continue to be relatively high. Call money at that center is still 4 per cent. or lower, while at New York the quotation for that species of accommodation at the Stock Exchange has rallied at 2¾ per cent. or thereabouts. On the other hand, the action of the foreign exchange market has been such as to fully justify the transfer of gold from London to New York, and would, indeed, hold out the promise that further transactions of the same nature are not unlikely in the near future. It seems, in fact, a rather fair conclusion that leading American banking interests are in this case exercising more or less forbearance. They are not inclined to make undue use of the advantages which conditions in the exchange market, adverse to London, seem to afford, to their full extent.

CIRCULATION STATISTICS.

The money in circulation showed an increase of a little over $19,000,000 for the month of January. The most marked change was in the case of gold certificates, which showed an increase of over $37,100,000 as compared with those for a month before. Gold coin exhibited a gain of over $2,900,000. There was a falling off of over $2,200,000 in standard silver dollars, one of over $4,800,000 in silver certificates, and one of over $3,700,000 in subsidiary silver. Treasury notes of 1890 showed a decrease of over $127,000, United States notes a decline of over $3,300,000, and national bank notes a loss of over $6,800,000.

For the twelve months ending with January the extraordinary increase of over $222,200,000 is recorded. Gold coin showed an increase of over $40,700,000, while gold certificates exhibited a gain of almost $109,000,000. Standard silver dollars were over $2,700,000 in excess of those for the same date last year, while silver certificates were greater by over $3,900,000, and subsidiary silver shows an increase of over $12,800,000. Treasury notes of 1890 exhibited a decline of over $1,500,000, while United States notes showed an increase of a little over $800,000, and national bank notes exhibited a gain of over $53,700,000.

In the following table are set forth in detail the general stock of money coined or issued in the United States, the amount held in the Treasury as assets of the government, and the money in circulation on February 1:

	General stock of money	*Held in Treasury*	*Money in circulation*
Gold coin, including bullion in Treasury	$1,598,116,107	$250,005,397	$695,539,841
Gold certificates	....	35,006,180	617,564,689
Standard silver dollars	561,763,530	2,948,490	83,173,040
Silver certificates	....	12,705,811	462,936,189
Subsidiary silver	127,474,478	7,066,315	120,408,163
Treasury notes of 1890	6,488,000	14,460	6,473,540
United States notes	346,681,016	8,121,292	338,559,724
National bank notes	596,197,569	17,950,662	578,246,907
Total	3,236,720,700	333,818,607	2,902,902,093

The total amount of money in circulation on February 1 was $2,902,902,093. On the basis of a population estimated at 85,484,000, that represents a circulation per capita amounting to $33.96, an increase of 18 cents for the month, of $2.08 as compared with February 1 last year, and of $2.92 as compared with the corresponding date in 1905. As will be seen, we are now in sight of the $34 mark in circulation and may pass it by the end of the month.

EDITORIAL NOTES

In an interview which the eminent New York banker, Mr. Jacob H. Schiff, gave forth in London some days ago, his remarks involving a discussion of the present financial conditions in the United States, he raised the point that owing to the difficulty the railroads were experiencing in financing further large issues of securities with which to pay for improvements, additional facilities and new equipment, they were very likely to suspend or reduce these outlays, or at most to merely complete work of the above kind which had already been commenced. Various indications would seem to show that the managements of large railroad corporations are, in a number of important instances, adopting the same view. The general tenor of some remarks credited to Mr. B. F. Yoakum, president of the St. Louis & San Francisco Railroad, are especially pertinent. That company, which forms a part of the Rock Island-'Frisco system, so called, has in the last three years done a considerable amount of new construction work, involving a substantial increase in its mileage. According to the road's president, financial conditions at this juncture are such that the company will certainly not enter upon any further plans of this character, and will confine itself to the completion of the lines which are already under way. It might also be noted that this week the New York Central management decided on a curtailment of the construction and improvement work which that company has in progress. The above are merely typical instances of the way in which narrow financial conditions and a congested securities market limit the disposition of the railways to furnish additional facilities to the full extent which the growth of their traffic would apparently call for.

The strength of the market for tin has been frequently referred to in these columns, and though the prices paid have shown some decline from the very high prices paid under stress of small supplies and large demand last spring, the situation even now is a very strong one. The reason for this is not hard to find, being, mainly, continued active demand coming upon a market in which supplies have been small. The really important feature in this metal, however, unlike that for copper or iron, has been the failure of very high prices to induce a correspondingly larger production. Messrs. Sargent & Son, of London, summarize the supplies, deliveries, stocks and market value for the past three years in the following table:

Shipments from	1904 *Tons*	1905 *Tons*	1906 *Tons*
Straits to Europe and United States	57,566	56,847	57,138
India and China	3,300	1,700	1,300
Australia	4,248	5,322	6,672
English output	4,300	4,300	4,500
Banca and Billiton sales	14,750	12,800	11,254
Bolivian to Liverpool, etc.	12,780	14,245	16,380
Total supplies	96,944	95,214	97,244
Deliveries, Europe, United States, etc.	94,878	94,920	96,794
Visible supply December 31	15,398	13,606	13,320
Bolivian unsold, Liverpool	308	573	446
Banca reserves	1,869	1,450	1,350
Straits tin, December 31	£134¼	£160½	£193½

There is here shown an increase in supplies of only 300 tons in two years, while deliveries expanded 1,916 tons in the same time, the result being a reduction in the visible supplies on December 31, 1906, of over 2,000 tons from two years before, while the price at the close of last year was 44 per cent. higher. The highest price reached was in May, 1906, when £215 per ton was paid for spot metal in London, while the price in the United States reached as high as £220 per ton. As to the outlook, it is remarked that invisible supplies are thought to be small, and given a continuance of large trade, lower prices than those now ruling, which are only slightly below those paid at the end of 1906, are hardly to be looked for. The world's output in 1907 is not expected to be increased much over 5,000 tons. For the past seven years the consumption has increased 2,500 tons yearly. There is nothing bearish about these figures, though it must be remembered that present and past very high prices are tempting to discoverers and miners of new supplies.

RECENT LEGAL DECISIONS.

[*Prepared for* BRADSTREET'S.]

Liquor Tax—Certificate—Revocation.

The New York Court of Appeals held, in the Matter of Clement, that in a proceeding for the revocation of a liquor-tax certificate, when issue has been joined the court has no power to send the matter to a referee, but must itself hear the proofs.

Nuisance—Window—Impure Air.

The Supreme Judicial Court of Massachusetts held, in the case of Vaughan vs. Bridgham, that the causing of a current of hot or impure air, or air charged with offensive odors, to strike upon the plaintiff s window, was a nuisance, if the plaintiff elected to keep the window open.

Kentucky Anti-Trust Law Valid.

The Kentucky Court of Appeals affirmed, in the case of The International Harvesting Machine Company vs. The Commonwealth, the validity of the act prohibiting the formation of trusts. The company was indicted on a charge of fixing prices for harvesting machines and was convicted and fined.

Constitutional Law—Tickets—Resale.

The Supreme Court of California held, in Ex Parte Quarg, that a statute forbidding the resale of tickets to places of amusement at a price higher than that originally placed upon them violated the constitutional right of property, where by statute the ticket was at least an irrevocable license to the purchaser to be in the place of amusement during the performance.

Real Estate—Agent—Commissions.

The Supreme Court of Minnesota held, in the case of Quist vs. Goodfellow, that where the owner of real estate, which he has listed with an agent for sale for a definite price, sells the same to a person who was induced to purchase it by the efforts of the agent, but in good faith and in ignorance of those efforts, and for a consideration less than that given the agent, he is not—there being no exclusive agency—liable for the commission agreed to be paid for the production of a purchaser ready, able and willing to buy.

Carrier—Switching—Discrimination.

The Supreme Court of Kansas held, in the case of The Larabee Flour Mills Company vs. Missouri Pacific Railway Company, that a railway holding itself out to the public as ready and as undertaking to do switching, which required it to have its own rails and right of way, and go upon the rails and right of way of another company with which it had no express contract relating either to compensation for switching or to track rights, was a common carrier, and as such must switch cars without discrimination against a disfavored shipper.

Negotiable Instrument—Signature.

The New York Court of Appeals held, in the case of The Far Rockaway Bank vs. Norton, that under the law of 1897, providing that where a person not otherwise a party to an instrument payable to the order of a third person places thereon his signature in blank before delivery, he is liable to the payee and to all subsequent parties, any error in excluding evidence in an action against the indorser of a note, to show that the defendant had indorsed the note with the purpose of giving the maker credit with the payee, was immaterial.

Real Estate—Broker—Commissions.

The Supreme Court of Arkansas held, in the case of Lewis vs. Briggs, that a broker under a contract to procure a purchaser of real estate, which stipulated that the owner should receive a specified sum out of the price and that the balance should be paid to the broker as his commission, did not make out a case for a recovery of his commission by showing that he secured a contract with solvent parties to purchase the land, but must show either that the owner received some part of the balance of the price to which the broker was entitled, or that the parties who agreed to purchase were ready, willing and able to purchase and were prevented by default of the owner.

Note—Discount—Bank—Deposit.

The Kentucky Court of Appeals held, in the case of The Planters' State Bank vs. Schlamp et al., that the rule that where one indebted to a bank has money on deposit in the bank at the date upon which a note owing to the bank by a depositor falls due, it is the duty of the bank to apply the money on deposit to the discharge of the note, and that if it fails to do so it releases the sureties on the note to the extent of such deposit, applies only to general deposits and not to a special deposit. In the case before the court it appeared that a person discounted a note for $1,000 executed by him and two sureties at a bank in which he was not a depositor. The bank delayed payment on the note until a partnership note for $1,500 held by the bank against the person mentioned and another fell due, when it notified him that it had appropriated $750 of the $1,000 note to the liquidation of the $1,500 indebtedness to the bank. In an action by the bank on the note, the court held that the bank had no right to appropriate $750 or any part of the $1,000 note to the discharge of the $1,500 debt owing to the bank by the person mentioned, but was bound to honor his check for the $1,000 special deposit as it had agreed to do.

Transfer Tax—Legacy—Assignment.

The New York Court of Appeals held, in the Matter of Cook, that the transfer and assignment by nephews and nieces of their legacies under a will to the restator's widow, made for a valuable consideration and in settlement of a contest over the will, did not change the rate of the transfer tax thereon from 5 to 1 per cent.; that under such circumstances, the will having been admitted to probate on the withdrawal of the contest, the widow would be deemed to have taken the legacies under transfer by the nephews and nieces, not by the will, and that the transfer tax on a legacy to the son of an adopted child was 1 per cent., the same as in the case of the descendant of a natural child.

Lease—Measure of Damages.

The Kentucky Court of Appeals held, in the case of Devers vs. May et al., that where a valid contract for the rent of a farm was entered into and the lessor refused to place and keep the lessee in possession according to the terms of the lease, the measure of damages the lessee was entitled to recover for the breach of contract was the difference between the price he agreed to pay and the actual rental value of the property; that if the facts authorized it the lessee might in the same action recover such special damages as he had sustained in attempting to carry out his contract, and that it was not necessary, to entitle the lessee to recover general or special damages, that he should allege or prove any effort upon his part to rent other land or to engage in other occupation.

Employer's Liability—Unguarded Vat.

The Supreme Court of Indiana held, in the case of Bessler vs. Laughlin, that a paragraph of a complaint alleging that an object fell against the plaintiff when he was working for the defendant beside a vat of boiling water and caused plaintiff to lose his balance, and that by reason of the defendant's failure to provide a guard rail over and across the vat, plaintiff was thereby caused to fall into the vat without his fault, was not insufficient under the Indiana statute (section 7081i, Burns), by reason of showing that the falling object directly contributed to his injury, and that its fall was an extraordinary occurrence which the employer could not reasonably anticipate and was not bound to guard against; but that a paragraph which directly charged that the plaintiff's injury was caused by the falling of the lid of such a vat, by reason of the defendant's negligent failure to provide a guard hook, chain or other fastening to hold it up, did not state a cause of action under said section, since the factory act only requires the vat to be guarded and not the appliances about it.

Publisher—Property—Right—Injunction.

The Appellate Division of the New York Supreme Court for the First Department held, in the case of Dutton et al. vs. Cupples et al., that a publisher can obtain a property right in a book as an article of merchandise entirely apart from any copyright or exclusive right to the literary matter, and that where a publisher took non-copyrighted hymns and poems and printed and bound and illustrated them in a particular and distinctive fashion, but did not copyright the illustrations or the cover design, and the defendant copied the books by photographic process, claiming that when the books were put upon the market they were dedicated to the public, the plaintiff had a right to each book considered as a whole distinct from its various parts, and that though the defendant had a right to copy each part separately, it had no right to copy the entire book, and that such a copy would be restrained.

BUSINESS NOTES.

Imports and Exports of Copper.

The United States government, through the Department of Commerce and Labor, announces that the value of copper exported from this country during the calendar year 1906 was $84,728,400, while imports were worth $30,416,578, a total of $115,144,978. The total value of both movements in 1905 was $102,809,973, made up of $80,706,232 exports and $22,103,741 imports. The average value of the copper exported during the entire twelve months' period was 17.84 cents per pound. Imports during the year, totaling 176,558,390 pounds, formed the record amount brought into this country, increasing 16,000,000 over the previous year's takings. The following comparative statement of copper exports and imports by months for 1905 and 1906 is compiled from monthly returns (in pounds):

	Exports		*Imports*	
	1906	1905	1906	1905
January	31,985,053	43,246,994	14,110,340	11,965,159
February	36,092,275	44,856,032	12,362,483	13,223,910
March	38,426,561	41,597,725	16,326,159	12,236,611
April	33,830,057	58,234,827	12,974,609	12,815,783
May	42,321,749	46,744,959	15,130,991	11,468,819
June	39,662,582	58,018,828	14,591,387	13,353,121
July	40,52 ,290	37,901,351	15,206,099	12,195,827
August	46,789,702	48,942,284	12,578,745	10,602,522
September	34,964,157	46,954,409	13,776,177	18,703,558
October	39,245,144	35,156,328	18,718,000	15,519,438
November	36,718,984	31,565,859	15,693,716	15,110,744
December	34,139,354	41,688,013	14,999,778	13,283,913
Year	454,752,018	534,907,619	176,558,390	160,619,385

Cuba's Export of Cigars.

In 1906 Cuba exported 256,738,029 cigars, of which quantity the United States took a little more than 30 per cent., or 79,483,125, an increase of about 15,000,000 over 1905. *El Tabaco*, the publication from which we get the figures, shows some very interesting features of the Cuban cigar trade. Thus the average person not engaged in the tobacco business would be inclined to say offhand that the United States purchases more cigars from Cuba than does England, for instance, but such is not the case, for in 1906 England imported no less than 92,459,687 cigars from Cuba, as against 90,505,906 in 1905. Germany buys between 25,000,000 and 30,000,000, and France takes from 10,000,000 to 12,000,000. Seventy-five different countries are included in the list of Cuba's direct shipments. Turks, Koreans and Egyptians import them. The little islands of St. Pierre et Miquelon bought 18,500 Havana cigars last year, and the Paraguayans and Bolivians, the Swedes, the Danes and the Norwegians were also purchasers. They were sent to the African possessions of England, France, Germany, Spain and Portugal. Havana cigars went to Australasia, to China and to Japan. Our purchases fall below those of England because we import large quantities of Cuban leaf for manufacture here. We bought last year about 25,000,000 pounds of leaf, while England's purchases were only about 25,000 pounds. Out of total leaf shipments of 12,636,836 kilos, 11,413,373 kilos came to this country. Cuba's cigarettes find their largest foreign market in Colombia, to which country 5,869,248 were sent last year. American purchases were less than 500,000.

Output of Tobacco Manufactures.

The *Western Tobacco Journal* reports that 1906 was a record year for tobacco manufacturing. All lines showed an increase, and the output of cigars established a new record. The total output of tobacco manufactures was 360,953,280 pounds, and the output of cigarettes was the greatest since 1897. This table gives a statistical outline of the progress made by the industry in 1906:

	1906	1905	*Increase*
Tobacco, pounds	360,953,280	345,086,816	15,866,464
Cigars, number	7,373,491,014	7,024,563,719	348,927,295
Small cigars	994,779,535	805,021,037	189,758,498
Small cigarettes—			
At $1.08	3,684,421,457	2,920,531,210	763,890,247
At 54 cents	731,561,127	625,901,694	105,659,433
Total	4,415,982,584	3,546,432,904	869,549,680
Large cigarettes	11,933,190	8,306,300	3,626,890
Total cigarettes	4,427,915,774	3,554,739,204	872,176,570
Snuff, pounds	23,660,061	21,474,621	2,185,440

Smoking and chewing tobacco did not make so good a record during 1906 as during 1905, so far as the percentage of increase is concerned, but it surpassed all previous records in the matter of output, which in 1906 amounted to 360,953,280 pounds, as compared with 345,086,816 pounds in 1905, an increase of 15,866,464 pounds, or about 5 per cent. The year 1905 made a gain over 1904 of 6 per cent. The cigar manufacturers enjoyed the best year in their history in 1906. In 1905 the production for the first time exceeded the seven-billion mark, and in 1906 the output was 348,927,295 greater than in 1905, thus showing an increase of almost 5 per cent. The larger factories have found it almost impossible to secure sufficient capable help to turn out the vast quantity of cigars that have been demanded of them. Out of the forty important cigar-producing districts only twelve show a decreased production in 1906. Small cigars had an exceptionally good year, in fact breaking all past records. The total output amounted to 994,779,535, which is the nearest the billion mark that this product has ever approached. The gain during 1906, as compared with 1905, was 189,758,498, an increase of more than 23 per cent. The gain made in 1905 over 1904 was only 9 per cent. Baltimore, Danville, Richmond and Greater New York continue to supply the market with the bulk of small cigars. The production of 4,427,915,774 cigarettes in 1906 was the largest since the record year of 1897, when 4,967,444,232 cigarettes were manufactured. The only change in the ranking of the cigarette-producing districts was the first California (San Francisco) district, which dropped from sixth to eighth place. More than 40 per cent of the cigarettes manufactured in 1906 were for foreign consumption.

Our Trade with Latin America.

Our trade with Latin America is growing, our sales to those countries having increased 90 per cent. within five years, and 50 per cent. within two years. The annual totals of exports during calendar years follow:

1901	$116,475,877
1904	146,849,361
1906	218,077,809

Our sales to South America alone have increased from $42,500,000 in 1901 to $78,800,000 in 1906. Sales to Mexico have increased from $36,800,000 in 1901 to $62,300,000 in 1906. Sales to the five Central American states have increased from $6,500,000 in 1901 to $10,700,000 in 1906. Five years ago our Panama business was included in the commerce of Colombia. It is now reported with the trade of its sister states, but it includes so large a quantity of canal material that the figures are of no value as an evidence of trade development. Our exports to Brazil have taken on a new life. The largest sales of earlier years were made in 1895, about $15,000,000. For the next ten years they show steady decline to $10,700,000 in 1904. Last year lifted them to $16,547,000, a record mark. Argentina's purchases of about $6,000,000 in 1896 are increased to $33,271,000 in 1906. Within a decade Chile's purchases have increased from a little more than $3,000,000 to $9,390,000, while the trade of Peru during the same time has jumped from $1,000,000 to a little more than $5,000,000. A large percentage of this commerce consists of manufactured products.

Shipbuilding in 1906.

Last week we published some estimates of shipbuilding throughout the world in 1906 and 1905, but for record purposes we give on this occasion the annual return of *Lloyd's Register*, which shows that the high record of shipbuilding in the United Kingdom achieved in 1905 was exceeded during 1906, in which the output of merchant tonnage reached 1,828,343 tons gross, as compared with 1,623,168 tons in 1905. There were also twenty-nine warships launched, with a total displacement of 108,450 tons, making a total launched of 915 vessels of 1,936,793 tons. The following is a statement of the gross merchant tonnage launched in the United Kingdom in each of the past ten years:

	Steam		*Sail*		*Total*	
	No.	*Tonnage*	*No.*	*Tonnage*	*No.*	*Tonnage*
1906	815	1,809,433	71	18,910	886	1,828,343
1905	737	1,604,796	58	18,372	795	1,623,168
1904	613	1,171,375	99	33,787	712	1,205,162
1903	632	1,165,503	65	25,115	697	1,190,618
1902	622	1,378,206	72	49,352	694	1,427,558
1901	591	1,501,078	48	23,661	639	1,524,739
1900	664	1,432,630	28	9,871	692	1,442,471
1899	744	1,414,774	12	2,017	726	1,416,791
1898	744	1,363,318	17	4,252	761	1,367,570
1897	545	924,382	46	28,104	591	952,486

"As regards foreign shipbuilding, the only countries in which any marked expansion took place were, as in previous years, Germany and the United States. The German output was 318,000 tons, or 63,000 tons more than in the previous year, but in spite of this increase Germany was again the best customer for British-built vessels. In the United States a tonnage of 441,087 was constructed, which was nearly 139,000 tons larger than the output of the previous year. France built only 35,214 tons, Holland 66,809 tons and Norway 60,774 tons. Of the total merchant vessels launched in the world during 1906, nearly 62 2-3 per cent. were launched in the United Kingdom; but if only sea-going steel steamers of 3,000 tons gross and upward be taken into account (thus excluding vessels trading on the North American lakes), out of the total of 389 such steamers of 1,788,044 tons launched in the world, no less than 81.4 per cent. of the tonnage was launched in the United Kingdom."

CURRENT BUSINESS NEWS.

Commercial.

The exports of steel rails for 1906 and 1905 compare as follows:

Exports to	1906	1905	*Increase*
Europe	$23,640	$395,550	†$371,910
British North America	1,854,530	694,251	1,160,279
Central America and British Honduras	641,178	307,165	334,013
Mexico	864,141	1,486,261	†622,120
W. I. & Bermuda	856,912	761,422	95,490
South America	3,008,778	2,894,662	114,116
Japan	722,245	305,883	416,362
Other Asia	913,810	366,148	547,662
British Africa	10,549	98,687	†88,138
Other Africa	7,628	....	7,628
Total	8,903,411	7,310,079	1,593,382

† Decrease.

Forty-one vessels, of 19,982 gross tons, were added to the merchant marine of the United States during the month of January.

The fire loss of the United States and Canada for the month of January, as compiled by the *Journal of Commerce*, shows a total of $24,064,900. That this is a conspicuously large amount will be seen from the following: January, 1907, $24,064,900; January, 1906, $17,723,800; January, 1905, $16,378,100.

The following table shows the part that American and foreign vessels took in the transportation of merchandise during 1906 and 1905:

	1906	1905
Value exported domestic merchandise	$1,772,720,530	$1,599,422,622
Value carried in American ships	138,712,468	148,005,065
Value carried in foreign ships	1,438,920,216	1,285,975,103
Per cent. carried in American ships	7.7	9.2
Per cent. carried in foreign ships	81.0	80.0
Value imported	1,320,609,250	1,179,144,550
Value carried in American ships	173,005,020	170,285,284
Value carried in foreign ships	1,054,723,117	928,160,065
Per cent. carried in American ships	13.0	14.0
Per cent. carried in foreign ships	80.0	78.0

Sauerbeck's average index numbers of British commodity prices are set forth in the following:

	Average		*Average*
1878-87	70	1899	68
1888-95	68	1900	75
1893-99	66	1901	70
1896-1905	68	1902	69
1883	82	1903	69
1889	72	1904	70
1896	61	1905	72
1897	62	1906	77
1898	64		

This seven-year record of the exports of the United Kingdon and of the United States is interesting as showing the struggle that has been going on for first place during that period:

	United Kingdom	*United States*
1900	$1,416,515,000	$1,477,946,000
1901	1,362,620,000	1,465,375,000
1902	1,377,219,000	1,360,685,000
1903	1,405,178,000	1,484,753,000
1904	1,463,410,000	1,451,318,000
1905	1,666,057,000	1,626,990,000
1906	1,828,212,000	1,798,247,000

In 1900, 1901, 1903 and 1905 the United States held first place, the United Kingdom occupying the premier position in the other three years, viz, 1902, 1904 and 1906.

Consul-General Rodgers, at Shanghai, who volunteered to handle the contributions from America for the famine sufferers, has cabled the State Department that unless the seed wheat, which is so earnestly desired, reaches Shanghai by March 15, it will be too late for planting. He adds that the purchase of wheat in Australia, presumably to save time, is in contemplation.

Foreign crop conditions as published Tuesday in Broomhall's Liverpool *Corn Trade News:* United Kingdom—The weather is seasonable and the crop outlook continues unchanged from last week, which was then satisfactory. France—The weather is seasonable and the outlook for the crop is favorable. Supplies are rather larger. Germany—There is an abundant snow covering, but occasional reports are heard regarding the recent damage due to the severe weather changes, but nothing definite is heard. Purchases of Argentina wheat are still reported. Hungary and Roumania—Crop prospects have improved since our last report, due to sufficient snow covering. Russia—There is generally a sufficient snow covering, but some local complaints are heard. Arrivals at southwestern ports are very small. The government is still buying rye, and it is expected that it will soon take wheat, owing to the fact that rye is becoming very scarce and dear. Italy, Spain and North Africa—The crop outlook is favorable. Sweden—A recent proposal has been introduced into Parliament to either reduce or abolish the present duty on corn. The present duty is 3.70 kroner, or equal to 24½ cents per fifty-six pounds.

The N. K. Fairbank Company estimates stocks of lard held in the United States, Europe and afloat therefor on the dates mentioned to have been as follows: February 1, 1907, 204,511 tierces; January 1, 1907, 206,146; February 1, 1906, 230,267; February 1, 1905, 299,936; February 1, 1904, 176,174; February 1, 1903, 152,371.

This table gives preliminary figures of the foreign trade of France during the years 1906 and 1905:

Imports—	1906	1905
Food	F 954,092,000	F 822,915,000
Raw materials	3,336,334,000	3,087,320,000
Manufactures	938,969,000	868,673,000
Total	5,229,425,000	4,778,908,000
Exports—		
Food	731,011,000	780,542,000
Raw materials	1,370,854,000	1,337,972,000
Manufactures	2,560,626,000	2,410,743,000
Post parcels	381,174,000	337,610,000
Total	5,043,665,000	4,866,867,000

The returns of post parcels comprise a sum of 33,810,000 francs of silk goods, against 32,484,000 francs in 1905.

The wheat crop of South Australia is officially placed at 20,480,000 bushels, against 20,143,000 last year and 12,023,000 two years ago. This suggests an exportable surplus of about 16,800,000 bushels.

The January statement of the British Board of Trade shows increases of £7,066,200 in Great Britain's imports and of £4,295,800 in exports. The principal increase was in the imports of raw materials, of which cotton totals £1,500,000 each for America and Egypt; wool, £1,000,000, and other textiles, £1,450,000. The increases in exports were principally in manufactured goods and iron and steel, £868,000, and cottons, woolens, etc., £1,450,000. From the returns (imported goods reëxported being omitted) the following comparative table of the United Kingdom's January trade in merchandise may be compiled. Both imports and exports are the largest of any month in the history of the country's trade:

	1907	1906	1905
Imports	£60,566,200	£53,500,000	£47,637,000
Exports	35,045,800	30,750,000	24,929,000
Excess imports	25,520,400	22,750,000	22,648,000

Excess of imports in January, 1904, were £21,910,000; in 1903, £21,322,000; in 1902, £25,877,000, and in 1901, £21,233,000.

The following table shows the sources of supply of the sugar consumption of the United States for the calendar year 1906:

	Pounds
Cuba	2,683,893,633
United States	1,304,607,360
Hawaii	852,468,857
Porto Rico	428,916,079
Java	425,372,363
Germany	303,430,122
South America	173,627,104
West Indies (except Cuba)	163,496,319
Belgium	65,861,744
Philippine Islands	26,283,929
Austria-Hungary	9,934,000
Mexico	3,186,469
Other countries	9,575,715
Total	6,450,653,967
Less sugar exported	25,731,407
Amount available for consumption	6,424,922,560

The following table shows the annual average consumption of sugar in the United States (*a*) and share thereof supplied by domestic production (*b*) and by imports from Porto Rico, Hawaii and the Philippine Island (*c*), by quinquennial periods, 1876 to 1905:

	(*a*) *Tons*	(*b*) *Per cent.*	(*c*) *Per cent.*
1876-80	816,500	16 3	13 3
1881-85	1,195,800	15.5	15.8
1886-90	1,450,600	14.9	17.6
1891-95	1,912,300	15.7	11.3
1896-1900	2,066,300	13.9	13.1
1901-05	2,577,489	20.0	16.8
1906	2,864,013	20.3	20.3

Financial.

The coinage executed by the mints of the United States in January amounted to $7,236,820, of which $6,525,000 was in gold, $284,000 in silver and $427,820 in nickels and 1-cent pieces.

The January production of the Rand mines is estimated by London Kaffir houses at 550,000 ounces fine gold. The December output was 550,167 fine ounces; November, 533,373. Reckoning one ounce roughly at $21.25, the value of the output in January is $11,687,500. Comparison of last month's output with previous months and with January in other years is as follows:

January, 1907	$11,687,500	January, 1906	$9,103,695
December, 1906	11,694,805	January, 1905	7,842,540
November, 1906	11,328,125	January, 1904	6,134,230
October, 1906	11,481,850	January, 1903	4,232,445
September, 1906	10,727,875	January, 1902	1,491,930
August, 1906	10,812,915	January, 1901	None

The Prussian income-tax returns for 1906 show the largest increase registered in any of the past thirteen years. These returns, covering all incomes of £45 ($218) and more, indicate a gain of £35,250,000 ($170,449,100) in the people's incomes for 1905 over 1904. Since the income-tax law was introduced, fourteen years ago, the number of persons taxed has risen from 2,440,000 to 4,680,000, and their aggregate income from £298,000,000 ($1,445,300,000) to £536,000,000 ($2,608,444,000).

The directors of the Republic Iron & Steel Company have declared the regular quarterly dividend of 1¾ per cent. on the preferred stock and 2 per cent. on back dividends. This leaves only 2 per cent. more in arrears on back dividends. The dividend is payable April 1.

The aggregate market value of 162 representative French securities showed during 1906 a depreciation from 59,527,800,000 to 57,272,300,000 francs.

A seat on the New York Produce Exchange sold for $500 Wednesday, an advance of $50 over the last sale.

The directors of the International Silver Company have declared an extra dividend of 1 per cent. on the preferred stock, payable March 1.

Speyer & Co. have purchased $6,500,000 of Chicago, Rock Island & Pacific Railway Company 4½ equipment notes. The notes are dated February 1, 1907, and are payable in twenty semi-annual installments, beginning August 1, 1907, the last series maturing February 1, 1917, making the average life of the notes five and a half years. They are secured by equipments costing in excess of $7,400,000.

The reduction of the discount rate of the Imperial Bank of Russia from 7 to 6½ per cent., which was decided upon at a meeting of the directors January 31, has been approved by Finance Minister Kokovsoff, and is now in effect.

The committee of arrangements of the New York Stock Exchange has ordered that the sale of "odd lots" of stocks, that is, lots of less than 100 shares, shall be printed on the tape.

According to the *Journal of Commerce*, the following table summarizes the various issues to date this year:

	Authorized	*Issued*
Railroad notes	$117,500,000	$117,500,000
Railroad bonds	32,500,000	17,411,000
Railroad stocks	123,750,000	3,000,000
Industrial notes	25,020,000	25,000,000
Industrial bonds	10,500,000	12,000,000
Industrial stocks	19,762,400	16,762,400
Total	329,012,400	191,673,400

Of the notes, Europe has taken perhaps $50,000,000, chiefly of those issued under the auspices of J. P. Morgan & Co.

Formal announcement has been made that the Rubber Goods Manufacturing Company will be liquidated. This has been the ultimate purpose of the United States Rubber Company ever since it acquired over 75 per cent. of the stock of the other company early in 1905, and a committee was appointed at the meeting of the directors Thursday to take the matter up.

For the first time in thirty years the city of Baltimore on Thursday sold some of its stock for less than par. One million of the 3½ per cent. 1980 sewerage loan was offered at public sale, and the best bid for the whole issue was $91.66 a share. This offer was rejected, but three small lots were awarded at $97 a share or better. The price was finally fixed at the latter figure. A low price was expected owing to high money, and also in view of the fact that this is the first stock to be offered since the legislature repealed the law allowing corporate holders of city stock an exemption from taxes on their own capital to an amount equal to their holdings of city stock.

The statement of the consolidated business of the New York National Exchange Bank and the Irving National Bank as of January 26 shows the following:

Resources—	
Loans and discounts	$16,171,497
United States bonds	911,000
Other bonds	301,200
Premium	45,050
Stocks and securities	136,991
Real estate and fixtures	209,225
Due from banks	776,210
Cash	5,487,525
Total	24,038,700
Liabilities—	
Capital	$2,000,000
Surplus	1,000,000
Undivided profits	25,571
Circulation	890,297
Bond account	260,000
Deposits	19,862,831
Total	24,038,700

The business of the combined institutions will be continued under the name of the Irving National Exchange Bank, with offices at West Broadway and Chambers street, the formal merger of the two institutions to go into effect February 19.

Wm. A. Read & Co.

INVESTMENT SECURITIES

BOSTON CHICAGO BALTIMORE

Railroads.

Railroads in Germany during 1906 had a prosperous year. The increase in earnings during the eleven months ending November 30 over the corresponding period in 1905 was no less than 14 per cent. Earnings of the German roads monthly during 1906 were as follows, in marks:

	1906	*Increase over 1905*
January	115,169,638	18,516,172
February	114,225,839	19,137,946
March	127,724,508	16,505,639
April	113,327,393	10 679,241
May	122,966,776	10,145,664
June	113,928,505	11,614,402
July	121,259,073	11,822,536
August	129,713,257	10,913,273
September	130,183,569	5,294,108
October	146,345,514	16,372,337
November	137,681,377	13,589,718

The first steel postal car ever constructed has just been turned out of the shops of the Pennsylvania Railroad. It is ten feet longer than the ordinary postal car and more roomy. Eighteen windows admit light and seventeen specially constructed electric lights illuminate it at night. The car can carry 30,000 pounds of mail.

Following are the reports of gross earnings of the New York Central lines for January:

	1907	1906	*Increase*
New York Central	$7,412,494	$7,185,768	$226,726
Lake Shore	3,464,616	3,408,166	56,450
Lake Erie & Western	413,503	456,165	*42,662
Chicago, I. & S.	245,428	194,749	50,679
New York, C. & St. L.	816,297	867,467	*51,178
Michigan Central	2,278,826	2,079,742	199,084
C., C., C. & St. L.	1,828,801	1,864,052	*35,251
Peoria & Eastern	241,765	262,627	*20,861
Cincinnati & Northern	74,190	70,863	3,327
Pittsburgh & Lake Erie	1,092,148	1,115,684	*23,536
Rutland	194,895	197,856	*2,961
Total	18,062,964	17,703,139	359,826

* Decrease.

Shipments of anthracite coal in January aggregated 5,249,946 tons, against 5,458,084 tons in the corresponding month last year. The following table shows the shipments by the various companies during January as compared with the corresponding month of 1906, in tons:

	1907	1906	*Dec.*
Reading	1,070,898	1,098,385	27,487
Lehigh Valley	833,360	980,548	97,188
Central R. R. of New Jersey	633,351	714,250	80,899
Del., Lackawanna & West.	862,500	820,352	*33,148
Delaware & Hudson	526,026	552,061	26,035
Pennsylvania	507,607	492,145	*15,462
Erie	532,500	567,467	34,967
Ontario & Western	233,704	245,876	12,172
Total	5,249,946	5,458,084	210,138

* Increase.

Industrial.

The first shipment of Pittsburgh coal to a foreign country was started February 1, when Jones & Laughlin sent from their Bessemer mines three carloads destined for Germany.

Conductors, trainmen and yardmen of the Southern Railway are to receive an advance in wages aggregating between $350,000 and $400,000 a year, the advance ranging from 6 per cent. as the minimum to 25 per cent. as the maximum.

The whole number of furnaces in blast in the United States on December 31, 1906, was 340, against 323 on June 30, 1906, and 313 on December 31, 1905.

According to the Census Bureau, the capital invested in the coke industry increased from $17,462,729 in 1890 to $90,712,877 in 1905; the value of the product increased from $16,498,345 in 1890 to $51,728,647 in 1905. Thus capital increased 419.5 per cent. in fifteen years, while the value of the product has risen 213.5 per cent. The following table embraces a summary of the principal items of the returns for 1890, 1900 and 1905:

	1905	1900	1890
No. of establishments	278	241	218
Capital	$90,712,877	$36,502,679	$17,462,729
Wage earners	18,981	16,999	8,998
Total wages	$9,304,498	$7,085,736	$4,072,632
Miscellaneous expenses	$4,891,130	$2,184,968	$394,784
Materials used	$29,884,532	$19,655,532	$11,509,737
Coal—Short tons	36,781,006	30,157,820	15,795,087
Cost	$28,360,121	$18,355,252	$11,110,700
All other materials	$1,524,411	$1,310,283	$309,037
Products, total value	$51,728,647	$35,585,445	$16,498,345
Coke—Short tons	24,733,063	19,640,798	10,008,169
Value	$49,022,051	$34,633,418	$16,494,454
All other products	$2,726,596	$952,027	$3,981

Building operations for January, 1907, show a decrease as compared with the corresponding month of 1906. According to official reports to *Construction News* from thirty-eight principal cities of the United States, the operations for January, 1907, show a total of $32,257,552, as compared with $38,677,587 for January last year. This shows a decrease of 16 per cent. for the month.

Quotations for Government, State, Railroad and Miscellaneous Bonds, Week ending February 7.

STATE OF TRADE.

[A Summary of Special Telegrams to BRADSTREET'S.]

First effects of the past week's widespread winter weather have been to dull trade at most markets, to quiet spring demand, retard collections, and in sections accentuate the already congested railway situation. Some sections, particularly the south, report benefit to trade in winter goods and footwear, and the latter trade has of late certainly been benefited by seasonable weather. Bad roads are a necessary condition making for present quiet in country trade north and west, but where blockades have been lifted, as, for instance, at some western markets, an increased buying on spring account is noted. Taken as a whole, the business booked by wholesalers for January and the elapsed portion of February is fully equal to, and in some markets and staples, notably cotton dry goods, far in excess of, last year's undeniably large business. Building activity has been checked by weather conditions, but while some cities report dulled markets for materials, others report the lumber markets strong. After-effects of the iron workers' strike of last year are witnessed in checked operations at the metropolis. Some few western cities report more conservatism in buying by manufacturers and by railroads, who have decided to forego some projected improvements in view of high costs of labor and material, and also because of talked-of legislative or executive action adverse to corporations. Past measures of trade movement are, on the whole, encouraging. Failures were few for January, clearings were next to the record, and prices of staples as of February 1 were at the top. The winter-wheat crop has been benefited by heavy snowfalls as far south as Tennessee, but reports of damage by bugs come from Texas. Iron buying has become rather quieter, with far-off deliveries easing, a continuance of tendencies noted last week. Money is easier, commercial paper is more fully taken, and the security, grain and cotton markets are all higher. Better export buying is noted in all grains, and those markets are apparently well out of the ruts they have been in. Bank clearings are larger than last week, but are below those of a year ago.

Pig iron is easier on business for future delivery, the indications in this respect being most marked at eastern centers, yet there is a good deal of inquiry in the west, particularly for malleable Bessemer, for delivery in the second half. Foreign iron, arriving and to come, is somewhat lower in price. Large Birmingham interests are quoting $18.50 for No. 2 for the second half, but less important producers appear disposed to shade that figure, while spot quotations are lower. The advance of 25 cents a ton in the freight rate on iron from southern points, announced for February 1, has been postponed until March 3. Bessemer pig at Pittsburgh is off 50 cents a ton. The market for steel is easier in eastern territory. Orders for steel rails are moderate, trolley lines figuring as the largest purchasers, while the placing of some large orders has been deferred owing to money market conditions. It is said, however, that many leading railways have decided to curtail expenditures because of talked-of interference by federal and state authorities. Business in plates is active, and mills are well sold ahead. Specifications for structural material are coming along freely, and conditions in all finished lines are satisfactory. Demand for cast-iron pipe is good, the number of fair-sized orders making a rather large tonnage. Tubular goods are in active request, as are sheets and steel bars, while tinplates for third-quarter delivery command a premium of 10 cents per box. The railways are receiving better deliveries of cars. Coke is firm at all markets except Cleveland, and shipments have been hampered by the weather. Coal is in better demand owing to cold weather. Copper is firmer, and anything like prompt supplies bring prices somewhat above 25 cents per pound.

Monthly statistics of failures, bank clearings and prices are, in the main, very favorable. There were fewer failures in January than in any corresponding month for fifteen years past, but liabilities, swelled by some suspensions in the steel and wire business, were the largest for any January since 1897. Every section of the country reports fewer failures than a year ago, except the territories, and the increase in liabilities at New York City accounts for the entire gain in this direction over January a year ago.

Bank clearings in January were next to the largest ever recorded, the high-water mark having been touched in January, 1906. The past month's clearings show a decrease of 8 per cent. from the record figures, but were 5 per cent. larger than for December, 1906. Decreased speculation at New York seems to be mainly responsible, a decrease of 14 per cent. being shown at that city from January a year ago, while the aggregate clearings at ninety-six other cities show a gain of 5 per cent. over January, 1906, and are the heaviest ever recorded.

Insistent demand or large orders booked ahead make for strong and still steadily rising staple prices. One-half of all prices included in BRADSTREET'S table are steady and unchanged, while one-third are higher and one-fifth are lower as compared with January 1. Ten out of thirteen classes of commodities advanced, while only two declined, and BRADSTREET'S index number as of February 1 is $8.9853, a gain of eight-tenths of 1 per cent. on January 1, of 9 per cent. over February 1, 1906, and of 57 per cent. over July 1, 1896. Textiles and provisions showed special strength during January, due to higher prices for cotton goods and hog products. Breadstuffs and vegetable oils also advanced.

The bull movement in wheat and other grains strengthened further this week. Larger receipts, liquidation to secure profits, and short selling brought about a temporary easing early, but cold weather in the northwest, reduced offerings due to the car shortage, and a disposition on the part of exporters to bid for wheat later caused prices to harden and to reach the highest price touched this year. Prices are up an average of 2½ cents per bushel at all markets, with supplies closely held, and little prospect of increasing movement until the weather moderates. The car shortage is being keenly felt at western milling centers, and Minneapolis flour production is down to a low point, owing to light supplies. European advices have been more bullish. Russian dealers are reported to be buying wheat here and in Canada. BRADSTREET'S visible supply figures are more bullish than for a long time past. American supplies have been decreasing while Canadian receipts have gained slightly, but the great decrease has been in European stocks, which fell off over 9,000,000 bushels in January. American and European supplies combined show a decrease of 11,000,000 bushels for January, and are now only 5,000,000 bushels larger than on February 1 a year ago. Corn has strengthened, partly in sympathy with wheat, but also on poor Argentine crop reports, despite a good-sized movement from the interior. The crop movement as a whole, however, is still behind a year ago at interior points, as is that of wheat. Oats strengthened 4 cents a bushel on good cash demand here and at the west and reported overselling of May delivery in Chicago. Weather conditions and reduced slaughtering have been favorable to provision prices, which are higher on the week.

Congestion in manufacture and marketing of Cuban sugar is reflected in further easing of raw prices, which are off 8 points, while refined is 15 points lower, in sympathy. Coffee is steadier, and spot coffee is back to 7 cents, a gain of ⅛@¼ cent, while futures are 15 to 20 points higher, largely on stronger advices from Europe and Brazil, which respond to large purchases for valorization purposes in the face of an increase of 755,000 bags in the visible supply from January 1. The United States stock decreased 136,000 bags in January. The world's visible supply is 15,133,293 bags, against 11,931,631 bags a year ago, but this entire excess has been bought for valorization purposes, and the United States stock is only 3,692,555 bags, against 4,239,476 bags a year ago.

Cotton future prices struck the low point of the year on February 2, on liquidation, not unconnected, apparently, with the easing of stocks, but this week the course of values has been steadily upward, with a net gain of about ¼ cent on old crop and of 15 points on next season. The stimulating feature has been the strength of demand for actual cotton, particularly at Liverpool, cables from which have been bullish throughout the week, with talk of March-April delivery being cornered. Prospects of lighter receipts from now on are also a factor making for strength. It is hard to see how receipts can keep up, in fact, because for the five months ending with January the movement into sight is 1,843,000 bales larger than last season, and 842,000 in excess of the movement in the record season of 1904-05. The January into-sight movement was nearly double that of January one and two years ago. Spot cotton has been steady and unchanged at 11 cents, New York.

Statistics of shoe shipments from eastern centers bear out past reports of conservative buying of shoes from manufacturers for spring delivery. On the other hand, retail trade has been unquestionably benefited by the past month's weather, and rubber footwear especially has sold better, so that fewer oppressive stocks of winter goods are likely to be complained of than a year ago. Leather markets are quiet, as a whole, but firm. Hemlock-sole sales have been checked by recent advances. Upper leather is strong, and splits and patent leather deliveries are still far behind. Hides are firmer.

The New York stock market is firm and more active at a substantial improvement in prices, which seems due to covering of shorts and the termination of liquidation of weak holdings in the higher-priced stocks. Rumors of further borrowings by railroad companies are circulated, but seem to have much less effect. Industrial stocks are quiet, and the United States Steel issues did not fully respond to the improvement in other parts of the list. Bonds continue inactive, there being but a limited investment demand for such securities. Foreign exchange was heavy, but recovered slightly at the end of the week, demand sterling being 4.84.70.

Bank clearings for the week ending with February 7 aggregate $3,326,000,197, 12.8 per cent. over last week, but 4 per cent. below the same week last year. Excluding New York City, the total is $1,155,675,629, 7 per cent. above last week and 7.5 per cent. over last year.

Business failures for the week ending February 7 number 198, against 211 last week, 204 in the like week of 1906, 207 in 1905, 202 in 1904 and 217 in 1903.

Wheat, including flour, exports from the United States and Canada for the week ending February 7 aggregated 3,319,930 bushels, against 2,102,216 bushels last week, 3,241,939 bushels this week last year, 987,775 bushels in 1905 and 4,800,457 bushels in 1902. For the past thirty-two weeks of the fiscal year the exports are 113,383,475 bushels, against 86,969,486 bushels in 1905-06, 41,049,918 bushels in 1904-05 and 171,410,188 bushels in 1901-02. Corn exports for the week are 2,407,089 bushels, against 2,157,677 bushels last week, 3,660,750 bushels a year ago and 2,448,456 bushels in 1905. For the fiscal year to date the exports are 35,636,797 bushels, against 72,088,795 bushels in 1905-06 and 35,492,101 bushels in 1904-05.

IN CANADA.

Seasonable weather helps retail trade and reorder business in winter goods, spring trade is active with wholesalers and jobbers, and some business for fall is being booked. Light receipts of grain make for firmer prices, labor is scarce throughout the Dominion, coal is badly needed in the northwest and in British Columbia, and Canadian cotton goods are advancing. New mills are projected by Montreal interests. Country trade is active because of good sleighing. Dairy products are firm at Montreal. Toronto reports manufacturers unable to fill all the orders they are offered. Transportation congestion is still acute in the northwest, and coal is scarce. Cold weather in British Columbia helps trade in winter goods. Failures for the week number 18, as against 26 last week and 27 in this week a year ago. Clearings for the week aggregate $81,015,141, a gain of 18.8 per cent. over last week and of 8.1 per cent. over this week a year ago. January clearings in Canada aggregated $356,617,021, a gain of 8.9 per cent. over January, 1906. There were only 104 failures in January, as against 162 a year ago, and liabilities were less than half those of January, 1906.

TRADE REPORTS.

In the dry-goods trade in New York a fair volume of business has been transacted, but there is not the usual number of buyers in town generally seen at this season, and business for the first week in February has not, as a consequence, been up to anticipations. Cotton goods continue brisk and active; dress goods and worsteds are also asked for, and collections are satisfactory. Raw silk is firm. Manufacturers of shirts and gloves are busy on orders, and prices are advancing. Demand for knit goods, hosiery and underwear exceeds the supply, and mills have more orders than they can immediately fill. The continued cold weather has helped to further reduce stocks of furs, which, however, continue to be offered at lower prices. Wholesale notions are active and business brisk. Sales of rags and shoddy are of small proportions. Wholesale grocers report a fairly satisfactory volume of orders, but weather conditions have restricted shipments. Retail business is good and some lines are more active. Prices of confectionery continue firm and collections are fair. California wines are dull, and cheaper grades, of which there are full stocks on hand, are lower. High prices asked by Kentucky distillers limit buying of whiskies. Weather conditions and shortage of cars lessen supplies of live stock and dressed meats, but not to such an extent as to cause inconvenience or a hardening of prices Flour is still inactive, but the contest between millers and jobbers has forced some concesssions, except from the strongest millers, who hold firmly. Butter, cheese and eggs are in the usual demand. Receipts are about up to requirements, and prices are stationery. In apples and potatoes none are being offered for export, home consumption being sufficiently large to clear the market. The china and glassware trades are quiet, domestic glass being less inquired for. High prices of brass and copper limit purchases to actual needs. Iron and steel show less activity. Metals hold their price. Collections in the electrical-goods line are better, but business is of less volume. Trade in automobiles continues very active, and an invasion of Europe by American manufacturers appears more than probable. Jute cordage is very active and prices are high. In the leather trade business is active and prices well maintained. Harness and horse clothing are also in brisk demand. Sales of rubbers and rubber goods have been stimulated by the recent snowfall. The paint trade is quiet. Prices in this line have advanced from 10 to 50 per cent. during the last six months. Real estate is fairly active, and the easier conditions obtaining in the money market are reflected in the building trade, which, however, does not show a volume of business equal to that of last year, as in January, 1906, plans calling for an expenditure of $14,000,000 were filed, while those filed in January, 1907, aggregate only

$3,000,000. Business in lumber and building materials has been affected by the prevailing weather conditions, but the trade is not dissatisfied with the volume transacted under the circumstances. A slight advance is noted in some lines. Collections are only fair, and renewals of paper are asked for in some instances. Improved conditions in the wholesale paper trade continue, and business is above the average for this season of the year.

The following telegrams show trade conditions at the cities mentioned for the week ending February 8:

BOSTON. — Business in dry goods has been checked by the severe snowstorm. Collections in retail lines are affected by the cold or stormy weather. Strength of textile fabrics is still pronounced. Cotton cloths are very strong and active. Dress materials sell actively, in some lines up to the limit of production. Wholesale millinery is quiet, but some jobbers have made extraordinary purchases in anticipation of an active and prosperous spring season. Boston leather dealers appear to be disappointed with sales thus far. Shoe manufacturers have not yet received as many supplementary orders for spring and summer goods as was expected, and are buying leather only for immediate needs or conservative estimates of their future requirements. Hides are firmer, sole leather tanners buying buffs to make up for the shortage of branded cows. Shipments of footwear are falling behind those of the same period last year. There is a good tone in the general market for paper, mills are busy on orders ahead, and jobbers are having a satisfactory business. The local paper-stock market shows no marked change. Manufacturers are buying only for near wants, which are of moderate amount, and, on the whole, trade is characterized as quiet, although more activity is looked for in the not distant future. Jobbers of house-furnishing goods are receiving a considerable number of orders for early spring delivery, and the volume of business promises to be of fair proportions; collections are somewhat slow. Lumber is quiet. Southern lumber is in moderate demand, while in western lumber there appears a little more activity in some lines. In iron and steel, prices are a little easier on quiet demand. Paints and oils are quiet, but prices are firm. Brick and other building materials are quiet, with no material change in prices. Anthracite coal is in fair demand; shipments of bituminous coal have been delayed on account of stormy weather, but there is a good supply, the market not being very active. Grocers say the trade is of fair volume but lacks snap.

PROVIDENCE.—In the cotton-goods market there is a marked scarcity of goods, and the general dry-goods trade is affected because of this. Jobbers in furnishings, notions and fancy goods report a good business. In the jewelry line business remains brisk. Machinery and tools hold firm in demand and prices. Collections are fair.

PORTLAND, ME.—Heavy snows and continued bad weather affect demand for goods at retail. Country roads are in an extremely bad condition. Wholesalers report trade improving.

PHILADELPHIA.—Wool is quiet, but prices are well sustained. Jobbers of dry goods report fair trade but slow collections. Chemicals and dyestuffs are firm, demand for heavy grades being good. Drugs are selling freely. Paints and glass are dull. Adverse weather interferes with deliveries of lumber and there is a lull in the retail line; prices, however, are firm. Hides and skins are strong on brisk demand. Glazed kid is firm. Shoe dealers report good business and improvement in sales of rubber goods due to wintry weather. Sugar is quiet and all hard grades declined. Tobacco sells less freely, but prices are firm. Manufacturers of cigars are bringing up arrears of orders, but new ones are not coming in so well. The liquor trade, though busy, is not so active. The pure food laws, which were to become operative January 1, but which go into effect March 1, are not well understood. There is a good deal of business doing in pig iron. The supply is not overabundant, immediate deliveries are hard to obtain and prices are strong. Business in coal is good, though deliveries are interrupted by inadequate transportation facilities.

PITTSBURGH.—During the week there was a good inquiry for basic and malleable iron, and sales aggregating about 5,000 tons, mostly for third quarter, were made, the former at $21.25 and the latter at $21.50. Bessemer and basic iron for second quarter is now practically all cleaned up. The finishing mills of this district continue to operate under full pressure and heavy specifications are being drawn against old contracts, and present indications point to a continuance of this activity until well into the fall. Coke shipments have been interfered with somewhat by the weather and an inadequate car supply. Prices are holding firm at present quotations. At the valley furnaces pig iron for spot delivery is quoted as follows: Standard Bessemer, $23; chilled basic, $22; No. 2 foundry, $24, and gray forge, $21.75. Standard Connellsville coke is quoted at $3.60, and foundry coke, $4 to $4.25, at the ovens.

BUFFALO.—Weather conditions have been favorable to seasonable goods, and trade generally is active. Iron, steel and lumber are in demand and prices are good. No complaints are heard regarding collections.

BALTIMORE. — Continued cold weather has assisted retail clothiers to reduce their large stocks, and an increased business in rubber goods is also reported. Retail trade in shoes continues quiet and jobbers' sales are less than in 1906, though equal to those of 1905; collections are only fair. Clothing manufacturers are busily engaged in shipping spring orders. Some late spring business is coming from the far south; collections are fair. In dry goods and notions, business for the month is somewhat behind that of 1906, due to crop failures, floods in certain portions of the south and the carrying over of stocks, and therefore dealers are showing more conservatism in ordering than last year. City business, however, is satisfactory. Men's furnishings are quiet, aside from the sale of gloves, with spring orders being received in fair numbers. Flour is quiet though prices are firm. A feature of the week was the offering of $1,000,000 of the 3½ per cent. 1980 sewerage loan, upon which $91.66 was bid for the whole issue. While this was below par and partly due to the condition of the money market, the main factor was the repeal by the legislature of the law allowing corporate holders of city stock an exemption from taxes on their own capital to an amount equal to their holding of city stock. Demand for money continues active.

CINCINNATI.—General business is much improved. Money is abundant, but demand is light.

CHICAGO.—Conservatism prevails among manufacturing and railroad interests owing to the attitude taken by the federal administration, as well as by nearly every western and middle-western legislature. This has caused a curtailment in contemplated expenditures by railroads. Those running into Chicago have cut their budgets $125,000,000 from estimates made early in the season. High cost of raw materials, general supplies and labor are also given as other reasons for the change. Heavy snows and delays to traffic have interrnpted trading with jobbers and delayed purchases of those who came here from the extreme southwest for spring and summer stocks. Dry-goods houses report fair inquiries for medium-sized new stocks and are making heavy shipments on forward sales of spring goods. Boot and shoe interests, as well as clothing, are having a good average trade for the season. Specifications for iron and steel, as well as new buying, are liberal, and there is nothing in the immediate situation to indicate a change. Pig iron is held at full prices. Furnacemen have sold their first half year's output and made a good beginning on the last half. Railroads are buying cars, but on a somewhat reduced scale, and are getting liberal deliveries on previous purchases. Coal traffic is delayed on some railroads, and sales are better, on the whole, with a stronger undertone to prices. Sales of upper grades of white pine are at $1 advance, and the general market is stronger. Groceries are selling freely and consumption is large. Butter, eggs, potatoes and poultry are higher, with a good demand and reduced supplies. Hogs advanced early but reacted later, while cattle and sheep are lower. Receipts of cattle and sheep increased; those of hogs decreased. Money is easy. Commercial paper is in active demand from local and interior banks. Currency movement about an average. Collections are fair.

LOUISVILLE.—Cold weather stimulates retail trade. The mild weather of fall and winter caused many retailers to carry over large stocks of heavy goods, which they are endeavoring to dispose of by cut-price sales. Last week, bank clearings, for the first time in many weeks, showed a decrease from the corresponding week of last year. This was entirely due to flood conditions and will undoubtedly be overcome in a week or two. The people of Louisville are raising a fund for the flood sufferers, which now amounts to about $5,000. Business in all jobbing lines is fairly active. Dry-goods merchants report fair trade, and good-sized spring orders are coming in. Filling-in orders are scarce owing to the previous open season. Whiskey dealers and distillers report a good business at high prices. All Louisville merchants are complying with the pure food act as nearly as the indefinite instructions of the Agricultural Department permits. Jobbers in shoes report business quiet, the spring season being about over, and it is too early for duplicating orders. Manufacturers of clothing are busy making up and shipping spring goods. Few traveling men are out. Hardware merchants report business fair for this time of year. Paints, oils and glass are moving well. Collections are slow, particularly from the far south.

ST. LOUIS.—In some sections traveling men are meeting with success in the shape of good spring orders, while in others there is much complaint. However, the volume of orders now booked for early shipment in dry goods, shoes, hats and kindred lines is larger than at the same period last year. Cold weather has retarded building operations somewhat, consequently all grades of building material are rather quiet. Retail trade is quiet. Collections range from fair to good. Money is easy.

KANSAS CITY.—Country merchants are in the market, having been attracted by low railroad rates, and trade in dry goods, boots, shoes, hats, caps and millinery has been active. House sales compare favorably with previous years. Collections continue backward, and retail trade has been affected by unfavorable weather. Live stock receipts are heavy. with firm prices. Money is in good demand at normal rates.

MILWAUKEE. — Trade continues satisfactory. Collections are fair.

SIOUX CITY. — Wholesale trade shows good mprovement, and retail trade is fair. Prospects for the coming year are excellent. Collections have improved.

DAVENPORT.—Retail trade is quiet owing to below-zero weather. Shoe dealers have been benefited by the snow. Jobbers seem satisfied and manufacturers report plenty of orders. Collections range from fair to good.

ST. PAUL.—Business in all lines is quite lively, sales being in excess of a year ago, although many shipments await transportation facilities, and the long-distance telephone is in frequent demand regarding same. Collections are coming in fairly well, the last two days being good. The month of January fell below last year. The amount received was about the same, but the volume outstanding was greater. Merchants from North Dakota report that no business is being done. Many cities are snowbound and without coal, not only on branch lines but on others as well. Some have not seen money since December.

MINNEAPOLIS.—The continued cold weather throughout the northwest retards business, although there has been a fairly good demand for staples. Collections have been only fair in most directions, and in northern Minnesota and North Dakota are less so. Orders for spring goods are, however, in excess of last year, and prospects are excellent. Flour manufacturing is quiet, demand being only fair.

OMAHA.—Jobbers in leading lines report orders for future delivery considerably in excess of a year ago. Retail trade is only fair. Collections continue quiet.

LINCOLN.—Recent cold weather stimulated retail trade. Wholesale business is about normal and collections are fair.

SIOUX FALLS.—Severe weather has caused heavy losses to live stock on ranges. Business is dull and collections are slow.

CHARLESTON.—Jobbers in dry goods and shoes report business quiet. Wholesale grocers are doing a fair volume of business. Fertilizer dealers are still experiencing a shortage of cars. Collections are slow, and a number of accounts are being carried to next fall.

RICHMOND.—All lines of trade show improvement. Retailers of wearing apparel are benefited by the cold weather. Sales thus far made for the spring season by wholesalers of dry goods and notions exceed the total for the same period of last year, and demand shows no signs of abatement. Similar conditions are found in the shoe and hat trades. Roasters of coffee and dealers in spices are doing a steadily increasing business, constantly extending their territory and adding new lines. Manufacturers of trunks and bags are well supplied with orders for present and future delivery. Local foundries are being operated at full capacity, and manufacturers of stoves have had a particularly encouraging season. The weather has been unfavorable for handling tobacco, consequently offerings have been light. Prices are firm, with a strong upward tendency for the better grades. Demand for money is active. Collections are backward.

AUGUSTA.—Trade and collections are fair.

ATLANTA.—Business in practically all lines is good for the season. Collections are still dragging.

JACKSONVILLE.—Tourist travel is not up to expectations, but business is good. Money is easier and collections are fair.

BIRMINGHAM.—Southern foundry No. 2 pig iron is scarce for immediate delivery, and sales are made at $23.50. Trade in general is a little dull, which is thought to be due to the inclement weather. Collections are slow.

MOBILE. — Extensive preparations are being made for the Mardi Gras festival, and many thousands of visitors are expected next week. Tradesmen look for an active business. Jobbers report a very active trade being done, 20 per cent. more than at the same time last year, but they cannot fill spot orders, as factories in the north are overstocked with rush orders. Collections are fairly good. Lumbermen are looking forward anxiously to a cold snap that would kill the worms that are playing havoc with millions of feet of storm-swept timber. Freezing weather would perhaps save $1,000,000 worth of timber in the immediate vicinity. Material advances are noted in naval-stores products, owing to the storm and the scarcity of labor.

MONTGOMERY.—Trade in all wholesale lines is good. Retailers report conditions satisfactory. Collections are fair. A large amount of building is in progress, and there are complaints as to scarcity of labor.

CHATTANOOGA. — Jobbers look forward to a good spring business, and manufacturers are busy. Cold weather has stimulated retail trade. Collections are fair.

MEMPHIS.—Retail business is dull, but wholesale sales are increasing. Collections are slow, money is tight. The high water is receding. Damage is slight. The inconvenience will soon be overcome. Bad country roads and car shortage are delaying the movement of cotton. Lumber warehouses and railroad platforms are congested.

NASHVILLE.—Collections are improving and colder weather has stimulated many lines of retail trade. Jobbers of hardware and groceries report a healthy demand.

LITTLE ROCK.—Wholesale trade shows a slight increase for this time of the year. Retail trade in wearing apparel, due to cold weather, shows an increase. The movement of cotton is light. Collections are good.

NEW ORLEANS.—Jobbing trade is still dull, but prospects indicate that there will be considerable activity a little later on. Retail trade is improving with the influx of visitors for the carnival. Collections are only fair, but money appears to be growing a trifle easier. The present stage of the Mississippi river is causing apprehension in some quarters, but the authorities believe the levees will hold. Money is firm.

DALLAS. — Jobbing in all lines is excellent. Collections are fair. The wheat crop in this section has been practically ruined by green bugs.

SAN FRANCISCO. — Building operations are delayed by the weather and scarcity of labor and material. Business is good.

SEATTLE.—There has been some relief in the car shortage, but shipping generally is still being hampered. Trade in all lines, however, is active and spring purchases are large. Collections are good.

SPOKANE.—Business is good considering the delay that is being experienced in the delivery of freight, owing to snow and washouts. Collections are only fair.

TACOMA.—Heavy snows in the mountains have further added to railroad blockades. Stocks in some lines are almost depleted as a result.

PORTLAND, ORE.—Jebbers report the receipt of orders for spring goods far in excess of former years. High water in the principal rivers retards the movement of freight, all railroads being more or less affected.

TORONTO.—In all directions there is an excellent business being done. Manufacturers are as busy as they were at any time last year, and in many instances they are unable to take care of the business offering. Wholesale trade is brisk. In all departments of the dry-goods trade there is a good movement of spring lines. Fall lines are also being shown and the outlook is good. Retail trade, city and country, is brisk and collections are good. Groceries are more active, teas are in good

demand, and dried fruits, cheese and canned goods are very firm. Butter is a trifle easier, but eggs are very firm and tend upward. Trade in grain is quiet. Owing to light receipts of wheat at Winnipeg prices here are firmer and oats also hold firm. Receipts of hides are heavy; they are expected to continue so for a week or more, and the market is weak. Wool is very quiet.

MONTREAL.—Cold weather is causing a good retail movement in winter lines, and the wholesale sorting trade is correspondingly more active. Deliveries of Canadian cottons are slow, due to a scarcity of labor, and prices hold very firm. New cotton mills are to be established at Shawinigan, Que. A good advance business is now being done for fall lines of dry goods. Hardware is more active. Demand for heavy metals is active at firm prices. Country trade is active. Collections are fair to good. Hogs are very firm at $10 per hundredweight for dressed selects. Cheese is firm, with stocks light. Butter is firm, and it is expected from now on the make will be light. Trade in hides, wool and tallow is quiet, but prices are steady.

VANCOUVER.—Unusually cold weather along the coast has resulted in a brisk demand for heavier lines of dry goods. Retail trade generally is active and collections from all points are good. Provincial industries continue busily engaged; there is, however, some annoyance felt at the scarcity of coal which has been in evidence during the past week or two. A company of English and Canadian capitalists has been incorporated with $1,000,000 capital to start a car foundry. The lumber trade continues active. Prices hold firm.

WINNIPEG.—Transportation congestion is still acute, though some slight improvement is noted. Retail trade is brisk, and there is a good sorting business from dealers in the city and nearby towns. Collections are fair.

FINANCIAL.

Money Market.

The banks lost to the Treasury this week, and not a little attention is drawn to the way in which the government balances are again piling up. In fact, there is a disposition in certain quarters to doubt the advisability of reduction on any extensive scale of the government deposits in the banks. It seems, for the present at least, however, that Secretary Shaw will do no more than to reclaim the $12,000,000 of such deposits which he made in December, and will not call on the banks to return the $30,000,000 which was deposited during the autumn. On the general movement of the week the banks seem to have lost about $3,000,000 cash, according to the estimates. It was noted, however, that the offerings of funds, particularly on time, were more liberal, and arrangements running up to four months declined to 5 per cent., loans for longer periods being somewhat steadier, although in this connection also there was a disposition to make concessions from the rates which have lately prevailed. Call money was easy and in good supply, the sudden rise on Friday afternoon to 6 per cent. being apparently due to temporary causes, while there was a fair out-of-town buying demand for commercial paper.

Bank Clearings.

[By Telegraph to BRADSTREET'S.]

Bank clearings for the weeks ending February 7 and January 31, 1907, and the percentage of increase or decrease for the week ending February 7, compared with the corresponding week of 1906, follow:

	February 7	Inc.	Dec.	January 31
New York	$2,170,324,568	....	9.8	$1,869,294,010
Chicago	252,253,978	17.0	....	228,778,757

New York Banks.

Another expansion in loans was shown by the New York Clearing House averages for the week ending last Saturday. In this case the increase was $11,852,100, while since the bank statement of January 5 this item displays an augmentation of $48,170,000. The generally accepted explanation continues to be that these results arise from the repayment of foreign borrowings or time loans made with trust companies and their replacement by call loans from the banks. The only other feature of last week's statement was the loss of $501,600 in cash, which figure was, however, smaller than had been indicated by the estimated actual movements of money for the week. Deposits increased $9,708,400, or some $1,600,000 less than was called for by the other changes, making the reserve required $2,427,100 larger, so that the surplus reserve was reduced to the extent of $2,928,700. The figures of the statement compare as follows with those of the preceding week:

	February 2	January 26	Changes
Loans	$1,097,837,500	$1,088,985,400	I. $11,852,100
Specie	197,800,300	196,873,200	I. 927,100

Bonds, state	14,000	3,000	35,000	400,000
Bonds, gov't	1,630,000	1,352,000	7,507,500	15,581,600

Foreign Exchange.

There was a fairly good supply of commercial bills, together with some further offerings of exchange created in connection with recent European participation in the subscriptions for new issues of bonds or short-term notes by railway companies. The market for demand sterling was, on the whole, heavy, but the fluctuations were within narrow limits, and toward the end of the week the tone became somewhat firmer, the actual rate rising to 4.84.65 on Thursday. It was noted that francs were relatively strong in consequence of a rise in the sterling quotation at Paris to 25 francs 26 centimes. In addition to the $500,000 of gold secured by New York banking interests in London at the close of last week, some further small engagements were effected, amounting in the aggregate to $400,000, but it would seem that the demand from India and South America is sufficiently large to absorb the bulk of the supplies of new gold which come into the London market.

POSTED RATES OF LEADING DRAWERS FOR LONG AND DEMAND STERLING.

Feb. 2	Feb. 4	Feb. 5	Feb. 6	Feb. 7	Feb. 8
4.82 @ 4.86	4.82 @ 4.86	4.81½ @ 4.85½	4.81½ @ 4.85½	4.81½ @ 4.85½	4.81½ @ 4.85½

Closing quotations on Friday for actual business in other classes of bills were: Cables, 4.85.35@4.85.40; commercial bills, 4.80@4.80⅝; francs, 5.23¾ plus 1-32@5.20 less 3-32; reichsmarks, 93 11-16 plus 1-32@94½ less 1-64.

The Bank of England this week showed a gain of £1,134,000 in gold. Its rate remained at 5 per cent., while the proportion of its reserve increased from 48.31 per cent. to 49.66 per cent., the figure in question comparing with 46.12 per cent. at the corresponding date last year. In the London open market money continues to be firm at 3¾@4 per cent. for call loans and 4⅝@4 11-16 for discounts. The Bank of France this week reported a gain of 700,000 francs in gold. Its discount rate is unchanged at 3 per cent., and in the Paris market discount is also quoted at 3 per cent. At Berlin the bank rate remains at 6 per cent., the open market quotation being 4½ per cent.

New York Securities Market.

The dull and depressed conditions which have existed for some little time in the stock market gave place this week to a more or less decided recovery in values. Moreover, as the week progressed, the tone of the trading showed a little more aggressive bullishness on the part of the rank and file of the operators, while the activity was on an enlarged scale. It would seem that the overloaded speculative accounts in some of the high-priced stocks, such as those of the Hill group, which had experienced such severe declines from the high prices of last autumn, has been thorough and effectual, and the street gossip has not failed to identify the source of a good deal of such selling. The main fact, however, was that weak holdings had been generally eliminated, while a very considerable short interest was created, the covering of which supplied not a little buying power, supplementing the purchases by investors, which, while not on a particularly large scale, had, nevertheless, made their appearance at the recent concessions. The further easing of money, particularly in time loans, was something of a factor in producing the improved feeling which animated the market. There is, of course, some apprehension lest the withdrawal of more of the government deposits from the banks might cause trouble, although Secretary Shaw is quoted as giving reasonable assurances that his course in that respect will not be calculated to adversely influence the monetary position. While foreign exchange is practically down to the gold-import point, some parcels of bullion having been obtained in London this week, it is realized that in the strained condition of the London money market no large influx of the yellow metal can be counted upon. There is still some apprehension as to the extent and influence of the raising of new capital by railroads for improvements. This week it was noted that the Rock Island had sold an issue of $10,000,000 of short-term notes, and there continues to be rumors to the effect that the Erie management will be likely to negotiate a block of new securities of some kind, these latter intimations, however, having a rather bad effect upon the action of the Erie stocks in the market. The return of Mr. Harriman to Wall street, after an absence of several weeks, was regarded as a favorable point in respect to the issues with which he is identified, Union Pacific and Southern Pacific having shown not a little strength in the last few days. At the same time the market has been rather a general one, no special securities having shown exceptional tendencies, though it might be mentioned that the Hill stocks, St. Paul, Reading and the others, which have been subjected to hammering by the bears, recovered ground very readily, the same being true of Amalgamated Copper and some of the other industrials. The Steel stocks, it was noted, tended to hang back, their course in this respect being in marked variance with the relative steadiness they displayed during the weakness in the general list. On Friday the market was strong well up to the close, when an advance in call money to 6 per cent. from 3 per cent. early in the day caused a rather sharp break.

Boston Stock Market.

Prices of principal stocks, with volume of transactions, on the Boston Stock Exchange, have been as follows:

February 2	+816,000	—768,000	—807,000

Wheat and Flour Exports.

[Special to BRADSTREET'S.]

The quantity of wheat (including flour as wheat) exported from United States and Canadian ports for the week ending with Thursday compares as follows, in bushels:

Week ending	1907	1906	1905
January 3	4,255,270	3,839,741	1,411,947
January 10	4,073,110	4,768,772	700,950
January 17	2,636,460	3,448,862	1,138,974
January 24	3,328,255	3,433,585	1,101,587
January 31	2,102,216	3,056,208	945,358
February 7	3,319,930	3,241,939	987,775
Largest exports in 1906, week ending Aug. 30			5,188,817
Smallest exports in 1906, week ending July 19			1,535,967
Largest recorded exports, week ending Aug. 11, 1901			9,039,761
Smallest recorded exports, week end'g Feb. 16, 1905			536,540

Corn Exports, in Bushels.

[Special to BRADSTREET'S.]

Week ending	1907	1906	1905
January 3	1,974,599	6,265,333	3,186,532
January 10	1,296,187	5,342,569	2,932,014
January 17	1,906,873	5,941,571	3,186,529
January 24	2,064,883	5,633,265	3,035,733
January 31	2,157,677	8,289,359	5,302,503
February 7	2,407,089	3,660,750	2,448,456
Largest exports in 1906, week ending February 1			8,289,359
Smallest exports in 1906, week ending June 14			320,486
Largest ever recorded, week ending Feb. 1, 1906			8,289,359
Smallest ever recorded, week ending Sept. 1, 1902			21,196

Cereal Crop Movement.

The movement of flour and of leading grains at primary points for the week and for the thirty-one weeks of the present season compares with similar periods one and two years ago as follows:

Week ending	*Flour, barrels*	*Wheat, bushels*	*Corn, bushels*	*Oats, bushels*
Feb. 2, 1907	347,351	2,232,002	6,980,468	3,332,623
Feb. 3, 1906	382,492	2,976,015	4,422,053	3,987,443
Feb. 4, 1905	137,719	2,498,471	3,826,450	1,906,204
Season				
July 1, 1906, to Feb. 2, 1907	13,312,413	170,463,298	116,745,277	128,317,017
July 1, 1905, to Feb. 3, 1906	12,670,565	182,369,791	119,104,958	146,013,680
July 1, 1904, to Feb. 4, 1905	11,176,494	163,288,595	112,765,365	106,047,081

Cereal Exports, with Destinations.

The exports of wheat and corn (in bushels) and of flour (in barrels) from the United States and Canada (coastwise shipments included), with ports of destination, for the week ending January 31, 1907, follow:

To	*Wheat*	*Corn*	*Flour*
Liverpool	195,215	467,139	12,590
London	11,998	386,427	6,075
Bristol	128,000	25,900	3,290

Statistical Situation of Cotton.

The aggregate world's visible supply of American and other cotton last week, as made up by the New Orleans Cotton Exchange, is shown, with comparisons:

Week ending	*Feb. 1, 1907*	*Jan. 25, 1907*	*Feb. 3, 1906*
American	4,356,812	4,360,064	3,895,270
Other kinds	1,145,000	1,142,000	1,530,000
Total	5,501,812	5,502,064	5,425,270

Of the world's visible supply, as above, there were afloat for or held in various countries on the dates given the following quantities:

	Feb. 1, 1907	*Jan. 25, 1907*	*Feb. 3, 1906*
Great Britain and continent	2,983,000	2,818,000	2,766,000
Egypt	237,000	245,000	199,000
India	505,000	494,000	846,000
United States	1,777,000	1,945,000	1,614,000
Total	5,502,000	5,502,000	5,425,000

Following will be found the movement of cotton into sight for the week and season, as compiled by the New York Cotton Exchange:

	This week	*Last week*	*Last year*
Week	347,200	392,740	198,754
Season	10,263,456	9,916,256	8,249,259

COMPARATIVE PRICES OF 107 COMMODITIES.

Quotations ruling for standard grades at the low point in 1896, the succeeding high point in 1900, the succeeding low point in 1901, and the generally high records reached since then:

Boston Shoe and Leather Market.

Leather dealers report trade quiet. Buying of hemlock sole leather has been temporarily checked by the increase in the selling price. Receipts are fully taken up by balances due on old contracts. Union sole is firm, sole cutters' new orders about equaling receipts. Oak sole is well sold up and tanners decline to make contracts covering any considerable distance in the future. All kinds of offal leather are scarce and prices are advancing. Rough leather is quiet. A little more activity is noted in grain leathers, but as yet few transactions of any size have been closed. Rough and finished splits are sold ahead for months. Patent leather manufacturers are still far behind on orders, but owing largely to lack of sunshine. Hides are firmer. Tanners of sole leathers are buying buffs to make up for short supply of branded cows. Dealers expect that an advance in prices will be made. Goatskins are scarce and tend higher in price. Some fair-sized orders for late spring shipment have been placed, but, as a whole, the shoe trade is still expecting, rather than realizing, free buying on the part of the wholesale trade. Some dealers state that they are carrying good-sized stocks which could not be replaced at prices paid; they are also of the opinion that prices will not be materially higher. Their policy is therefore to watch the market closely and to buy only what they know they can turn over to the retailers. Shipments of footwear continue to bear out the general market reports. The *Shoe and Leather Reporter's* figures this week are as follows: Last week, 85,145 cases; preceding week, 88,501; last year, 100,175; total for 1907, 448,532; total for 1906, 506,793; decrease, 58,261.

Boston Wool Market.

Stocks of desirable domestic wools are so small at present that the attention of the manufacturers is turned largely to foreign wools, and as much of the wool which was bought abroad is now commencing to arrive in this market, the market for domestic wool is still more quiet. There is still a small amount of wool moving, however, both small and large mills looking for lots to tide them over, pending the arrival of foreign-bought wools. Domestic clothing wools are especially neglected, in spite of the fact that they are so much cheaper than the same grades of foreign wools, but this is also due to heavy purchases in Australia which will be here shortly. The Whitney clip of northern California wool has just been sold here, the price being private, but supposed to have been at top quotations. Mills waiting for the direct wools have created a sharp demand for Australian fine merinos in this market during the past week, and some small sales are reported at 42½@47 cents, including a small amount of the wool from the last London sale and some of the direct wools from Australia. Buyers returning from the London sales are very much impressed by the strength of foreign markets, and predict fully as high prices at the London March series. The total purchases for this country in Australia this year are estimated at over 100,000 bales, and in South America, where prices are extremely high, at about 16,000 bales thus far, very much less than last year. It now appears that the amount of wool under contract in the west is quite large, amounting from 1,500,000 to 2,000,000 pounds in Idaho at 17@18 cents for western, 4,000,000 to 5,000,000 pounds in Utah at 23@23½ cents, and a little in Nevada at 18 cents. Shearing is going on in Arizona, and sales have been made at 20@21½ cents, ½@1 cent below last year. Locally, fine and fine medium territories have sold at 22@23 cents, scoured territories at 67@68 cents for fine and 68 cents for fine medium, quarter blood fleeces at 33½@34 cents for Ohio and 32½ cents for Michigan, fine washed delaine at 37½ cents, Ohio XX at 34@34½ cents, washed delaine at 30 cents, fine unwashed at 26½ cents, fall Texas at 22@23 cents, choice white B pulled at 52@54 cents, and ordinary Bs at 47@50 cents.

A STUDY OF THE IRON TRADE.

Dr. William Kent, dean of the L. C. Smith College of Applied Science, Syracuse University, contributes an interesting study on the history of the iron trade for forty-two years to the *Iron Trade Review*. Dr. Kent's paper discusses the various currents that have appeared in the industry during the period mentioned, and the general course of the industry is graphically depicted by a plotted diagram. Lack of space, however, prevents us from producing anything but Dr. Kent's conclusions and views as to the future. Thus, after showing how the production of pig iron has progressed since 1864, Dr. Kent points out that the most remarkable fact shown by the figures is that, notwithstanding panics and depressions of every kind, the average rate of production for forty years is more than 100 per cent. in every decade. To illustrate his point Dr. Kent has made a logarithmic calculation of the average rate of increase per year and per decade for several periods, with the following results:

Period	*Years*	*Rate of increase per year*	*P. ct. per decade*
Forty-one years	1864-1905	7.909	114.088
Twenty-five years	1880-1905	7.424	104.742
Sixteen years	1889-1905	7.160	99.688
Ten years	1895-1905	9.303	143.401
Five years	1883-1888	7.123	90.472
Five years	1898-1903	8.872	113.964

While panics and depressions may set the iron trade back for a few years, they are always followed by a period of great activity, as if to make up for the lost time, to replace the rails, cars and other material that have been wearing out during the slack period, and to build the structures, machines, etc., the building of which was postponed during that period. The rate of progress for the ten years 1895 to 1905, 9.303 per cent. per annum, or 143.401 per cent. per decade, was no doubt due to some extent to making up for the lost time of the years 1890 to 1895, and it does not seem reasonable to suppose that that rate of progress will continue for many years, for we have good reason for believing that the rate for twenty-five years, 1880 to 1905, which included one big panic period and two small ones, will continue for a long time to come. Using the rate of these years, 7.424 per cent. per annum, or 104.742 per decade, we have the following figures for the prospective production up to 1920, in round numbers:

	Gross tons		*Gross tons*
1905	22,990,000	1913	40,780,000
1906	24,700,000	1914	43,810,000
1907	26,530,000	1915	47,070,000
1908	28,510,000	1916	50,560,000
1909	30,620,000	1917	54,320,000
1910	32,900,000	1918	58,350,000
1911	35,340,000	1919	62,680,000
1912	37,960,000	1920	67,340,000

Assuming that the rate per decade should decrease to 100 per cent. after 1910, we have the following possible figures for the next forty years:

1910	33,000,000	1940	264,000,000
1920	66,000,000	1950	528,000,000
1930	132,000,000		

Dr. Kent recognizes that the concluding figure is a startling one, but he says it is not more astonishing than the increase from 1,000,000 to 25,000,000 in the last forty-two years.

WHAT THE STATES EXCEL IN.

According to the Chicago *Inter-Ocean*, "the Agricultural Department of the United States government has a Hall of Fame. Here are crowned the states that surpass other states in the production of things dear to the heart of the Secretary of Agriculture. So far but sixteen of the states have been admitted to this Hall of Fame, and some of the sixteen wear pretty small crowns.

"In this Hall of Fame honors are fleeting, as elsewhere, but just at present Pennsylvania proudly occupies the niche nearest the grand entrance, and fills it pretty full with eight honors for supremacy in the production of rye, natural gas, coal, pig iron, coke, stone, slate and sand and gravel.

"No one thinks at first of New York as an agricultural state, but the Empire State largely makes

good its proud title with five honors—hay, potatoes, buckwheat, cows and salt. This is a happy combination, since potatoes and salt go together as naturally as do cows and hay.

"Texas squeezes into the third niche with four honors. Three of them are not surprising—cotton, rice and beef cattle. But when we say that the fourth is mules we tear from Missouri a proud honor that she has long worn in the opinion of the people. Texas, though so big, is young; some day she will take to herself other honors.

"Illinois has a clear lead in three things and occupies the fourth niche. Leading all the states in corn and oats, she very fittingly takes the lead also in horses. Kentucky leads in tobacco.

"Colorado and Montana just now are disputing precedence, each with two honors—the former in gold and beet sugar and the latter in silver and sheep.

"There is nothing formal about the occupancy of the other nine niches; almost any arrangement will do, since no one state has more than one honor. Kansas leads in wheat, Louisiana in cane sugar, Minnesota in barley, Oregon in hops, North Dakota in flaxseed, Iowa in swine and California in petroleum. Wisconsin is near the last with mineral waters, and Ohio fills the last niche with clay.

"These facts give us a pretty clear idea of certain phases of the agricultural production of the country. New England, evidently, is out of the competition, but Pennsylvania and New York, with rather more than their share, give the east its full quota of honors. Massachusetts is the center of the codfish industry. The middle west has eight honors, the south six and the far west seven. Illinois, Kansas, Minnesota and Iowa carry off the honors in corn, oats, wheat, barley and swine."

THE TEHUANTEPEC RAILROAD.

Writing in the *Engineering Magazine*, G. C. Terry points out that "at the beginning of its operation, in December, 1906, the Tehuantepec Railway had but a single line of track, though a double track is assured as soon as the freight situation requires it. The rolling stock at present consists of 12,000 freight cars and fifty engines, while supplementary orders for more cars are now being filled. The equipment of the Tehuantepec road is of the most modern description. The gauge is the standard one of four feet eight and a half inches. Bridges, which are of steel, with abutments of solid masonry, are numerous, and as in the instance of that over the Jaltepec river, at Santa Lucrecia, of very considerable size. This bridge is 560 feet long, with five spans, and ties of creosoted pine, native hardwood and California redwood.

"While the scenery along the road is beautiful beyond all expression, the forests being a great green jungle of palms, huge tree ferns and other tropical plants, over which the most exquisite orchids climb, it certainly does not conduce to successful railroading, and the Tehuantepec Railway builders have been obliged to sprinkle the entire roadbed with chemicals which kill off all encroaching vines and vegetation, and even dry up their roots.

"The opening of the railway across the isthmus of Tehuantepec is destined to be of great importance to the middle west of the United States, and more especially to the great Mississippi valley. In his report to the United States government, Admiral Shufeldt stated that a canal across Nicaragua or Tehuantepec would come to be a natural prolongation of the Mississippi river to the Pacific ocean, and in the case of Tehuantepec would bring New Orleans 1,400 nautical miles nearer to San Francisco than a canal by way of Darien. The distance from the mouth of the Mississippi to the northern terminal of the Tehuantepec Railway is only 810 miles, and the total distance by rail and water from Chicago to the Pacific ocean by way of the Mexican isthmus is only 1,875 miles.

"There will be no troublesome and delaying consular invoices, custom-house inspections and the like to delay freight going over the Tehuantepec Railway. In other words, if one ships a carload of, say, cotton from New Orleans to Hong-Kong, it will only be necessary so to manifest and bond it; from Coatzacoalcos docks it will be transferred direct to Tehuantepec freight cars, and at Salina Cruz, several hours later, your cotton will be loaded on to the Chinese steamship without an hour's delay for the taking out of consular invoice—that great nuisance in foreign shipping—or inspection by the custom house. In short, so admirably has been carried out the 'straightening and reballasting of the Tehuantepec National Railway and the dredging, deepening and building of her deep-water harbors' (as reads Sir Weetman Pearson's contract with the Mexican government), that it ought to be able after January 1 largely to kill the business of that very lame line—the 'Panama Railway'; and who knows but what it can yet compete very favorably with the Panama canal? At least, the Tehuantepec Railway intends to have a 'good try.'"

TEA FROM THE FLOWERS.

According to the *Scientific American*, "tea, not from the leaves, but from the flowers alone of the plant, is rarely encountered in commerce. The petals, stamens, etc., are sun-dried, and the resulting tea is of a rich, deep brown hue of peculiarly delicate odor, and gives a pale amber-colored infusion rather more astringent in taste than that from the average fair-grade leaf. The taste for it is an acquired one, and even if this tea could be made commercially possible, it is doubtful if it would ever become popular.

"The American tea trade could advantageously take a suggestion from the brick tea of the Far East. In our country the tea dust, some of which is of good quality, is not properly utilized. In Europe it is a regular article of trade, and it is advertised and sold as tea dust. In America it is sold to thousands of cheap restaurants, who make from it the mixture of tannic acid, sugar and boiled milk which they sell as 'tea.' If, as in the Orient, this dust were compressed into bricks, good tea could be made from it, and the product would find a ready market through the multitude of uses for which it is adapted. A beginning in this direction has been made by the Pinehurst tea estate in South Carolina, and in Europe similar advances have been inaugurated.

"The virgin tea (biepjcki-chi), so called from its use at Chinese weddings, is the sun-dried leaf intact, tied up with three strands of colored silk. After infusion, these fagot-like little bundles are pickled in vinegar and used as salad. This tea is sold in especially handsome silk-covered and glass-topped boxes. The rarest of all teas, and one that has never been known to reach this country, is a naturally sweet tea, produced in western China on a very limited scale. Its culture is centuries old, and the secret has been jealously guarded from generation to generation. The saccharinity is probably due to grafting and years of patient study and care, such as only the small Chinese tea farmer is capable of bestowing."

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, FEBRUARY 16, 1907.

The Senate Committee on Finance met expectation this week in reporting favorably a bill embodying two features already foreshadowed in a reference to the matter in these columns. These features are the increase of the amount which may be retired in any one calendar month from $3,000,000 to $9,000,000 and the provision that all banking institutions designated for that purpose by the Secretary of the Treasury shall be depositories of public money. This latter provision in effect removes the restrictions against the deposit in such institutions of receipts from customs revenues. In addition, the bill authorizes the Secretary of the Treasury to issue gold certificates in denominations of not less than $10, and when the gold reserve falls below $100,000,000 and silver certificates of the denominations of $1, $2 and $5 are in his opinion insufficient to meet the public demand, to issue United States notes of those denominations. It is thought that this bill has a chance of being passed, in view of the fact that part of it has already received the approval of the House.

As the result, apparently, of recent conferences, it has been determined that the second Hague Conference will meet about June 15 and will continue in session for about two months. An announcement to this effect was made by Professor de Martens in an interview at London, whither he went to ascertain the views of the British Foreign Office upon a number of questions relating to the coming meeting. It was learned from the Russian jurist and diplomat that Germany, France and Russia all hold that the question of disarmament is not yet ripe for discussion, and that even the limitation of armaments is not a practical question at the present stage. This attitude of the powers mentioned does not, however, involve opposition to any consideration of the question in case the same should be suggested by the United States or Great Britain, and, indeed, Professor de Martens is quoted as saying that if the government of either of those countries should desire to bring the question up, the powers would be obliged to discuss it.

The San Francisco school authorities, with the mayor of the city, have had a conference with President Roosevelt in which the school question has been gone over very thoroughly. Judging from late Washington advices, the matter is likely to be settled in an amicable way. It is believed that the local school authorities would like to establish a number of additional separate schools in which Japanese children would receive the education they desire. This suggestion will be submitted to the Japanese government. If it should not be viewed with favor, then the San Francisco school authorities will rescind their order segregating the Japanese pupils in the schools, and will readmit them into the schools for whites on the condition that an amendment to the Immigration bill will be adopted authorizing the President to suspend the passport privilege whenever he is convinced that that privilege is being abused to the detriment of labor conditions in the United States.

While nothing definite has been given out officially at Washington regarding the outcome of the recent conference on tariff matters held at Berlin, it is believed that Mr. North, the leading American representative, is in a position to submit some specific propositions to the government. One of these involves the granting by the President of certain concessions through a modification of the customs regulations; another has regard to the negotiation of a new reciprocity treaty. The latter matter will probably be left to rest until the meeting of the new Congress, while it is not unlikely that the President may make some modifications in the existing tariff regulations with the view of removing some of the grounds of German criticism. It is believed that the complaints which have come from this source, and which it is the purpose of the proposed new treaty to obviate, have regard rather to administrative regulations than to questions of tariff rates.

A notable feature of present-day economic politics is the agitation in favor of legislation fixing a maximum rate of 2 cents per mile for the carrying of passengers on railways. In a number of states bills fixing such a rate are pending, and in several of them the measures seem certain of passage. A law of this kind was passed in Ohio last year and seems to have been accepted by the railroads without any appeal. In West Virginia and Arkansas the legislatures have passed bills of the kind referred to, while in Iowa, Indiana, Missouri and Pennsylvania similar measures have passed one house or the other of the state legislature, and in only one state in which such a measure has appeared has it been definitely defeated in the legislature. In some aspects the movement seems to be more generally supported than was the granger movement of three decades or so ago.

Negotiations are under way to bring about an amicable settlement of the dispute which has arisen in Central America. The United States and Mexico have, it is understood, united with Salvador, Costa Rica and Guatemala in making identical representations to Honduras and Nicaragua, suggesting that the two last-mentioned republics will be expected to settle their differences without resort to war, and that the Arbitration Commission which met some time ago at San Salvador must be reconvened in order that the issues between the two countries may be peacefully settled in accordance with existing treaties. It may be taken for granted that these representations will have great weight and perhaps it is not too much to expect that as the result of them hostilities will be averted. It is not without interest to note in this place that President Roosevelt has sent to the Senate the new treaty with Santo Domingo relative to the administration of the revenues of that country, which will aid in removing some grounds of complaint by foreigners against the government of that country.

Railroad traffic throughout the western country has naturally been interrupted to some extent by the heavy storms which have marked the present winter. In fact, it is admitted by railroad officials, not only in that section but in the territory served by the trunk lines as well, that they will have to contend with serious conditions for some six weeks to come, and it is naturally feared in financial circles that the same are likely to have an adverse effect upon net earnings. It may be remarked, however, that some of the operating officials are inclined to think that the density of traffic modifies the unfavorable features of the situation, and claim that the frequency with which trains are moved over many lines keeps the larger roads open, although low temperatures naturally diminish the hauling power of the engines. It is also fully admitted that the car situation is still a very troublesome and unsatisfactory one to all concerned. Nor does there seem to be much hope of any improvement in this respect, unless the manufacturers of cars and engines can accelerate their deliveries of the rolling stock which has been ordered or a falling off in business makes its appearance, diminishing the tonnage to be moved and reducing the intensity of the demand for railway transportation. In the eyes of most railroad people, however, the latter is also an improbable contingency. The present tremendous pace cannot, of course, continue indefinitely. Indeed, railroad managements seem to recognize this in the curtailment which has occurred in a number of cases as regards improvements and additional facilities. For the moment, however, the railroads continue to be placed under a great strain meeting the public requirements, while the difficulty in raising new capital on any further large scale is also an element of much importance in the situation.

After a long-continued dispute between the Senate and the House on the Immigration bill, an agreement has at length been reached, and, to the surprise of many, there is a prospect that the bill may become a law before the present session of Congress adjourns. The principal points of difference between the two houses have already been adverted to in these columns. An agreement has been secured by dropping from the bill the Senate requirement as to the literacy of immigrants, and the House amendment that no immigrant fleeing from religious or political persecution should be excluded because unable to earn a living or being without means of support. The bill increases the head tax on immigrants from $2 to $4, but exempts those who have resided in Canada, Newfoundland, Cuba or Mexico for more than a year, and also those arriving in Porto Rico and Hawaii.

The bill includes tuberculosis, idiocy, imbecility and epilepsy in the list of complaints for which steamships may be fined for bringing in aliens suffering from loathesome and contagious diseases; requires the registration of aliens leaving the insular possessions of the United States; makes the Panama Canal Zone foreign territory for immigration purposes; authorizes an annual expenditure of $50,000 for the enforcement of the contract labor laws, and requires an enlargement of the air space to be provided for immigrants on shipboard. Evidently the framers of the bill do not think that they have said the last word on the subject dealt with, for they have authorized the appointment of a committee of three senators and three representatives to investigate the question of immigration. A further noteworthy feature of the measure is that authorizing the President to call an international conference or to send commissioners to foreign nations to consider the subject of immigration into the United States for the purpose of regulating it by international agreement.

RAILWAY GROSS EARNINGS SHOW A SMALLER INCREASE.

Within the past three months or so a tendency to smaller ratios of increase has developed in connection with railway gross earnings. This movement does not mean, however, that the volume of business has fallen off, for, as a matter of fact, traffic is still of immense proportions; but it does indicate that the railways are no longer able to score such huge gains as they had been recording in the months prior to November. Of course the primal reason for the development to which we have referred is that earnings in 1906 were characterized by what might be termed a persistent degree of expansion, and it may be said that this growth still continues, though the ratios of increase reflected therefrom are not so striking. Thus, if one compares the latest fairly complete returns of gross earnings, those for January the current year, one will find that the gain over the same month in 1906 amounts to only 2.4 per cent.; but it should be remembered that the increase scored in the last-mentioned period amounted to no less than 19.4 per cent. Moreover, operating conditions in January, 1906, were nearly ideal, the winter being a very open one, thus enabling the railroads to operate with a minimum of inconvenience, and it is almost needless to say that business was of the healthiest character. On the other hand, meteorological conditions in January this year were rather adverse. Floods in the southwest and the Ohio valley and snow in the west, northwest and far west caused much difficulty so far as traffic operations were concerned. Indeed, in parts of the northwest, North Dakota for instance, railway operations were brought to an absolute standstill, some towns being completely isolated. Furthermore, the poor condition of country roads, together with traffic difficulties on the railways, militated against a free movement of wheat to primary points, the decrease from January, 1906, being about 17 per cent. In view of the various adverse factors cited, the wonder is not that a small percentage of increase is reported, but that there is any increment at all. However, the event furnishes ample testimony of the favorable nature of the country's basic business conditions.

Now, while results for many of the leading roads are not as yet available, we have sufficient data to indicate the trend. Thus, roads that have so far reported for January show gross receipts aggregating $69,909,545, a gain of $1,636,704, or 2.4 per cent., over January last year, when, as heretofore stated, the increase amounted to 19.4 per cent. over the like month in 1905, the gain on that occasion being 6.1 per cent. in excess of the total for January, 1904, when a decrease of 3.8 per cent. from January, 1903, was recorded. This table gives the returns for January the current year, along with comparisons for the same month in 1906:

	1907	1906	*Inc.*
Northwestern	$5,066,522	$6,304,030	*19.6
Central-western	13,344,104	13,194,038	1.1
Trunk lines	17,213,086	16,437,590	4.7
Southern	13,554,480	12,768,347	6.1
Southwestern	10,733,886	9,031,564	18.8
Pacific	9,997,467	10,537,272	*5.1
Total	69,909,545	68,272,841	2.4

* Decrease.

A glance at the above table shows that increases still rule, though two groups, the northwest and Pacific, furnish decreases of 19.6 per cent. and 5.1 per cent. respectively, weather conditions being entirely responsible for both. The most significant increase is that returned by the southwestern roads, the gain being 18.8 per cent. That territory has been favored with especially good business conditions, the reports coming therefrom being relatively better than those emanating from any other section of the country. The other increases noted are of moderate proportions. Thus, the southern roads contribute a gain of 6.1 per cent., the trunk lines one of 4.7 per cent. and the central-western one of 1.1 per cent.

After a partial discussion of percentages, the following exhibit, which shows the trend of gross earnings month by month for a series of years, becomes quite apropos:

	1907 *Inc.*	1906 *Inc.*	1905 *Inc.*	1904 *Dec.*	1903 *Inc.*	1902 *Inc.*	1901 *Inc.*
January	2.4	19.4	6.1	3.8	10.1	7.6	8.1
February	..	25.6	†2.7	*.2	13.5	3.9	7.6
March	..	9.5	10.3	.05	14.5	6.7	7.4
April	..	11.7	8.7	4.5	14.3	11.2	8.9
May	..	14.7	9.5	3.5	12.0	9.0	9.2
June	..	13.3	6.3	.6	14.1	8.1	6.8
July	..	14.1	7.4	1.4	12.3	7.5	13.3
August	..	13.1	5.1	*3.4	9.4	4.6	13.2
September	..	9.3	6.3	*4.0	7.9	9.6	10.5
October	..	11.2	5.9	*4.0	5.5	6.6	11.8
November	..	4.6	9.1	*0.9	4.0	7.2	12.1
December	..	5.7	9.9	*8.0	4.6	9.4	5.5
Year	..	12.7	6.9	*1.4	11.5	8.0	10.5

* Increase. † Decrease.

Taking the returns of practically identical roads for the seven months of the fiscal year, we get what might be called an index to the course of gross earnings during that period. Thus, for the seven months to which we have alluded, gross earnings aggregate $565,252,755, the gain over the like period in 1905-06 being 8.5 per cent. This table gives the statistical facts by months:

	1906-07	1905-06	*Increase*	*P. ct.*
July	$80,800,673	$70,805,720	$9,994,953	14.1
August	78,771,383	69,593,637	9,177,746	13.1
September	79,270,463	72,521,836	6,748,627	9.3
October	86,650,834	77,911,337	8,739,497	11.2
November	86,842,493	82,983,127	3,859,366	4.6
December	83,007,364	78,548,032	4,459,332	5.7
January	69,909,545	68,272,841	1,636,704	2.4
Seven mos	565,252,755	520,636,530	44,616,225	8.5

The individual increases are very noteworthy, as the following table of gains in excess of $50,000 shows, the comparison being with January, 1906:

Missouri, Kansas & Texas	$603,171
Grand Trunk system	344,415
Texas & Pacific	324,184
Louisville & Nashville	301,251
New York Central	226,726
Missouri Pacific system	223,000
International & Great Northern	211,500
Michigan Central	199,084
Central of Georgia	176,600
St. Louis Southwestern	167,778
Illinois Central	156,993
Colorado & Southern	148,336
Denver & Rio Grande	111,200
Mobile & Ohio	80,774
Yazoo & Mississippi Valley	79,759
Wabash	61,908
Lake Shore & Michigan Southern	56,449
Chicago Great Western	53,499
Chicago, Indiana & Southern	50,678
Western Maryland	50,579
Total	3,624,884

The other side of the picture—the decreases—are set forth in the following:

Great Northern system	$1,101,133
Northern Pacific	416,555
Canadian Pacific	236,000
Minneapolis, St. Paul & Sault Ste. Marie	232,050
New York, Chicago & St. Louis	51,178
Buffalo, Rochester & Pittsburgh	50,968
Total	2,087,884

Adverse weather conditions are responsible for most of the above decreases, ill effects of which are fully reflected in a loss of $1,101,133 reported by the Great Northern system, and $416,555 shown by the Northern Pacific.

MINERAL RIGHTS IN PUBLIC LANDS.

Once again the President has sent a special message to Congress, dealing this time with a matter which has engaged his attention heretofore, namely, the status of lands containing coal and other mineral resources and still under the control of the United States. Speaking generally, the President takes the position that the nation should henceforth retain the title to its fuel resources. He suggests that it would have been better if some of the eastern coal lands had been left under government control, and recommends provision in the west against the recurrence of the conditions deplored in the east.

In the view of the President, mineral fuels, like the forests and streams, should be treated as public utilities. Already, he says, probably one-half of the total area of the high-grade coals in the west has passed under private control. Including both the lignite and the coal areas, these private holdings probably aggregate not less than 30,000,000 acres of coal fields. With the remainder of the lands containing mineral fuels reserved and leased by the government, there will be, Mr. Roosevelt says, ample opportunity to determine in the near future which of the two systems—private ownership or the leasing system—with general government supervision, will best protect the interests of the people and thus promote the permanent development of the west.

At the outset, the President suggests, the law should be administered in a spirit of the broadest liberality with the least possible interference with the development of the coal fields. Moreover, all laws which merely seek to prevent monopoly or the mishandling of the public by forbidding combination are, he says, certain to fail of their purposes. What is needed, as experience under federal legislation has shown, is not prohibition of all combinations, but such supervision and control over combinations and over corporations entering into them as will prevent the evils, while giving to the public the advantages of combination. Mr. Roosevelt urges that legislation be enacted to provide for government control of the public pasture lands of the west on the same general principles which now apply to the government control of forest reserves, and that a substantial appropriation in addition to the present estimates be applied immediately to the clearing of the arrears of business in the General Land Office as regards the detection and prevention of fraud in disposing of applications for patents to the public lands.

Most striking and notable is the declaration of the President expressing his utter and complete dissent from the statements that have been made as to there being but a minimum of fraud in the actual working of our present land laws. Mr. Roosevelt declares himself exceedingly anxious to protect the interests of bona fide settlers and to prevent hardships being inflicted upon them. At the same time the President says he is working in their interest in trying to prevent the land, which should be reserved for them and for those like them, from being taken possession of for speculative purposes or obtained in any fraudulent fashion. A very practical hint thrown out by the President is that the present force of special agents is utterly insufficient to conduct the proper field examinations. This would seem to call for the temporary increase at least of the force at the disposal of the General Land Office.

THE MINING-STOCK MARKET.

Neither the recent unsatisfactory conditions in the securities market at large, nor the unfortunate results which attended speculation in the shares of certain prominent mining companies, have apparently destroyed the popularity of that class of stocks. In fact, the promotion of new enterprises of that character goes on merrily, and very important developments have already taken place in connection with some of the most substantial of such interests, there being, furthermore, reports that powerful financiers identified with the mining interests, and who have been extremely successful both on the practical side and in the market, are preparing further plans of much importance, among which may be mentioned a consolidation of some of the larger of the Lake Superior copper-producing organizations.

Boston has long enjoyed the reputation of possessing the widest and most active market for the better class of mining securities. This is largely based upon the fact that it was Boston capital which originally provided for the development of the great copper mines of northern Michigan, and was also largely identified with the exploitation of the Butte, Mont., district. Furthermore, it may be noted that while, with the exception of a few like Amalgamated Copper or Anaconda, mining stocks are not considered acceptable collateral for loans by New York bankers, Boston institutions will lend upon these shares, particularly upon those of the companies whose stocks have been admitted to a quotation at the Boston Stock Exchange.

The increased attention which the investing public is paying to mining stocks has, however, of late transferred not a little of the business done in them to New York, although the trading is, in the main, confined to what is known as the outside or curb market. The New York Stock Exchange has, it is true, within recent years, added the stocks of a number of mining concerns to its list, and one of them—Amalgamated Copper, it is needless to say—is one of the most active objects of speculation. Still, the curb continues to be the chief if not the only medium for purchases or sales of the shares of mining enterprises, and is subject to the disadvantage that, although transactions are theoretically made by the unofficial representatives of stock-exchange houses, the curb has not and cannot have any definite organization or the responsibility which attaches to the regular exchange and its members. It is recognized by many of the capitalists connected with the successful, reputable or prospectively profitable mining companies, that admission to a quotation for their stocks at the New York Stock Exchange would be calculated to give additional respectability to investments in such shares and generally benefit the mining interests of the United States.

With a view to meeting such desires on the part of mining concerns, and doubtless, also, with the object of increasing the business of its members, the governing committee of the Stock Exchange has this

week taken a very important step. Heretofore the rules of that body have embodied the provision that all stocks having a par value of over $10 must be quoted and dealt in at the exchange on a per cent. basis. This applies to stocks having a par value of $50 per share, such as Reading or Pennsylvania, the quotation of 132 for the latter in New York being the equivalent of 66 in Philadelphia, where the stock is dealt in on a dollars-per-share basis. Similarly, Anaconda Copper, one of the prominent mining stocks traded in at New York, though of a par value of $25, is quoted there on a per cent. basis at 300, the real price being $75 per share. It is claimed that this rule is objectionable when applied to mining stocks, which, as a great many of such stocks do, possess a par value of $25 or less. To meet this situation the governors of the exchange have just adopted an amendment to its rules, whereby the governing and listing committees will be authorized to permit trading in stocks having a less value than $100 upon a dollars-and-cents instead of per cent. basis, as at present. The members of the exchange at large have still to pass upon this change, but it is hardly to be doubted that it will be ratified. In fact, the way now seems open for the establishment of a much wider market for mining stocks at the metropolis, which, it is presumable, will aid powerfully in attracting capital to enterprises of a substantial nature based upon the mining industry.

CROSS CURRENTS IN EXPORT TRADE.

At first sight the export returns of leading products for January and the seven months ending therewith seem quite favorable, because the aggregates of five leading products show good gains, both for the month and the seven months, over the same periods of last year. The aggregates for the month and seven months were very large, that for January having been only three times exceeded, while that for seven months is a record total. Closer examination of the details, however, shows that large exports of raw cotton account for the entire gain shown in the month and seven months' totals, while with cotton excluded all the other classes of exports show decreases from last year and from many other years in the past. Following will be found the details of exports of five leading products for January and the seven months ending therewith for this year and last:

January	1907	1906	*Changes from last year*
Breadstuffs	$14,639,034	$26,253,558	Dec. $11,614,524
Meat and dairy products	17,092,224	20,542,799	Dec. 3,450,575
Live animals	3,218,389	3,480,390	Dec. 262,001
Cotton	69,990,636	38,991,818	Inc. 30,998,818
Mineral oils	5,452,959	6,908,771	Dec. 1,455,812
Total	110,393,242	96,177,336	Inc. 14,215,906
Seven months	1906-07	1905-06	*Changes from last year*
Breadstuffs	$102,769,590	$111,276,896	Dec. $8,507,306
Meat and dairy produce	104,927,344	111,568,549	Dec. 6,641,205
Live animals	18,462,427	22,476,228	Dec. 4,013,801
Cotton	321,544,628	278,326,410	Inc. 43,218,218
Mineral oils	46,060,262	46,945,070	Dec. 884,808
Total	593,764,251	570,593,153	Inc. 23,171,098

For the month of January the aggregate exports of five leading products was $110,393,242, a gain of 14.7 per cent. over January, 1906. If, however, the exports of cotton, which gained 79 per cent. over January, 1906, are excluded, the exports show a decrease of 29 per cent., because the exports of breadstuffs fell off 44 per cent., those of meat products declined 17 per cent., mineral oils 21 per cent. and animals 7.5 per cent. So in the seven months' returns the record total of $593,764,251 for five products shows a gain of 4 per cent. over last year, but with cotton exports, which show a gain of 15.4 per cent., excluded, there is a decrease of 7 per cent., because breadstuffs decreased 8 per cent., meats 5 per cent., live animals 18 per cent. and mineral oils 2 per cent.

The detailed returns of exports of breadstuffs, provisions, animals, cotton and oils given herewith show the directions in which the export trade has expanded or contracted:

	JANUARY. *Quantities*		*Values*

Cotton	*Bales*		*Pounds*	*Values*
1907	1,270,468		658,728,918	$69,990,636
1906	647,821		335,241,116	38,991,818
	FIVE MONTHS.			
1906-07	5,545,472		2,880,517,406	302,670,888
1905-06	4,234,093		2,193,734,912	243,625,851

In cotton, the seven months' exports far exceed those of any preceding period. In quantity they amount to 3,063,376,265 pounds, which is a gain of 21 per cent. over the preceding year, and of 6.6 per cent. over the record year (as to quantities exported) of 1899. The gain over last year is, of course, due to the enlarged quantity exported, because, as is shown in the January statement of the Bureau of Statistics, the price per pound in January was only 10.6 cents, as against 11.6 cents in January, 1906, and for the five months of the present cotton year the export price is 10.5 cents, against 11.1 cents in the preceding year.

In breadstuffs, the reasons for the decreases shown are found largely in the high prices ruling, which are responsible for particularly large decreases in exports of corn, those for January being one-third of those of January a year ago, while the seven months' exports are only about half those of a year ago. Oats also show a very large falling off and wheat-flour a slight decrease, all of these combining to offset the doubling of the exports of wheat for seven months. In meats and animals, the features are the decreases shown for seven months in the exports of beef cattle, canned beef and hog products, particularly of bacon and lard. Butter exports fell off, while those of cheese increased. The only kind of mineral oils showing a gain is crude, while the heaviest decrease is in illuminating oil.

PENNSYLVANIA RAILROAD'S MAGNITUDE.

An exceedingly interesting statistical comparison has been prepared by the management of the Pennsylvania Railroad Company, showing the relations between the earnings of that corporation and its constituent lines and those of all the railways in the country. The following table, based on the figures for the fiscal year ending June 30 last, compares in respect to mileage, earnings, income, dividends and taxes all the lines operated by and affiliated with the Pennsylvania Railroad east and west of Pittsburgh and Erie (not including the Baltimore & Ohio and the Norfolk & Western) with all the roads of the United States:

	All roads in U. S.	*All Penna. Co.'s lines*	*P. ct. of total*
Mileage	220,028	10,707	4.86
Gross earnings	$2,319,760,930	$276,802,301	11.93
Gross earnings per mile	10,543	25,852	..
Passenger earnings	618,555,934	72,777,367	11.77
Passenger earnings per m.	2,811	6,797	..
Freight earnings	1,640,942,862	194,987,364	11.88
Freight earnings per mile	7,458	18,211	..
Operating expenses	1,532,163,153	192,426,759	12.56
Operating expenses per m.	6,963	17,972	..
Net earnings	787,597,877	84,375,542	10.71
Net earnings per mile	3,580	7,880	..
Income from other sources	132,624,982	22,595,271	17.04
Dividends paid	229,405,598	34,799,193	15.17
Taxes	68,903,288	8,016,491	11.63

A striking fact is that with only 4.86 per cent. of the aggregate railroad mileage, the Pennsylvania receives 11.93 per cent. of the total gross earnings, 11.77 per cent. of the passenger receipts, 11.88 per cent. of the freight earnings, and 10.71 per cent. of the net earnings of the entire country. The income from other sources, i. e., the revenue from controlled railroads and other properties, is 17 per cent. of the total revenues of that kind, and the company pays 15 per cent. of all the dividends and 11 per cent. of all the taxes of the country's total system. Nor is it of less importance that the gross earnings per mile of road are $25,862, against an average of $10,543 for all the lines, the net earnings per mile being $7,880 against $3,580, indicating thereby the superior density of the business of the Pennsylvania system.

The showing is rendered more interesting and complete by supplementary comparisons, giving the same figures with reference to the portions of the system east of Pittsburgh and Erie and west of those cities respectively. The Pennsylvania's eastern lines constitute 2.74 per cent. of the country's entire mileage, but contribute 7.92 per cent. of the gross earnings, 7.14 per cent. of the net earnings, 11.15 per cent. of income from other sources, 9.57 per cent. of dividends paid, and 7.20 per cent. of the railroad taxes of the United States. The remarkable density of the eastern-lines business is clearly exhibited by the fact that their gross earnings per mile were $30,423 against $10,543; their passenger earnings per mile, $9,129 against $2,811, and their freight earnings, $20,921 against $7,458, the net earnings being $9,311 against an average of $3,580.

For the western part of the Pennsylvania system the showing is naturally less favorable, their mileage being 2.12 per cent. of the whole amount, their gross earnings 4.01 per cent. and their net 3.57 per cent., while in respect to dividends they contribute 5.60 per cent. of the aggregate. In the same way the reduced density of their business is shown by the gross earnings per mile, which are $19,543 against $10,543, and the net per mile $13,912 against $6,062.

ENGLISH COTTON GOODS ACTIVE.

Manchester, February 7.—The first month of 1907 has been a period of activity at the spinning mills and weaving sheds and also in the way of new business. During December the demand from abroad seemed to taper off and the outlook was somewhat discouraging. However, the New Year holidays were scarcely over before a healthy inquiry came from India and China, and spinners began to receive more orders. Engagements of manufacturers are now generally more extensive than a month ago. At the close a strong tone prevailed in practically all quarters and sellers were not at all easy to deal with. Raw American cotton in Liverpool kept steady, the fluctuations not being at all important. As to the American crop, there seems to be every probability of the crop turning out to be about 13,000,000 bales. The Egyptian crop continues to do well, and some authorities consider that the yield will be not far from 7,000,000 cantars. The East Indian growth is also expected to be larger than last year, but the big government estimate is looked upon by authorities in Manchester as not likely to be reached. On all hands we seem to be fully assured of a plentiful supply of the raw material. American cotton is proving to be of a rather poor quality, and the high prices paid for the better grades are somewhat hampering users.

In piece goods for export the year opened with a healthy demand for various markets. India buyers made better offers, and, for Calcutta particularly, the business was on an encouraging scale. China buyers have bought freely in spite of big stocks in Shanghai. This large business was scarcely expected, but some shippers appear to have been afraid of missing delivery later on in the year. Medium and best shirtings moved off very well for both India and China, and the consequence is that producers are now very deeply engaged, especially those makers who spin their own yarn. The smaller outlets of the continent also provided a steady business in a variety of cloths, the demand for the Levant being healthy. Various other minor markets of the Far East and of South America did fairly well, and it can scarcely be said that any outlet is really depressed. For home trade, buying has opened out rather slowly.

There was some improvement toward the close of the month, but buyers seem to be waiting to see if prices will come done. There is not much likelihood of this happening, and certain distributers will again be hampered by deliveries if orders are not soon placed. It is said to be impossible to get adequate advances from retailers.

Home trade American yarns have moved off steadily and spinners maintain their position. The margin for practically all kinds and qualities is wide and remunerative. The better marks are getting a little scarce and extreme rates have been paid for quick delivery. Shipping yarns have met with a fair business for the Far East, and especially for continental markets. Doubled numbers are extensively sold and prices are against buyers. Just recently some heavy purchasing has transpired in twofold 40s for the continent. Bolton spinners are very independent owing to deep engagements, and new business is rather restricted by the attitude of sellers. Certain producers have sold their production for practically the whole of the year.

EDITORIAL NOTES

Unfavorable results attended the operations of the People's Gas Company of Chicago during the last calendar year. In fact, the falling off in both gross and net earnings during that period gives a valid reason for the reduction in the annual dividend rate from 6 to 5 per cent., which was made about a year ago. The figures showing the results for 1906, compared with those of the preceding year, are given as follows in tabular form:

	1906	1905	*Decrease*
Gross earnings	$11,680,044	$12,284,363	$604,319
Operating expenses	6,787,303	6,578,784	‡208,519
Net earnings	4,892,741	5,705,579	812,838
Charged off	782,220	726,989	‡55,231
Balance	4,110,521	4,978,590	868,069
Bond interest	1,819,300	1,829,300	10,000
Balance for dividends*	2,291,221	3,149,290	858,069
Dividends (5%)	1,618,455	†1,978,146	329,691
Surplus	672,766	1,171,144	528,378
Previous surplus	8,676,931	7,505,787	‡1,171,144
Total surplus	9,319,697	8,676,931	‡642,766

* Equal to 6.95 per cent., against 9.55 per cent. in 1905. † Six per cent. ‡ Increase.

This result is charged directly by the management to the reduction by the Chicago City Council of the rate to be charged by the company to 85 cents per 1,000 feet, the price in question being made effective on February 1, 1906, and is to continue without change until 1911. The outcome, therefore, would indicate that the complaint made by the management and stockholders of gas organizations operating in the large cities, that arbitrary reductions in their prices involve a serious diminution in their income earning power and force a cutting down or suspension of dividends, and discourage capital from investing in the securities of such companies, has a good foundation.

Owing to an unfortunate combination of excessive capitalization at the outset through the high valuations placed upon the properties which were acquired by the company, and of a bad condition of affairs in the coal trade itself, the Pittsburgh Coal Company some three years ago was ranked among large industrial combinations which seemed liable to go to the wall and become the object of a complete reorganization. The annual report of the company for 1906, which has just made its appearance, not only removes any cause for apprehension of this kind, but illustrates in a striking way the change for the better which has occurred in the bituminous coal business in the Pittsburgh district. In fact, the figures now presented show that the twelve months were the best in the history of the enterprise and that its tonnage production was also the largest, the total amount of coal and coke showing an increase of 3,588,000 tons, or 23 per cent., over the output for the preceding year. The figures for 1906 and those for 1905 are given herewith in tabulated form:

	1906	1905	*Increase*
Mining profits	$5,297,123	$3,255,358	$2,041,765
Dep'ltn coal	743 020	593,075	149.945
Deprec'n plant	1,194,094	830,271	363,823
Total deductions	1,937,114	1,423,346	513,768
Net earnings	3,360,009	1,832,012	1,527,997
Interest 1st mtge bonds	1,167,241	1,207,087	*39,846
Balance	2,192,768	624,925	1,567,843
Dividends	....	343,273	*343,273
Balance	2,192,768	281,652	1,911.116
Previous surplus	4,169,377	3,887,725	281,652
Total surplus	6,362,145	4,169,377	2,192,768
Extraordinary adjustm'ts	2,272,935	....	2,272,935
Final surplus	4,089,210	4,169,377	*8 ,167

* Decrease.

It may also be noted that important changes have occurred in the management of the organization, it being understood that contending interests in the enterprise have settled their differences in a way which promises to have good results in the future.

American exports of iron and steel and manufactures thereof in 1906 were the greatest in quantity and value ever recorded. This, too, in a year when domestic demand was active as never before, and when prices of all products were so high as to attract large imports of foreign iron to help supply domestic wants. The total value of the exports of iron and steel in 1906 was $172,555,588, as against $142,930,513 in 1905 and $128,553,613 in 1904. The imports in 1906 were valued at $34,827,132, as against $26,401,283 in 1905 and $21,621,970 in 1904. The following table, showing the exports and imports of leading classes, will be of value as showing some of the cross currents in foreign trade in iron and steel during the past three years:

EXPORTS.

	1906	1905	1904
Pig iron	$1,506,774	$762,899	$764,543
Bar iron	2,575,905	1,255,418	1,133,128
Billets	4,094,659	4,701,909	6,150,035
Steel rails	8,993,411	7,310,029	10,651,222
Iron sheets	1,139,526	460,995	247,694
Steel sheets	4,081,015	2,889,084	2,064,241
Tinplates	1,001,688	702,977	651,774
Structural	6,14-,861	4,357,186	2,777,768
Wire	8,770,042	7,061,442	5,935,003
Builders' hardware	14,273,137	12,460,053	11,176,613
Castings	2,033,527	1,595,711	1,372,314
Firearms	2,493,979	1,687,029	1,486,151
Wire nails	2,232,051	1,703,120	1,599,005
Pipes	8,541,050	8,293,816	7,303,900
Stoves	1,317,929	1,019,757	810,971
Electrical machinery	8,274,753	7,409,242	6,675,766
Metal-making mach'y	7,913,327	5,625,044	3,483,232
Printing presses	2,047,773	1,500,603	1,450,903
Pumps	4,122,703	3,737,774	2,733,625
Sewing machines	7,845,228	6,474,992	6,019,161
Shoe machinery	1,470,900	1,383,005	1,240,996
Locomotives	7,430,277	5,573,080	4,697,340
Stationary engines	1,931,038	1,184,784	1,099,690
Boilers	2,533,210	2,486,589	2,003,323
Typewriters	5,694,244	5,102,980	4,138,651

IMPORTS.

	1906	1905	1904
Pig iron	$11,851,210	$5,185,784	$1,765,107
Bar iron	1,590,592	1,522,434	917,254
Steel billets	3,010,589	2,072,606	1,537,531
Tinplates	3,883,225	4,090,523	4,354,761
Wire rods	876,270	800,027	707,779
Wire	1,079,868	705,465	624,892
Cutlery	2,109,529	1,851,113	1,811,511
Machinery	4,410,000	3,150,958	2,792,885

A few words of explanation of the above tables may not be amiss. One point is that nearly one-half of all the exports of iron and steel products in 1906 consisted of machinery in a myriad of forms. Only a few of the leading lines of machinery are mentioned above, but the fact is that of the total exports of $172,555,588 of all kinds, machinery makes up $83,254,191 of the total. In the cruder forms, it will be noted, pig iron is included as an export, but we also imported a large quantity. In fact, almost the entire increase in imports of iron and steel is accounted for by the gain in pig-iron imports. Another fact worth noting is that we exported nearly $9,000,000 worth of rails, while there is no record of any imports. Accurate measurements of the iron exports of the fiscal year 1906, just completed by the Bureau of Statistics, show that of the iron and steel exports in the fiscal year 1906, which amounted to $161,000,000, $72,000,000 worth, or 40 per cent. of the total, went to the various countries of North America; $44,000,000 worth, or 27 per cent., to Europe; while about $20,000,000 worth went to South America, $12,000,000 to Asia, $9,000,000 to Oceania (chiefly Australia), and about $4,000,000 to Africa.

The trade of the United States with its non-contiguous territories, Alaska, Hawaii, Porto Rico, the Philippines and the smaller islands of the Pacific, totaled $131,206,941 in 1906, a gain of a little over 1 per cent. on 1905 and of 32 per cent. over 1904. The increase over the 1906 total was entirely in shipments from the United States, which increased about 20 per cent., while shipments to the United States fell off 9.5 per cent. Alaskan and Porto Rican shipments to the United States increased, but those from Hawaii and the Philippines fell off, presumably because of smaller shipments of sugar and Manila fiber. Following are the detailed figures of shipments to and from the United States from the four most important possessions, with the grand totals of all, which include small shipments to and from the little islands of the Pacific:

DOMESTIC AND FOREIGN MERCHANDISE.

	Shipments from U. S.		*Shipments to U. S.*	
Alaska—	1905	1906	1905	1906
Domestic	$13,989,619	$16,818,426	$9,296,600	$12,052,114
Foreign	305,727	559,613	65,927	40,801
Total	14,295,346	17,378,039	9,362,527	12,092,915
Hawaii—				
Domestic	12,122,261	12,094,980	37,429,395	29,358,104

Domestic	5,736,281	7,098,625	15,567,736	10,104,544
Foreign	679	3,206	....	....
Total	5,736,960	7,101,831	15,567,736	10,104,544
Total, dom.	48,371,383	57,764,097	79,796,803	72,137,164
Tot., for'gn	1,231,564	1,206,669	184,515	99,071
Grand total	49,602,947	58,970,706	79,981,318	72,236,235

GOLD AND SILVER.

	1905	1906	1905	1906
Alaska—				
Domestic	$532,661	$755,915	$12,131,023	$18,471,451
Foreign	....	4,203	8,116,265	6,538,934

An interesting feature of the above table is that giving the shipments of gold from Alaska and the Canadian territories in 1906. Those from Alaska increased 50 per cent. over 1905 and were double those of 1904, while the shipments of Canadian gold decreased.

The crop reporting board of the Bureau of Statistics of the Department of Agriculture finds, from the reports of the correspondents and agents of the bureau, that the numbers and values of farm animals on farms and ranges in the United States on January 1, 1907, were as follows:

	Nos.	*Per cent. comp'd with Jan. 1, 1906*	*Average price per head*	*Value*
Horses	19,747,000	100.9	$93.51	$1,846,578,000
Mules	3,817,000	102.5	112.16	428,064,000
Milch cows	20,968,000	102 4	31.00	645,497,000
Other cattle	51,566,000	98.0	17.10	881,557,000
Sheep	53,240,000	103.0	3.84	204,210,000
Swine	54,794,000	99.5	7.62	417,791,000

The numbers of farm animals stated in the foregoing table represent, as nearly as ascertainable without an enumeration, the actual number of each specified class on farms and ranges on January 1, 1907. The figures are the results of a very careful investigation by the agents and correspondents of the bureau, who used all available means to secure accurate information; but such results are not strictly comparable with similar data published heretofore, as the reports of agents were made without exclusive reference to the relation they may bear to figures of previous years. A careful investigation of market movements, census, agricultural and assessors' reports of various states, and other data, has indicated that the numbers of farm animals reported for several years have been too small. In order to bring the figures near the actual facts the board has made certain adjustments and revisions in the report of January 1, 1906, and the percentages of increase or decrease on January 1, 1907, as compared with the preceding year, have been applied to the revised figures.

The United States, which furnishes from two-thirds to three-fourths of the world's supply of raw cotton, cuts a very poor figure in the export trade in cotton goods. Just how badly off we are is, perhaps, best shown by comparing the value of our trade in this respect with that of the United Kingdom, which does not raise a pound of cotton and has to import its entire supply of raw material. Following are the values of the exports from the two countries during 1906 and 1905:

Cotton cloths	1906	1905
United Kingdom	$366,908,200	$344,630,900
United States	32,282,504	47,652,434
All other goods		
United Kingdom	117,815,700	103,117,500
United States	10,678,544	8,808,566
Total all cotton goods		
United Kingdom	484,723,900	447,748,400
United States	42,961,048	56,461,000

Following are some details of the exports from the two countries:

United Kingdom—	1906	1905
Yarn and twist—Gray	$47,468,900	$40,019,200
Bleached or dyed	10,130,600	10,196,300
Total	57,599,500	50,215,500
Lace and patent net	21,407,700	18,156,500
Stockings and socks	957,400	764,100
All other hosiery	1,529,300	1,755,900
Thread for sewing	19,606,900	16,455,100
All others	16,714,900	15,770,400
Total above	117,815,700	103,117,500
Piece goods	366,908,200	344,630,900
United States—		
Wearing apparel	4,677,314	3,858,293
Waste, cotton	2,099,869	1,271,275
Yarn	394,131	343,243
All other	3,507,230	3,335,755
Total above	10,678,544	8,808,566
Piece goods	32,282,504	47,652,434

The contrast here shown between the immense exports by Great Britain and the pitifully small shipments by the United States need not be enlarged upon. Nor should, perhaps, the additional fact that, while Great Britain showed a large gain over her best previous year in this trade, American exports fell below those of 1905. The reason for the slump in American exports is to be found in the practical cutting in two of our export trade in cotton cloth with China. Great Britain, it is true, also shipped less to China in 1906 than in 1905, but as China takes only about 10 per cent. of all British exports, whereas she takes more than half of all ours, the effect on American export trade was of course more hurtful, though owing to the immense expansion in domestic trade, the slump in export business was hardly perceptible.

RECENT LEGAL DECISIONS.

[*Prepared for* BRADSTREET'S.]

Arson—Burning Property—Insurance.

Burning either a building or personal property with intent to injure an insurance company is a statutory offense, even though the property may not be the property of another, but such burning is not arson, according to the decision of the Supreme Court of Illinois in the case of Mai et al. vs. The People.

License—Master Plumber—Property.

The Court of Appeals of the District of Columbia held, in the case of The United States ex rel. Daly vs. Macfarland et al., that a license to pursue the occupation of a master plumber is a species of property, and that the right to forfeit this property by the revocation of the license must clearly appear or it must be held not to exist.

Building Association—Mortgage Debt.

The Maryland Court of Appeals held, in the case of Preston et al. vs. Woodland, that when a building association has become insolvent and is in process of liquidation, a member who owes it a mortgage debt may set off against that debt not only the premium and interest, but also the dues paid by him under the mortgage.

Land—Overflow—Dam—Action.

An action in ejectment for the purpose of determining the legal rights of the parties may be maintained for land overflowed by the erection of a dam in a river adjacent to the land, where a perpetual right to overflow is claimed, according to the decision of the Supreme Court of Minnesota in the case of Reynolds vs. Munch et al.

Contract—Sale—Buyer's Order.

The Supreme Court of Louisiana held, in the case of Bloom's Son Company vs. Union Rice Milling Company, Limited, that the sale of a specific lot of rice at a fixed price payable within ten days, to be shipped on order of buyer, was not a promise of sale but a completed sale by which the ownership passed to the purchaser, and that the failure of the purchaser to pay within ten days would not have the effect of setting aside the sale or of authorizing the seller to set it aside without the consent of the buyer, and that the latter's refusal to honor a sight draft would not have that effect even after ten days if so qualified as to preclude the idea of an abandonment of the contract.

Natural Drain—Waste Oil.

The Supreme Court of Louisiana held, in the case of McFarlain vs. Jennings Heywood Syndicate et al., that where an oil syndicate claims the ownership of all the waste oil on a field and diverts the mixed oil and salt water by ditches into a natural drain closed by a dam for the purpose of separating and saving the oil, the syndicate is responsible for all the actual damages occasioned to the estate below by the escape of salt water and oil over or through the dam. Under the provisions of article 660 of the Civil Code, the court said, the proprietor of the estate above has no legal right to discharge into a natural drain the waste oil and salt water from wells sunk on his premises, and is reponsible for the resulting damages to the estate below.

Shipping—Damaging Fishing Nets.

The Supreme Court of Michigan held, in the case of Bishop vs. Baldwin, that in an action by the owner of fish nets set in navigable waters to recover damages caused by running defendant's tugboats and raft over them, it was immaterial whether the plaintiff had a statutory right to set his nets where they were, and whether as between himself and the owner of the shore he was a trespasser. The court further held that if persons in charge of a vessel see fish nets in time to avoid them without appreciable interruption of the voyage, or if they were not seen, but their presence was so obvious that they must have been seen by such persons if they were performing their duties with ordinary care, the owners of the vessel will be liable for running over and damaging the nets.

Storekeeper's Liability—Lost Clothing.

In the case of Wamser vs. Browning et al., recently decided by the New York Court of Appeals, it appeared that the plaintiff, in company with a friend, called at the defendant's store to make a purchase, and going to a clerk with whom they were acquainted, asked for a vest. The clerk, who was then engaged with another customer, told the plaintiff that the vests were piled on a table some distance away, on the side of the store; that the plaintiff could go over, select a vest, lay his clothing on the adjoining table and try on the vest, and that he would come over when he got through with the customer he was attending. The plaintiff went over to the table, selected a vest, took off his coat and vest, and tried on the new one in the presence of his friend. At the time all the clerks were busy, there being a number of persons in the store. After a few minutes the clerk spoken to originally came over to the plaintiff, who handed him the vest he had tried on and asked him to wrap it up. In the meantime the plaintiff's companion had departed. The plaintiff, turning to put on his clothes, found that his vest, in which were some valuables, was missing. The court, reversing a judgment below, held that the loss had occurred through the negligence of the plaintiff and that he could not recover.

Insolvent Trust Company—Balances.

The New York Court of Appeals held, in the case of The People of the State of New York vs. Merchants' Trust Company, that the depositors and holders of certificates of an insolvent trust company are entitled to interest on their respective balances at the rate specified in their contracts up to the time of the appointment of a temporary receiver; that from that time to the date of payment they are entitled to interest at the legal rate; that depositors and holders of certified checks having no interest contracts are entitled to interest on their respective balances at the legal rate from the time of the appointment of the temporary receiver to the date of payment, and that the assets being sufficient, all depositors are entitled to full payment of principal interest as above specified before any distribution of surplus to stockholders of the company.

Insurance—Ownership—Agent.

The Supreme Court of Indiana held, in the case of The Glens Falls Insurance Company vs. Michael et al., that a person obtaining a fire-insurance policy, delivered to him after he had verbally applied for it to an agent and paid the premium, could not be deemed bound by printed conditions in such policy not called to his attention and of which he had no actual knowledge, so as to defeat a claim under the policy upon a loss as to which the conditions were not material, where the premium was retained until after the loss occurred and had been adjusted. The court further held that joint ownership of insured property did not defeat an insurance policy stipulating against such ownership where no inquiry was made of the insured as to the character of title held, and no attention was called to such stipulation.

Gas Lease—Rent—Forfeiture.

The Supreme Court of Indiana held, in the case of Dill vs. Fraze et al., that where a gas lease gave the lessee the right to drill for oil and gas on the leased premises and granted him the oil and gas therein, reserving royalties to the landowner, but contained no covenant whatever that he would drill any wells, and provided that "in case no well is completed within sixty days, and number two well in sixty days thereafter from this date, then this grant shall become null and void, unless second party shall thereafter pay at the rate of $40 for each year such commencement is delayed," the $40 must be deemed payable in advance, and upon a negligent failure of the lessee to drill a well or pay the rent for seven months, the lessor was entitled to a cancellation of the lease.

Married Woman—Stock—Pledge.

The Kentucky Court of Appeals held, in the case of Eberhardt et al. vs. Wahl's Administrator, that under the act of March 15, 1894, in removing the disabilities of married women to deal as single persons respecting their property, the legislature saw fit to so qualify the privilege as to make it conditional when the dealing was with the husband, and that unless the condition requiring such transactions to be in writing, acknowledged and recorded is satisfied, the privilege could not attach. The court held that where a married woman pledged ten shares of stock she owned in a corporation to secure a note of her husband in bank, and by a mistake of the bank, when she paid the note for which her stock was pledged, she was entitled to be subrogated to the rights of the bank in the note that she had discharged, and thereby had a lien on the shares of stock owned by her husband which had been pledged to secure that note.

BUSINESS NOTES.

Banking Power of the World.

In his annual report for 1906 the Comptroller of the Currency gives the banking power of the world as $38,414,000,000. Since 1890 the increases have been:

	Amount	*Per ct.*
United States	$11,312,000,000	219.6
All foreign countries	11,117,000,000	102.6
Total increase	22,429,000,000	140.3

These figures show that in the sixteen years the United States has surpassed by $195,000,000 the increase in banking power of all the rest of the world. Compare the combined banking statements of the banks of the United States with the combined banking statements of all the rest of the world:

	United States	*All others*
Capital	$1,640,000,000	$1,365,000,000
Surplus	1,592,000,000	587,000,000
Deposits	12,719,000,000	15,888,000,000
Circulation	511,000,000	4,112,000,000

This gives the United States a total of $16,462,000,000, and all others combined $21,952,000,000.

Foreign Commerce of the Seaports.

The following table, showing the relative position of the leading seaports of the United States in regard to their foreign commerce the past two years, is of interest. Imports and exports of the principal ports compare as follows, together with percentage of changes (three figures omitted):

Exports—	1906	1905	*P. c. inc.*
United States total	$1,798,247	$1,626,990	10.5
New York	621,950	559,203	11
Galveston	186,844	150,112	24.5
New Orleans	167,988	144,352	16
Baltimore	107,979	103,607	4
Boston	99,370	93,798	6
Philadelphia	88,243	70,882	24.5
San Francisco	33,867	47,718	*29
Portland, Me.	17,119	11,694	46
Imports—			
United States total	1,320,600	1,179,144	12
New York	789,501	12,797	10.7
Boston	110,334	106,072	4
Philadelphia	72,138	67,914	6
New Orleans	44,860	35,580	26
Baltimore	35,338	24,737	43
Galveston	4,949	6,034	*18
San Francisco	49,139	44,241	11

*Decrease.

Production of Spelter.

Henry R. Merton & Co., of London, estimate the world's output of spelter in 1906 to have been 688,300 long tons, a gain of 40,580 tons over 1905 and of 73,010 tons over 1904. This table gives the output by countries in tons of 2,240 pounds:

	1904	1905	1906
Belgium	137,780	143,300	150,060
Rhine	64,360	66,185	67,615
Holland	12,895	13,550	14,420
Great Britain	45,490	50,125	51,760
France-Spain	48,310	49,575	52,940
Silesia	123,695	127,895	134,180
Austria-Italy	9,100	9,210	10,610
Poland	10,440	7,520	9,460
Europe	452,070	467,360	491,045
Australia	....	....	1,010
America	163,220	180,360	196,245
Total	615,290	647,720	688,300

The figures for the United States, namely, 196,245 long tons, appear to be too low. The United States showed the largest increase of any of the countries, but not enough to enable it to take first place among spelter producers. This is still held by Germany, which comprises the Rhine district and Silesia. Both Belgium and Silesia continued to show the large rate of increase which has been manifest for several years. Poland regained its former position, the labor troubles which checked production in 1905 having been overcome.

Japanese Investments.

Vice-Consul-General E. G. Babbitt, of Yokohama, reports concerning Japan's industrial investments since the war with Russia and other movements in that direction. He calls attention to the fact that it is reported that only a fourth of the sums subscribed to establish new companies is ever paid in. He writes: "The amount of capital subscribed for new companies during the month of October, 1906, was about $18,764,900; to enlarge companies already existing, $6,682,500. This, with the amounts previously subscribed, makes the aggregate, since the conclusion of the Japanese-Russian war, about $416,502,040. It is the prevailing custom among Japanese companies to start business with only one-quarter of the shares paid up, and this, the *Japan Herald* says, is held responsible for the alleged insecurity of business interests and for inviting speculative investments. These quarter shares change hands so rapidly that it is often a difficult matter, at the first general meetings of shareholders, to identify the real holders. Such an arrangement is a check to the real growth of undertakings, and Japanese business enterprises will not attain the solidity of foreign corporations until, like them, the whole or at least three-quarters of the shares are required to be paid up. There seems to be some reason for apprehending that the business of company promoting in Japan is assuming serious dimensions. According to investigations conducted by the Nippon Ginko (Bank of Japan), capitalization of new enterprises started from July, 1905, to November 30, 1906, including increase of capital, involves 988,729,080 yen (yen = 49 cents). The following statistics indicate the nature of such enterprises:

	New enterprises, yen	*Increase of capital, yen*
Banks	31,970,000	30,747,250
Spinning factories	20,353,000	28,469,080
Electric business	93,310,000	17,080,000
Mining business	44,270,000	3,550,000
Marine products	16,725,000	1,000,000
Railways	294,330,000	72,519,000
Manufacturing industries	149,544,800	64,167,000
Shipping business	5,000,000	8,400,000
Insurance business	30,700,000	13,600,000
Commerce, etc	44,480,000	18,513,150
Total	730,682,800	258,045,480

Another feature in the development of such enterprises in this country is the growth of the marine-product business. The fishery companies incorporated during the eleven months ending November 30 numbered seventeen, involving a capital of 14,975,000 yen, of which only 1,825,000 yen has actually been paid up."

California's Citrus-Fruit Industry.

L. A. Maynard, writing for the *World To-day* quotes some figures which show the importance of the citrus-fruit industry to California. Conservative estimates place the acreage of the state under orange culture alone at 75,000, while about 16,000 acres are devoted to lemon growing. In southern California alone not less than $50,000,000 are invested directly in citrus-fruit culture, with another $50,000,000 in related industries and enterprises which owe their origin to the same source. The following table shows the expansion in the citrus industry for a period of ten years:

Season	*Carloads*	*Boxes*
1894-95	7,575	2,545,200
1895-96	6,915	2,323,500
1896-97	7,350	2,469,600
1897-98	15,400	5,174,400
1898-99	10,875	3,654,000
1899-1900	18,400	6,624,000
1900-01	24,900	8,964,000
1901-02	19,180	6,904,800
1902-03	23,871	8,593,560
1903-04	29,399	10,480,488
1904-05	31,422	11,105,864

At an average net value of $350 per car the domestic product for the season 1904-05, 31,422 carloads, would represent a total net income to the producers of $10,997,600. About as much more money was disbursed for cultivation, packing and freight, making the total sum for the crop nearly $20,000,000.

Fluctuations in London Stock Prices.

The London *Bankers' Magazine* has published a table showing the monthly changes that have occurred on London's stock market during the year just ended. By means of an "index number" the monthly fluctuations of a representative list of securities are shown by the following table, the total valuation being given in pounds sterling:

End of	*Millions*	*End of*	*Millions*
January	3,100	July	3,018
February	3,099	August	3,050
March	3,087	September	3,021
April	3,075	October	2,980
May	3,063	November	3,018
June (not calculated)	....	December	3,020

In comparing the index of the close of 1906 with that of each of the past ten years, the following showing is made:

Close of	*Millions*	*Close of*	*Millions*
1897	3,276	1902	3,084
1898	3,241	1903	2,994
1899	3,121	1904	3,042
1900	3,102	1905	3,078
1901	3,064	1906	3,020

Commenting on the unfavorable showing made at the close of 1906 with that of the year before, the *Bankers' Magazine* has the following to say: "It would seem as though conditions of peace have been as unfavorable to the course of Stock Exchange values as periods during which wars were proceeding between great nations. An examination of the course of prices during 1906 shows that, with the exception of 1904, values have touched nearly the lowest points during the past decade. The best that can be said for the year, perhaps, is that it closes with some recovery from the worst."

CURRENT BUSINESS NEWS.

Commercial.

The Standard Oil Company on Monday announced a division in Pennsylvania oil, fixing the price of Pennsylvania amber at 173 and Pennsylvania dark at 163. The prices of the other grades, except Ragland, were advanced from 2 to 5 cents.

Fearing a wheat famine in consequence of the bad crops, the finance department of Mexico has considerably decreased the custom-house duties on wheat imported from the United States. The duty on wheat from February 15 to June 13 will be $1.50 for 100 kilograms.

The Sheet Copper Manufacturers' Association has advanced sheet copper 2 cents a pound, which is the second increase since the first of the year. On January 18 the price was put up 1 cent a pound, which makes the base price now 32 cents per pound. The present quotation is 15½ cents higher than the prices ruling at the time of the formation of the association, in 1898.

Foreign crop conditions as published Tuesday in Broomhall's Liverpool *Corn Trade News:* United Kingdom, Spain and Italy—The weather is wintry and the crop outlook is favorable. France—More snow is needed; otherwise the outlook for the crop is favorable. Supplies are sufficient for present requirements. Germany—The crop is abundantly provided with snow, but the markets are firm, influenced by the Russian situation. Hungary—The crop outlook is more favorable, with a sufficient snow covering. Roumania—The weather is cold, with a good snow cover. Navigation is expected to remain closed until March 12. Russia—Occasional complaints are heard from the southwest; otherwise the condition of the crops is favorable. There are no arrivals at the ports. The markets continue very firm, but our Odessa correspondent thinks there will be fair interior reserves to come forward in the spring. The government, also, reports large railway holdings in the interior. North Africa—The weather is favorable for the crop. Argentina—Only very partial rains have fallen, and our Argentina agent estimates a damage of 50 per cent. to the corn crop.

The general convention of the German Farmers' National Association met in Berlin Monday, with 8,000 members present, and adopted the following resolutions: First—The convention expects that no further reductions in the tariff will be agreed to, and that the assurances of Count von Posadowsky-Wehner (Imperial Secretary of State for the Interior) on the subject will be observed. Second—That any negotiations for the conclusion of the commercial treaty shall be made under that condition. Third—That the government, especially, will wait and see what concessions the United States is going to make for a further extension of the present provisional advantages. Fourth—The convention expects that the government, in view of the various statements in the press which have caused disquietude among the agricultural interests, will adhere to the foregoing fundamental principles.

The European crop year, which starts with August, is a month later than ours. Exporting countries generally ship more freely during the first half of the year, which expired with January. Now, the question is, what will they do during the last half? Russia and Balkan peninsula shipped a third of the total. How much will the famine curtail them? How much more will they want from our country? Argentina and Australia will hardly let go more than last season. Exports of wheat and flour during the first half and last half of recent crop years show as follows in million bushels (six figures omitted):

	First half crop year					*Last half crop year*			
From	1906	1905	1904	1903	1902	1905	1901	1903	1902
U.S. & Canada	107	79	37	98	139	62	28	44	59
Russia	55	87	98	77	66	68	81	61	68
Balkan peninsula	47	55	30	40	35	22	23	17	22
India	13	13	46	25	9	12	30	32	19
Argentina	22	35	26	14	3	70	77	67	58
Australia	11	9	15	5	..	21	20	23	..
Chile, N. Africa	9	2	6	9	12	2	4	6	1
Total	264	280	258	268	264	257	263	250	267

Secretary Shaw has instructed the Treasury officials that the department is advised by the Postmaster-General of the conclusion of a parcels-post convention between the United States and Ecuador, to take effect March 1, 1907.

Provisions are much higher than a year ago, but some brokers think they will go still higher. One writes to *King's Circular* that "pork and ribs are not showing the strength of lard, because of the government ruling excluding the black guts from the lard. There seem to be willing buyers of pork, but they do not seek to excite the market. Looks like a considerable concentration of the long interest. Some think government ruling on lard will reduce production 15,000 tierces. Swift asserts his shortage alone will be 18,000. He and Armour claim a shortage of nearer 90,000 tierces."

The following shows the world's production of linseed for the past fifteen years (compiled by Dornbusch from official returns), in tons:

	India	*Argentine*	*N. Amer.*	*Russia*	*Total*
1906	353,400	657,000	639,400	500,000	2,149,800
1905	347,400	591,900	711,944	537,000	2,188,244
1904	571,832	740,000	585,013	471,846	2,368,691
1903	481,567	937,601	682,513	461,314	2,562,036
1902	342,924	763,976	732,122	542,234	2,380,956
1901	336,136	365,035	650,020	455,414	1,806,615
1900	295,674	380,951	475,000	533,877	1,694,502
1899	427,894	220,185	437,500	316,570	1,407,149
1898	446,668	260,000	412,500	563,409	1,682,577
1897	220,983	160,000	273,000	520,552	1,174,535
1896	358,000	185,000	402,000	703,970	1,648,970
1895	326,000	250,000	355,000	566,500	1,497,500
1894	625,000	270,000	177,000	403,500	1,475,500
1893	584,000	120,000	236,500	363,400	1,303,900
1892	487,000	85,000	260,000	234,000	1,066,000

In accordance with his promise made during the last session of the British Parliament, in the course of the discussion on the subject of the importation of canned goods, John Burns, president of the Local Government Board, Wednesday introduced a bill in the House of Commons enabling the Board of Trade to institute more stringent regulations for the "prevention of the danger arising to the public health from the importation, preparation, storage and distribution of articles of food." The proposed measure probably will come up for discussion in the House next week.

The Michigan February report shows a decided crop damage. Last month 312 correspondents say the wheat crop was injured; 402 say it was not. This is nearly the same proportion as a year ago. The December condition was 86, last April 75, and the crop was 12,000,000 bushels, against 19,000,000 in 1905.

Financial.

At the annual meeting of the National Biscuit Company, Monday, H. J. Evans, S. S. Marvin and S. A. Sears were reëlected directors, and W. H. Morse and F. A. Kennedy were elected directors to fill unexpired terms. The directors declared quarterly dividends of 1¾ per cent. on the preferred stock and 1¼ per cent. on the common, and an extra dividend of 1 per cent. on the common. All are payable April 15.

Japan's national budget for 1907-08 passed the House of Representatives without the slightest curtailment, an occurrence without precedent since the establishment of the Japanese diet. It provides for an expenditure of $305,000,000, $60,000,000 more than last year, and there are large appropriations for naval and military increases, with new undertakings in the department of communications to be met by an internal loan of $15,000,000.

In the first quarter of the mill year which ended with January, 1907, the Fall River mills paid dividends of $605,895, which compared with $428,650 in the first quarter of 1906, $289,025 in the second quarter, $367,275 in the third quarter and $381,895 in the fourth quarter. The average was 2.56 per cent.

New low records for several years were made in the sale of two New York Cotton Exchange seats this week. One went at $10,000 and one at $11,000. The last previous sale was at $12,700, on January 14. Only a little more than a year ago a membership was transferred at above $24,000.

The governing committee of the New York Stock Exchange adopted on Wednesday an amendment to the constitution, which if approved by the members will go into effect in a week. It allows all shares of a par value of less than $100 to be traded in in dollars and cents instead of on a percentage of their par value. The amendment is intended to apply particularly to mining stocks.

The Adams Express Company has declared an extra dividend of 2 per cent., to be paid from the proceeds of the sale of some property not needed in the conduct of the company's business. A similar disbursement was made last year.

A summary of the reports of the savings banks of New York state as to their condition on the morning of January 1, issued Wednesday by the State Banking Department, shows an increase of nearly $60,000,000 in resources and almost $70,000,000 in amount due depositors.

The California bank commissioner's report shows a total of 129 savings banks in California on December 31, 1906, an increase of six since August of last year. The assets of these institutions were increased $8,655,522 and the deposits $12,212,771. Of this increase in deposits $2,212,771 has been added in the last three and one-half months.

Employees of the National Biscuit Company to the number of 2,341, the annual report of the company shows, are stockholders.

The falling off in the earnings of the People's Gas Light & Coke Company of Chicago, as a result of the 85-cent gas law, which went into effect on February 1 of last year, is shown in the report of the company for the year ended December 31 last. The surplus for the year, after bond interest and amounts charged off, is stated at $2,291,220, or 6.95 per cent. on the capital stock, against a surplus of $3,148,290, or 9.55 per cent., in 1905. In February of last year the dividend rate was reduced from 6 per cent. to 5 per cent., but restored to the old rate at the last dividend declaration, in January.

The Metropolitan Life Insurance Company has taken over all of the industrial business of the Columbian Life Company of Boston, amounting to about $7,000,000, and including about 60,000 policies.

It is pointed out in the thirty-third annual report of the Council of Foreign Bondholders that no fresh default has occurred since 1901, when Costa Rica, in spite of the liberal concessions made to her by the bondholders in 1897, suspended payment of her external debts. Guatemala broke faith with her creditors for the sixth time in 1899, while as for Honduras, no serious attempt has been made to pay a penny since the default which occurred in 1873.

The American Coal Company has declared the usual semi-annual dividend of 5 per cent. and an extra dividend of 25 per cent., payable March 1.

Directors of the American Smelters Securities Company on Monday increased the membership of the directorate from seventeen to twenty members by the election of Arthur L. Walker, Joseph Clendenin, John K. MacGowan, William H. Pierce and John N. Steele to the board. Two of the newly elected directors fill vacancies existing on the board, one of which was caused by the resignation of Simon Guggenheim, who was recently elected United States senator from Colorado.

The preferred and common stocks of the American Pneumatic Service Company have been stricken from the list of the New York Stock Exchange.

The Colorado & Southern has declared an initial semi-annual dividend of 2 per cent. on its second preferred stock.

At the close of business January 31, 1907, there were in existence 6,315 national banking associations, with authorized capital stock of $867,776,275; bonds on deposit to secure circulation, $553,253,550; circulation outstanding secured by bonds, $549,698,574; circulation secured by deposit of lawful money, $46,498,995; total outstanding circulation, $596,197,569. During January there were chartered forty banks, with capital of $3,105,000, twenty-five of which were banks of primary organization, six reorganizations of state and private banks, and nine conversions of state banks.

A New York Produce Exchange membership sold Wednesday for $600, which is an advance of about $400 from the price of last fall.

William A. Read & Co. and Lee, Higginson & Co. have purchased $10,000,000 three-year 5 per cent. notes of the Interborough Rapid Transit Company, redeemable after two years at 1 per cent. premium.

The Standard Oil Company of New Jersey has declared a dividend of $15 per share, payable March 15 next, to stock of record of February 20. The last previous dividend was $10, and the dividend declared at the corresponding quarter a year ago was $15.

The Sloss-Sheffield Steel & Iron Company has declared a dividend of 1¼ per cent. on its common stock, payable March 1. It is understood that this dividend, which is only one-half the amount of the usual semi-annual dividend, is for the last quarter, and that hereafter dividends will be declared quarterly, leaving the annual rate the same as before, namely, 5 per cent.

Industrial.

James Lewis & Sons, metal merchants, of Liverpool, estimate the world's output of copper in 1906 at about 730,000 long tons, against 708,000 tons in 1905, the increase being 3 per cent. There was an important increase in the production of Japan, Australia and Spain, but some of the other countries showed decreases.

"When natural gas was first brought into use in America there seemed to be a general idea that the supply was inexhaustible," says the *Iron Age*. "It was sold at low rates and usually without measurement. This method encouraged waste in the consumption of gas, and was shortly abandoned by the larger companies. To-day nearly all consumption is sold by measurement. It is believed that the time has now come when it is possible to procure statistics of the quantity of gas consumed, and next year this will be undertaken. The method will give such figures in the future that a more direct knowledge will be obtained of the capacity of gas areas to maintain a commercial supply of gas for a certain number of years."

The Postal Telegraph & Cable Company has announced an increase in wages to its operators averaging 10 per cent., to go into effect on March 1.

Pig-iron production of Germany in 1906 was 12,478,000 tons, an increase of 1,490,500 tons, or 13.5 per cent., over 1905. England's 1906 production is figured at 10,540,000 tons, an increase of 8.5 per cent. United States production in 1906, of 25,307,191 tons, showed an increase of 10 per cent. In 1896 the United States produced 8,623,127 tons, England 8,659,681 tons and Germany 6,372,575 tons.

The Western Union Telegraph Company has decided to raise the wages of operators at its principal offices 10 per cent., beginning March 1.

According to the *Iron Age*, the production of coke and anthracite pig iron in January amounted to 2,205,407 gross tons, as compared with 2,235,306 tons in December, the production of the steel works stacks having been 1,406,397 and 1,445,528 tons respectively. The decrease in output was therefore due entirely to the latter, merchant furnaces having held their own. Furnaces entered February with an active furnace capacity of 492,359 tons per week, as compared with 507,322 tons per week on January 1.

Anthracite coal was first burned in a grate in Wilkes-Barre on February 11, 1808, ninety-nine years ago.

The *Oil, Paint and Drug Reporter* estimates that the production of petroleum in the United States last year was 10 per cent. less than the output of 1905, the total for 1906 being 123,000,000 barrels, while the consumption was 132,300,000 barrels.

Railroads.

An address to the stockholders of the Northern Central Railway, made public Monday, announces the abandonment of the proposed merger of the Northern Central with the Pennsylvania. This is the action of a committee of shareholders appointed three years ago. The committee has recommended that the directors fix the rate of the next semi-annual dividend at 5 per cent., and that regular dividends shall be paid thereafter at not less than 5 per cent. so long as the company's net income shall warrant the same.

Miscellaneous.

Daniel Draper, who has charge of the New York Meteorological Observatory in Central Park, has made a report comparing the weather figures of last year with those of the last thirty-eight years. The mean temperature for thirty-eight years was 52.2 degrees. The warmest day in that time was September 7, 1881, 101 in the shade; the coldest, January 24, 1882, 6 degrees below. Last year's lowest was 8 above, on February 6; the hottest, 94, on June 30. The mean temperature last year was 54.6 degrees. The palm as a fair-weather month, according to the statistics, goes to September. Winds that blow through the city come from the west in January, November and December, generally; from the northwest in February, March, July, August and October; from west-northwest in April; from the southeast in May and June, and from the southwest in September.

The total number of immigrants to Canada in 1906 was 215,912, an increase of 71,294 over the previous year. Of these immigrants, the British numbered 98,257, those from the United states 63,781, and those from the continent of Europe 53,874. It will be seen that the British immigration was decidedly the largest. It will also be noticed that the immigration from the United States continues very large.

Recent statistics show that Italy's population for the last five years has been gradually decreasing. In several of the provinces, which furnish the largest contingents of emigrants, the deaths already outnumber the births, while in others the population is stationary. The lack of laborers is felt everywhere throughout the country. Emigration is considered to be the main cause of the depopulation. Hence the government, instead of encouraging it as heretofore, intends to adopt restrictive measures.

Wm. A. Read & Co.

STATE OF TRADE.

[A Summary of Special Telegrams to BRADSTREET'S.]

Better weather and improved roads have developed a stronger tone and greater activity in distributive trade, increased deliveries of grain by farmers, and slightly relieved the congestion in transportation lines, though the latter situation is still far from perfect. Cold weather and price concessions have helped to move remaining stocks of winter goods, rubber wear of all kinds has had a good sale, southern reports are of a good retail trade doing, and in the southwest preparations for spring trade are being made by retailers. With wholesalers and jobbers, deliveries on orders are the main occupation, but there is apparently little let-up in the demand for cotton goods for anything like spring or summer delivery. Freer movement of grain has led to ease in wheat, corn and oats, and enormous receipts of cotton have made for a similar condition in this line. Recent advances in grain have tended to retard export demand, but shipments of cotton are of record proportions. The latter feature, indeed, is the most favorable element in export trade at present, because high prices of breadstuffs, provisions, food animals and oils tend to check foreign takings of these products. Prices of hog products are strong and advancing. Crop conditions are promising as a whole, though the winter-wheat belt has lost its snow covering and some northern sections report conditions impaired, while Texas repeats the stories of damage by bugs, and needs rain. So, also, does Florida, which reports truck interests affected by the prolonged drought lasting since the late fall. Good prices for cotton and large sales of fertilizers point to a large, if not record, acreage in the south the coming spring. Money is easier at western centers but firmer at the east, and most liberal buying of eastern commercial paper is by western banks. The car-shortage trouble is better in the northwest, except in North Dakota, parts of which are still isolated. Farmers there are reported selling grain below market prices, buyers taking chances of getting their purchases to market. In the Pacific northwest some progress is making in relieving the car shortage, which is, however, still hurtful to business. Recent stormy weather checks building, but signs of revival are noticed at the west. Iron prices for distant deliveries have eased, but there is no sign of pressure to sell, though buyers for distant periods are reported less ready to place orders. There are signs of spring trade opening up rather earlier than usual, and a heavy business is looked for in this direction when weather conditions permit.

Pig-iron markets are quieter, and while producers display no marked disposition to force sales, quotations, nevertheless, tend to lower figures. Spot iron is lower in the south, and in the west prices for last-half delivery have declined 50 cents a ton. Some steel makers contend that they cannot profitably dispose of their outputs at the present price of pig iron, and they have, therefore, refrained from buying. Supplies of Bessemer iron for early shipment are larger than for some time. Production in January fell below that of December, and the working capacity of furnaces on February 1 was lighter than on January 1. Some large orders for cast-iron pipe have been booked, the New Orleans contract for 38,000 tons being let on the basis of $33 per ton for 1907 and $32 for 1908 delivery. In the steel-rail trade the feature is the sale of 50,000 tons of eighty-pound rails for export in the second half of the year. It is said that this order will net the mills a larger profit than domestic business would. Bolivia has also taken 6,000 tons in addition to a small lot of bridge material. New business for domestic account is fair, trolley lines being the principal purchasers. Sheets, plates, bars, tinplate, tube and wire interests all report heavy business and great activity on old orders. Most of the goods mentioned command premiums. Structural steel is showing more activity. Old material is weaker. Coal is in better demand, and stocks of soft coal in the west are smaller, the cold weather having tended to reduce supplies. Coke is firm. Copper is higher, the prevailing quotation for lake being 25.12½ cents to 25.37½ cents a pound, with fairly prompt shipments commanding even higher figures.

Crop movement, Liverpool advices, and anti-future legislation accomplished or projected in various southern states, have all been against the cotton market this week and combined to reduce futures about 25 points, in the face of exceptionally good advices from the manufacturing trade at home and abroad. Advices to BRADSTREET'S from Manchester are that there, as in this country, January was a month of activity in cotton manufacturing and of large orders booked for future delivery. Here, high prices asked for cotton goods do not seem to affect demand, which is heavy for the season. In the speculative market for the staple, conditions seemed to have reached a balance which some new influence will be required to unsettle. Crop movement is still far beyond all precedent, especially in the southwest, which seems to have had a record crop, but exports are likewise unprecedented. Public interest in the market is lacking and the situation seems to favor a trader's market, with short swings up and down, pending a clearer view as to the size of the crop, future consumption and the working out of the new anti-speculation legislation. Some urgent buying of merino wool by mills whose foreign purchases have not arrived is noted at Boston. Large shipments are on the way, but arrivals are slow. In domestic wools, quarter bloods are active on good reports from the goods trade. Little buying is reported in the west.

Better weather, larger offerings, and slightly larger movement, due to better roads, weakened the grain markets early this week, and export demand has been less urgent at the recent advance, all of these influences inducing taking of profits and some liquidation in wheat, the result being declines of 1 cent to 2 cents at leading markets. In corn a gain of 2,000,000 bushels in BRADSTREET'S visible supply and reports of immense quantities on track at Chicago have been slightly depressing to prices, which are, however, only fractionally lower on the week. Oats are slightly up. Provisions have been strong and active.

It may be said for gross railway earnings that they are really better than anticipated, considering that weather conditions have been against the railways, and comparisons now are with practically perfect conditions a year ago. Gross receipts for January, as reported to BRADSTREET'S show a gain of 3 per cent. over January a year ago, which latter month showed a gain of 19 per cent. over January, 1905.

Export trade returns for January are, in the aggregate, satisfactory, but this is due mainly to enormous cotton exports. Aside from this, the tendency of breadstuffs, animals, meats and oils is toward decreased exports, a reflection, apparently, of high prices. Corn, wheat-flour, oats, beef, cattle, hog products, illuminating oil and canned beef exports are all smaller than a year ago. Wheat (the grain) and cotton show gains. Exports of manufactures are also larger.

Trade in shoes and leather is moderate. Retail business is and has been good, and rubbers have sold well, but retailers, wholesalers and jobbers are reported to have good sized stocks and will not buy freely from manufacturers till they are ready. Sole leather is quiet but closely sold up. Upper leather is fairly active and a good export demand is noted. Shoe shipments are 12 per cent. behind last year.

Pressure of Cuban offerings still affect the raw-sugar market, which is easy, though quotations are unchanged. European markets are rather firmer. Refined sugar here is strong and slightly higher, and the margin between 3.42 cents for raws and 4.55 cents for refined indicates a profitable trade.

The New York stock market is strong, and although professional in character, has shown a tendency to advance even in the face of a rather firmer money market. More favorable feelings about governmental interference with corporations has prevailed, while the Treasury's offer to buy $25,000,000 of government bonds had a good influence on speculative sentiment. Europe was a buyer of stocks this week on a liberal scale, presumably to cover shorts. The bond market is dull and neglected, although good buying of short-term notes of railroad companies is reported. Foreign exchange has been quiet and somewhat heavy on selling of bills drawn against purchases of securities. Demand sterling is 4.84.50.

Bank clearings for the week ending with February 14 (a holiday period) aggregate $2,698,244,818, 18.7 per cent. under last week and 2 per cent. below the same week last year. Excluding New York City, the total is $1,047,190,683, 9 per cent. below last week, but 6 per cent. over last year.

Business failures for the week ending February 14 number 204, against 198 last week, 208 in the like week of 1906, 243 in 1905, 231 in 1904 and 188 in 1903.

Wheat, including flour, exports from the United States and Canada for the week ending February 14 aggregated 2,500,139 bushels, against 3,319,930 bushels last week, 2,951,642 bushels this week last year, 536,540 bushels in 1905 and 3,175,481 bushels in 1902. For the past thirty-three weeks of the fiscal year the exports are 115,883,614 bushels, against 89,921,128 bushels in 1905-06, 41,586,458 bushels in 1904-05 and 174,585,669 bushels in 1901-02. Corn exports for the week are 1,997,720 bushels, against 2,407,089 bushels last week, 4,163,853 bushels a year ago and 2,882,770 bushels in 1905. For the fiscal year to date the exports are 37,634,517 bushels, against 76,252,648 bushels in 1905-06 and 38,374,871 bushels in 1904-05.

IN CANADA.

Severe cold weather checked retail buying early in the week, but it improved later with milder temperatures. Seasonable weather through the winter makes for small stocks, and spring trade and collections should be better for this. Wholesale trade has been good and there is still some complaint of slow deliveries. In the northwest the railroads are winning out of the congestion caused by heavy snowstorms. Unusually cold weather in British Columbia affects the lumber output. In Ontario there is complaint of manufacturing operations being behindhand, owing to labor scarcity and backward deliveries of materials. In Quebec dairy products are firm. Montreal reports carpet manufacturers sold up for spring delivery. Failures for the week number 29, as against 18 last week and 28 in this week a year ago. Clearings aggregate $65,939,891, a decrease of 18.6 per cent. from last week and of 7.3 per cent. from this week a year ago.

TRADE REPORTS.

In New York business in dry goods and clothing is of very fair proportions. Silks have also been moved to some extent. Retail trade, however, was less active, demand for winter goods being over, while that for spring goods has not yet fully set in. Foreign woolens are quiet. Manufacturers and retailers of furs have large stocks to carry over. Retail millinery is active, and manufacturers of artificial flowers and fancy and ostrich feathers are busy. Prominent firms in the wholesale hosiery and underwear trades report having all the orders they can fill for the entire season. Shirt and glove manufacturers are also busy and some of them are unable to fully execute their orders. Raw silk continues unchanged, manufacturers buying merely to fill present requirements. Large stocks of rags and shoddy on hand are not being moved. Wholesale grocers report a satisfactory week's trade, with liberal out-of-town orders and good collections. Retailers also report good business and that their collections are satisfactory. Orders for Easter confectionery are being freely placed, and factories are working full time. Some cheese is offered for export, but receipts are moderate. Butter is unchanged and supplies only equal demand. Eggs are down 2 cents. There is more life in flour at wholesale, as the strong tone of the wheat market sustains millers and compels jobbers to buy at the market or face an advance. Local arrivals of live stock have been equal to the demand, and there has been an ample supply of dressed meats. Prices are steady, and for the better grades very firm. Binder twine is in good demand, and prices about equal those of last year. Business in jute cordage is excellent, and quotations are very firm. Cotton yarn and warp are quiet. Furniture manufacturers report a brisk business, but the carpet trade is quiet. In the jewelry trade there is a pronounced demand for stock. Both importers and manufacturers of china are receiving satisfactory spring orders. Weather conditions have interfered with the volume of business in the hardware trade, but prices are very firm and some articles have been advanced. Metals are quieter, and pig iron less active. There is a pause in the rush for material which has prevailed in these lines, but prices are very little changed. Mining machinery manufacturers are busy, and electrical material is in fair demand. In the wholesale paper trade prices are stiff. Collections are fair to good, and buying is above the average at this season. Rubber goods continue in request and retailers are doing an active business. Manufacturers of bags and pocket books are not so busy, but there is considerable buying of sheepskins in anticipation of a further advance in price. Crude rubber prices for standard brands are firm, fluctuations being only in inferior grades. Real estate is dull, but there has been some renewal of speculative building operations in the Bronx section of the city. Lumber and building materials are unchanged in price, though weather conditions have temporarily interfered with trade.

The following telegrams show trade conditions at the cities mentioned for the week ending February 15:

BOSTON.—Active trade in dry goods continues, and scarcity is more apparent. Some lines of cotton goods have been withdrawn by the mills, and for spot delivery are unobtainable at any price. Local jobbers are receiving demands from jobbers as well as retailers in the west, and where goods are on hand prices asked are received. Prints are higher, and all plain cottons are very firm. Ginghams and percales are short in deliveries, mills supplying only proportionate amounts of orders on hand. Dress material of popular makes, panamas, voiles, fancy suitings and broadcloths are selling actively. Manufacturers of men's clothing are actively shipping goods, especially those which have been sold on spring datings. Jobbers of hats, with larger orders on hand for spring, are preparing for shipments in March. Shoe manufacturers are not receiving the amount of supplementary spring orders anticipated. Shipments are nearly 74,000 cases less than for the first six weeks of 1906, and some factories are not employed to capacity. Leather is going forward to the cutting room in good volume, prices remaining firm. Hides are strong, with eastern buyers very conservative in amounts taken. There is a good volume of business in paper at firmly sustained prices. Mills are reported as generally running to full capacity on orders, and jobbers are having a good trade. As paper makers are evincing no great interest in the market for paper stock, and are buying mostly in small quantities, the movement is on a limited scale. Prices as a whole are well sustained. There is little demand for housefurnishing goods for immediate shipment, but jobbers are receiving a fair volume of business for early spring delivery. Collections are slow. In iron and steel the market is quiet. Turpentine has again advanced, but in other lines demand is quiet. Some grades of southern lumber

are high, but other lines show no change of account. Coal is in good demand. Provisions are quiet with the opening of the lenten season, but quotations are not appreciably lower. Flour market is quiet. Collections are only fair with grocery jobbers and bakers' supply houses.

PROVIDENCE.—Retail trade is affected by inclement weather. Trade in rubbers and rubber goods has increased, occasioned by recent storms. Lumber is fairly active. Worsted goods continue in demand. Collections are fair.

PORTLAND, ME.—Wholesale and retail trade generally is quiet, though spring orders are arriving with freedom. Climatic conditions are rather too severe at present and milder weather is awaited.

PHILADELPHIA.—Trade is rather quiet in wool, and prices are steady. Cotton yarns are in demand and prices are sustained. The textile situation shows little change. Dry-goods jobbers report collections slow but trade fair. Flour is quiet, millers being disposed to advance quotations for superior brands, but buyers holding off. Chemicals and dyestuffs rule firm and there is a very fair movement for immediate consumption. Drugs are active at satisfactory prices. Paints and glass are very dull, there being practically a stop to immediate deliveries. Large orders are being booked, however, and prices rule firm. Lumbermen say that the storm has checked demand to some extent, but order books are well filled and the market is strong and firm. Hides and skins continue firm, with fair activity and quality, and good supply and prices. Goatskins are scarce and held at high figures. Glazed kid continues firm, with fair demand. The leather market continues in good supply, with an upward tendency. Tobacco sales are checked. Liquor distillers still find an active market at steady prices. Wholesalers, while not securing all the trade looked for, are steadily busy. The decision on the pure food law relating to blending, expected March 1, 1907, has some restraining influence. The anthracite trade is active on cold weather; prices are firm. For bituminous the demand is not quite so brisk as it was.

PITTSBURGH.—In the pig-iron market there is a lull in buying for the second half of the year, though $21.50 for Bessemer and $21.25 for basic are the prices which are still nominally maintained at the valley furnaces One sale of basic iron of 1,500 tons for second-quarter delivery was made at $22. In finished lines there has been an increased demand for structural shapes and plates, and all lines of finished and semi-finished products appear to be in good demand. Activity extends to all branches of industry, and the whole business situation seems to be quite favorable. Coke continues in good demand, with prices firm, and shipments have been somewhat accelerated by open weather. At the valley furnaces spot pig iron is quoted as follows: Standard Bessemer, $23; chilled basic, $22; No. 2 foundry, $24, and gray forge, $21.75. Standard Connellsville furnace coke is quoted at $3 50 and foundry coke at $4 to $4.25.

BUFFALO.—Business is better than during the same period of 1906, and the outlook is favorable.

BALTIMORE.—Retail trade is fair. Winter stocks have been materially reduced by seasonable weather and clearance sales. Drug houses report city business fair, with out-of-town trade good, but collections are slow. Lumber is rather quiet, due to the weather retarding building operations. Hardwoods are in active demand. Business in hardware is of good volume and prices are advancing. Deliveries are very backward, but collections are slow. In dry goods and notions, spring orders in fair numbers are being received, but complaint is made of mill deliveries. Prices are steady and collections are fairly good. Harness manufacturers report new business quiet, but they are busy on old orders; collections are fair. City trade in shoes is quiet. Manufacturers of clothing are busy shipping and filling spring orders. Furniture manufacturers report prices firm and business satisfactory. Orders for paper are plentiful, but mill deliveries are exceptionally slow; prices tend upward and collections are fair. Wholesale milliners are having a satisfactory month and expect an increased business from buyers now coming on from the far south. Purchases of leaf tobacco are mostly for immediate wants. High-grade leaf is scarce. Shirt manufacturers are busily employed in getting out an unusual large amount of spring orders and are starting to manufacture large orders for fall delivery.

CINCINNATI.—Trade conditions continue favorable, and with a continuance of the seasonable weather of the past week, sales will increase. It is stated in clothing houses that probably less heavy wearing apparel has been sold in Cincinnati this winter than for some years past, because of the open winter. However, in the sales of rubber shoes, coats and similar goods the winter very likely broke all records. The wholesale department of the clothing and furnishing goods trade is exceptionally good, and shoe manufacturers continue busy.

CHICAGO.—Distribution of merchandise is of good volume, considering the unfavorable weather in some sections and slow movement of traffic in all parts of the country. Country roads have improved in most parts, thus stimulating the movement of grain and increasing sales of merchandise by interior merchants. Dry-goods jobbers complain of light stocks of cottons and slow deliveries by mills. Shoes and rubbers meet with good sale, and more interest is being taken in clothing. An unsettled condition prevails in pig iron, with some sales for delivery in the last half of the year at a decline of 50 cents. Buyers want larger concessions and say pig iron is too high, considering the selling figures on finished products. Furnacemen desire to keep prices on a healthy level, commensurate with general conditions in the trade. For finished products new business is fair, with premiums of $2 to $4 paid for prompt delivery of steel sheets, and $3 advance in merchant bars. A fair business is under way, with liberal specifications in structural material and cast-iron pipe. Wire and nail makers complain of a scarcity of steel and have suffered some let-up in buying of their products, owing to unfavorable weather. Accumulations of bituminous coals are cleaning up, owing to cold weather and increasing consumption. Eastern smokeless coals are in lighter supply and held at higher prices. Lumber sells readily and is held firmly, with an upward tendency to values. Groceries are selling freely. Butter and eggs advanced, but poultry and potatoes declined. Cattle and hogs are higher, while sheep are steady, but lambs are lower. Receipts of cattle decreased; those of hogs and sheep increased. Money is firmer and demand is improving. Banks here and in the interior are large buyers of commercial paper and short-time notes at 5½ to 5¾ per cent. Collections are fair.

LOUISVILLE.—All jobbing lines are quiet, and business is reported less than that of a year ago. Dry-goods jobbers report fairly good business in spring orders and but few filling-in orders. The whiskey market is in good shape, demand for straight goods of six to eight years exceeding the supply. Business in boots and shoes is rather quiet. Receipts and shipments have been largely curtailed by the flood. Rubbers and rubber boots continue in good demand. Dealers in drugs, oils and paints report business fairly good. Three wholesale houses have taken out licenses for the sale of denatured alcohol, but as yet have been able to purchase very little. Collections are slow.

ST. LOUIS.—In dry goods, shoes, hats, millinery and kindred lines, jobbers are making preparations for a large spring trade. Traveling men are meeting with fair success in the shape of filling-in orders, and in some instances some good sized orders for early shipment have been booked. On the whole, the trade outlook is very bright. Manufacturers of clothing are operating their factories to the fullest capacity on spring orders. Manufacturers of ladies' ready-to-wear suits and waists are experiencing some trouble in getting experienced help, and are behind on orders. Open weather has revived building operations, consequently all grades of materials are active. Retail trade, especially among department stores, shows some improvement. Growing crops are in a favorable condition. Deposits in bank and trust companies appear to be increasing, and some buying of short time corporation paper is noted.

KANSAS CITY.—Jobbers of dry goods, millinery and kindred goods report sales in excess of a year ago. Trade in groceries and provisions is not fully up to expectations. Retail business is being stimulated by early spring displays. Collections are backward. Money continues in good demand, with rates slightly increased.

MILWAUKEE.—Trade in jobbing lines is satisfactory. Retail trade is somewhat quiet. Collections are fair.

DAVENPORT.—Retail trade is only fair, although the weather has been favorable. Jobbers and manufacturers are busy and report a good business, with orders equal to or in excess of last February. Collections are fair.

ST. PAUL.—Business continues quite active in all lines, sales being in excess of last year. Mail orders are a feature. Dry-goods lines are oversold, eastern mills being unable to supply the demand. Collections are still behind those of last year, but are coming in nicely from some sections, but not enough to offset the shortage from North Dakota. Weather conditions are still a hindrance to traffic in North Dakota. Some branches are not open yet, and on others but one train a week is operated. Grain buyers in sections where team hauling is practicable, have bought the farmers' wheat at 10 cents less than the current price and taken chances on having it shipped, the result being that it is now lying in the open and likely to spoil.

MINNEAPOLIS.—Business conditions are on the whole more favorable than a year ago, except in some northern localities, where the crop movement has been interfered with by railway congestion and deep snows. In such localities trade and collections are very slow. Jobbers and manufacturers are preparing for an active spring trade. Flour manufacturing is quiet and the movement is slow.

OMAHA.—Business continues satisfactory and collections are fair.

LINCOLN.—Retail trade is a little dull. Wholesale business is about normal. Some complaints are heard regarding collections.

SIOUX CITY.—Very mild weather has made for good retail trade, and wholesalers report satisfactory sales. Collections are fair.

CHARLESTON.—Wholesale grocers report trade good. Dealers in dry goods, shoes and notions state trade is seasonable. Fertilizers are moving heavily, and farmers are actively engaged in preparing the soil for the new crop. An event of interest during the past week was the arrival of nearly 200 immigrants from Germany. Collections are fair.

RICHMOND.—Iron foundries and machine shops are very active. In most instances labor is hard to obtain, and on this account there have been a good many orders turned down. As a market for steel and iron scrap, Richmond has grown to considerable importance. Dealers in this line have had a successful year. Prices are high, and there has been no abatement of demand, partly due to the fact that on account of congested transportation pig iron has not been readily obtained. Scrap cast iron shows a marked advance in prices. Jobbers of and wholesale dealers in hats, caps, gloves and rubber goods are busy, orders are coming in liberally and sales show an increase thus far over those of last year. Collections are good. Tobacco is active, and prices for the better grades of sun-cured loose leaf are higher than they have been for fifteen years. Prices range up to 50 cents per pound. The cold weather has given tone to local retail clothing and dry-goods markets. Collections in Virginia are good, but in eastern North Carolina they continue backward, and requests for extensions are numerous.

AUGUSTA.—Wholesale trade is improving and retail is fair. Collections are fair.

ATLANTA.—Business for the first month of the New Year was not up to expectations, but has been improving, and for the week just closed has gone ahead of the corresponding period of last year. Building shows a marked increase. The present price appeals to many who have been holding cotton, and this has improved collections, which have been lagging.

JACKSONVILLE.—Country merchants are increasing orders despite high prices. Retail trade is good, with collections fair. Prolonged drought hinders seed sowing for early truck.

BIRMINGHAM.—Trade in general is good, but collections are a little slow.

MOBILE.—Business has now resumed its normal condition since the carnival. Collections are improving.

MONTGOMERY.—Jobbing in all lines is fairly good, but collections are slow. Retail trade is better. The movement of cotton is light.

CHATTANOOGA.—Trade, wholesale and retail, is satisfactory, and collections are good.

MEMPHIS.—Business is quiet and collections are slow. The car shortage is delaying the movement of cotton, lumber and other merchandise, and warehouses and railroad platforms are congested.

NASHVILLE.—Nearly all jobbing lines report a full share of orders, and retail business continues fairly good. Collections are satisfactory.

LITTLE ROCK.—Jobbing business is increasing. The outlook is for a record-breaking spring trade. Warm weather retards retail business. Collections are good. Real estate is active, and building material is in great demand. Wagon receipts of cotton at primary points show an increase on account of the improved condition of country roads. Practically all of the old crop has been gathered. Preparations are now being made for the new crop, and increased acreage will be limited only by the labor supply, conditions regarding which are much better than a year ago.

NEW ORLEANS.—Thousands of carnival visitors during the past week have given retail stores a good run of business, but jobbers are inactive, although several lines report good spring orders. Building operations are larger than during any previous year, and there is a heavy demand for all building materials.

DALLAS.—Jobbers in all lines report an excellent business, but collections are slow.

WACO.—Wholesale trade is good but retail is a little slow. Small grain in this section is badly in need of rain; in fact, we have had a very dry fall and winter, and the green worm is reported as doing great damage.

SAN FRANCISCO.—The arrival of materials from outside points has given an impetus to building. Labor is still scarce. Business in all lines is good, though the inability to collect insurance claims will cause some distress.

SEATTLE.—The blockade in transportation is materially affecting business generally, especially the shingle and lumber trade, and has a tendency to tighten the money market. Collections are consequently only fair.

SPOKANE.—The northern roads are now open and they are bending every effort to relieve the congested freight situation. Business is quiet and collections are very slow, owing to the inability of farmers to ship wheat.

TACOMA.—Traffic is again opening up and some long delayed shipments are arriving. Retail trade is quiet. Collections are fair.

PORTLAND, ORE.—Inability of transportation companies to handle shipments without long delays, owing to recent storms, affects trade considerably and collections are only fair.

TORONTO.—General trade continues brisk. Very cold weather gave a quieter tone to some lines of retail trade, but business has been brisker since. Wholesale trade and manufacturing continue active. There is still complaint regarding the slowness of deliveries of cottons and woolens, and prices are firm. Manufacturers of white wear are hampered by the scarcity of suitable cotton, scant supplies of embroidery and a shortage of experienced operators. This is particularly trying, as manufacturers are busy on summer lines, for which the orders are heavy. General lines of spring dry goods are going forward fairly well, although western transportation facilities are still much upset. Hardware continues active, with iron and steel prices firm. Country trade is fairly good, with collections, on the whole, satisfactory. Cheese is advancing.

MONTREAL.—Very severe weather worked against retail trade early, but later, with milder weather, retail demand again became brisk. So far this winter good seasonable weather has helped trade in winter lines, and sorting trade has kept up well. In this regard the season is much better than a year ago, when the end of winter found shelves heavy with stocks of winter goods. They should this year be much better cleaned up, a circumstance helpful to collections and spring trade. Travelers report the outlook for both summer and fall trade to be exceedingly bright. Dry-goods lines are moving well. There are still complaints regarding deliveries. Carpet prices have advanced and Canadian manufacturers are entirely sold up for spring. Stocks of butter are not heavy and the make is light. Cheese is also firm and export demand is brisk.

VANCOUVER-VICTORIA.—Wholesale trade has a quiet tone, although comparing well with previous seasons. Retail trade is brisk and collections are good. Lumbering has been much interfered with by the unusual cold, which has frozen up the rivers and prevented work. There is a decided shortage of logs, and prices are firm. The shipping trade is active. Coasting rates have advanced on all lines of freight.

WINNIPEG.—The railroad systems are recovering from the general tie-up of a week or two ago, and they are endeavoring to move some of the freight which has been accumulating during that time. There is, however, a pronounced shortage of some lines of goods, and the fuel scarcity is a serious matter, particularly in the outlying districts. The loss of cattle on the ranges is this year likely to be heavy. Retail trade in the country has not been heavy and collections have in many instances been a little slow. They will improve, however, with the further marketing of grain.

FINANCIAL.

Bank Clearings.

[By Telegraph to BRADSTREET'S.]

Bank clearings for the weeks ending February 14 and February 7, 1907, and the percentage of increase or decrease for the week ending February 14, compared with the corresponding week of 1906, follow:

Money Market.

Last Saturday's unfavorable bank statement was regarded as indicating that the return of funds from the interior to New York was practically over, and it was recalled that last year, in the week corresponding to the present one, the spring outflow began. The announcement made that Secretary Shaw would purchase $25,000,000 of the 4 per cents was regarded with approval, though it was claimed that it may be rather difficult for the Treasury to secure that amonnt of the bonds at the price named, and that, moreover, the Secretary's action would seem to indicate that his intention is to speedily call in all or a part of the $30,000,000 of government deposits made last autumn. The possibility of some currency legislation, indicated by the bill favorably reported by the Senate Finance Committee, was also discussed, although it could not be said that any positive effect was produced on the loan market. As the week advanced, the tone, in fact, became rather firmer, call money, which had earlier ruled at 4 per cent., running up on Thursday to 6 per cent, while time money for short periods hardened to the extent of about ¼ per cent. and was not offered with much liberality. There continues to be a fair market for commercial paper, the demand coming almost entirely from out of town, and it may be noted that western institutions are understood to be liberal buyers of acceptable names, of which there is at present a fair supply.

New York Banks.

The chief feature of last Saturday's Clearing House averages was the heavy loss in the cash items, amounting to $12,077,600, which was far in excess of the amount of the loss in that respect indicated by the estimates of the actual currency movement for the week. In some quarters it was argued that the extent of the loss reflected transfers of funds to the trust companies. At the same time the loans increased $1,518,900, while the deposits were $11,757,500 smaller, which agreed fairly well with the changes in loans and cash. This reduced the reserve requirements by $2,789,275, but the surplus reserve showed a decrease of $9,288,000, bringing the total surplus down to $3,345,875. The figures of the statement compare as follows with those of the preceding week:

	February 9	*February 2*	*Changes*
Loans	$1,099,356,400	$1,097,837,500	I. $1,518,900
Specie	190,382,100	197,800,300	D. 7,418,200
Legal tenders	79,354,400	84,913,800	D. 4,659,400
Deposits	*1,065,562,500	1,076,720,000	D. 11,757,500
Circulation	53,334,800	53,135,400	I. 149,400
Total reserve	269,736,500	281,814,100	D. 12,077,600
Reserve required	266,390,625	269,180,000	D. 2,789,275
Surplus reserve	3,345,875	12,634,100	D. 9,288,225

The following table shows the bank holdings on the respective dates:

	Feb. 9, 1907	*Feb. 10, 1906*	*Feb. 11, 1905*

Foreign Exchange.

A quiet tone prevailed for the most part in the foreign exchange market this week. The inquiry was at no time urgent, and was, in fact, of limited dimensions. On the other hand, the supply of commercial bills was somewhat limited, so that in the early part of the week the market was steady on rather small dealings. Later on, however, foreign purchases of American stocks began to cut something of a figure in the situation, offerings of bills drawn in connection with such transactions causing the market on Wednesday to assume a rather weaker tone. There was some discussion as to the possibility of a reduction in the Bank of England's rate of discount from 5 per cent., but it was not thought in international banking circles that such a step would be taken when the London open money market remains so strong as at present, and no surprise was accordingly felt that the rate was left unchanged on Thursday last.

POSTED RATES OF LEADING DRAWERS FOR LONG AND DEMAND STERLING.

Feb. 9	*Feb. 11*	**Feb. 12*	*Feb. 13*	*Feb. 14*	*Feb. 15*
4.81½ @ 4.85½	4.81½ @ 4.85½	....	4.81½ @ 4.85½	4.81½ @ 4.85½	4.81½ @ 4.85½

ACTUAL BUSINESS BANKERS' DEMAND STERLING.

4.84.70 @ 4.84.80	4.84.50 @ 4.84.65	....	4.84.55 @ 4.84.65	4.84.50 @ 4.84.65	4.84.50 @ 4.84.60

ACTUAL BUSINESS BANKERS' SIXTY-DAY STERLING.

4.80.50 @ 4.80.75	4.80.50 @ 4.80.75	....	4.80.40 @ 4.80.70	4.80.40 @ 4.80.60	4.80.30 @ 4.80.45

* Holiday.

Closing quotations on Friday for actual business in other classes of bills were: Cables, 4.85.25@4 85.30; commercial bills, 4.79¾@4.80⅜; francs, 5.24⅜@5.21¼; reichsmarks, 93⅝@94 7-16.

The Bank of England's discount rate is unchanged at 5 per cent. Its gold holdings decreased £91,000 for the week, but the proportion of reserve to liability was 50.29 per cent., against 49.65 per cent. the week before. In the London open market money continues firm at 4½@5 per cent. on call, while discount is quoted at 4 11-16@4¾ per cent. The Bank of France continues to maintain a 3 per cent. rate and this week reports a loss of 3,625,000 francs in its gold. The Paris market for discount meantime is at 2⅞ per cent. At Berlin the bank rate is still 6 per cent., the market quotation for discount being 4¾ per cent.

New York Securities Market.

Several developments which were of a favorable nature, or at any rate were construed in that way, aided in creating an improvement in stock-market sentiment this week. It was intimated, rather vaguely it is true, that the attitude of the administration toward railroads and corporate interests generally was not as radical a one as had been depicted. Claims were also advanced by railroad people that the public mind was becoming more reasonable as regards the roads, and that it was being recognized that the difficulties in providing adequate transportation facilities, about which there has been so much complaint, were due to causes which, in a great measure, could not be overcome immediately by the companies, while, furthermore, it is appreciated that indiscriminate attacks have tended to discourage or frighten capital and hamper the railways in obtaining the capital necessary to improve their facilities and increase their equipment. While last Saturday's bank statement was a decidedly poor one, its effect was offset by the announcement that the Secretary of the Treasury would purchase $25,000,000 of the 4 per cent. bonds due July 1, 1907, at 101½, thus releasing that amount of money from the Treasury and making amends for the prospective withdrawals of government deposits. The currency measure reported to the Senate by the Finance Committee, while only a partial remedy, was, nevertheless, accepted by Wall street as evidence that Congress would do something in the matter, and aided in creating the change of feeling which was so notable a feature in the early portion of the week. As already stated, the bank statement was a decidedly poor one, and as the week advanced money became somewhat firmer, thereby causing something of a halt in the rising tendency of prices. In fact, on Thursday there was a rather general recession in prices, hardly amounting to a reaction, but indicating that the professional operators, who had been encouraged to act on the long side of the account, were taking profits, and, to a certain extent, felt like waiting for a renewed decline. One of the incidents of the week was rather large buying of stocks for London account, the first demonstration of that kind which has been seen for some little time, although it was generally concluded that the purchasing in question was principally to cover shorts. On Friday the market, after an early spell of reaction, became strong and showed renewed advancing tendencies.

Incidents of importance were not especially numerous. The declaration of the regular half-yearly dividends on Union Pacific and Southern Pacific occasioned no particular movement in those stocks, which had, however, earlier in the week, received a good deal of support. The standard stocks, in fact, as a class moved with a good deal of regularity, selling up moderately, as before stated, and then easing off when money rates became firmer. Not a little attention was attracted to several of the less active specialties, among them being American Sugar and Missouri, Kansas & Texas. The strength of the copper metal position is, of course, calculated to render Amalgamated Copper and Anaconda favorite objects for speculative trading, while in Stock Exchange circles the steps which are being taken by the governing body of the exchange to facilitate the listing of and trading in reputable mining stocks at the institution are, generally speaking, fully approved. One of the weak features of the market, particularly in the latter days of the week, was the Gould group of stocks, there being more or less unfavorable rumors in circulation regarding Missouri Pacific and its companions.

Boston Stock Market.

Statistical Situation of Cotton.

The aggregate world's visible supply of American and other cotton last week, as made up by the New Orleans Cotton Exchange, is shown, with comparisons:

Week ending	Feb. 8, 1907	Feb. 1, 1907	Feb. 10, 1906
American	4,320,181	4,356,812	3,826,579
Other kinds	1,173,000	1,145,000	1,529,000
Total	5,493,181	5,501,812	5,355,579

Of the world's visible supply, as above, there were afloat for or held in various countries on the dates given the following quantities:

	Feb. 8, 1907	Feb. 1, 1907	Feb. 10, 1906
Great Britain and continent	3,076,000	2,983,000	2,667,000
Egypt	236,000	237,000	196,000
India	505,000	505,000	895,000
United States	1,736,000	1,777,000	1,598,000
Total	5,493,000	5,502,000	5,356,000

Following will be found the movement of cotton into sight for the week and season, as compiled by the New York Cotton Exchange:

	This week	Last week	Last year
Week	297,496	347,200	192,513
Season	10,560,952	10,263,456	8,441,772

Boston Wool Market.

The feature of the market during the past week has been the very urgent buying of merino wools by the mills which are waiting for the arrival of the wools bought abroad, and whose stocks had run to so low a point that the wool was needed immediately to keep them running. There is a large amount of this foreign bought wool on the way, some via London, some direct from Australia and some overland between Boston and Vancouver, but arrivals are greatly delayed. Sixty-fours to 70s have been most in demand, the former selling at 41@42 cents and the latter at 43@43½ cents, and fine crossbreds in small lots at 45 cents. In the market for domestic wools, the feature has been the better inquiry for quarter bloods, this being due to the improved condition of the goods market, but outside of quarters the local market is very quiet, with exceedingly small stocks. At the same time prices are being held very firm, and such lots as are offering are at full quotations. During the past week there have been some sales of Idaho clothing at 22 cents, Montana at 23 cents, Ohio quarter blood fleeces at 33½@34 cents, and other grades as required, or allowed by the smallness of the stocks. There is very little contracting going on in the west at present, but something has been done during the week in Idaho at 18 cents and in Utah at 20@22 cents. The new Arizona wools are arriving in sample bags and are of light shrinkage and comparatively free, selling in primary markets at 20@21 cents, with an occasional lot at 21½ cents. The next London sales will open March 12, and the opinion seems to be that prices will be fully sustained at the level of the January sales.

Boston Shoe and Leather Market.

There is a moderate export demand for both sole and upper leather. Union backs have sold in some good lots to cutters. Everything in oak, hemlock or union offal is closely sold up. Satin, glove and kangaroo grain are in somewhat better inquiry, but no large sales have been announced. Hides and skins are firm. Boston buyers have not been willing to pay asking prices on Ohio buffs, but sales are reported as being made to western buyers at 13 cents. Shoe manufacturers are not receiving the number of orders they anticipated, although hope is still held out that later orders will make good the deficiency. Wholesalers are still carry-

ing stocks brought over from last season, and are therefore buying very conservatively. Shipments for the first six weeks of 1907 are nearly 74,000 cases under the same period last year. It is said that some factories could produce 50 per cent. more goods, and in some cases a more striking comparison could be made. This is caused not by any lack of retail demand, but by the fact that wholesalers and retailers are determined to buy as few goods at present prices as possible, first disposing of goods bought a year or more ago. Shipments last week, according to the *Shoe and Leather Reporter*, were as follows: Last week, 84,551 cases; preceding week, 85,141; last year, 100,130; total for 1907, 532,979; total for 1906, 606,923; decrease, 73,944.

THE RISE IN SILVER.

Charles A. Conant, writing in the *Inter-Ocean*, says that "practically the whole period of nearly sixty years since the great gold discoveries in California and Australia has been a record of ups and downs in the relation between gold and silver. First, there was the great output of gold in the fifties, which carried the value of the metal far below parity in silver at the European ratio of 15½ to 1. This condition continued practically from 1850 to 1870 and flooded with gold France and other countries which had previously employed silver as their chief money metal.

"Then, beginning almost unobserved in 1866, came the decline of silver, which by 1873 caused the abandonment of bimetallism by the countries of the Latin Union and by Germany. Silver continued downward until the crash of 1893, when British India closed her mints to its free coinage, and the price dropped from 37⅞d. per ounce to 30⅛d. within a week. The market gradually sagged from 1893 to the beginning of 1903, which witnessed a turn. Silver was at its minimum of 12 11-16d. in January of that year. Before the year closed it had touched 28½d., and the average for the year was 24¾d. The years 1904, 1905 and 1906 witnessed a further almost uninterrupted appreciation, which carried the price to an average at 27d. in 1904, 27 13-16d. in 1905 and 30½d. for the first eleven months of 1906.

"It was near the close of 1902 that the Mexican and American governments took up the question of giving stability to exchange between the silver countries and the gold-standard countries. The primary purpose was to secure comparative uniformity in the currencies of the Orient, under a system conforming generally to the gold exchange standard.

"So low had silver fallen in 1903 that it was almost universally believed that it would never rise again above the ratio of 32 to 1 in gold. That coins issued at this ratio could be maintained by proper regulation at a fixed parity with gold was the substance of resolutions adopted by representative bodies appointed by the British, French, German, Dutch and Russian governments to confer with the American and Mexican commissioners. Practically all the discussion tended to the question whether a limited quantity of token coins could be kept up to a fixed gold value in the face of a further fall in silver.

"Several results of a practical character followed the efforts of the commissions of Mexico and the United States. One was the decision of British India to make purchases of silver with greater regularity. Another was the decision of Germany to introduce the gold exchange standard into several of its oriental dependencies. Further results were the adoption of a coin approximately at the ratio of 32 to 1 in the Philippine Islands and in Mexico.

"The remarkable rise in silver has, within less than four years, called for a readjustment of these arrangements. Perhaps the most remarkable experience has been that of Mexico. After taxing exportation and providing for reducing the fineness of the coins, Mexico was forced into the market in November, 1900. Old coins having been shipped to London, purchases of new bullion were made from the American Smelting Company for subsidiary silver. Such purchases of about 6,000,000 ounces by the country which ranked as the greatest producer of the white metal represented a revolution of a most astonishing character.

"Already the remarkable recovery in silver has compelled action by several governments which had adjusted their coinage upon the basis of a continued low value for the metal, including Japan, the Philippine government, Mexico and Straits Settlements. The Philippines, the Straits and Peru have prohibited the exportation of silver, while Mexico has imposed a tax of 10 per cent. on the export of coin. These measures, however, are admitted to be only makeshifts. The prophecies of the past suggest caution in making predictions.

"That the supply of silver bullion does not respond at once to changes of price is due in part to the fact that silver has become a by-product of the smelting of gold, copper and lead. In 1903 about 130,000,000 ounces of silver were produced as a by-product and about 40,000,000 ounces as a primary product. While present business conditions continue, demand for silver seems likely to grow at least as rapidly as production. The industrial consumption naturally increases with the growth of population, and even increases per capita with the growth of wealth and luxury. Industrial consumption in all countries probably rises to about 60,000,000 ounces per year.

"The demand for silver for subsidiary coins in gold countries has been one of powerful influence. Nearly every government at first, in meeting the demands for additional subsidiary coins, met them from stocks of old silver. Hence, none of these governments appeared in the London market as purchasers of silver bullion.

"There are two influences which may possibly come into play to retard a further rapid rise of silver. One is the discovery of fresh supplies of the metal, the other is change in business conditions. Under the first head there are some indications of new supplies of importance in Canada, but it is doubtful if they will be developed with sufficient rapidity to more than keep pace with demand.

"It is possible, moreover, that some of the countries which have issued silver coins at about the ratio of 32 to 1 would part with them willingly in exchange for gold if they should rise above their face value, and thereby without cost increase the amount of gold in their currency systems. This has been practically the policy of Mexico so far as constituting her bank reserves is concerned.

"So far as gold has met a specific demand for money which was formerly met by silver, it would tend to depreciate the gold value of silver rather than to appreciate it, by diverting a part of the monetary demand from silver to gold and leaving a larger quantity of silver to meet the remaining demand. Undoubtedly, to some extent, however, the general rise in commodity prices has affected the value of silver.

"In the long run silver is subject to the law of demand and supply. The demand may be varied by the arbitrary action of governments, but their action again will be influenced by business conditions rather than by whim so long as silver continues to be the only available metal for subsidiary coinage. The crisis in silver seems to have passed with the year 1902. So far as one can measure many complicated factors, the demand for the arts and for subsidiary coins is likely to advance the price by degrees in the future."

A NEW ERA.

"According to the latest estimates of the Census Office, the population of the United States in 1904 was 81,752,000. Since the war period the increase per decade has been 22 per cent., at which rate—assuming it to be maintained—we shall have at the end of another generation, or say in the year 1940, a round total of about 170,000,000, or approximately double our present number of inhabitants. This prospective growth will come within the experience of a large proportion of our now living people, and therefore presents a field of deeply interesting speculation for every American citizen," says the New York *Journal of Commerce*.

"More than in any past times, this prospective generation must be viewed as 'through a glass darkly.' It promises to be, in a very vital sense, an era full of newness, full of experiment, full of reconstruction, and full of weanings and weedings from the past. From this time forward we may hope to know man as we have never known him before. Taken as a whole, social man, industrial man and the higher-class man are to be differently constituted from what development has hitherto made of them. Since education has become universal and the elective franchise has been conferred on all men, the structure of society is broadly changing and government is being revolutionized in many of its important functions. This new development of education is only in its beginnings. The parental process of transmission is destined to elevate the intellectual stamina of each successive generation. One cycle of this process has already developed a higher standard of popular thought. The working masses are acquiring a broader training in the industrial processes; and along with that progress is coming a higher social ambition and a higher grade of popular morals. With this elevation of a renovated generation, so distinctly coming within the last forty years, we may expect to make still further advances within the generation upon which we are now entering with so much promise.

"What may we not expect from the progress of science? The answer from the achievements of the past generation of invention foreshadows much more important results than anything that power and mechanism have hitherto achieved. Great scientists will no longer be raised alone among our college-bred students. The quota of intellectuals coming from our public schools will many times multiply our contributions from born sons of science and invention. From this source alone, the probable developments in the various sources of industrial production are inspiring beyond experience. Between, together, the impulse from recent discovery and the impulse from native philosophers in the public schools, there are before us promises of intellectual advancement far surpassing anything in modern history. Under such an impulse of development, who shall declare any great progresses impossible?

"To the world's masses such a future of possibilities is full of inspiration. The 'good time coming' now seems to be approaching with really unprecedented speed. It is not a millennium of utopia that lies before us. It is an era of high progress based upon scientific revelation, the developments coming alike from the uncovering of nature and the elevation of humanity. There need be no disappointing delay of this promised advance, providing the workers in the ranks of progress understand their respective possibilities and opportunities. And yet, with no needless impatience, there may be much unwarrantable delay. Nor does this discouraging possibility lie alone with any one of the social classes. The lower, the middle and the upper orders are surcharged with immemorial grudges against each other, and it is the hardest task of civilization for one class to coöperate with and conciliate the other. There is, however, an all-ruling power which now and then intervenes to settle the petty animosities among the divided branches of the human family and establishes order between man and man, and man and the laws of nature. We, however, prefer to seek direction less in such merciless chastisements than in the fraternal self-control of brother men. It is one of the greatest anomalies of human society that, with a distinct consciousness of undying enmity between its variously shaded memberships and a clear perception that such enmities are the chiefest obstacles to peace, rulers persist in holding us on the constant verge of war. It remains to be seen whether this glory of slaughter is destined to vanish with the appearance of the nobler civilization which, let us hope, waits to appear among the great boons of the New Era."

THE BANK OF ENGLAND.

The London *Statist* says: "Banking reform, it is generally understood, is under the consideration of the Chancellor of the Exchequer. Whether he will be able to take it in hand next session will depend, firstly, upon whether he has made up his mind as to the extent of the changes required; and, secondly, upon whether the Cabinet ranks banking reform among the most urgent questions it has to deal with. But that banking reform will be undertaken either next session or the session following is expected by the whole country. That it ought to be thorough when essayed is plain to everybody who thinks. It is now over sixty years since Sir Robert Peel's legislation. In the interval the whole face of the world has been altered by an economic revolution greater than ever has been witnessed in the same space of time; but with regard to banking there has been no revision of the law. Small points, it is true, have been dealt with, but there has been no reform. It is probable, then, that whatever is done by the present government will remain the law for a considerable time to come, and it is much to be desired, therefore, that the reforms should be not only well considered and in the right direction, but that they should also be thorough and calculated to stand for a considerable time. The most pressing of all banking questions, no doubt, is that of the reserves to be kept. But it will be disappointing if the Chancellor of the Exchequer stops short at merely requiring the banks to keep reserves. It ought to be settled who is to have the custody of the reserves and on what conditions. For example, it would be costly, and therefore wasteful, if every bank throughout the United Kingdom were to be required to keep a separate reserve in gold. The banks have no vaults in which to keep the metal, and at present they have not the staff to guard it. In what manner, then, are the reserves to be held? Manifestly the cheapest way, as well as the way that would make the least change in the system to which the country has grown accustomed, would be for the Bank of England to undertake the custody of all the reserves. But if the Bank of England is to be the custodian of all the reserves of the United Kingdom, or at all events of all the reserves of England and Wales, the constitution of the Bank of England ought to be brought into harmony with modern conditions. The Bank of England was founded more than two centuries ago. The constitution originally given to it was excellent, as is proved by the fact that the administration has been so good throughout so long a period. But the whole conditions of life have changed during those two centuries, and now the constitution of the Bank of England is not merely antiquated, it is entirely out of date. More particularly, the bank ought to have one permanent head. In saying this we are not to be understood to hint dissatisfaction with the management of the present governor. On the contrary, he has done exceedingly well in trying times, especially considering that he is not a trained banker—that until four years ago, in fact, he had practically no acquaintance with international banking. But we are now looking forward to the future, not looking back to the past, and we think everybody will agree with us in saying that it is entirely wrong that the Bank of England should have no permanent chief. A director of the Bank of England practically takes no part in the business of the bank until he becomes deputy-governor. In that position he has a certain amount of training for two years. Then he becomes governor, and is virtually absolute for two years more. At the end of the two years, when he is beginning to feel himself competent for the place he fills, he goes out of office, and a new man comes in, to learn at the expense of the whole trade of the country.

"To make matters still worse, there is no permanent manager. There are two heads of great departments, very competent men, but neither is chief, and neither, therefore, has either the responsibility or the power which a manager should have. We take it for granted that if nothing is done in the meantime the Chancellor of the Exchequer will put an end to this exceedingly unsatisfactory state of things. It is for the directors of the Bank of England to consider whether they will leave it to the Chancellor of the Exchequer to settle what is to be the future constitution of the bank, or whether they will themselves take the initiative and make a change which, in the eyes of the government, will probably seem deserving of a full trial."

INTERNAL COMMERCE DURING 1906.

Internal commerce movements during 1906 exceeded those for any preceding year in the history of the country. This fact is apparent from compilations of the year's record just completed by the Bureau of Statistics of the Department of Commerce and Labor. While the movements during December and others of the later months of the year were less than those for the corresponding months of 1905, due probably in a considerable degree to car shortage, the grand total for the year exceeds that of any prior year.

Receipts of live stock at interior primary markets during 1906, while they exceeded to a small extent similar activities in 1905, showed an appreciable decrease during the last few months of the year. During December receipts at Chicago, Kansas City, Omaha, St. Louis, St. Joseph, St. Paul and Sioux City amounted to 3,285,529 head, falling nearly 200,000 head below like arrivals in 1905 and more than 10,000 head below those for 1904. Compared with the December, 1905, movement, all of the markets specified reported a decrease with the exception of St. Paul, where a gain of approximately 20,000 head was made. For the full year live-stock receipts at these markets aggregated 40,727,658 head, exceeding corresponding movements in 1905 by more than 150,000 and those in 1904 by nearly 3,000,000. The gain shown in the aggregate movement, as compared with that of 1905, was caused by heavier receipts at Kansas City, Omaha and St. Louis, losses having occurred at Chicago, St. Joseph, St. Paul and Sioux City. Of the different animals received, cattle constituted 9,373,825 head; calves, 796,793; hogs, 19,223,693; sheep, 10,864,427, and horses and mules, 468,920. Gains were made in the arrivals of cattle, calves and sheep, while losses occurred in those of hogs, horses and mules.

Shipments of packing-house products from Chicago during 1906 aggregated 60,776,900 pounds of beef, 117,688,650 canned meats, 804,642,049 cured meats, 1,138,072,285 dressed beef, 13,170,300 dressed hogs, 175,170,520 hides, 421,914,539 lard and 36,581,200 pork, a total of 2,768,016,443 pounds, being over 100,000,000 greater than that for 1905 and more than 300,000,000 in excess of 1904. The shipments of all products, with the exception of canned meats and dressed hogs, present gains if compared with those of either of the two immediately preceding years.

Grain receipts at fifteen interior primary markets aggregated 798,521,585 bushels, exceeding those in 1905 by approximately 250,000 bushels and those in 1904 by about 80,000,000 bushels. The total movement was divided into 243,735,058 bushels of wheat, 242,722,716 corn, 233,300,239 oats, 69,469,290 barley and 9,294,282 rye. Compared with the arrivals in 1905, losses occurred in the receipts of wheat, barley and rye, but were more than offset by the gains made in the corn and oats movement. East-bound trunk-line movements of grain from Chicago and Chicago points were 114,062,000 bushels in 1906, 112,220,000 in 1905 and 90,501,000 in 1904.

During 1906 Boston received 26,496,320 bushels of grain; New York, 89,365,846 bushels; Philadelphia, 28,073,289 bushels; Baltimore, 39,600,786 bushels, and New Orleans, 31,310,757 bushels, a total of 214,846,998 bushels, compared with 200,186,727 bushels in 1905 and 119,125,238 bushels in 1904. Compared with the preceding year's movement, all ports show gains with the exception of New York, where a loss of over 1,500,000 bushels occurred.

Shipments of anthracite coal from eastern producing regions for the entire year aggregated 55,647,296 tons, in contrast with 61,410,201 in 1905 and 57,498,642 in 1904. The losses indicated for 1906 were principally due to the suspension of mining during April and part of May.

The estimated production of coke at Connellsville during 1906 amounted to 14,436,928 tons, and exceeded like production in 1905 by over a million tons and that in 1904 by approximately 4,500,000 tons.

The volume of freight traffic on the Great Lakes during 1906 established a new high record for those great bodies of water, notwithstanding that the preceding year was also one of maximum tonnage. Toward the end of 1906 inadequate rail facilities assisted materially in increasing the volume of water traffic, this being particularly true with regard to grain movements. In the aggregate the gains made in freight tonnage were enormous. During 1906 shipments aggregated 75,610,690 net tons, in contrast with 67,345,620 shipped during 1905 and 51,370,855 in 1904. Of the different articles transported flour amounted to 1,334,979 tons, grain and flaxseed to 4,211,197 tons, coal to 17,575,917 tons, ore and minerals to 43,030,419 tons, logs and lumber to 3,993,165 tons, and unclassified freight to 5,465,013 tons. With the exception of logs, all commodities showed heavy gains over the shipments of the preceding year; the gain in iron ore amounted to nearly 5,000,000 tons.

During the entire year vessel clearances from all ports on the Great Lakes aggregated 81,271 of 94,893,961 tons, against 79,908 of 87,978,397 tons cleared in 1905 and 68,967 of 67,773,295 tons in 1904. Of the 1906 movement, 21,004 vessels of 28,470,554 tons cleared light or without cargo, and 60,267 of 66,423,407 tons carried more or less freight.

The total movement of domestic freight through Detroit river during the year to December 31 amounted to 60,578,155 tons, divided into a northbound movement of 16,448,812 tons and a southbound movement of 44,129,343 tons. Coal constituted the bulk of the freight shipped from the lower to the upper lakes, amounting during the year to 14,522,031 tons, while unclassified or package freight totaled 1,303,042 tons. In the opposite direction grain, flaxseed, flour and iron ore were the principal commodities shipped, and were divided in the following manner: Grain, 119,480,821 bushels; flaxseed, 17,758,376 bushels; flour, 1,237,652 tons, and iron ore, 32,208,009 tons. Vessel movements through this river during the year numbered 24,062 of 47,076,781 net tons, those passing in a northerly direction numbering 11,618 of 22,681,761 tons, and those in a southerly 12,444 of 24,395,020 tons.

The commerce through the canals and Sault Ste. Marie, Mich., and Ontario, Canada, for the entire season aggregated 51,751,080 tons, an increase of approximately 7,500,000 tons over the preceding season and of nearly 20,000,000 over that of 1904. The United States canal cared for 45,180,292 tons, and the canal in Canadian territory for 6,570,788, while of the entire movement, 41,584,905 tons moved in an easterly and 10,166,175 in a westerly direction. The principal items in the former movement were 138,607,764 bushels of grain, 6,484,754 barrels of flour and 35,357,042 net tons of iron ore, while of the latter, 8,739,630 net tons of coal and 984,265 net tons of general merchandise composed the bulk of the tonnage. As compared with like shipments in 1905, grain gained over 30,000,000 bushels, flour more than 700,000 barrels, iron ore approximately 4,000,000 tons and coal over 2,000,000 tons.

In the United States about 83 per cent. of the total number of concerns failing had $5,000 capital or less and 7 per cent. had from $5,000 to $20,000 capital.

BRADSTREET'S

ADVERTISING DEPARTMENT.

BRADSTREET'S is issued every Saturday, and goes to the better class of business and professional men of this country and Europe—including bankers, lawyers, railroad and insurance officials, merchants, manufacturers and public men. It has a larger and choicer paid subscription list than any similar periodical in the world.

SUBSCRIPTION, FIVE DOLLARS A YEAR.

ADVERTISING RATES, SINGLE INSERTIONS, DISPLAYED, 25 CENTS A LINE, AGATE MEASURE.

DIVIDENDS.

UNION PACIFIC RAILROAD CO.
Semi-annual Dividends of
$2.00 per share on the Preferred Stock
$5.00 per share on the Common Stock

of this company have been declared, payable at the Treasurer's Office, 120 Broadway, New York, N. Y., on April 1, 1907, to stockholders of record at 3 P. M. on Friday, March 8, 1907.

The stock transfer books will be closed at 3 P. M., on March 8, 1907, and will be reopened at 10 A. M., on April 1, 1907.

Stockholders who have not already done so are requested to promptly file mailing orders for dividends with the undersigned, from whom blank orders can be had on application.

FREDERIC V. S. CROSBY, Treasurer.

ENTERED AT THE POST OFFICE AT NEW YORK, N. Y., AS SECOND-CLASS MATTER.

SATURDAY, FEBRUARY 23, 1907.

As the end of the short session of Congress approaches the legislative mill begins to grind more rapidly, but to all appearance the grist for the remainder of the session will not be large. The activity has been effective mainly in relation to appropriation bills. The Naval Appropriation bill, providing for a second battleship of the Dreadnaught type, and carrying about $100,000,000, passed the House on Friday of last week. The bill was passed by the Senate at a night session on Wednesday. At the same session that body passed the River and Harbor bill, which also carries a heavy appropriation. The House passed the Post Office Appropriation bill on Wednesday, and on the same day the legislative appropriation bill was completed after being in conference for about a month. The appropriation bills are therefore well advanced. As regards other measures before Congress there is some uncertainty. This is particularly the case as regards the Shipping Subsidy bill, which can only be got through by holding night sessions. The Aldrich Currency bill was brought up on Wednesday, but was laid over, and it may be said to be in the same predicament as the subsidy measure. The session is now nearing its end, but one working week remaining before the close.

From time to time during the existence of the present Congress the question as to the possibility of action being taken by that body looking to a revision of the tariff has been discussed at Washington. The subject was brought to the attention of the President lately by the receipt of a petition sent to him by the governor of Massachusetts asking for a special session to revise the tariff. Advices from the capital are to the effect that the President acknowledged the receipt of the petition in a formal reply saying that it would receive careful consideration. Ordinarily little significance would attach to a circumstance of this nature, but it appears that the reply was sent after a long conference with both senators from Massachusetts and with a number of other members of both houses. This is taken as indicating that Mr. Roosevelt is convinced that there is no likelihood of any measure of tariff revision being adopted in the immediate future. It is not meant by those who reach this conclusion that the President is opposed to tariff revision, but simply that in his judgment there is not at present a sufficient force of public opinion behind the movement to justify him in taking up the question as one calling for special and speedy treatment.

Last week the expectation was generally entertained that, as the result of the action taken by the United States and Mexico in conjunction with Salvador, Guatemala and Costa Rica, hostilities in Central America would be averted. An agreement was apparently reached to submit the controversy between Nicaragua and Honduras to arbitration. Some surprise was naturally occasioned at Washington by the receipt of news that hostilities had actually broken out between the two republics, and that both sides claimed the honors of the first success in arms. Information conveyed to Secretary Root yesterday puts a somewhat different aspect upon the matter. According to statements made by Ambassador Creel, of Mexico, and Minister Corea, of Nicaragua, neither republic has declared war against the other, and the hostilities reported amounted simply to a clash on the frontier between small bodies of troops, which would not be permitted to interfere with the negotiations for arbitration. It is to be hoped that this will turn out to be the case; serious complications for the states involved would thus be averted.

At the close of last week the Senate adopted a resolution reciting the allegation that the native inhabitants of the basin of the Kongo have been subjected to inhuman treatment, and declaring that the President would have the support of the Senate in any steps not inconsistent with treaty obligations or with traditional American foreign policy which he might deem wise to take in coöperation with or in aid of any of the powers signatory of the Treaty of Berlin for the amelioration of the condition of such inhabitants. This resolution as adopted represented a very considerable toning down from the form in which it was introduced. In its original shape it declared that in the opinion of the Senate the time had come when the affairs of the Kongo Free State should be made the subject of international inquiry. In consonance with the resolution the President has requested the American ambassador to Great Britain to inform the Foreign Office of the action of the Senate, with the assurance that the administration is prepared to act on the advice of the Senate and to coöperate with Great Britain and the other signatory powers with a view to instituting an international investigation, if that be deemed necessary. Baron Moncheur, the Belgian minister at Washington, when asked about the resolution after its passage, pointed out that the resolution did not seem to specially affect Belgian interests or those of the Kongo Free State, but only dealt with the condition of the inhabitants of the basin of the Kongo.

What is termed the agitation against railroads and the attacks which are being made upon them in so many different directions, legislative and otherwise, furnish the ground for a variety of very strong protests from high railway officials. Admitting, as some of these officials frankly do, that there have been errors in the management of railways in the past, they dwell upon the efforts which such corporations are making to give the public adequate and efficient service, and on the exaggerated and distorted character of a great deal of what is said by the opponents of the roads, or would-be regulators. Nor do they fail to point out the obstacles which timidity on the part of capital, induced by the indiscriminate and in some cases uninformed nature of the onslaughts, places in the way of obtaining the additional capital which is absolutely necessary to provide increased facilities. This latter phase of the question would, in the minds of many competent observers, constitute the really troublesome feature. It was pointed out very recently by Mr. Jacob H. Schiff, certainly a good authority on the financial side of the question, that the inability of railroads to raise further large amounts of money was bound to result in a curtailment of the outlays for improvements. In fact, various examples of this tendency have already been witnessed, and the effect of a decreased demand for the material which railroads employ for construction and improvement work would naturally constitute an item of great importance in bringing about some degree of quiet in general trade conditions.

What is looked forward to as likely to be one of the most interesting gatherings in the history of the British empire is the Colonial Conference, which is scheduled to meet in London on April 15. The opening meeting will be presided over by the British Premier, Sir Henry Campbell-Bannerman, and the delegates will comprise the premiers of Canada, Australia, New Zealand, Cape Colony, Newfoundland and Natal, together with ministers or officials having to do with trade or finance. India will appoint a special representative, and the Premier of the Transvaal, who will doubtless be chosen by the time the conference opens, will be invited to attend. Methods of promoting imperial trade and defense will furnish the keynotes of discussion. The topics thus far on the programme comprise such subjects as preferential trade within the empire, the formation of an imperial council, further additions to the colonies' naval contributions, and plans for the coöperation of British and colonial troops in defense of the empire. It is expected that the representatives from the colonies will urge the making of some definite trade concessions in return for those granted by them to the mother country.

Returns thus far had indicate that in the elections of representatives to the new Russian Duma the opposition to the government will have a decided majority and that the radical elements in the opposition will be in control. The radicals, indeed, are said to have elected about 40 per cent. of the whole, with the Constitutional Democrats and the Conservatives following with about 25 per cent. each. The success of the radical element in the second as compared with the first Duma is an illustration of a familiar tendency in revolutionary movements; in the present instance the radicals have been powerfully aided by the widespread distress among the peasantry, who are suffering from famine. There has been talk of a postponement of the meeting of the Duma, but this is positively denied by the Ministry, who declare that the meeting will take place on March 5. There has been another outbreak of riots, particularly in Odessa, and these are alleged to be connived at by the authorities in some places.

An important amendment to the law governing the procedure in federal courts is embodied in a bill which has just passed the Senate after going through the House. This bill allows writs of error or appeals on behalf of the government in certain criminal cases, as, for example, from decisions quashing or sustaining demurrers to indictments, where the ground for such demurrers is the invalidity or construction of the statute upon which the indictment is founded, or from decisions sustaining special pleas in bar where the defendant has not been put in jeopardy. The enactment of this legislation has been earnestly advocated by the President, and his signature of the bill may be taken for granted. The passage of the law will remedy a weakness which has long attracted attention in the criminal jurisprudence of the United States.

THE JAPANESE QUESTION SETTLED.

The controversy over the admission of Japanese pupils to the public schools of San Francisco has at length been settled, at least so far as the United States is concerned, substantially upon the lines indicated in our issue of last week. As the result of several conferences held at the White House and the State Department on Friday of last week, it was arranged that the San Francisco Board of Education would modify its regulations so far as they specifically affected Japanese pupils upon the passage by Congress of a clause in the immigration bill authorizing the exclusion of Japanese coolies. It is understood that the President and Secretary Root gave assurances to the representatives of the San Francisco Board of Education that in the event of the failure of Congress to pass the proposed provision at the present session, an extra session would be called to deal with the matter immediately after adjournment.

As it happened, a resort to the latter course will not be necessary. On Saturday afternoon the Senate adopted the report of the conference committee on the immigration bill which contained the clause covering the question of exclusion. This clause authorizes the President to exclude from the continental territory of the United States immigrants who have no passports from their own governments to come to this country. Upon the final adoption of the report there was no division, but there was a vote before that on a motion to instruct the conferees to report an amendment incorporating in the bill a provision specifically excluding Japanese coolies. This motion was defeated by a vote of 45 to 24. The vote on this proposition indicated that the administration had the situation in the Senate well in hand.

In the House the conference report was carried by a vote of 187 to 101. In the course of the debate over the matter in the latter body on Monday, the interesting point of order was raised that the provision giving the President power to exclude aliens, as well as that regulating the air space in immigrant vessels, could not properly find a place in the conference report, inasmuch as neither was in either the House or the Senate bill. The minority leader, Mr. Williams, quoted extracts from decisions of former Speaker Henderson in support of the point of order, and he argued that it would be a dangerous precedent to allow to a conference committee the power to legislate which it had virtually exercised. In permitting extraneous matter to be put into a bill by a conference committee, Mr. Williams argued, Congress was virtually establishing a third house—the Conference Committee. There are, however, precedents and precedents, and Representative Watson was able to satisfy the Speaker with a decision made by another predecessor, Mr. Colfax, as long ago as 1865, holding that conferees, in dealing with a situation such as that before the two houses, were bound only by the limits of the whole subject in preparing a bill. The amended immigration bill was signed by the President on Wednesday.

The passage of the amended immigration law by the House was followed by the issuance of a statement by Mayor Schmitz on behalf of the San Francisco Board of Education in which the whole question is gone over at length. It will not be necessary to recapitulate this statement, which deals in large part with the subject of the influx of Japanese labor. It may be pointed out, however, that while the representatives of San Francisco declare their willingness to modify the school regulations so as not to embarrass the administration in its negotiations with Japan, they do not concede that any treaty rights have been violated by the regulations now in force, and that in so far as any provisions in the treaty with Japan limit the power of the local Board of Education to regulate its own school affairs, they are null and void.

It was in October last that the San Francisco Board of Education passed the original resolution which opened up the controversy. This referred specifically to Japanese pupils. The amended regulations will provide that "children of all alien races who speak the English language" must be examined to determine the grade in which they are entitled to be enrolled; that no children of alien birth over certain specified ages shall be enrolled in certain designated grades, and that if such alien children shall be found deficient in the elements of the English language or unable to attend the grades designated by reason of the restrictions mentioned, they shall be enrolled in special schools or in special classes established exclusively for them in such manner as the Board of Education shall deem proper and most expedient.

In view of the course of events, the test cases brought to determine the rights of Japanese residents to educational privileges under the treaty will now be dropped. Negotiations will also be pressed with Japan for the adoption of a new treaty embodying the provisions as to exclusion contained in the immigration bill. How the matter will be viewed in Japan cannot be very clearly determined just yet. The adoption of the exclusion provision will undoubtedly arouse some antagonism, though the better informed among the Japanese view the situation with apparent tranquillity. As regards the settlement internally, it can only be said that it leaves an open place in our public law still unfilled, and that it brings no nearer to a determination the question as to the respective limits of the federal power to regulate foreign relations and that of the local governments to exercise regulative authority over persons within their territorial jurisdiction.

RECORD RAILWAY EARNINGS.

Nineteen hundred and six was a year in which many previous records were eclipsed, a fact with which practically every student of trade trends is quite well acquainted by now. However, as the various indicia of economic movements become available, it behooves one to register the facts for historical purposes, if for nothing else. A study of returns regarding railway earnings, both gross and net, makes one thing patent, that the railways shared to the full in the prosperity that was so prevalent in the last calendar year, the result being an enormous augmentation in the totals of income. Perhaps the shortest route to the main points can be gained by stating that gross earnings of all roads thus far reporting for the calendar year 1906 aggregated $2,171,955,917, the gain over 1905, itself a year of no mean magnitude, being 12.5 per cent. But taking the returns of roads reporting both gross and net earnings, we get a total of $1,986,661,167 for gross earnings and of $606,620,613 for net receipts, the respective gains over 1905 being 11.3 per cent. and 10.1 per cent. These increases, it should be noted, cap gains that have been making for a series of years, which is another way of saying that the outcome in 1906 surpassed preceding records. Indeed, the degree of progress attained over a period of ten years can be readily appreciated by contrasting the returns just cited with those reported for 1896. On this basis we get what might be termed a statistical sermon that is full of meaning, the point being fully brought out by stating that gross earnings in 1906 exceeded those of 1896 by 104 per cent., while the net outdistanced the returns of ten years ago by 106 per cent. Of course, during the interim there have been periods when the line of earnings showed wavering tendencies, but the disposition in this respect never assumed very marked proportions, so that it may be said that the story of traffic revenue during the past ten years has been one of continuous progress.

Needless to say, the chief factor that brought about the excellent record for 1906 was prosperity—activity everywhere in the country—to which we might add bounteous harvests, following good returns in the preceding year. Moreover, the winter of last season was almost ideal for railway operations, the result being heavily increased ratios of net earnings; in other words, more than the usual volume of gross receipts was saved for the net earnings. On the other hand, the coal-miners' strike, which occurred in April and extended into May, was one adverse feature, though the ill effects thereof were largely confined to the coal-carrying roads. At the same time the San Francisco catastrophe, which also occurred in April, was another unfavorable feature. And while the cereal crops were of unusually large proportions, the movement to primary markets fell below that of 1905. Then, again, operating expenses toward the latter part of the year, owing partly to increased wages, higher cost of material, widespread car congestion and the rigorous weather of the current winter, underwent marked expansion.

Now, while words do well enough for a description of the central theme and the main undercurrents, the figures themselves give a more graphic idea of achieved results. Therefore we subjoin this table, which gives gross earnings of all roads making conclusive returns for 1906 and the preceding year:

	1906	1905	*Inc.*
Northwestern	$101,722,382	$88,435,530	15.0
Central-western	142,917,175	130,097,215	9.9
Trunk lines	653,078,898	598,749,845	9.0
Eastern	146,035,001	136,961,684	6.6
Coal roads	165,417,849	149,964,244	10.3
Southern	270,688,651	238,292,502	13.6
Southwestern	254,659,628	224,063,724	13.6
Pacific	252,141,583	218,227,855	15.5
Total	1,986,661,167	1,784,792,599	11.3

Gains rule in every instance, though in varying degrees. Thus the heaviest increments over 1905 are contributed by the Pacific group and the northwestern lines—15.5 per cent. and 15 per cent. respectively. Two sections show gains that are identical, the southern and the southwestern—13.6 per cent. in each instance. The hard-coal roads, despite the strike, show an increase of 10.3 per cent. The central-western roads return an accretion of 9.9 per cent., while the trunk lines show an advance of 9 per cent., and the eastern roads furnish a gain of 6.6 per cent.

The record as regards net earnings is set forth in the following:

	1906	1905	*Inc.*
Northwestern	$33,594,077	$27,221,902	23.4
Central-western	41,095,683	34,642,699	18.6
Trunk lines	183,242,979	165,098,050	11.0
Eastern	40,304,153	41,019,361	*1.7
Coal roads	59,555,895	61,554,737	*3.2
Southern	72,041,067	71,579,308	.6
Southwestern	89,412,869	70,142,388	27.4
Pacific	87,373,890	79,444,212	9.9
Total	606,620,613	550,703,557	10.1

*Decrease.

The southwestern roads lead with an increase of 27.4 per cent., the northwestern lines being second with a gain of 23.4 per cent. After these come the central-western roads, the trunk lines and the Pacific roads with increments of 18.6 per cent., 11 per cent. and 9.9 per cent. respectively. The southern roads barely remain within the increase column, their gain being only six-tenths of 1 per cent., heavy expenditures for improvements causing the comparative shrinkage. The coal roads and the eastern lines show decreases of 3.2 per cent. and 1.7 per cent. respectively.

The more important increases in gross earnings, as compared with those of 1905, are shown in the following:

Pennsylvania system	$22,797,700
Southern Pacific	13,938,642
Canadian Pacific	13,040,419
Atchison, Topeka & Santa Fe	11,390,874
Reading	10,635,567
Baltimore & Ohio	8,797,172
Union Pacific	6,882,044
Rock Island	6,562,142
New York Central	6,303,500
Louisville & Nashville	6,232,410
Southern	5,533,583
St. Louis & San Francisco	5,387,001
Illinois Central	5,319,913
Missouri Pacific	4,069,288
Lake Shore & Michigan Southern	3,850,100
Norfolk & Western	3,494,722
Erie	3,335,657
Chesapeake & Ohio	3,192,110
Grand Trunk of Canada	2,895,799
Wabash	2,888,195
Michigan Central	2,813,200
Atlantic Coast Line	2,706,226
Missouri, Kansas & Texas	2,699,328
Boston & Maine	2,607,108
Total	157,372,700

Leading increases in net earnings are given in the appended table:

Southern Pacific	$8,557,041
Pennsylvania system	8,209,700
Canadian Pacific	6,854,041
Atchison, Topeka & Santa Fe	6,712,857
Baltimore & Ohio	4,365,161
Rock Island	3,813,504
St. Louis & San Francisco	2,852,837
Denver & Rio Grande	2,474,237
Wabash	2,456,441
Missouri Pacific	2,430,548
Illinois Central	2,364,749
Missouri, Kansas & Texas	2,121,482
Lake Shore & Michigan Southern	1,781,900
Chesapeake & Ohio	1,484,289
Erie	1,213,341
Norfolk & Western	1,169,206
New York Central	1,121,600
Kansas City Southern	1,117,730
Minneapolis, St. Paul & Sault Ste. Marie	1,011,631
Total	62,112,295

The other side of the picture is set out in the following figures of decreases from the net earnings of 1905:

Union Pacific	$7,512,246
Southern	3,512,547
Reading	3,018,012
New York, New Haven & Hartford	1,077,152
Seaboard Air Line	950,247
Atlantic Coast Line	857,578
Buffalo, Rochester & Pittsburgh	734,505
Delaware, Lackawanna & Western	632,565
Total	18,294,852

By way of completing the record of gross earnings for the calendar years 1906 and 1905, we append the following table, with the explanation that while the majority of the country's railways report both gross and net receipts, there are quite a number that make approximate returns of gross earnings only:

	1906	1905	*Inc.*
107 roads reported above	$1,986,661,167	$1,784,792,599	11.3
18 roads which report gross earnings but not net	185,294,750	162,404,682	14.0
Total, 125 roads	2,171,955,917	1,947,197,281	12.5

The foregoing total of $2,171,955,917 is based on a mileage of about 190,000 out a total of, let us say, 215,000 miles, and may therefore be taken as thoroughly representative of the trend. It will be seen that the gain over 1905 amounts to $224,758,636, or 12.5 per cent. The foregoing level is a very high one, and the question naturally arises, will the railways be able to surmount it in the current calendar year. Only time will tell.

BRITISH FOREIGN TRADE INCREASING LARGELY.

The United Kingdom is still by far the greatest trading country of the world, and it is always of interest to know what the condition of the foreign trade of that country is. Light on this point may be had by consideration of the following table, giving the imports and exports of that country during the past three calendar years:

Imports from	1906	1905	1904
British possessions	£142,185,000	£127,859,000	£120,018,000
Foreign countries	465,802,000	437,151,000	431,020,000
Total	607,988,000	565,020,000	551,038,000
Exports to			
British possessions	121,264,000	113,438,000	111,938,000
Foreign countries	254,409,000	216,379,000	188,773,000
Total	375,673,000	329,817,000	300,711,000

There is here shown a gain in imports of all kinds of 7.5 per cent. in 1906 over 1905 and of 10.3 per cent. over 1904. The imports from British possessions gained 11 per cent. over 1905 and 18 per cent. over 1904, while the imports from foreign countries gained 6.5 per cent. over 1905 and 8 per cent. over 1904. Thus the gain in imports from British possessions was relatively larger than from foreign countries. The exact opposite is the case in the matter of exports, however. There is a gain in all exports shown over 1905 of 13.8 per cent., and the increase over 1904 is 24 per cent., but the takings of the British colonies increased only 6.8 per cent. over 1905 and 8.3 per cent. over 1904, while foreign takings gained 17.6 per cent. over 1905 and 34.7 per cent. over 1904. In other words, in the past two years foreigners have bought more freely in proportion than have the colonies, which is a tendency rather opposed to the views and predictions of those who have believed that Great Britain's markets in time will be largely confined to its own possessions. It might be noted, however, that although the so-called balance of trade is still heavily against Great Britain, the excess of imports over exports in 1906 being £232,315,000, it is not so large as in 1905, when the imports exceeded exports by £235,203,000, or in 1904, when the excess was £250,297,000.

In any consideration of these figures, however, it is well to remember that they cover merely merchandise, and the imports from the colonies, for instance, do not include the shipments of gold or diamonds from Australia or South Africa. Thus it is estimated that Australia produced about £18,000,000 of gold in 1906, while South Africa produced £26,000,000 of gold and £8,000,000 of diamonds, some of which was shipped to the United Kingdom, and which, some English journals say, do not figure in the above returns.

The statistics of exports and imports by countries are of interest as showing the directions which British trade has taken in the past three years, and the proportions of total trade contributed by each of the kingdom's leading customers.

EXPORTS OF UNITED KINGDOM'S PRODUCE.

	1906	1905	1904
India, Straits and Ceylon	£50,672,000	£47,629,000	£45,182,000
Germany	33,627,000	29,704,000	25,103,000
United States	27,789,000	23,916,000	20,198,000
Australasia	27,712,000	23,452,000	23,688,000
France	20,495,000	16,143,000	15,254,000
Argentina	19,430,000	13,003,000	10,847,000
Cape and Natal	15,262,000	16,360,000	17,533,000
Canada and Newfoundland	14,159,000	12,342,000	11,113,000
Japan	12,913,000	9,662,000	4,859,000
China	12,237,000	13,136,000	8,809,000
Holland	11,615,000	9,684,000	8,200,000
Belgium	11,592,000	10,056,000	9,052,000
Italy	11,185,000	8,893,000	8,371,000
Other countries	106,985,000	95,836,000	92,472,000
Total	375,673,000	329,816,000	300,711,000

IMPORTS OF COLONIAL AND FOREIGN PRODUCE.

	1906	1905	1904
United States	£131,105,000	£115,573,000	£119,352,000
France	53,816,000	53,073,000	51,071,000
India, Ceylon and Straits	51,181,000	47,376,000	46,891,000
Australasia	44,768,000	40,471,000	36,330,000
Germany	38,033,000	35,800,000	33,914,000
Holland	36,652,000	35,481,000	34,690,000
Canada and Newfoundland	30,951,000	26,204,000	23,138,000
Russia	30,054,000	33,366,000	31,473,000
Belgium	29,008,000	27,751,000	27,536,000
Argentina	23,809,000	25,034,000	23,035,000
Egypt	16,857,000	14,977,000	14,362,000
Denmark	16,433,000	15,416,000	15,912,000
Spain	15,843,000	13,859,000	13,672,000
Sweden	10,727,000	9,828,000	9,767,000
Other countries	78,651,000	70,811,000	70,047,000
Total	607,988,000	563,020,000	551,039,000

India and the Straits Settlements are the best customers for British goods, taking over 13 per cent. of all exports of British produce, Germany coming next with about 9 per cent. and the United States third with 7.4 per cent., closely followed by Australasia, with almost as much. In the matter of British imports the United States is far and away the favorite, with 21.5 per cent., or over one-fifth, coming from this country. Broadly speaking, the United Kingdom buys five times as much from us as she sells to us. India's trade is about as well balanced as that of any country, she buying and selling in the neighborhood of £51,000,000 yearly.

As to tendencies during the past year, it may be noted that the United Kingdom's export trade in 1906 increased to all countries except China, South Africa, Hong-Kong, Java and Cuba. The reduced trade with China is directly chargeable to the reduced trade in cotton goods. The heaviest proportionate gain is with Argentina, which appears to have had very good trade for some years past. Canada's takings from Great Britain were less important than from Australia, Argentina and the cape colonies.

These statistics, taken as a whole, certainly point to a solid growth in trade during the past few years. The London *Statist*. commenting on the growth shown, dates the improvement back to August, 1904, when, as that paper says, the United Kingdom began to export capital freely again. "In this period of two years and six months," says that journal, "our imports have expanded £65,970,000, or nearly 13 per cent.; our reëxports have increased £16,311,000, or 23 per cent., and our net imports have grown by £49,659,000, or 10 per cent. But this satisfactory growth of imports has been attended by the enormous and unprecedented growth of £88,773,000, or 36 per cent., in the value of the exports of the produce and manufactures of the United Kingdom. In this period of two years and six months the expansion in the value of the exports of British produce has thus exceeded the expansion in our net imports by no less than £49,659,000. From whatever point of view these results are regarded, no one can fail to be delighted that the trade of the country has expanded in this remarkable manner."

THE LACKAWANNA REPORT.

More than the ordinary interest which attaches to the annual report of one of the great railway companies is being exhibited in that of the Delaware, Lackawanna & Western for the year 1906, which has just made its appearance. So far as the actual results for the twelve months are concerned, the company does not show as favorable earnings, on the whole, as in 1905. Compared with that year the revenue and expenditures of 1906 display the following changes:

	1906	1905	*Changes*
Gross earnings	$32,062,880	$31,051,064	Inc. $1,011,816
Operating expenses	18,899,442	17,827,975	Inc. 1,071,467
Net earnings	14,063,438	14,123,089	Dec. 59,651
Other income	4,499,375	3,938,963	Inc. 560,412
Total income	18,562,813	18,062,052	Inc. 500,761
Taxes	1,573,000	1,000,085	Inc. 572,915
Balance	16,989,813	17,061,967	Dec. 72,154
Fixed charges	5,511,740	5,482,816	Inc. 28,921
Balance	11,478,073	11,579,151	Dec. 101,078
Dividends (20%)	5,240,000	5,240,000	
Surplus	6,238,073	6,339,151	Dec. 101,078
Improvements, etc	5,651,001	3,640,722	Inc. 2,010,279
Final surplus	587,072	2,698,429	Dec. 2,111,357

From this it will be seen that the increase in gross was only 3 per cent., while operating expenses were 6 per cent. greater, the taxes also being 57 per cent. larger. As a result, the balance over fixed charges, which latter item shows only a slight increase, decreased $101,000, although the amount applicable to the payment of the 20 per cent. dividends which the Lackawanna disbursed to its shareholders was more than double the amount of the payment in question. Furthermore, the company increased its expenditures for improvements and betterments by the sum of $2,000,000. The showing, in fact, represents the effects of increased cost of working, and although the company undoubtedly enjoyed a year of reasonable prosperity, the circumstances in question prevented any further advance in that direction.

The discussion of other matters, however, lends the chief interest to the report. Mr. Truesdale devotes a large portion of the text of the document to a discussion of the agitation against railroad corporations, and adds his voice to the chorus regarding what he terms the universal and pronounced feeling of hostility which exists toward the companies and those controlling and managing them, and the alleged attitude of indifference or unconcern as to the efficiency and safety of the service rendered to the shipping and traveling public. He reëchoes the admission made by Mr. Thayer, one of the vice-presidents of the Pennsylvania Railroad, who in treating the same subject frankly admitted that there was some justification for the feeling, largely in the attitude and actions of railroad managements in the past. The Lackawanna's president, however, very emphatically claims that the conditions complained of are neither universal nor as bad as represented, and have been exaggerated and distorted. This, however, with the prevalent clamor for legislation as a panacea, or what he terms the substitution of governmental control and management in the place of that furnished by trained railway officials, is working great wrong and injustice to the railway interests of the country. He also takes up the subject of taxation of railways, point being lent to his remarks by the above increase of about 57 per cent. in the taxes paid by the company last year. His particular complaint relates to the state of New Jersey, setting forth that the taxes paid in that state under the new legislation amounted to 9 per cent. of the gross earnings and 30 per cent. of the net earnings derived from the road's business in that state. How these figures are arrived at is not, however, stated, and it will be noted that the total taxes were only 8 per cent. of the aggregate gross.

Another feature of the report is the statement that the Lackawanna will not be required to dispossess itself of its coal properties under the provision of the amended interstate commerce laws, making it unlawful for a carrier to transport commodities, such as coal, produced or mined by it or in which it has any direct interest. The claim advanced in this respect is that by the terms of the company's charter, which was an early one granted by the state of Pennsylvania, it has the undoubted right to mine, purchase, transport and merchandise coal. Whether this contention will hold good of course remains to be seen, but the statement made on behalf of the Lackawanna seems to raise interesting questions as to the course which some at least of the other anthracite roads may adopt in reference to their coal-mining interests.

A DEFENSE OF THE PENNSYLVANIA RAILWAY.

It is now nearly a year since the Interstate Commerce Commission, in investigating charges of discrimination in favor of certain shippers in the matter of rates and cars, brought to light the facts regarding the Pennsylvania Railroad Company, or, rather, some of its officials, which were a disagreeable surprise to the public, which had always regarded the management of that great corporation as a model not only of efficiency but of integrity. The most disagreeable of these facts were that various officers in minor though responsible positions were personally interested in the stocks of certain coal companies and other corporations which are large shippers over the lines of the system, and that in some instances their holdings of stock in the other concerns had been acquired virtually as gifts. The action then taken by the company itself was what might have been expected. A committee of the directors was promptly appointed to investigate the relations of officers and employees to shippers, and at the same time to probe the charges that there had been favoritism in the distribution of cars or other discrimination between the different patrons of the company.

The report of this special committee, which has just been published, covers these matters not only as respects the officers of the Pennsylvania Railroad Company itself, but all of its controlled and affiliated railroads as well. It sets forth with much detail that public opinion was misinformed because of the publication of portions and not the whole of the testimony given before the Interstate Commerce Commission, and that the adverse conclusions formed upon insufficient premises have done grave injustice to the whole of the Pennsylvania's service. As a result of the examination of 2,505 officers and employees of the different companies, including every one whose individual action or whose orders to subordinates could lead to any of the acts of discrimination complained of, the committee reports that it found 266 had interests in coal or other

corporations or firms and individuals who were among the company's shippers, and that with the exception of fifteen, all of these had acquired their interests by purchase. These parties who admitted the receipt of gifts of shares or other benefits, have been reported to the presidents of the several railroad companies for appropriate action.

In regard to the allegations of favoritism to freight shippers, principally coal-mining concerns, the committee sums up the situation by stating that there has been no discrimination between shippers, and sets forth that much of the trouble which led to the charges was due to the so-called individual cars owned by certain patrons of the road, especially the large coal shippers. Recognizing that the presence of this kind of rolling stock leads to dissatisfaction and complaint, the committee, however, found itself unable to recommend its abolition, owing to the inability of the company to provide equipment with sufficient rapidity to meet the growth of business. It also goes fully into the relations between the Pennsylvania system and a large coal-mining company, especially as to the lease of the coal docks at Jersey City and elsewhere to that concern, which was one of the principal allegations urged against the railroad. In this respect the committee apparently finds that the arrangement was one of a proper nature and beneficial to the railroad company and involved no favoritism in the car distribution for the benefit of the interest in question.

Taken as a whole, the report seems to be a vindication of the body of officers and employees who have charge of the traffic of the Pennsylvania system. It points to the fact that the service is one of sixty years' growth and is composed of men educated and trained in the service of the company, with traditions of loyalty and recognition not only of their duty to the company but to the public which it serves. In some quarters the report will doubtless be characterized as a whitewashing one, but reënforced as it is by evidences of painstaking and thorough investigation by a body of gentlemen who possess the confidence of the financial community, it would seem to set at rest the theory that the entire service of the greatest railroad in the country was corrupt. In fact, the evidences are that acts of maladministration or of collusion with dishonest shippers were confined to an exceedingly small number out of the thousands employed by the company.

A WESTERN VIEW OF THE TRADE SITUATION AND OUTLOOK.

To the Editor of BRADSTREET'S:

SIR—That the maximum of expansion in manufacturing and distribution of commodities has been reached is the belief of financiers and close observers of business conditions. A recession in buying in the near future would not be surprising, and a readjustment is deemed as necessary by some to keep the country's business in a healthy condition. A reduction of 5 to 10 per cent. might easily come and not be felt, but at the same time it would do good. Transportation facilities are inadequate for the present volume of trade. Cars are scarce throughout the west, and railroads are issuing embargoes to prevent loaded cars from leaving the tracks of the parent system, thus creating congestion and delays. Most country elevators in the corn belt are full of corn awaiting shipment, and larger lines of insurance than ever before are being carried. This extra expense, combined with delays in shipment owing to car scarcity, removes profits of shippers. Jobbers report purchases of dry goods, clothing and shoes above the average. Cotton goods are in light supply and higher. Groceries and leather are having a good sale. Dullness prevails in the pig-iron market. Northern furnacemen assert they are getting full prices, but admit that the market is easy. Deliveries are better, though restricted by car shortage. Finished products are taken fairly well. The feeling is healthy, with specifications coming in readily. Coal and coke sell fairly, but coke is moved slowly from the east. Supplies of coal are liberal. Lumber sales are increasing. Retail business is good. Butter, eggs and potatoes are higher. Fat beeves are scarce and higher. Hogs are lower, but sheep are higher. Receipts of all live stock decreased. Apprehensions of damage to winter wheat by thawing and freezing are increasing in the central winter-wheat belt. Interior banks are large buyers of paper. Short-time notes find active sale in the west on the basis of 5½ to 6 per cent. Collections are fair. M.

Chicago, February 21.

EDITORIAL NOTES

Thanks chiefly to the immense shipments of cotton during January this year—36 per cent. of the month's exports being of cotton, as against 23 per cent. in January, 1906—the export trade total is the largest recorded for that month, and the third largest monthly total in the country's history. The largest totals are usually made in December, and only those months of 1906 and 1905 exceed the January aggregate. In imports, also, the month's total is a very large one, next in point of importance, in fact, to that of December, 1906. Following will be found the imports and exports of merchandise during January and the seven months ending therewith for the past three years:

January	1905	1906	1907
Imports—Free of duty.	$46,322,059	$49,765,135	$59,886,585
Dutiable	52,020,817	56,756,390	66,690,380
Total	98,342,876	106,521,525	126,576,965
Exports—Domestic	121,612,550	168,395,823	187,392,415
Foreign	1,984,833	2,207,230	1,867,835
Total	123,597,383	170,603,053	189,260,250
Excess of exports	25,254,507	64,081,528	62,683,285
Seven mos. end'g Jan.			
Imports—Free of duty.	297,780,624	314,245,533	366,490,425
Dutiable	328,133,889	381,479,108	443,239,782
Total	625,914,513	695,724,641	809,730,207
Exports—Domestic	887,293,199	1,041,754,453	1,115,515,684
Foreign	13,896,827	14,870,372	14,147,272
Total	901,190,026	1,056,624,825	1,129,662,956
Excess of exports	275,275,513	360,900,184	319,932,749

The exports in January, 1907, aggregated $189,260,250, a decrease of only six-tenths of 1 per cent. from December, 1906, and a gain of 10 per cent. over January, 1906. Compared with January, 1905, a gain of 53 per cent. is shown. The record month in exports was December, 1905, when they aggregated $199,738,520, and from this aggregate the January total shows a decline of only 5.2 per cent. Imports for the month of January aggregated $126,576,965, a decrease of 5 per cent. from December, 1906, but a gain of 18.7 per cent. over January, 1906, and of 28.6 per cent. over January, 1905. For the seven months' period the exports of merchandise aggregated $1,129,662,956, a gain of 6.9 per cent. over the same period of 1905-06, while imports aggregated $809,730,207, a gain over the same period of 1905-06 of 16.4 per cent. Compared with the same period two years ago, the gain in exports is 25 per cent. and in imports 30 per cent. The excess of exports over imports for the seven months is $319,932,749, as against $360,900,184 in the same period of the preceding year, this reflecting the relatively larger increase of late in the imports.

Much interest has been exhibited in the news which came out at the end of last week that bonds of the New York, New Haven & Hartford Railroad Company to the amount of about $30,000,000 had been successfully negotiated in the Paris market. According to published accounts, the new issue consists of 4 per cent. debentures due in fifteen years, and the price at which they will be offered for public subscription by French and other foreign investors is to be in the neighborhood of 98. There is, of course, a bankers' commission to be taken into account, but the impression remains, after considering the rather meager accounts of the transaction which have thus far come to hand, that the New Haven management has, on the whole, done better by applying to the French market than it could if it had depended upon an issue of short-time notes or had it, under present conditions, attempted to sell the bonds in question in the American market. It is duly noted that this development seems to indicate that the alleged suspicions, not to say unfavorable attitude, of the foreign markets toward American securities at large has been unduly exaggerated. Besides this, it would seem to show that the difficulties which the laws of France put in the way of the admission of foreign railroad and other securities to a quotation on the Paris Bourse are not insuperable, as was shown in connection with the $50,000,000 of Pennsylvania Railroad bonds placed in the French market during the later portion of last year, which at that time was heralded as being the commencement of a decided demand for prime American railroad securities on the part of continental European investors.

It has become almost an axiom in Wall street that the borrowing capacity of the Pennsylvania Railroad and its affiliated lines has no limit. This idea would apparently receive further confirmation from the announcement which was made a few days ago that the corporation in question had negotiated an issue of $60,000,000 of three-year 5 per cent. notes, the securities being taken by the New York banking house which has in several recent instances acted for the company, it being also understood that while most of the amount is to be placed at home, European interests, nevertheless, have a share in the transaction. It is stated that the notes are to be secured by car-trust obligations, water-supply bonds and other satisfactory collateral, and that $50,000,000 of the amount is to be used to retire the notes of the Pennsylvania Company (the western part of the Pennsylvania system), guaranteed by the parent company, which mature next November. It is also understood that payment for the obligations will not be made until midsummer, the explanation being that while the bulk of the money involved will not be needed until then, it is considered desirable by banking interests connected with the matter to carry it through at that time rather than to wait until the autumn, when it might occasion disturbance in the money market. Accompanying these announcements is the additional statement that the amount in excess of the funds needed for the retirement of Pennsylvania Company notes will be expended upon the work now going on upon the Pennsylvania's New York City terminal, and that this will render it unnecessary to use for such purposes any of the new stock or bonds, the issue of which is to be authorized at the stockholders' meeting on March 12. It might also be mentioned that the present management of the Pennsylvania is disposed to modify its policy in regard to further expenditures for improvements. Work of that kind which was planned under Mr. Cassatt's presidency has, in the main, been completed, with the exception of the New York tunnels and terminal, and it is not intended to enter into any further plans of that kind until financial conditions develop further.

The report of the Comptroller of the Currency on the condition of the national banks of the United States as of January 26, 1907, makes possible the following comparisons, three figures being omitted:

	Jan. 26, 1907	*Nov.* 12, 1906	*Jan.* 29, 1906
Loans and discounts	$4,463,267	$4,366,045	$4,071,041
Bonds, securities, etc.	659,524	665,960	652,443
Specie	521,722	482,276	492,568
Legal tenders	173,780	152,273	175,734
Total cash	695,502	634,549	668,303
Due other national banks	900,574	839,065	825,732
Due state banks	396,632	379,757	364,221
Due trust companies, etc.	341,254	337,113	368,223
Individual deposits	4,115,650	4,289,773	4,088,420
United States deposits	145,891	129,193	52,207

The number of banks contributing to this showing is 6,288, as against 6,199 on November 12, 1906, and 5,911 on January 29, 1906. The percentage of legal reserve is 21.53, as against 20.80 on November 12 and 21.82 on January 29, 1906, while the cash redemption funds aggregate 26.87 per cent. of the deposits, as against 25.48 on November 12 and 27 per cent. on January 29, 1906. The changes in the leading items from the two earlier periods mentioned are shown in the following table:

	Jan. 26, 1907, *compared with Nov.* 12, 1906	
Loans and discounts	Inc.	$97,222,000
Specie	Inc.	39,446,000
Legal tenders	Inc.	21,507,000
Total cash	Inc.	60,953,000
Due other national banks	Inc.	61,509,000
Due state banks and bankers	Inc.	16,875,000
Due trust companies and savings banks	Inc.	4,141,000
Individual deposits	Dec.	174,123,000
	Jan. 26, 1907, *compared with Jan.* 29, 1906	
Loans and discounts	Inc.	$392,226,000
Specie	Inc.	29,154,000
Legal tenders	Dec.	1,954,000
Total cash	Inc.	27,200,000
Due other national banks	Inc.	74,842,000
Due state banks and bankers	Inc.	32,411,000
Due trust companies and savings banks	Dec.	26,969,000
Individual deposits	Inc.	27,230,000

Three interesting items in this showing compare as follows with the January statement for a series of years:

	Loans	*Cash*	*Individual deposits*
1907	$4,463,267,629	$695,502,000	$4,115,650,294
1906	4,071,041,165	668,303,289	4,088,420,136
1905	3,728,165,086	669,971,553	3,612,499,508
1904	3,469,195,044	614,626,152	3,300,619,898
1903	3,350,897,744	579,598,719	3,159,534,591
1902	3,128,627,094	561,764,854	2,982,489,201
1901	2,814,388,346	552,342,476	2,753,969,722
1900	2,481,579,945	476,544,317	2,481,847,036
1899	2,299,041,947	508,986,560	2,232,193,157
1898	2,138,078,280	440,893,111	1,982,660,933
1897	1,886,282,264	420,281,715	1,669,219,961
1896	1,951,344,781	337,361,833	1,648,092,869
1895	1,951,846,832	374,644,695	1,667,843,286
1894	1,858,763,803	414,135,407	1,586,800,444

RECENT LEGAL DECISIONS.

[*Prepared for* BRADSTREET'S.]

Tug—Signals—Fog—Duty.

The United States Circuit Court of Appeals for the Fifth Circuit held, in the case of Quinette vs. Bisso, that a tug did not discharge its full duty to small craft which might be in its way in a river by giving fog signals when proceeding in a fog so dense that they could be seen only a few feet away.

Limitations—Exceptions—Equity.

The United States Circuit Court of Appeals for the Fourth Circuit held, in the case of Patterson vs. Safe Deposit & Trust Company of Baltimore, that while the exceptions in a statute of limitations may be enlarged to include cases within their equity although not within their strict letter, such action should be taken with great caution and only in cases where the plaintiff has proceeded with due diligence and is not chargeable with laches.

Partnership—Settlement—Action.

The Supreme Court of Louisiana held, in the case of Stark, Adm'r, vs. Howcott et al., that where an action is plainly for the settlement of a partnership and for a division of profits, a prayer for general relief will authorize a decree for any balance that may be found due the plaintiff on a statement of accounts; that in the absence of express agreement, each partner is bound for his full share of the losses as shown by a general settlement of accounts, and that the number of transactions involved or the assignment of one partner's right to profits in particular cannot change the rule.

Federal Question—State Courts.

The Appellate Division of the New York Supreme Court held, in the case of Grant vs. Cananca Consolidated Copper Company, that where a federal question is raised the inferior and intermediate courts of a state are bound to follow the decisions of the Supreme Court of the United States, even if they are in direct opposition to decisions of the highest court of the state which otherwise would be controlling. The court further held that the courts of the state of New York have no jurisdiction in personam of a foreign corporation that does no business and has no office in that state, and has appointed no agent for the state of New York upon whom service of process may be made.

Carrier's Liability—Free Transportation.

The Supreme Court of Indiana held, in the case of The Indianapolis Traction & Terminal Company vs. Klentschy, that where a street railway company donated a free trolley ride to the members of a society visiting the city, furnished special cars for the conveyance of persons invited by a committee of the society, and operated the cars in charge of its own conductors and motormen, it bore the relation of carrier and passengers toward the members of such society who accepted such invitation, although they were carried gratuitously, and that where a passenger is carried gratuitously as a mere favor by a common carrier without any contract relieving the carrier from liability, the latter is liable for injuries inflicted by the negligence of its servant.

Broker—Sale—Commissions—Whiskey.

In the case of Jones et al. vs. Moore et al., which was an action by a broker to recover commissions for the sale of whiskey which he alleged he effected, the Kentucky Court of Appeals held erroneous an instruction requiring, as a condition precedent to the finding a verdict for him, that the jury should believe from the evidence that there was an express promise to pay the usual compensation for such services; that as a matter of law, if the fact were that his services were requested and a sale resulted from his bringing the parties together, there was an implied promise on the part of the defendant to pay for the services, and that the jury should further have been instructed that where one was employed as a broker to sell whiskey and he found a purchaser, he could not be deprived of his commissions by the defendant's negotiating a trade himself.

Fire Insurance—Appraisal—Waiver.

The Supreme Court of Indiana held, in the case of The Providence Washington Insurance Company vs. Wolf, that where a fire-insurance company, having sent its adjuster to estimate the loss on a stock of goods that were partly burned and agreed on the extent of the total loss, and finding that he and the owner were unable to agree as to the partial loss, arranged with the owner for an appraisal thereof to be made on January 29 following by two appraisers, and with knowledge that the goods were worth $12,800, and were wet, frozen and damaged, and that the owner held a total of only $9,500 insurance, of which it carried only $1,000, delayed in proceeding with the appraisement until January 28, and then failed to answer a telegram from the owner asking when its appraiser would come, it must be deemed to have waived the conditions in the policy requiring proofs of loss and an appraisement, and to have consented that the damaged goods be sold without appraisement. The court said that in such a case neither party would be permitted, by negligently or willfully postponing the appraisal, to unreasonably delay the adjustment of the controversy, a provision for adjustment and payment of the loss within sixty days not giving the insurer an absolute right to postpone the appraisal for sixty days after an appraisement has been agreed on.

Married Woman—Homestead—Certificate.

The Kentucky Court of Appeals held, in the case of Long et al. vs. Branham, that under section 3760 of the Kentucky statues the certificate of an officer to the acknowledgment of a mortgage on a homestead by a married woman cannot be collaterally impeached in an action to enforce the mortgage except on an allegation of fraud in the party benefited, or a mistake on the part of the officer, unless in a direct proceeding against such officer or his sureties, and that a certificate of an officer to a mortgage of a homestead, that it was "acknowledged by G. W. Long to be his act and deed for the purposes therein named and acknowledged, dower relinquished by Elzada Long separate and apart from her husband to be her act and deed for the purposes therein named," was sufficient to bind the wife's dower and homestead interest in the land.

Collision—Negligence—Runaway Horse.

The Louisiana Supreme Court held, in the case of Damonte vs. Patton, that it is negligence for the driver of a horse and cart to abandon his seat and hold on the reins and to go chasing his hat in the street without fastening or otherwise securing the animal; that where a horse thus left standing runs away the owner will be held responsible for injury inflicted by the runaway's collision with a third person without contributory fault. In the case before the court, it appeared that a runaway horse hitched to a cart without lights on a dark and rainy night dashed along the track of a street railway and collided with an electric car coming from the opposite direction, with the result that the motorman was knocked off and injured. It appearing from the evidence that the motorman could not avoid the collision, the court held the owner of the runaway horse liable, and further ruled that where, in such a case, the motorman was running his car on schedule time, he was not chargeable with negligence for not anticipating and being prepared for the unexpected and improbable appearance on the track of a runaway horse at large through the negligence of his driver and in contravention of police ordinances.

Stock—Sale—Gambling Contract.

In the case of Dryden, Adm'r, vs. Zell et al., recently decided by the Maryland Court of Appeals, it appeared that stock was purchased for a customer by licensed stockbrokers, paid for by the brokers and carried for the account of the customer, but not paid for by him. The stock declined in price and suit was brought by the stockbrokers. A judgment was recovered by them for the difference between the purchase price with interest less dividends received with interest and the present market price of the stock. The defendant contended that the contract was a gaming or wagering one and was therefore void. The Court of Appeals held that the burden of proof was on the defendant to offer evidence legally sufficient to prove that it was a gambling contract within the rule stated in the previously decided case of Billingslea vs. Smith (77 Md.), namely, that where the contract is that in case of a decline in the market price of the stock, the purchaser is to pay the difference between the contract price and the market price, and there is no intention that he shall receive and pay for the stock, itself, the dealing is a gambling contract and the law does not permit an action to be maintained upon it. In the absence of this evidence the court held that the judgment should be affirmed.

BUSINESS NOTES.

The Potato Crop.

Our potato crop is worth $150,000,000 and is increasing. The progress of food production in modern times is shown in no way more clearly than in the use which European and American peoples have made of the potato. The three great classes of food for western people are cereals, root crops and meats. The potato belongs to the second of these. Only in recent centuries has it become incorporated into the farming systems of Europe. The people who develop this crop most fully are the Germans. According to recent figures, it is shown that Germany has a larger percentage of land under potato cultivation than any other nation in Europe. There are 64.3 acres to every 10,000 inhabitants, against 44.8 in Austria and 39.4 in France. There has been a great tendency to increase this crop as its uses have enlarged. The chief use for manufacturing is distilling. There are 96,000 potato distilleries in operation in the German empire, 4,000 of which represent the chief activity of the farms on which they are located, and 2,000 distilleries play a secondary rôle.

Coal and Gas Consumption in Large Cities.

The consumption of coal and gas in the larger cities of the United States is compared in a recent issue of the *Stevens Indicator*, which shows New York to lead with an annual consumption of 12,500,000 tons of coal, while Chicago, as one might naturally expect, is second with 8,245,000 tons. As to gas, New York (Manhattan and the Bronx) consumes 21,000,000,000 cubic feet, and Chicago 12,000,000,000. The per capita consumption for six cities is stated as follows:

	Population	*Coal, net tons*	*Gas, cubic ft.*
New York	4,014,000	3.12	8,800
Chicago	2,020,000	4.00	5,940
St. Louis	714,600	7.55	5,600
Boston	602,500	6.70	5,120
Cleveland	465,500	5.43	3,230
Cincinnati	425,000	8.20	5,180
Average	1,374,000	4.42	7,017

Of the total coal burned in these six cities, aggregating 36,428,000 tons, no less than 23,588,000 was bituminous, while the anthracite amounted to 12,840,000 tons (2,000 pounds each). The anthracite percentage was about 35. In the several cities the anthracite percentages were as follows: New York, 72; Chicago, 17; St. Louis, 3; Boston, 45; Cleveland, 13; Cincinnati, 1. Compared with the bituminous tonnage used in New York, 3,500,000 tons, Cincinnati used almost identically the same, St. Louis 50 per cent. more, and Chicago 95 per cent. more.

British Trade in Gold and Silver.

The following statement, showing the imports and exports of gold and silver into and from the United Kingdom, from and to the several countries named, for the calendar year 1906, has been compiled from British official returns:

	Gold		*Silver*	
	Imports	*Exports*	*Imports*	*Exports*
United States	$346,100	$59,057,900	$72,466,600	$1,500
British S. Africa	125,135,900	268,100	352,900	40,900
British India	15,708,300	22,781,100	800	73,308,300
France	16,544,800	22,490,600	2,058,600	6,286,100
Australasia	34,246,100	....	605,900	1,248,800
Egypt	2,364,600	30,585,900	216,200	936,400
Argentina, Uruguay and Paraguay	2,676,600	20,857,300	9,800	2,500
Brazil	1,796,800	13,638,400	1,400	358,700
All other South America	936,900	3,408,600	1,112,000	320,300
Germany	8,704,800	1,614,000	1,953,900	1,572,400
West Africa	3,876,800	240,900	241,400	2,612,100
Belgium	1,957,800	2,616,500	341,700	143,100
Netherlands	3,965,800	368,900	311,500	72,700
Central America and W. Indies	1,955,800	....	310,100	667,300
Ceylon	1,183,100	....	857,100	319,700
China and Hong-Kong	....	....	1,582,100	2,112,100
Mexico	....	....	1,190,000	....
Russia	....	8,247,800	....	537,900
Sweden	300	700,900	700	92,400
Canada	600	2,000,200	7,800	601,000
All others	2,665,200	8,519,600	511,000	573,800
Total	224,066,300	207,397,100	84,132,500	91,868,000

Iron District of the Future.

"The Lake Superior district, at present the leading American producer, has been explored more thoroughly than any other ore field in the United States, but estimates as to total tonnage range within rather wide limits," says E. C. Eckel in the *Engineering Magazine*. "At present the totals commonly quoted vary from 1,500,000,000 to 2,000,000,000 tons, of which the United States Steel Corporation is commonly supposed to control over three-fourths. This supply is being drawn on to meet a constantly increasing annual demand, and it is conceded that before 1915 the district will probably be called upon to ship over 50,000,000 tons of ore a year. It is obvious that at such a rate the Lake Superior ores can hardly be expected to last beyond the year 1950; and it is equally obvious that long before that date the value of good workable deposits of iron ore, both there and elsewhere in the United States, will have increased immensely. During the past year ore lands in the lake district have been sold at a valuation of $1 per ton of ore in the ground, though the average valuation is still, of course, considerably below that price. With regard to the southern iron ores the case is very different. Here the work which the Geological Survey has carried on during the past three years, and which was planned so as to obtain data on the quantity of ore available, gives us a fairly secure basis for tonnage estimates. The following figures (in tons) are submitted as representing minimum values for the workable iron-ore reserves of certain southern states, with the caution that further exploratory work in the south will probably increase rather than decrease these estimates:

	Red ore	*Brown ore*
Alabama	1,000,000,000	75,000,000
Georgia	200,000,000	125,000,000
Tennessee	600,000,000	225,000,000
Virginia	50,000,000	300,000,000
Total	1,850,000,000	725,000,000

"This gives a total estimated reserve for the red and brown ores of the four states noted of 2,575,000,000 tons. If to this we add the ores occurring at deeper levels in the states named, the red and brown ores of Maryland, West Virginia and Kentucky, and the magnetic ores of the other southern states, it is probably fair to assume that the total American ore reserve will amount to very nearly 10,000,000,000 tons—or five times that credited to the Lake Superior district."

Connellsville Coke Production.

The following tabulated statement, taken from the Connellsville *Courier*, shows the total number of ovens in the Connellsville and lower regions at the close of each year, the annual output, average price and gross revenue from 1880 to 1906, inclusive:

	Total ovens	*Tons shipped*	*Average price*	*Gross revenue*
1880	7,211	2,205,945	$1.79	$3,948,643
1881	8,208	2,639,002	1 63	4,301,573
1882	9,283	3,043,394	1.47	4,473,889
1883	10,176	3,552,402	1.14	4,049,738
1884	10,543	3,192,105	1.13	3,607,078
1885	10,471	3,096,012	1.22	3,777,134
1886	10,952	4,180,521	1.36	5,701,086
1887	11,923	4,146,989	1.79	7,437,659
1888	13,975	4,955,553	1.19	5,884,081
1889	14,458	5,033,428	1.34	7,074,663
1890	16,020	6,464,156	1.94	12,537,370
1891	17,204	4,760,665	1.87	8,903,454
1892	17,256	6,320,452	1.83	11,598,407
1893	17,513	4,805,623	1.49	7,141,031
1894	17,834	5,454,451	1.00	5,454,451
1895	17,947	8,244,438	1.23	10,140,658
1896	18,351	5,411,602	1.90	10,282,043
1897	18,628	6,915,052	1.65	11,409,835
1898	18,643	8,460,112	1.55	13,113,179
1899	19,689	10,129,764	2.00	20,259,528
1900	20,954	10,166,234	2.70	27,448,832
1901	21,575	12,603,949	1.95	24,589,400
1902	26,329	14,138,740	2.37	33,508,714
1903	28,092	13,243,230	3.00	40,035,966
1904	29,119	12,427,468	1.75	21,748,069
1905	30,842	17,896,525	2.26	40,446,149
1906	34,059	19,999,326	2.75	54,998,146

Automobiles, Bicycles and Tricycles.

In bulletin 66 the Census Bureau states that at the census of 1900 the manufacture of automobiles in the United States was an industry so unimportant that it was not reported separately, being included under "carriages and wagons." The total value of automobiles and parts turned out in the census year was only $4,748,011. At the census of 1905, which covered the calendar year 1904, the output reached a value of $26,645,064, an increase since 1900 of 461.1 per cent. In 1900 the number of automobiles turned out by regular manufacturers was 3,723. At the census of 1905 the total output was 22,830. Of the 21,692 machines turned out by automobile factories, 18,699, or 86.2 per cent., were propelled by gasolene; 1,568, or 7.2 per cent., by steam, and 1,425, or 6 6 per cent., by electricity. The 1905 census of the manufacture of bicycles and tricycles disclosed great decreases since 1900. The number of factories declined from 312 to 101; the capital invested, from $29,783,659 to $5,883,458; the number of wage earners, from 17,525 to 3,319, and the value of products, from $31,915,908 to $5,153,240. The number of chain bicycles turned out declined from 1,136,122 in 1900 to 246,304 at the census of 1905; chainless, from 42,929 to 4,077, and tricycles, from 26,110 to 4,063. The tricycles were almost entirely children's toys. Motor cycles increased from 159 to 2,436. At the census of 1905 there were twenty-eight establishments making motor cycles.

CURRENT BUSINESS NEWS.

Commercial.

Governor Glenn, of North Carolina, stated in a recent address: "We now have in North Carolina 3,000,000 people, when we had only 900,000 thirty-six years ago. Our wealth has increased from $260,000,000 to $1,000,000,000; our debt has been reduced from $40,000,000 to absolutely nothing. We have $10,000,000 assets with which to meet outstanding obligations of $5,000,000. Five years ago North Carolina stood third in cotton manufacturing in the United States; now we stand second, and two years from now we shall be first."

The British War Office is taking steps to ascertain the possibility of obtaining for the army larger supplies of canned meats from Australia and New Zealand, so that the contract with the American packers may be reduced in the near future. A special officer has been dispatched to Australia and New Zealand to report on the methods of the packing houses and the capacity of those colonies to furnish increased quantities of canned meats.

The secretary of the London Public Health Committee says that the total amount of foodstuffs that reach that city yearly is between 2,500,000 and 3,000,000 tons, of which rather more than two-thirds arrives by water and less than one-third by rail. Three-fifths of the whole quantity is consumed by the Londoners, the remainder merely passing through in the course of transit elsewhere. The shipments include 1,000,000 tons of meat, fish, milk, butter, eggs, lard, etc.; 500,000 tons of fruit and vegetables, including sugar and preserved fruits, and 1,400,000 tons of grain and flour. It is pointed out in the committee's report that the system of inspection is inefficient and that oleomargarine is largely sold as butter.

Official returns as to the amount of live stock in New South Wales show that there are 451,570 horses, 2,274,386 cattle and 42,722,320 sheep. As the season is exceedingly favorable, a further big increase is anticipated in 1908.

Consul A. A. Winslow transmits to the Department of Commerce a copy of the law for the reconstruction of the city of Valparaiso, which was well received, notwithstanding it contains nothing relative to the free entry of building materials during the reconstruction period. The consul points out, however, that it furnishes a good opportunity for the sale of American building supplies.

Writing of canned goods in Japan, Consul Hunter Sharpe, of Kobe, says that heavy stocks of foreign canned goods were left over at the close of the Russo-Japanese war, and that the market is still overstocked. He adds that only $7,424 worth of American canned goods were imported during the first six months of 1906, or $184,903 less than were imported during a corresponding period of 1905. The Japanese are increasing their canning factories, while the consumption of foreign canned goods is limited to the foreign population and a small percentage of Japanese.

These words summarize foreign crop conditions as reported by Broomhall Tuesday last: United Kingdom—Occasional complaints; otherwise favorable. France—Reports less optimistic, nothing definite; supplies sufficient; holders very firm. Germany—Favorable outlook; supplies larger. Roumania, Hungary, Bulgaria—Good snow covering. Russia—Crop-damage reports southwest unconfirmed; elsewhere outlook favorable; no arrivals at ports; stocks decreasing; millers in interior are buying Roumanian grain. Advices received from Odessa via Berlin state that the government has issued notice that all requirements are covered up to April 30. Spain—Some complaints, but outlook favorable. North Africa—Some complaints of excessive rains.

Principally on account of a famine in Russia, there have within the last few days been remarkably heavy engagements of wheat for export. Last week sales on this account aggregated more than 2,000,000 bushels. On Monday 480,000 bushels were engaged, and Tuesday's business is said to have reached a total of 840,000 bushels. Most of the wheat sold is durum. Almost all of this wheat was taken for Russia and will be shipped to Hamburg and there shifted. Shippers have made arrangements for the transportation of the bulk of the purchases, but since much of the wheat is in the interior, a great deal of it will not be moved until the ice goes out of interior waterways.

Cotton and its products brought practically $500,000,000 into the United States from foreign countries in the year just ended. The value of cotton, raw and manufactured, and its products in various forms exported during the year aggregated $489,304,681, and thus formed more than one-fourth of the total exports of the country in the year of its greatest export record. The table which follows shows the value of cotton and its products exported in the calendar years 1896 and 1906:

	1896	1906
Cotton unmanufactured	$233,412,777	$413,137,936
Cotton manufactures	19,840,609	42,961,048
Cotton-seed oil	5,735,912	13,693,131
Cotton-seed oil cake and meal	4,873,905	14,165,268
Cotton seed	205,032	245,930
Cottolene, lardine, etc., chiefly from cotton-seed oil	....	4,801,078
Total	264,068,235	489,304,681

Lloyd Griscom, formerly ambassador to Brazil, but now accredited to Italy, says: "There is a big field for American capital in Brazil, and a great lot of American capital is already invested there. Americans have acquired the Sao Paulo & Rio Grande Railway, which is going to be one of the most important in Brazil. Americans have also secured a contract to construct port works at Rio Grande do Sul and Para. The latter port is going to have immense effect in developing American trade in that district. These and other American enterprises mean the employment of American engineers and industrial skill, as well as money, all of which will bring us in closer contact with the country. American and Canadian interests recently acquired all the public utilities in Rio de Janeiro and Sao Paulo, including telephones, tramways, electric power and lighting. They have already spent $25,000,000 and are going to spend $10,000,000 more on these services."

The cotton crops of Egypt since 1897 have been as follows (interior gross weights):

	Cantars	*In pounds*
1897-98	6,543,128	654,312,800
1898-99	5,589,314	558,931,400
1899-1900	6,510,050	651,005,500
1900-01	5,427,338	542,733,800
1901-02	6,371,643	637,164,300
1902-03	5,839,090	583,809,000
1903-04	6,589,047	658,894,700
1904-05	6,351,879	635,187,900
1905-06	5,959,883	595,988,300
1906-07 (approximate)	6,750,000	675,000,000

Statements have been given out by the coastwise steamship companies operating from New York that their freight traffic in 1906 was 25 per cent. greater than in 1905, with equally bright prospects for 1907. The net tonnage of such vessels at the port last year was 5,589,090 entered and 6,102,974 tons cleared. The permanent carrying capacity of the lines show an estimated increase equal to that in freight. The companies have enlarged their rail connections at terminals which enable them to issue through bills of lading to inland points, a matter of great advantage to the public as well as to the steamship companies.

Financial.

The commissioner of banking and insurance, in his annual report, shows that the aggregate resources of the New Jersey financial institutions are nearly half a billion dollars, and deposits are more than a third of a billion; that New Jersey has 262 financial institutions, including national banks, with resources of $490,996,758 and deposits of $366,099,078. There are sixty-eight trust companies, with resources of $181,784,406 and deposits of $136,868,109; twenty-five savings banks, with resources of $100,780,740; deposits, $927,696,777; and seventeen state banks, with resources of $16,409,811; deposits, $12,820,538. The resources have increased 8 per cent., or $22,355,028. The deposits have increased 9 per cent., or $21,157,015.

At the annual meeting of the board of directors of the Mississippi Valley Trust Company, held February 12, the officers were reëlected as follows: Julius S. Walsh, chairman; Breckinridge Jones, president; John D. Davis and Samuel E. Hoffman, vice-presidents; James E. Brock secretary; Hugh R. Lyle, Henry C. Ibbotson and C. Hunt Turner, Jr., assistant secretaries; Frederick Vierling, trust officer; Henry Semple Ames and Charles M. Polk, assistant trust officers; William G Lackey, bond officer; William McC. Martin, assistant bond officer; Tom W. Bennett, real-estate officer; Charles W. Morath, safe-deposit officer; Breckinridge Jones, counsel, and Henry Semple Ames, assistant executive officer. The old members of the executive committee were reëlected, and two new members added, as follows: Murray Carleton, Charles Clark, John D. Davis, David R. Francis, August Gehner, Samuel E. Hoffman, Breckinridge Jones, William D. Orthwein and Julius S. Walsh. Mr. Carleton and Mr. Orthwein are the new members, in accordance with a vote of the stockholders at the annual meeting February 4, to increase the committee from seven to nine members. The board elected as a new director W. J. McBride, to fill a vacancy caused by the death of George H. Goddard.

The following tables show our imports and exports of gold during the past three calendar years:

Imports from	1906	1905	1904
France	$17,198,791	$4,285,093	$4,783,890
Germany	4,889,434	....	11,287

Japan	5,345,112	1,664,470	4,134,319
All other countries	3,700	255,250	253,536
Total	46,709,158	46,794,467	121,211,827

The total of imports, $155,579,000, is the second largest in the history of the country, the record movement having occurred in 1898, when the total was $158,163,000. Exports were little more than normal, while the aggregate movement, amounting to $202,288,000, was, like the showing of imports, the second largest on record, having been exceeded in 1904, when the gold export and import movement aggregated $206,113,000.

It is said that the policy of the Republic Iron & Steel Company, while it will make expenditures for betterments and extensions, is to begin the payment of dividends on the common stock for the first quarter of the new fiscal year, which begins July 1. The rate will probably be 4 per cent. In 1906 the company paid 8 per cent. of the deferred dividends on the preferred issue. The company is still 2 per cent in arrears of its cumulative preferred dividends. This will be paid off in April.

The London Stock Exchange has granted an official quotation to Southern Pacific Railroad Company $3,990,000 additional refunding mortgage 4 per cent. gold bonds of 1935, Ingersoll-Rand Company $3,000,000 common stock in shares of $100 each, $4,500,000 6 per cent. cumulative preferred stock in shares of $100 each, and $2,000,000 5 per cent. first mortgage bonds for $1,000 each, and to Canadian Northern Railway Company further issue of £102,750 4 per cent. perpetual consolidated debenture stock.

The Astor National Bank has become a trust company and has consolidated with the New Netherlands Company. The capital stock of the new institution is to be $1,250,000, the entire capital stock being taken by the consolidated interests and interests connected with the Bankers' Trust Company.

Vice-President Frank A. Vanderlip, of the National City Bank, is quoted in a Chicago dispatch as having said: "Money will be firm all the year; by firm I mean from 5 to 5½ per cent. The current demand forecasts the future. Business, actual and prospective, is too superlative to think of having cheap rates."

These index numbers, taken from the London *Economist*, represent the trend of British commodity prices over a period:

End of	*Index No.*	*End of*	*Index No.*
January, 1907	2494	December, 1905	2342
December, 1906	2499	September, 1905	2219
November, 1906	2501	June, 1905	2163
October, 1906	2458	March, 1905	2153
September, 1906	2355	December, 1904	2136
August, 1906	2341	June, 1904	2130
July, 1906	2329	December, 1903	2197
June, 1906	2362	December, 1902	2003
March, 1906	2306		

Net profits of the Bank of France in 1906 were 35,063,642 francs, compared with 25,448,182 francs in 1905. The dividend was 150 francs in 1906, as against 130 francs in 1905. The average note circulation was 4,638,000,000 francs, and the largest at any time 5,026,000,000 francs.

Additional preferred stock of the National Lead Company to the amount of $3,750,000 has been admitted to quotation in the unlisted department of the New York Stock Exchange. This, it is said, is the purchase price agreed upon for the Magnus Metal Company, acquired by the Guggenheims in the interest of the National Lead Company.

The stockholders of the Irving National Bank and the New York National Exchange Bank approved Tuesday the consolidation of the two as the Irving National Exchange Bank. The new bank will occupy the premises of the New York National Exchange Bank on the southwest corner

Wm. A. Read & Co.

INVESTMENT SECURITIES

BOSTON CHICAGO BALTIMORE

of West Broadway and Chambers street. The capital will be $2,000,000, surplus $1,000,000, and total resources will exceed $24,000,000. The officers will be Lewis E. Pierson, president; James E. Nichols, Charles L. Farrell and Rollin P. Grant, vice-presidents; Benj. F. Werner, cashier, and David H. G. Penny, assistant cashier. The directors, consisting of the combined boards of the two companies, will be Robert B. Armstrong, William H. Barnard, M. M. Belding, Jr., William C. Breed, Warren Cruikshank, James M. Donald, Charles L. Farrell, William Halls, Jr., Charles R. Hannan, Lee Kohns, John G. Luke, Gerrish H. Milliken, Daniel P. Morse, James E. Nichols, Lewis E. Pierson, William J. Rogers, Edwin H. Sayre, John H. Seed, William A. Tilden, Gustav Vintschger, Theodore F. Whitmarsh, Daniel W. Whitmore and Frank W. Woolworth.

Railroads.

According to a report by Consul E. N. Gunsaulus, of Rimouski, British North America had only fifty-five miles of railroad in 1850, and in 1906 not less than 22,000 miles, with construction proceeding at so rapid a rate as to warrant the belief that Canada is soon to be covered with a complete network of railroads in all its parts. Last year fully $52,000,000 were expended in new roads, or in adding to old ones or appropriated for roads to be built. Practically every line in the country is adding to its mileage and to its general equipment, particularly rolling stock.

It is said that the Chicago, Milwaukee & St. Paul Railroad is following the policy for the present year which a number of other large roads, including the New York Central, have adopted. It will curtail its expenses for improvements to the lowest possible point. In explanation of the cancellation by the company of $7,000,000 of projected improvements, an official is reported to have said: "On account of the high prices of labor and materials we will do no more than is necessary this year." All the company's available capital will be used for putting through the extension to the Pacific coast.

Industrial.

Secretary Taft has received the following dispatch from Chief Engineer Stevens, of the Isthmian Canal Commission, at Culebra: "February, with twenty-three working days, will probably show 600,000 yards of excavation in Culebra cut, and March will show 800,000 cubic yards excavation."

The amount of coal consumed for steaming purposes in coastwise and foreign trade of the United States for 1906 was 10,607,095 tons, and the average price was $3.08 against $3.21 for the year 1905. The total tonnage and value for two years is given below by coasts:

	Tons		*Value*	
Ports—	1906	1905	1906	1905
Atlantic	6,410,031	5,663,441	$19,433,391	$17,205,710
Gulf	701,678	637,601	2,515,343	2,279,459
Pacific	798,985	727,810	3,377,391	3,065,635
Great Lakes	2,703,401	2,570,507	7,297,974	8,302,738
Total	10,607,095	9,599,359	32,624,099	30,857,942

Over the last five years the United States Steel Corporation has paid in wages to employees nearly $620,000,000. This money has been disbursed among approximately 170,000 employees, that being about the average number per year employed by the corporation.

The H. C. Frick Coke Company has posted notices that beginning on March 1 the wages of all workers will be advanced 10 per cent. The wages paid the last year were the highest in the history of the coking industry. The increase will amount to more than $125,000 a month.

Miscellaneous.

The total immigration into the United States during January amounted to 54,417 persons, against 51,127 in January, 1906, or a net increase of 3,290. A decrease of 31,049 is shown in comparison with December. Japanese immigrants increased from 911 to 5,275, or nearly 480 per cent. Italian immigrants decreased 3,957.

Chicago's population has increased to 2,350,000, according to estimates of the city statistician. The city directory estimate for 1906 is 2,300,500. In 1900 the federal census gave Chicago a population of 1,698,575.
